

Section and Chapter Notes

Note	EC (Doc. NR0323E1 (RSC/26))	Japan (Doc. NR0335E1 (RSC/WG/1))	US	RSC / Other
Section XVI				
[New 1]		Unless otherwise required, apparatus which are, <i>prima facie</i> , classifiable under two or more headings are to be classified under the heading which occurs last in numerical order among the possible headings.		
[New 2]		For the purposes of heading 8A.AA, the expression "Media for the storage of electric signals" means an apparatus on which data has been stored via writer and which allow the stored data to output as electric signals via reader.		
[New 3]		For the purposes of heading 8B.BB, the expression "reading or writing electric signals" means an apparatus having the function of reading data stored on media as electric signals or writing electric data on media.		
[New 4]		For the purposes of headings 8B.BB to 8L.LL, the term "input" means to change external information (for example, coded data, sound, or image) into electric signals, and the term "output" means to change electric signals into such external information.		
[New 5]		<p>For the purposes of heading 8I.II, the expression "data processing machines for executing any external programs" means that the machines satisfies the following two criteria :</p> <p>(a) comprising, at least a central processing unit (CPU) and a main memory designed for storing programs or data necessary for the execution of the programs;</p>		

Annex I to Doc. NR0334E1
(RSC/WG/1/Feb. 2003)

Note	EC (Doc. NR0323E1 (RSC/26))	Japan (Doc. NR0335E1 (RSC/WG/1))	US	RSC / Other
		<p>(b) being designed for reading and executing external programs.</p> <p>* Such programs are usually read by BIOS (boot-strap loader) of the apparatus.</p>		
[New 6]		<p>For the purposes of headings 8J.JJ to 8L.LL, the expression “processing machines” means machines whose function is to process electric signals by its hardware and programs installed therein.</p> <p>They include machines capable of executing external programs as a part of the function.</p> <p>They are classified under appropriate headings respectively according to the types of contents represented by electric signals which they process.</p> <p>The expressions “sound processing” and “image processing” do not include such function as creating sound or image signals in fixed form from coded data.</p>		
[New 7]		<p>For the purposes of headings 8J.JJ to 8L.LL, the term “telecommunication” does not include such communication only for the household or precincts such as wireless LAN technology.</p>		
[New 8]		<p>For the purposes of headings 8J.JJ and 8L.LL, the expression “coded data” means letters, numbers, symbols or other data (or information) except sound or image.</p>

2	<p>Subject to Note 1 to this Section, Note 1 to Chapter 84 and Note 1 to Chapter 85, parts and accessories of machines (not being parts or accessories of the goods of heading 84.84, 85.45, 85.46, 85.47 or 85.56) are to be classified according to the following rules :</p> <p>(a) Parts and accessories which are goods included in any of the headings of Chapter 84 or 85 (other than headings 84.09, 84.31, 84.48, 84.66, 84.85, 85.03, 85.38, 85.48, 85.59 and 85.74) are, in all cases, to be classified in their respective headings;</p> <p>(b) Other parts and accessories, if suitable for use solely or principally with a particular kind of machine, or with a number of machines of the same heading (including a machine of heading 84.79, 85.43 or 85.73) are to be classified with the machines of that kind or in heading 84.09, 84.31, 84.48, 84.66, 85.03, 85.38, 85.59 or 85.74 as appropriate;</p> <p>(c) All other parts and accessories are to be classified in heading 84.09, 84.31, 84.48, 84.66, 85.03, 85.38, 85.59 or 85.74 as appropriate or, failing that, in heading 84.85 or 85.48.</p>		<p>[Subject to Note 1 to this Section, Note 1 to Chapter 84 and Note 1 to Chapter 85, parts of machines (not being parts of the articles of headings 84.84, 85.44, 85.45, 85.46 or 85.47) are to be classified according to the following rules :</p> <p>(a) Parts which are goods included in any of the headings of Chapter 84 or 85 (other than headings 84.09, 84.31, 84.48, 84.66, 84.73, 84.85, 85.03, 85.22, 85.29, 85.38 and 85.51) are in all cases to be classified in their respective headings;</p> <p>(b) Other parts, if suitable for use solely or principally with a particular kind of machine, or with a number of machines of the same heading (including a machine of heading 84.79 or 85.50) are to be classified with the machines of that kind or in heading 84.09, 84.31, 84.48, 84.66, 84.73, 85.03, 85.22, 85.29 or 85.38 as appropriate. However, parts which are equally suitable for use principally with the goods of headings 85.49 and 85.25 to 85.28 are to be classified in heading 85.49;</p> <p>(c) All other parts are to be classified in heading 84.09, 84.31, 84.48, 84.66, 84.73, 85.03, 85.22, 85.29 or 85.38 as appropriate or, failing that, in heading 84.85 or 85.51.]</p>	

Annex I to Doc. NR0334E1
(RSC/WG/1/Feb. 2003)

Note	EC (Doc. NR0323E1 (RSC/26))	Japan (Doc. NR0335E1 (RSC/WG/1))	US	RSC / Other
3	Unless the context otherwise requires, throughout Sections XVI, XVIII and XX, composite machines consisting of two or more machines fitted together to form a whole and other machines designed for the purpose of performing two or more complementary or alternative functions are to be classified as if consisting only of that component or as being that machine which performs the principal function.			
4	Where a machine (including a combination of machines) consists of individual components (whether separate or interconnected by piping, by transmission devices, by electric cables or by other devices) intended to contribute together to a clearly defined function covered by one of the headings in Sections XVI, XVIII and XX, then the whole falls to be classified in the heading appropriate to that function.			
5	For the purposes of these Notes, the expression "machine" means any machine, machinery, plant, equipment, apparatus, instrument, appliance, article or component (excluding parts and accessories) cited in the headings of Sections XVI, XVIII and XX.

7	[To be updated later]		(Doc. NR0332B3/F/20) [Delete “heading 85.48” and substitute “heading 85.51”.]	HSC/28 (Doc. NC0510B2, Annexes E and L/5) Renumbered as Note 6
8	For the purposes of heading 85.51, “passive circuit elements” are individual, discrete components which are indivisible and have a single passive electrical function (for example, inductances, resistors, capacitors and interconnections).			

Annex I to Doc. NR0334E1
(RSC/WG/1/Feb. 2003)

Note	EC (Doc. NR0323E1 (RSC/26))	Japan (Doc. NR0335E1 (RSC/WG/1))	US	RSC / Other
9	For the purposes of heading 85.52, "active circuit elements" are individual, discrete components which are indivisible and can produce, rectify, modulate or amplify an electrical signal (for example, diodes, transistors and similar semiconductor elements, the operation of which depends on variation in resistivity on the application of an electric field).			
10	<p>For the purposes of heading 85.53, "electronic integrated circuits" are :</p> <p>(a) Monolithic integrated circuits in which the circuit elements (diodes, transistors, resistors, capacitors, etc.) are created in the mass (essentially) and on the surface of a semiconductor or compound semiconductor material (doped silicon, gallium arsenide, silicon-germanium, for example) and are inseparably associated;</p> <p>(b) Hybrid integrated circuits in which passive elements (resistors, capacitors, inductances, etc.), obtained by thin- or thick-film technology, and active elements (diodes, transistors, monolithic integrated circuits, etc.), obtained by semiconductor technology, are combined to all intents and purposes indivisibly, by interconnections or interconnecting cables, on a single insulating substrate (glass, ceramic, etc.). These circuits may also include discrete components.</p>		(See Note 5 above)	

Note	EC (Doc. NR0323E1 (RSC/26))	Japan (Doc. NR0335E1 (RSC/WG/1))	US	RSC / Other
	<p>For the classification of the goods defined in this Note, heading 85.53 shall take precedence over any other heading in the Nomenclature, except in the case of headings 85.60 and 85.61, which might cover them by reference to, in particular, their function.</p>			
11	<p>For the purposes of heading 85.54, "printed circuits" are circuits obtained by forming on an insulating base, by any printing process (for example, embossing, plating-up, etching) or by the "film circuit" technique, conductor elements, contacts or other printed components (for example, inductances, resistors, capacitors) alone or interconnected according to a pre-established pattern, other than elements which can produce, rectify, modulate or amplify an electrical signal (for example, active circuit elements).</p> <p>The expression "printed circuits" does not cover circuits combined with elements other than those obtained during the printing process, nor does it cover individual, discrete resistors, capacitors or inductances. Printed circuits may, however, be fitted with non-printed connecting elements.</p> <p>Thin- or thick-film circuits comprising passive and active elements obtained during the same technological process are to be classified in heading 85.53.</p>			
12	<p>For the purposes of heading 85.55 :</p> <p>(a) "Arrays" are formed by the mounting of [one][two] or more circuit elements, which are not interconnected electrically, on a</p>			

Annex I to Doc. NR0334E1
(RSC/WG/1/Feb. 2003)

Note	EC (Doc. NR0323E1 (RSC/26))	Japan (Doc. NR0335E1 (RSC/WG/1))	US	RSC / Other
	<p>printed-circuit board/printed-wiring board;</p> <p>(b) "Printed-circuit assemblies" are formed by the separate mounting of one or more discrete components or integrated circuits on a printed-circuit board/printed-wiring board.</p> <p>The expression "printed-circuit assemblies" does not cover goods specified or included elsewhere in the Nomenclature.</p>			
13	<p>For the purposes of headings 85.62 to 85.73, classification depends on the function of the machine. Such machines are all capable of data processing.</p> <p>The term "function" means the operation which a machine is capable of carrying out on the basis of the hardware present in the machine.</p> <p>The term "data-processing" means any kind of data manipulation (management). The capture, recording, storage, reproduction, transmission or reception of data is considered as data-processing.</p> <p>Any software present shall only to be taken into account when it is embedded into the machine.</p>			
14	<p>The term "automatic data-processing machines" means machines capable of :</p> <p>(a) storing the processing program or programs and at least the data immediately necessary for the</p>			

Note	EC (Doc. NR0323E1 (RSC/26))	Japan (Doc. NR0335E1 (RSC/WG/1))	US	RSC / Other
	<p>execution of the program;</p> <p>(b) being freely programmable by the user (writing/creating any application in a programming language);</p> <p>(c) performing arithmetical computations specified by the user; and</p> <p>(d) executing, without human intervention, a processing program which requires them to modify their execution, by logical decision during the processing run.</p>			
15	<p>For the purposes of heading 85.73, “automatic data-processing” means an operation performed by the central processing unit of an automatic data-processing machine, i.e., automatic and systematic manipulation of formatted data in order to transform the semantic content into the intended information.</p> <p>The transformation of data into another format without changing the semantic content cannot be considered as data-processing.</p>			<p>ICC (Doc. NR0201E1)</p> <p><u>Automatic Data Processing (ADP) Machine</u> The expression “automatic data processing machine” is a synonym for the term “computer”. According to the American National Standard Dictionary of Information Technology (ANSDIT), a computer is a functional unit that can perform substantial computations, including numerous arithmetic operations and logic operations without human intervention.¹ A computer may consist of a stand-alone unit or several interconnected units in the form of a system. The term computer usually refers to a digital computer. Digital</p>

¹ A similar definition is found in the Grand Dictionnaire Encyclopédia Larousse : Ordinateur : Machine électronique de traitement numérique de l'information, obéissant à des programmes formés par des suites d'opérations arithmétiques et logiques, à des fins administratives, comptables, techniques, scientifiques, pédagogiques, industrielles ou personnelles. (Computer : Automatic data processing machine, which follows programs using successive arithmetic and logical operations, used for administrative, accounting, technical, scientific, educational, industrial or personal purposes.)

Note	EC (Doc. NR0323E1 (RSC/26))	Japan (Doc. NR0335E1 (RSC/WG/1))	US	RSC / Other
				<p>computer is defined as a computer that accepts, processes, or produces digital data.</p> <p><u>Freely Programmable</u> An ADP machine (a.k.a. computer) is freely programmable. The capability to be freely programmed means that computers are capable of being programmed by the user to perform a wide range of functions. It is up to the user to take advantage or not to take advantage of the full functionality.</p> <p>In other words, by virtue of the freely programmable characteristic, computers have a “generic” or “general function” to process all types of data including programmers’ code, numbers, text, audio, video, etc. Processing in the context of computers includes the ability to freely manipulate data (edit, compose and combine different types of data) and not simply reproduce it. As general-function machines, computers are capable of, and used for, a variety of applications including word processing, financial management, computer-aided design, behavioural simulation (e.g., reaction of designs to wind or material resistance), desktop publishing, games, and education. The only limitation in terms of applications is the ability of the user to translate his/her task into a form that can be processed by the computer.</p> <p><u>Data Processing</u> Data processing is defined by ANSDIT as the systematic performance of operations upon data; for example, arithmetic or logic operations upon data,</p>

Note	EC (Doc. NR0323E1 (RSC/26))	Japan (Doc. NR0335E1 (RSC/WG/1))	US	RSC / Other
				merging or sorting of data, assembling or compiling of programs, or operations on text, such as text editing, sorting, merging, storing, retrieving, displaying, or printing. Data processing is also an abridged term for automatic data processing, which is defined as : “Data processing performed by a computer system. Loosely, a synonym for data processing.” The expression “data processing” does not have the same meaning as the individual terms “data” and “processing” and thus, the terms should not be separated.
16	Throughout the Nomenclature, the term “data” means sound, images, text and, more generally, any conventional representation of information.			
Subheading Note 1	Subheading 8567.11 covers only cassette-players with built-in amplifier, without built-in loudspeaker, capable of operating without an external source of electric power and the dimensions of which do not exceed 170 mm x 100 mm x 45 mm.			
Subheading Note 2	[Deleted]			
Subheading Note 3	<p>For the purposes of subheading 8573.24, the term “Personal digital assistant” means portable, stand-alone, data-processing machines, incorporating a screen and keyboard, and generally of a weight of less than 250 g.</p> <p>These machines can be connected to an automatic data-processing machine and programmed in order to perform various functions, for example, word-processing, calculations and e-mails.</p>
