Many homes around the county sustained some type of wind damage, mostly minor. At least two homes had roofs blown off, including one in Fort Branch and one near Oakland City. A church in Johnson was partially unroofed. A single wide mobile home just west of Johnson was overturned. A line of utility poles went down in Fort Branch, leaving the entire town without power. The ticket booth, concession stand, bleachers, and light towers were damaged at a high school. In Princeton, a tree fell across a main street and onto a vehicle. Near Oakland City, one house was destroyed. Several other houses and a barn had roof damage. A turkey farm received major damage, where over 2,000 turkeys, a brooder house, and a garage were destroyed. Indiana Route 57 was closed four miles north of the Indiana 64 junction because of downed power lines. About 15 people spent the night at a Red Cross shelter in Fort Branch.

Numerous buildings around the county sustained mostly minor damage, such as shingles blown off. Several reports of wind gusts from 60 to 75 mph were received. At the Evansville airport, a gust to 71 mph was measured by the automated surface observing system. Sustained winds were clocked at 52 mph. The highest estimated gust was 75 mph in the northwest part of the county, reported by a trained spotter. In Evansville, a gust to 60 mph was measured on the west side of the city, and a gust to 63 mph was measured on the southeast side. Numerous trees and power lines were down. A semi was blown over, and roofs were blown completely off two homes. An elementary school sustained considerable roof damage. North of St. Wendel, a pole barn, hay barn, implement shed, and a grain bin were destroyed. Minor damage occurred to tractors and farm equipment. A pole barn in the exact same place was destroyed just a few years earlier, in 2004.

At least seven nomes across the county sustained damage. The most severe house damage occurred in the Coe area. A two-car garage was destroyed, with debris blown onto Highway 61. Pieces of the garage were blown through the roof of the house. A central air conditioning unit was blown off its pad. A house next door lost part of its roof. A pole barn was blown apart near Cato. Across the county, a large number of trees were blown down. At least 15 roads were impassable at one point, including State Highway 56. Near Winslow, a tree was blown onto a house with damage to the front of the home. Schools were closed the following day.

A powerful cold front moved rapidly southeast across southwest Indiana during the late afternoon hours. An organized line of severe thunderstorms developed along the front as it approached southern Illinois, then swept east across southwest Indiana. Widespread damaging winds accompanied the line of storms. Temperatures fell about 30 degrees in less than one hour when the very strong cold front passed through.

thunderstorms developed along the front as it crossed southeast Missouri, then swept east across western Kentucky. Widespread damaging winds accompanied the line of storms. Temperatures fell about 30 degrees in less than one hour when the very strong cold front passed through.

(KY-Z001) FULTON, (KY-Z009) CALLOWAY			
	01/29/08 17:20 CST	0.16M	High Wind (MAX 78 kt)
	01/29/08 17:40 CST	0	

A brief period of high winds followed in the wake of a cold front passage. The most intense damage occurred in Hickman in Fulton County, where estimated winds of 90 mph occurred. The bulk of the damage occurred in downtown Hickman and two blocks west, along a bluff over the Mississippi River. Two multi-level brick buildings over 100 years old received major damage. The roof was stripped off an historic hotel, and the entire face of the second building crumbled. The canopies of a gas station and another building were destroyed. The second story porch of a home atop the bluff was destroyed. There was widespread roof shingle damage, street sign damage, and tree damage. A few vehicles were damaged or destroyed by falling debris. A couple of houses were hit by falling trees. An old hardware store suffered major damage. At one point, 11 city streets, six county roads, and six state highways were partially or totally blocked by debris. The largest magnolia tree in the state fell. In Murray, a tree was blown over. The tree landed on several cars.

Source: Other Federal

Minor flooding of the Green River occurred. At the Paradise gage, where flood stage is 380 feet, the river crested at 381.72 feet on the 12th. Minor flooding of bottomland fields occurred.

The new year started off as an active one, with numerous systems traversing the region. These systems brought rain, snow, and thunder. The frequency of systems caused enough rainfall to push the Green River above flood stage.

The north folk of Elk Creek was out of its banks.

Low pressure over south central Missouri produced an unseasonably mild south wind flow. Thunderstorms with heavy rain developed in the southerly flow ahead of a cold front approaching the Mississippi Valley.

01/29/08 16:12 CST	0	Source: NWS Storm Survey

Storm Data and Unusual Weather Phenomena - January 2008 Date/Time Property & Event Type and Details Location Deaths & Iniuries Crop Dmg The tornado touched down along Highway 177, where a hay barn was destroyed and one storage building sustained major damage. One house was damaged when it was struck by large portions of the hay barn. Another house sustained extensive shingle damage. Utility poles were snapped. A large 5000 gallon steel fuel tank converted for use as a culvert was moved. Witnesses within a few miles of the tornado reported a funnel cloud. Due to the hilly and wooded nature of the terrain, the observers may not have seen contact with the ground. The tornado crossed the Trail of Tears State Park, where numerous large trees were snapped or uprooted. Many of these trees were oak trees that were not in leaf during this mid-winter tornado. The downed trees in the park blocked in a couple of hikers. The average path width was about 150 yards. Peak winds were estimated near 95 mph. The tornado proceeded across the Mississippi River into Union County, Illinois. NEW MADRID COUNTY --- 5.3 N MATTHEWS [36.85, -89.58] 01/29/08 16·10 CST 10K Thunderstorm Wind (EG 55 kt) 01/29/08 16:10 CST Source: Newspaper 0 Several power poles were snapped. MISSISSIPPI COUNTY --- ALFALFA CENTER [36.97, -89.20], 1.7 ESE CHALLENOR [36.79, -89.32] 01/29/08 16:17 CST 0.10M Thunderstorm Wind (EG 61 kt) 01/29/08 16:32 CST 0 Source: Emergency Manager A couple of metal buildings were blown across fields. Approximately 20 telephone poles were snapped off. PERRY COUNTY --- ALTENBURG [37.63, -89.58] 10K 01/29/08 16:20 CST Thunderstorm Wind (EG 56 kt) 01/29/08 16:20 CST 0 Source: Emergency Manager A large open-front machine shed was destroyed. Trees were topped off. A powerful cold front moved rapidly southeast across southeast Missouri during the late afternoon hours. The temperature dropped 38 degrees between 4 and 8 P.M. in Cape Girardeau. An organized line of severe thunderstorms developed along the front as it crossed southeast Missouri. Widespread damaging winds accompanied the line of storms by the time they reached the Mississippi River. (MO-Z086) BOLLINGER, (MO-Z087) CAPE GIRARDEAU, (MO-Z100) WAYNE, (MO-Z107) CARTER, (MO-Z108) RIPLEY, (MO-Z109) BUTLER, (MO-Z110) STODDARD 01/29/08 15:05 CST

A brief period of high winds followed in the wake of a cold front passage. Wind gusts were measured up to 61 mph at the Poplar Bluff airport, 60 mph at Doniphan in Ripley County, and 62 mph at the Cape Girardeau airport. In Qulin, the roof and wall was blown off a vacant gas station. A portable building in Qulin was rolled into a mobile home. In Poplar Bluff, four power poles were snapped, and at least 21 trees were downed. Many homes lost shingles. At the Dexter airport in Stoddard County, a number of planes were blown around and damaged. Over a dozen planes received major damage, and about 33 of 36 hangars were damaged. Some hangars were destroyed. The roof of the airport restaurant was blown off. A concrete block building used to repair aircraft was demolished. Considerable roof damage occurred to homes and businesses across the Dexter area. Numerous trees were down in Bloomfield, and a few landed on vehicles and houses. A window was blown out of the courthouse in Bloomfield. A communications tower was blown down. In Bollinger County, the roof was blown off a barn in Grassy. Countywide, there were numerous downed trees and power lines in Carter County. Several roofs sustained shingle damage. In Wayne County, trees were down across Highways 34, 49, A, E, and FF.

A deepening surface low pressure system tracked northward from the Lower Mississippi Valley, passing across far western Kentucky. Cold air wrapped southward around the back side of the low, keeping precipitation frozen or freezing over parts of southern Illinois. Storm total precipitation ranged from 3 to 6 inches west of Interstate 57. Specific snow and sleet accumulations included 5 inches at Ava (near Carbondale in Jackson County), 3 inches at Carbondale, and 3 inches at Pinckneyville (in Perry County). In addition, a light glaze of ice up to one-tenth inch occurred in some places. To the south and east, lesser accumulations between one and two inches occurred. Numerous accidents were reported. Two persons were injured in separate accidents in Wayne County.
