Re: 7mile Hill project near The Dalles. As a member of the Historical Columbia River Hwy CAC to ODOT for 18 years, I believe allowing these wind turbines with in site of any of the key viewing areas of the Columbia River Gorge would be very short sighted after all the work that has been done to preserve the views of and in the Gorge. I am very much in favor of wind energy but not there. And there is plenty of room in Eastern OR & WA where it will not impact the neighbors who live within sound and close proximity of them. Thanks for receiving my comments. Carolyn Wood
