## **Review of Information Manual “Riparian Vegetation Management for Pierce’s Disease in North Coast California Vineyards”**

Attached is an information manual titled “Riparian Vegetation Management for Pierce’s Disease in North Coast California Vineyards” by the Pierce’s Disease/Riparian Habitat Workgroup. This information manual was funded by the North Coast Pierce’s Disease Task Force and the USDA Natural Resources Conservation Service EQIP program.

This information manual provides a source of information and background for personnel who are working to control Pierce’s Disease; Moreover, it is an excellent reference on establishing vegetation in riparian areas and determining regulatory requirements.

The information manual can be viewed at
