Dear Ms. Jordan:

This is to advise you that the Bay Area Air Quality Management District is issuing an administrative amendment and is proposing a minor revision to the Major Facility Review Permit for Waste Management of Alameda County, Facility Number A2066, and is submitting the permit to EPA for review.

The administrative amendment will remove two diesel engines (S-191 and S-192) from the permit that have been permanently shut down and replaced with electric motors.

(Chair)
Michael Shimansky
Gayle B. Uilkema

The main purpose of the minor permit revision is to modify permit conditions for the S-140 and S-141 Aerated Biological Reactors, which are part of the wastewater treatment system for the Altamont Landfill. These condition revisions will allow Waste Management to demonstrate compliance with precursor organic compound (POC) emission limits in lieu of meeting wastewater throughput and VOC concentration limits. The proposed conditions retain the current wastewater testing frequency and record keeping requirements and add a POC emission calculation procedure. This revision is minor pursuant to BAAQMD Regulation 2-6-215.

These actions will not result in any emission increases. The administrative amendment and proposed minor revision will be effective immediately. The permit will be formally re-issued after EPA review. This revision is not subject to public comment and therefore, requires no public notice.
