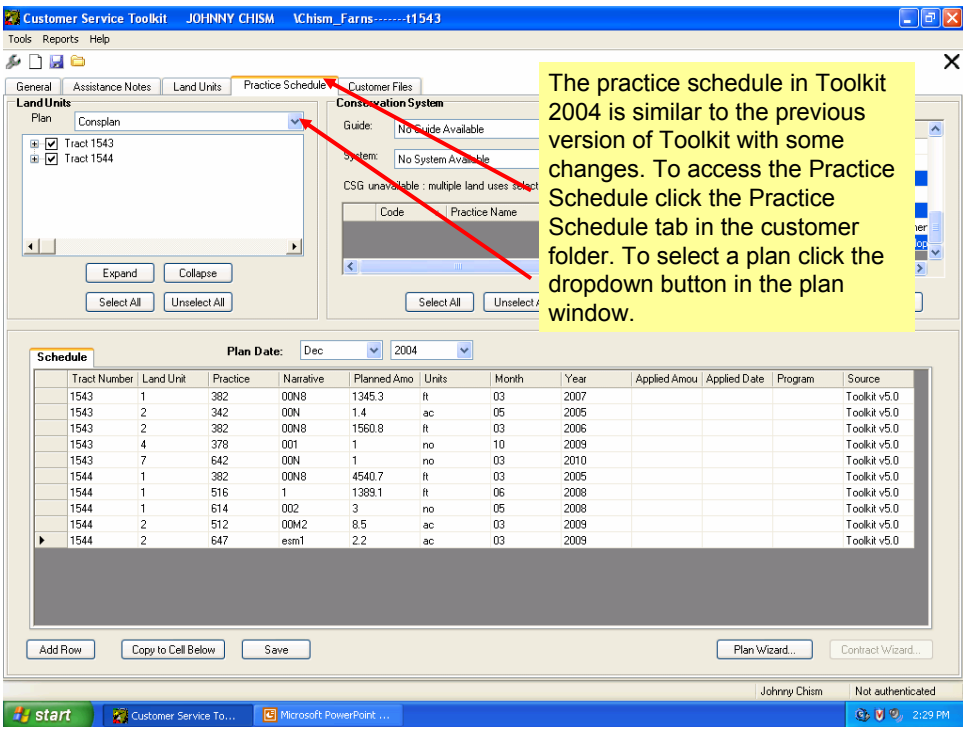
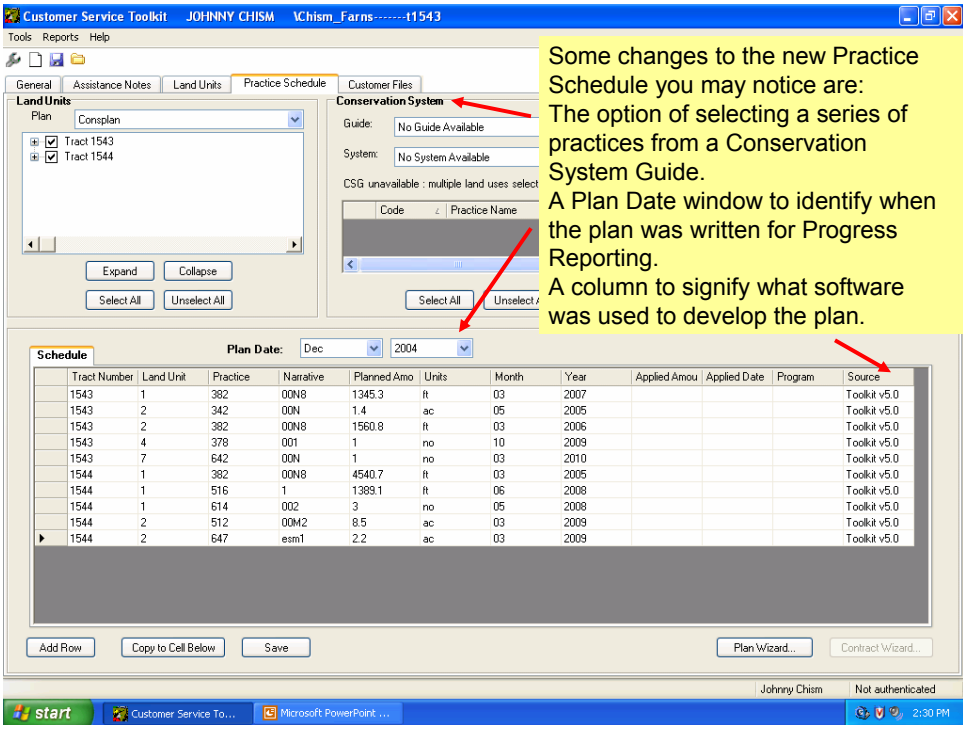
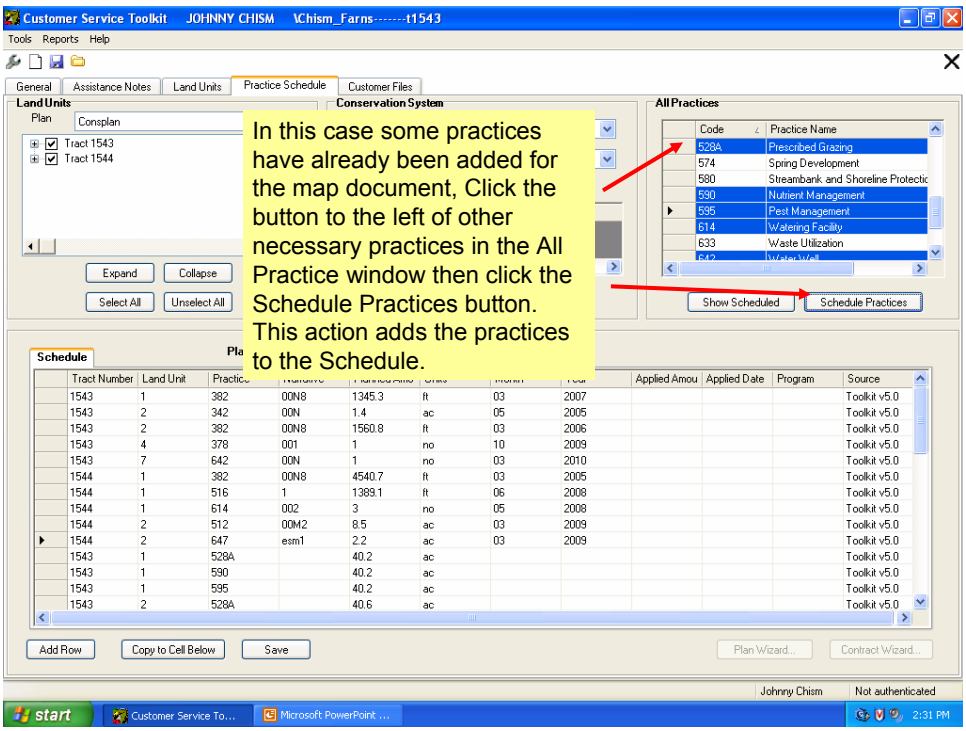
Scheduling Practices and Creating a Plan Report

Toolkit 2004

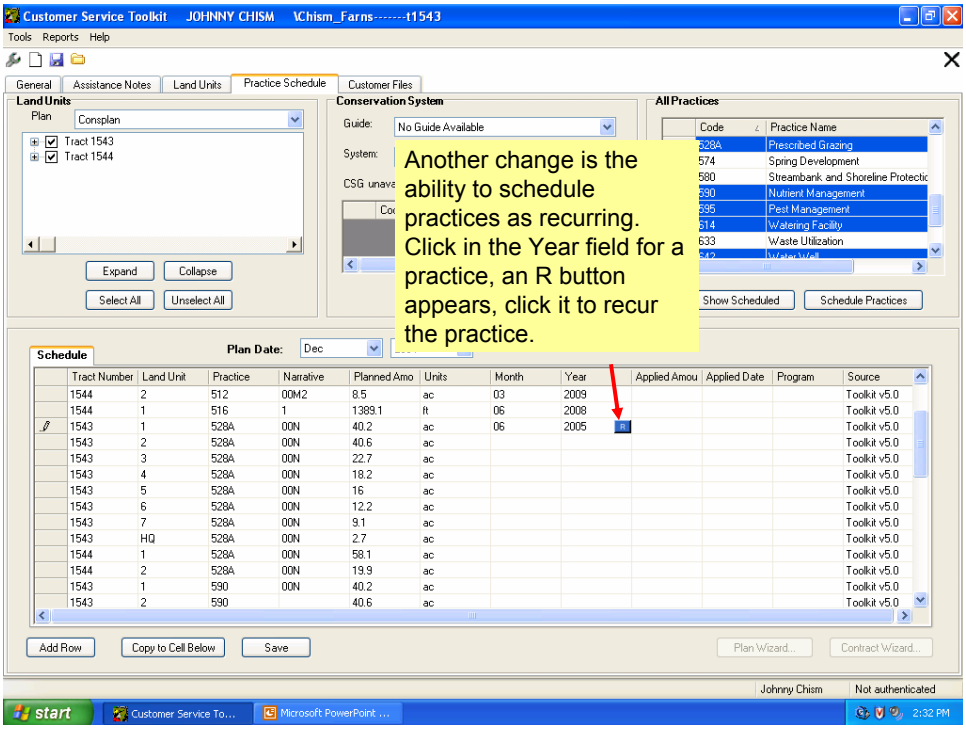




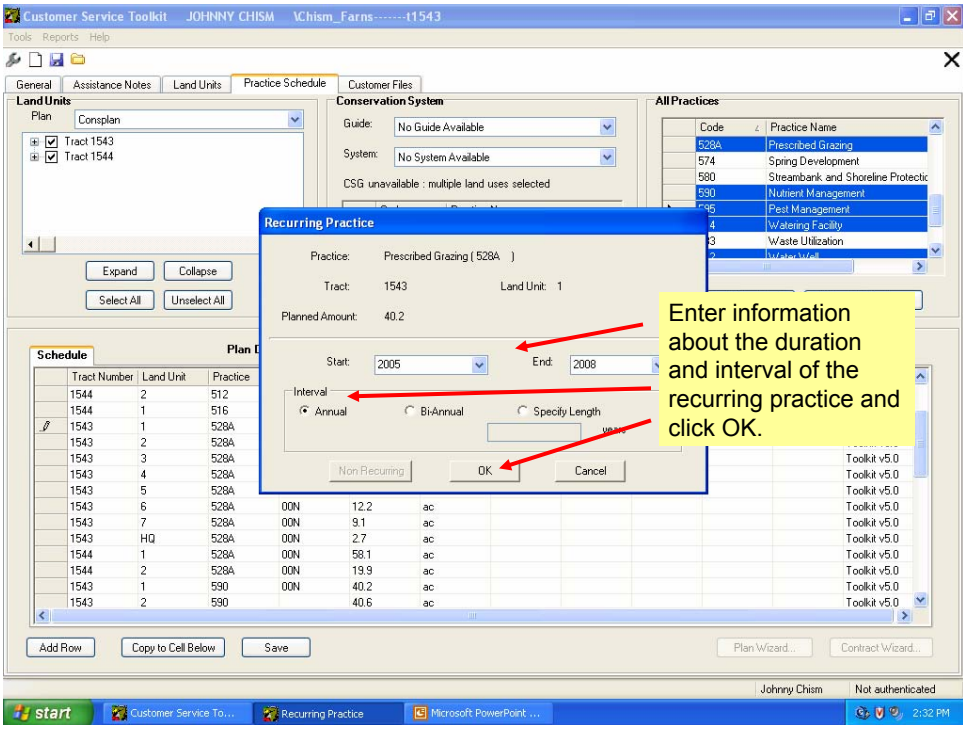
Some changes to the new Practice Schedule you may notice are:
The option of selecting a series of practices from a Conservation System Guide.
A Plan Date window to identify when the plan was written for Progress Reporting.
A column to signify what software was used to develop the plan.



In this case some practices have already been added for the map document, Click the button to the left of other necessary practices in the All Practice window then click the Schedule Practices button. This action adds the practices to the Schedule.



Another change is the ability to schedule practices as recurring. Click in the Year field for a practice, an R button appears, click it to recur the practice.



Recurring Practice
Enter information about the duration and interval of the recurring practice and click OK.
