ADMINISTRATIVE RECORD

The Administrative Record serves the same purpose in the *Comprehensive Environmental Response, Compensation, and Liability Act of 1980*, *Resource Conservation and Recovery Act of 1976*, and Washington State Dangerous Waste Programs. The Administrative Record is the body of documents and information that is considered or relied on to arrive at a decision for remedial action or hazardous waste management.

An Administrative Record file is established for each group of waste sites with a similar location and waste characteristics and for each grouping of treatment, storage, or disposal units for the purpose of preparing and submitting a permit application and/or closure plan. It will include all the documents considered or relied on in arriving at a decision or to issue a permit or permit modification. When the investigation process begins or when a permit action begins, the Administrative Record file is established. The USDOE is responsible for management of the official Administrative Record file (hard copies). EPA and Ecology (and the public information repositories) have information listings only.
