CitizenLetter®

An urgent message from a concerned citizen

August 17, 2006

Stephen Wright, Administrator
Bonneville Power Admin.
Public Affairs Office - DKC-7
P.O. Box 14428
Portland, OR 97293-4428

Dear Administrator Wright,

I am writing to urge you to require local utilities to meet their future peak-power needs with clean energy and conservation programs.

I know that in five years your agency, which sells inexpensive, federally generated nuclear and hydroelectric power to local utilities, will start limiting supplies. I know your goal is to encourage utilities to develop their own energy sources to tap when demand rises.

This presents you with a valuable opportunity. The contracts you write will last through 2032. It is vital that these contracts compel utilities to meet their power needs cleanly. They should require local utilities to rely on conservation and renewables like wind and solar, not coal and other fossil fuels.

With record heat baking the U.S. this summer, it's clear that global warming is here. This is no time for utilities to start spewing more pollution and greenhouse gasses.

Yet this is what many utilities will do unless they are encouraged to develop clean energy sources for the future. Please tell me how you intend to address this issue.

Sincerely,

This letter was sent to BPA by the people listed on the attached document.
