← ↔ 🛃	Produce a Conservation Plan				
Vieturier, John Liepp Vieturier Vieturier	 The Plan Wizard assembles the plan information into an Excel spreadsheet, stand starts Excel. From Excel you may print the plan in the standard format or following items: Practices grouped by land use A practice narrative for each practice (the narrative is the one you selected Columns for applied practice amounts Signature blocks for each participant The plan's appearance may also be customized, for example: Turn the display of practice narratives on or off Display a block for the customer's objectives Turn the display of applied practice amounts and dates on or off Display information by land use or by practice cade Display system narratives when land use is displayed Display additional text when practice narratives are displayed 	customize it. The standard fo	rmat includes the
