What is Title V?

Title V is part of the 1990 amendments to the Clean Air Act, and requires all state and local governments to develop and implement operating permits for all major pollution emitting facilities. The EPA oversees these permit programs and the Air District is charged with implementing them in the Bay Area, in accordance with Federal guidelines.

Title V is intended to clarify the complex air quality permitting process by consolidating the multitude of federal, state, and local air pollution control regulations into one summary operating permit that covers all aspects of a facility's year-to-year air pollution activities. The Title V operating permit program is implemented under Air District Regulation 2, Rule 6. Public comment is important to the Title V process. A final decision will incorporate consideration of public comments on the proposal.
