Topics

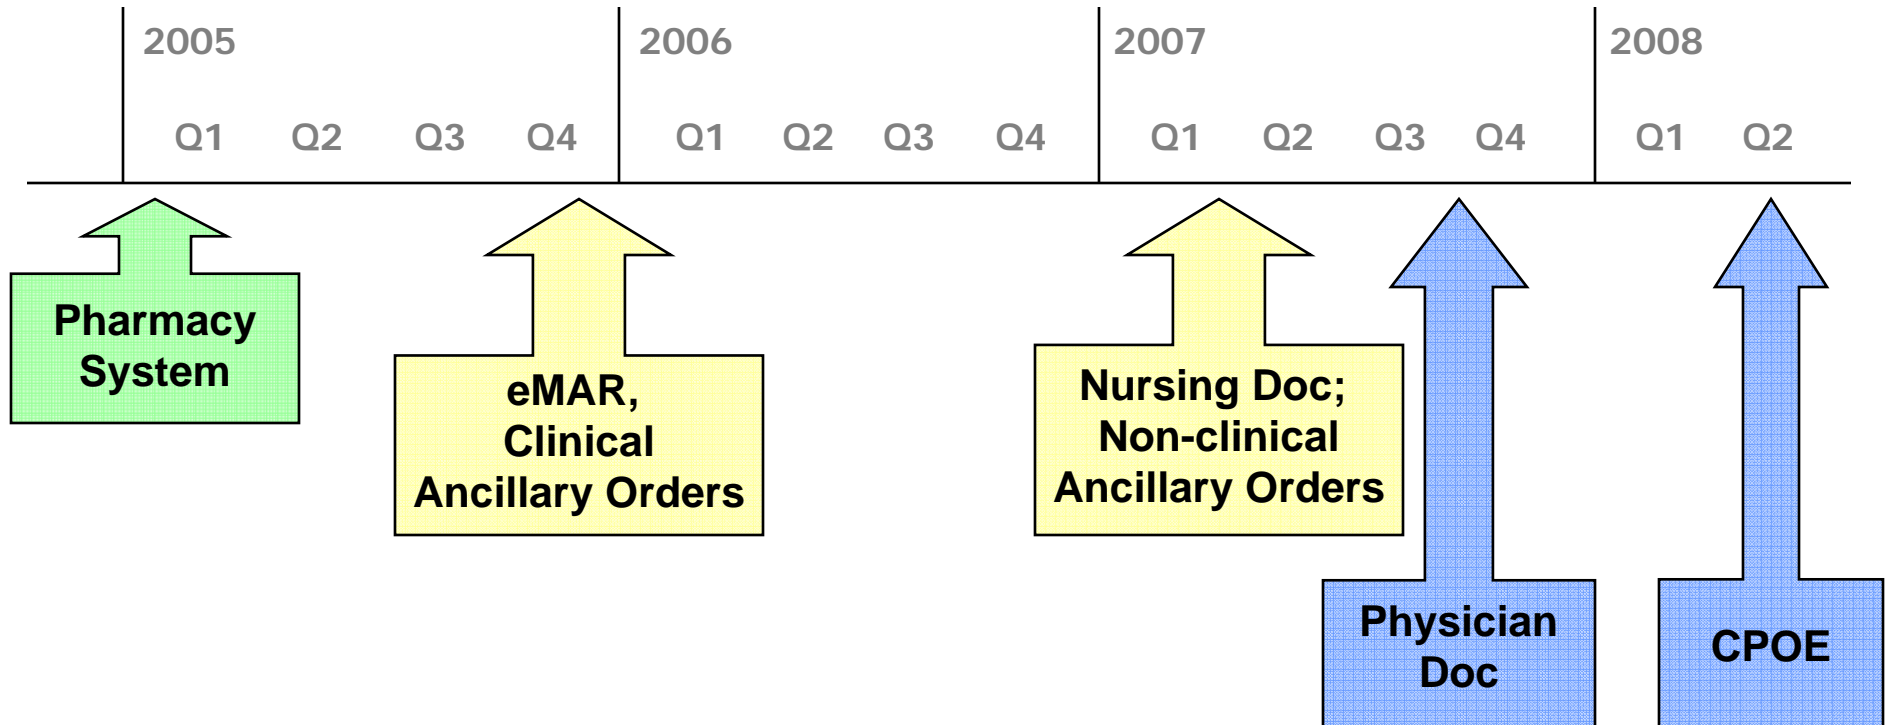

- Children's EMR Implementation
- Outcomes measurement approach
- Results: Nurse perceptions & acceptance

Children's Healthcare of Atlanta

- Pediatric healthcare system in metro-Atlanta
 - Three inpatient hospital
 - ◆ 450+ staffed beds
 - 16 satellite locations
 - 6,000+ employees
 - 1,400+ physicians
- Study setting
 - 2 largest hospitals during EMR implementation
 - ◆ 1 academic, 1 community
 - ◆ 23,000 hospital admissions
 - ◆ 128,000+ inpatient days

Children's EMR implementation

Phased implementation employing user-centered methods

Measurement Approach

- Patient Safety
 - Medication error rates
 - ◆ Trigger-based chart review
 - ◆ Self-reporting trends
- Efficiency
 - Pharmacy order turn-around time study
 - Physician & staff self-reports
- Quality
 - Physician & staff self-reports
- Satisfaction & acceptance
 - Users
 - ◆ Surveys
 - ◆ Qualitative interviews
 - Customers
 - ◆ Press Ganey trends

Nurse satisfaction and acceptance surveys

- Survey distributed before and after each go-live
 - Survey items based on Technology Acceptance Model (TAM) measured perceived usefulness
 - Open-ended questions: advantages & disadvantages
- Survey population: inpatient nursing staff
 - Before eMAR (n=245), after eMAR (n=268)
 - ~45% work in ICU
 - ~50% have worked 1-5 years in their current work area

Children's EMR implementation

Perceived usefulness ratings

Perceived advantages

Perceived disadvantages

Next Steps

- CPOE!
- Post-Nursing Documentation surveys
- Continue iterative improvements to the system
 - Focus on problem areas identified through the surveys and other feedback
- Physician Documentation surveys
