The District proposed a significant permit revision for this facility on January 12, 2007. The main purpose of this significant revision was to establish an alternative wellhead oxygen standard for landfill gas collection wells at the S-1 Los Trancos Canyon Landfill. The District determined that an alternative oxygen standard of 15% O₂ by volume was appropriate, and proposed to add this limit, applicability criteria, monitoring and record keeping requirements, and other procedures to the permit. The proposed revisions did not result in any emission increases.
