

followed. Approval by the Office of Management and Budget (OMB) has been requested by August 17, 2007.

ADDRESSES: Written comments regarding the emergency review should be addressed to the Office of Information and Regulatory Affairs, Attention: Nicole Cafarella, Desk Officer, Department of Education, Office of Management and Budget; 725 17th Street, NW., Room 10222, New Executive Office Building, Washington, DC 20503 or faxed to (202) 395-6974.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Director of OMB provide interested Federal agencies and the public an early opportunity to comment on information collection requests. The Office of Management and Budget (OMB) may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Acting Leader, Information Management Case Services Team, Regulatory Information Management Services, Office of Management, publishes this notice containing proposed information collection requests at the beginning of the Departmental review of the information collection. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. ED invites public comment.

The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner, (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected, and (5) how might the Department minimize the burden of this collection on respondents, including through the use of information technology.

Dated: August 9, 2007.

Delores J. Barber,

Acting Leader Information Management Case Services Team, Regulatory Information Management Services, Office of Management.

Office of Elementary and Secondary Education

Type of Review: New.

Title: School Improvement Grants.

Abstract: Section 1003(g) of Title I authorizes funds to help SEAs and LEAs address the needs of schools in improvement, corrective action and restructuring in order to improve student achievement.

Additional Information: Since Congress has directed that these funds need to be distributed as soon as possible in order to begin helping schools that are identified as needing improvement, corrective action, or restructuring in order to improve student achievement. We are requesting OMB approval by August 17, 2007 in order for the States to have 30 days to create their application.

Frequency: One time.

Affected Public: State, Local, or Tribal Gov't, SEAs or LEAs.

Reporting and Recordkeeping Hour Burden:

Responses: 52.

Burden Hours: 1,560.

Requests for copies of the proposed information collection request may be accessed from <http://edicsweb.ed.gov>, by selecting the "Browse Pending Collections" link and by clicking on link number 3441. When you access the information collection, click on "Download Attachments" to view. Written requests for information should be addressed to U.S. Department of Education, 400 Maryland Avenue, SW., Potomac Center, 9th Floor, Washington, DC 20202-4700. Requests may also be electronically mailed to the Internet address ICDocketMgr@ed.gov or faxed to 202-245-6623. Please specify the complete title of the information collection when making your request.

Comments regarding burden and/or the collection activity requirements should be electronically mailed to ICDocketMgr@ed.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339.

BILLING CODE 4000-01-P

DEPARTMENT OF ENERGY

Ultra-Deepwater and Unconventional Natural Gas and Other Petroleum Resources Research and Development Program 2007 Annual Plan

AGENCY: Office of Fossil Energy, Department of Energy (DOE).

ACTION: Notice of Report Availability.

SUMMARY: The Office of Fossil Energy announces the availability of the *2007 Annual Plan* for the Ultra-Deepwater and Unconventional Natural Gas and Other Petroleum Resources Research and Development Program on the DOE Web site at <http://management.energy.gov/FOIA/1480.htm> or in print form (see "CONTACT" below). The *2007 Annual Plan* is in compliance with the *Energy Policy Act of 2005, Subtitle J, Section 999B(e)(3)*, which requires the publication of this plan and all written comments in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Bill Hochheiser or Elena Melchert, U.S. Department of Energy, Office of Oil and Natural Gas, Mail Stop FE-30, 1000 Independence Ave., SW., Washington, DC 20585 or phone: 202-586-5600 or e-mail to UltraDeepwater@hq.doe.gov.

SUPPLEMENTARY INFORMATION:

Executive Summary [excerpted from the 2007 Annual Plan p.4]

This document is the *2007 Annual Plan (Plan)* for the Ultra-Deepwater and Unconventional Natural Gas and Other Petroleum Resources Research and Development Program (Program) established pursuant to Subtitle J, Section 999, of the Energy Policy Act of 2005 (EPAct).

EPAct required the Department of Energy to competitively select and award a contract to a consortium which in turn is to administer three elements of the Program pursuant to an annual plan. A fourth program element of complementary research will be performed by the National Energy Technology Laboratory (NETL). NETL is also tasked with primary review and oversight of the Consortium.

As required by Section 999B(e)(2)(A), the Consortium provided its recommendations for the 2007 Annual Plan in the form of a "draft annual plan" (DAP). These recommendations were the basis for the 2007 Annual Plan which was presented to the Ultra-Deepwater Advisory Committee (UDAC) and the Unconventional Resources Technology Advisory Committee (URTAC) for review and comments. These comments were considered in the final development of the *2007 Annual*

Plan. In order to accommodate the Section 999 requirement to publish all written comments, the Consortium's DAP and the Advisory Committee reports are appended to the 2007 *Annual Plan*. No other written comments were received.

As directed in Section 999, NETL solicited proposals, and in late 2006, competitively selected The Research Partnership to Secure Energy for America (RPSEA) as the Consortium. NETL worked closely with RPSEA in the development of its DAP, which frames their goals for the first two years of the program. RPSEA gathered extensive input through industry workshops, roadmapping sessions, and expert opinion to develop its first DAP, and identified the areas of highest priority for the investment of \$50 million per year.

EPAAct identifies three program elements to be administered by the Consortium: Ultra-deepwater architecture and technology, unconventional natural gas and other petroleum resources exploration and production technology, and technology challenges of small producers.

In the 2007 *Annual Plan*, the Ultra-Deepwater Program Element is divided into theme areas based on four generic field types that represent the most challenging field development scenarios facing deepwater operators. The Consortium will solicit research and development (R&D) projects that seek to develop technologies that will facilitate development of these field types. Additionally, there are eight crosscutting challenges that represent the areas where new technologies are needed to advance the pace of ultra-deepwater development for all field types. The Consortium will also solicit projects that seek to advance technologies in each of these areas as components of an integrated system.

The Unconventional Natural Gas and Other Petroleum Resources Program Element is divided into three theme areas that target gas shales, water management for both coalbed methane and gas shales, and tight sands. The 2007 *Annual Plan* focuses on unconventional natural gas rather than "other petroleum resources" (e.g., shale oil, oil sands, deep gas) where R&D to help convert resources into reserves is needed.

The Small Producers Program Element targets advancing technologies for mature fields, which primarily covers the technology challenges of managing water production, improving recovery, and reducing costs. Mature fields are the domain of small

producers, and they face these three challenges on a daily basis.

For each of these program elements, a number of "sub-themes" have been developed to help guide the Consortium through their solicitation process. These sub-themes and the prioritization process are provided in greater detail in Sections 2.1, 2.2 and 2.3 of the 2007 *Annual Plan*. The solicitation process that will be followed to generate the portfolio of R&D projects to address these themes is described in Section 2.4.

The NETL Complementary R&D Program Element has four principal areas of focus or "Centers":

- Drilling Under Extreme Conditions.
- Environmental Impacts of Oil and Natural Gas Development.
- Enhanced and Unconventional Oil Recovery.
- Resource Assessment.

A fifth area of activity will identify and quantify the benefits that are expected to accrue as a result of the annual \$50 million funding level provided under Section 999H(a) of EPAAct, and perform analyses in support of program planning.

Examples where the NETL R&D Program Element will complement the R&D administered by the Consortium include:

- Within both the Environmental Impacts of Oil and Gas Development and the Enhanced and Unconventional Oil Recovery Centers, there is a significant focus on oil shale and oil sands, resource areas that are not part of the program administered by the Consortium.

- The Center for Drilling Under Extreme Conditions will carry out fundamental research related to the performance of tools and equipment under extremely high pressures and temperatures, work that is related to development of the deep gas resource, which is not a target of the consortium program. Also, this work can support particular elements of the Ultra-Deepwater program.

- The Center for Resource Assessment will develop data and analytical products that will complement both the programs for small producers and the development of unconventional gas resources. These products, similar to those produced by DOE in the past and very popular within the industry, are not a focus area for the Consortium.

Continual communication between NETL and RPSEA will ensure that all program elements remain complementary and supportive, and that duplication of effort is avoided. Technology transfer for the entire program will be a continually evolving

function. Because there are not yet any active projects, the focus of the 2007 *Annual Plan* is to release solicitations and establish R&D projects. Technology transfer will be an integral part of the NETL Complementary program. It will also be part of each Consortium-administered award, as Section 999C(d) of EPAAct mandates that each award recipient use 2.5% of their award for technology transfer. RPSEA and NETL have been working together to develop a technology transfer plan that provides a systematic approach for development of an integrated technology transfer program.

Section 999H(a) of EPAAct provided that the Ultra-Deepwater and Unconventional Natural Gas and Other Petroleum Research Fund will be funded at \$50-million-per-year for 10 years, with funds generated from Federal lease royalties, rents, and bonuses paid by oil and gas companies. After allocations for program management by NETL and R&D administration by RPSEA, the amounts to be invested in R&D total \$44.56 million (\$32.06 million per year for Consortium R&D and \$12.5 million per year for Complementary R&D).

The NETL Strategic Center for Natural Gas and Oil is responsible for overall program management. Complementary R&D will be carried out by NETL's Office of Research and Development. Planning and analysis related to the program, including benefits assessment and technology impacts analysis related to program direction, will be carried out by NETL's Office of Systems, Analysis, and Planning.

Dated: August 1, 2007.

James A. Slutz,

Deputy Assistant Secretary, Office Oil and Natural Gas.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. ER07-1105-000, and ER07-1105-001]

Cedar Creek Wind Holdings, LLC; Notice of Issuance of Order

August 8, 2007.

Cedar Creek Wind Holdings, LLC (Cedar Creek) filed an application for market-based rate authority, with an accompanying rate schedule. The proposed market-based rate schedule provides for the sale of energy and capacity at market-based rates. Cedar
