Comment Sheet

List of Tables

TABLE 1-1-1:	Procedures to Report a Problem with the Manual <i>page 1-1-9</i>
TABLE 2-1-1:	Determine Where to Refer Questions in Veterinary Services (VS) <i>page 2-1-4</i>
TABLE 2-1-2:	Determine if Meat Is Hermetically Sealed and Shelf Stable Based on How Cooked in the Container <i>page 2-1-11</i>
TABLE 2-1-3:	Determine if Meat Is Hermetically Sealed and Shelf Stable Based on Your Examination of the Container <i>page 2-1-12</i>
TABLE 2-1-4:	Determine if Meat Is Hermetically Sealed and Shelf Stable Based on Your Inspection of the Contents <i>page 2-1-12</i>
TABLE 2-2-1:	Classify an Importation as Live Animal, Animal Product, Animal By-Product, or Related Animal Product <i>page 2-2-3</i>
TABLE 2-2-2:	Action to Take When Importer Requests Special Movement <i>page 2-2-5</i>
TABLE 2-2-3:	Determine Entry Requirements <i>page 2-2-6</i>
TABLE 2-2-4:	Determine Action to Take on Leaking or Damaged Container or Broken or Missing Seals <i>page 2-2-11</i>
TABLE 2-2-5:	Determine Action to Take Based on Results of Inspection <i>page 2-2-11</i>
TABLE 2-2-6:	Determine Action to Take on Contaminants and Ticks <i>page 2-2-12</i>
TABLE 2-2-7:	Inspection of Semen and Embryo Containers <i>page 2-2-13</i>
TABLE 2-2-8:	Determine Whether to Clean and Disinfect Empty Semen and Embryo Containers <i>page 2-2-13</i>
TABLE 2-2-9:	Procedures to Follow When Ticks Are Found <i>page 2-2-14</i>
TABLE 2-2-10:	Action to Take on Cargo When Authorizing a Shipment to an Approved Establishment <i>page 2-2-16</i>
TABLE 2-2-11:	Action to Take When a Shipment Is Not Eligible for Entry <i>page 2-2-18</i>
TABLE 2-2-12:	Determine the Authority to Identify When Documenting Violations <i>page 2-2-19</i>
TABLE 2-3-1:	Classify an Importation as Live Animal, Animal Product, Animal By-Product, or Related Animal Product <i>page 2-3-4</i>
TABLE 2-3-2:	Determine if the Importation Is Admissible Using Information Collected <i>page 2-3-5</i>
TABLE 2-3-3:	Determine if Meat Is Hermetically Sealed and Shelf Stable Based on How the Meat Was Cooked in the Container <i>page 2-3-8</i>

TABLE 2-3-4:	Determine if Meat Is Hermetically Sealed and Shelf Stable Based on Your Examination of the Container <i>page 2-3-9</i>
TABLE 2-3-5:	Determine if Meat Is Hermetically Sealed and Shelf Stable Based on Your Inspection of the Contents <i>page 2-3-10</i>
TABLE 2-3-6:	Determine Action Based on Results of Inspection <i>page 2-3-11</i>
TABLE 2-3-7:	Action to Take on Plant Debris, Hay and Straw, Soil, or Manure Contaminates <i>page 2-3-12</i>
TABLE 2-3-8:	Action to Take on Passenger Baggage When Authorizing a Shipment to an Approved Establishment <i>page 2-3-14</i>
TABLE 2-3-9:	Identify Your Authority When Documenting Violations <i>page 2-3-16</i>
TABLE 2-4-1:	Determine if PPQ Can Certify the Export Product <i>page 2-4-6</i>
TABLE 2-4-2:	Determine if PPQ can Certify the Export of Dairy Products <i>page 2-4-7</i>
TABLE 2-4-3:	Determine if PPQ Can Certify the Export of Fish Meal, Fish Oil, or Seafood <i>page 2-4-7</i>
TABLE 2-4-4:	Determine Which Statements Exporter Requires or Wants on the USDA Letterhead Certificate <i>page 2-4-9</i>
TABLE 2-4-5:	Validate Additional Declarations on VS 16-4, Export Certificate for Animal Products <i>page 2-4-11</i>
TABLE 2-4-6:	Select the Appropriate Disinfectant <i>page 2-4-14</i>
TABLE 2-4-7:	Formulas and Instructions for Mixing Disinfectants <i>page 2-4-15</i>
TABLE 2-4-8:	Formulas and Instructions for Mixing Sodium Hypochlorite <i>page 2-4-16</i>
TABLE 2-4-9:	Sources of Supply for Disinfectants and Cleaning Materials <i>page 2-4-18</i>
TABLE 2-4-10:	Decide Which Procedures to Use for Handling Pet Birds <i>page 2-4-21</i>
TABLE 2-4-11:	Action to Take on Pet Birds Transiting the U.S. <i>page 2-4-21</i>
TABLE 2-4-12:	Determine Action to Take on Mail Importations <i>page 2-4-23</i>
TABLE 2-4-13:	Determine Action to Take on Mail Importation of Animal By-Products <i>page 2-4-23</i>
TABLE 2-4-14:	Determine Action to Take on Mail Importations of Meat or Meat Products <i>page 2-4-24</i>
TABLE 2-4-15:	Determine Action to Take on Mail Importations of Meat or Meat Products Not Meeting Entry Requirements or from a Country Known to Be Affected with Diseases of Concern <i>page 2-4-24</i>

TABLE 2-4-16:	Where to Apply for VS Permits <i>page 2-4-26</i>
TABLE 2-4-17:	Where to Renew VS Permits <i>page 2-4-27</i>
TABLE 2-4-18:	Directions to Validate VS Permits Using ePermits <i>page 2-4-28</i>
TABLE 2-4-19:	Match Information on VS Permit with Shipping Documents <i>page 2-4-30</i>
TABLE 2-4-20:	Determine Action to Take on Discovered Animals <i>page 2-4-32</i>
TABLE 2-4-21:	Record Information Based on FSIS Report <i>page 2-4-34</i>
TABLE 2-4-22:	Decide Whether to Allow Animal Products or By-Products to Transit for Export <i>page 2-4-36</i>
TABLE 2-4-23:	Additional Criteria for Deciding Whether to Allow Animal Products or By-Products to Transit for Export <i>page 2-4-37</i>
TABLE 2-4-24:	Where to Locate Regulatory Action on Returned U.S. Origin Products <i>page 2-4-41</i>
TABLE 3-2-1:	Validate Importation Authorized Entry by a VS Permit <i>page 3-2-3</i>
TABLE 3-2-2:	Where to Find the Regulatory Action on Animal Waste or Related By-Products that Are Not Authorized by a VS Permit <i>page 3-2-4</i>
TABLE 3-2-3:	Feces, Guano, Manure, or Urine <i>page 3-2-5</i>
TABLE 3-2-4:	Bat Guano <i>page 3-2-6</i>
TABLE 3-2-5:	Bird Guano and Manure <i>page 3-2-7</i>
TABLE 3-2-6:	Powdered Bird Guano that Lacks Certification and Is from a Country Free from HPAI (H5N1) and END <i>page 3-2-7</i>
TABLE 3-2-7:	Livestock Feces, Manure, or Urine <i>page 3-2-8</i>
TABLE 3-2-8:	Animal Waste for Manufacturing or Industrial Use (Animal Glue, Glue Stock, and Gut Strings) <i>page 3-2-9</i>
TABLE 3-2-9:	Collagen and Collagenous Products <i>page 3-2-10</i>
TABLE 3-2-10:	Collagen and Collagenous Parts or Products of Ruminants from a Country Known to Be Affected with BSE <i>page 3-2-11</i>
TABLE 3-2-11:	Ruminant Glue Stock or Hide Glue from a Country Affected with BSE <i>page 3-2-12</i>
TABLE 3-2-12:	Ruminant Glue Stock from a Country Affected with FMD <i>page 3-2-12</i>
TABLE 3-2-13:	Swine Glue Stock from a Country Affected with ASF, CSF, FMD, or SVD; or Glue Stock from an Unknown Animal Class <i>page 3-2-13</i>
TABLE 3-2-14:	Pellets from Birds of Prey <i>page 3-2-14</i>

TABLE 3-2-15:	Rendered or Processed Protein Products from a Country Affected With BSE, Designated at Minimal Risk for BSE, or Free from BSE <i>page 3-2-16</i>
TABLE 3-2-16:	Rendered or Processed Protein Products from All Species of Animals from a Country Free from BSE <i>page 3-2-18</i>
TABLE 3-2-17:	Fish Emulsion, Hydrolysate, Meal, and Oil, and Shellfish Meal and Oil from a Country Free from BSE <i>page 3-2-19</i>
TABLE 3-2-18:	Rendered or Processed Protein Products from Poultry, for Animal Feed or Fertilizer from a Country Free from BSE <i>page 3-2-20</i>
TABLE 3-2-19:	Rendered or Processed Protein Products from Equine, Ruminant, or Swine, for Animal Feed or Fertilizer from a Country Free from BSE <i>page 3-2-21</i>
TABLE 3-2-20:	Other Animal Waste Products Which Have Not Been Fully Processed and Are Not Considered to Be Rendered from a Country Free from BSE <i>page 3-2-22</i>
TABLE 3-3-1:	Validate the Importation Is Authorized Entry by a VS Permit <i>page 3-3-2</i>
TABLE 3-3-2:	Where to Find Regulatory Action on Blood and Related By-Products Not Authorized by a VS Permit <i>page 3-3-2</i>
TABLE 3-3-3:	Blood and Blood Fractions Imported for Research or Scientific Use <i>page 3-3-4</i>
TABLE 3-3-4:	Blood Imported for Pharmaceutical Use <i>page 3-3-5</i>
TABLE 3-3-5:	Dried Blood Products Not Fully Rendered <i>page 3-3-6</i>
TABLE 3-4-1:	Validate Importation Authorized Entry by a VS Permit <i>page 3-4-3</i>
TABLE 3-4-2:	Where to Find the Regulatory Action on Bones and Related By-Products that Are Not Authorized by a VS Permit <i>page 3-4-4</i>
TABLE 3-4-3:	Bone Ash, Bone Black, or Bone Char <i>page 3-4-5</i>
TABLE 3-4-4:	Gelatin as Bulk Gelatin or Empty Gel Caps <i>page 3-4-6</i>
TABLE 3-4-5:	Gelatin Other Than Bulk Gelatin or Empty Gel Caps <i>page 3-4-8</i>
TABLE 3-4-6:	Bones for Manufacturing <i>page 3-4-10</i>
TABLE 3-4-7:	Bones that Are Not Fully Finished, and Are from Other Than Ruminants <i>page 3-4-10</i>
TABLE 3-4-8:	Ruminant Bones that Are Not Fully Finished <i>page 3-4-11</i>
TABLE 3-4-9:	Cervid Antlers from a Region Known to Be Free from BSE or Minimal Risk for BSE <i>page 3-4-12</i>
TABLE 3-4-10:	Hoofs Other Than for Pet Toys <i>page 3-4-13</i>
TABLE 3-4-11:	Chondroitin Sulfate and Glucosamine <i>page 3-4-14</i>

TABLE 3-4-12:	Bones and Related By-Products Not Specifically Mentioned Elsewhere <i>page 3-4-15</i>
TABLE 3-5-1:	Determine if Casings Are of Animal Origin <i>page 3-5-3</i>
TABLE 3-5-2:	Reconstituted Collagen Casings Derived from Ruminant Collagen <i>page 3-5-4</i>
TABLE 3-5-3:	Regulatory Action on Reconstituted Collagen Casings Derived from Swine Collagen <i>page 3-5-5</i>
TABLE 3-5-4:	Natural Animal Casings <i>page 3-5-6</i>
TABLE 3-5-5:	Ruminant Casings Originating in a Foreign Country <i>page 3-5-7</i>
TABLE 3-5-6:	Ruminant Casings from a Country Known to Be Free from BSE <i>page 3-5-8</i>
TABLE 3-5-7:	Ruminant Casings Originating in a Country Known to Be Free from BSE, but Processed and Stored in a Country Other than That in Which the Casings Originated <i>page 3-5-9</i>
TABLE 3-5-8:	Swine Casings Originating in a Foreign Country Free from ASF <i>page 3-5-10</i>
TABLE 3-5-9:	Natural Swine Casings from a Country of Origin Free from ASF, and Processed in a Country Other than the Country of Origin <i>page 3-5-11</i>
TABLE 3-5-10:	Swine Casings from a Country of Origin Known to Be Free from ASF, and Processed at an Approved Foreign Establishment in an ASF Affected Country <i>page 3-5-12</i>
TABLE 3-6-1:	Validate Importation Authorized Entry by VS Permit <i>page 3-6-2</i>
TABLE 3-6-2:	Where to Find the Regulatory Action on Eggs and Egg Products Not Authorized by a VS Permit <i>page 3-6-3</i>
TABLE 3-6-3:	Whole, Decorated Empty Egg Shells <i>page 3-6-4</i>
TABLE 3-6-4:	Edible Eggs and Egg Products <i>page 3-6-6</i>
TABLE 3-6-5:	Edible Eggs and Egg Products from Countries Affected With HPAI (H5N1) <i>page 3-6-6</i>
TABLE 3-6-6:	Commercial Shipments of Moon Cakes <i>page 3-6-7</i>
TABLE 3-6-7:	Edible Eggs and Egg Products from Other than Canada, the Mexican States of Sonora or Sinaloa, and Countries Free from HPAI (H5N1) <i>page 3-6-8</i>
TABLE 3-6-8:	Fresh, Unfertilized Eggs <i>page 3-6-12</i>
TABLE 3-6-9:	Fresh, Unfertilized Eggs from the Mexican States of Sonora or Sinaloa <i>page 3-6-13</i>
TABLE 3-6-10:	Commercial Shipments of Canned Quail Eggs <i>page 3-6-13</i>
TABLE 3-7-1:	Validate Importation Authorized Entry by a VS Permit <i>page 3-7-3</i>

TABLE 3-7-2:	Where to Find Regulatory Action on Hides and Related By-Products Not Authorized by a VS Permit <i>page 3-7-4</i>
TABLE 3-7-3:	Regulatory Action on Hides, Skins, and Capes <i>page 3-7-5</i>
TABLE 3-7-4:	Hard-Dried or Flint-Dried Untanned Hides or Skins of Animals Other than Goat, Lamb, or Sheep <i>page 3-7-6</i>
TABLE 3-7-5:	Hard-Dried or Flint-Dried Untanned Hides or Skins of Goat, Lamb, or Sheep <i>page 3-7-7</i>
TABLE 3-7-6:	Regulatory Action on Hides, Skins, or Capes of Swine <i>page 3-7-8</i>
TABLE 3-7-7:	Untanned Hides, Skins, or Capes of Ruminants or Swine <i>page 3-7-9</i>
TABLE 3-7-8:	Regulatory Action on Untanned Hides, Skins, or Capes of Ruminants and of Swine from a Region of Origin Known to Be Affected with FMD and Packed in Bundles <i>page 3-7-10</i>
TABLE 3-7-9:	Untanned Hides, Skins, or Capes of Ruminant or Swine from a Region of Origin Known to Be Affected with FMD, and Are Pickled in a Salt Solution Containing Mineral Acid <i>page 3-7-11</i>
TABLE 3-7-10:	Tanned Hides, Skins, or Capes, and Chrome-tanned Hides, Skins, or Capes of Birds <i>page 3-7-12</i>
TABLE 3-7-11:	Hard-dried or Flint-dried Untanned Hides or Skins of Birds <i>page 3-7-12</i>
TABLE 3-7-12:	Untanned Skins or Capes of Birds and With or Without Feathers <i>page 3-7-13</i>
TABLE 3-7-13:	Feathers Only or Products that Contain Feathers <i>page 3-7-14</i>
TABLE 3-7-14:	Regulatory Action on Wool, Hair, and Bristles <i>page 3-7-16</i>
TABLE 3-7-15:	Wool, Hair, or Bristles Free from Blood Stains, but Not Washed, Scoured, or Dyed and from a Region of Origin Known to Be Affected with FMD <i>page 3-7-17</i>
TABLE 3-7-16:	Wool that Is Contaminated with Manure <i>page 3-7-18</i>
TABLE 3-7-17:	Swine Hair or Bristles that Are Heavily Contaminated with Manure <i>page 3-7-19</i>
TABLE 3-8-1:	Validate Importation Authorized Entry by a VS Permit <i>page 3-8-3</i>
TABLE 3-8-2:	Where to Find Regulatory Action on Live Animals and Related Material Not Authorized By a VS Permit <i>page 3-8-4</i>
TABLE 3-8-3:	Earthworms <i>page 3-8-5</i>
TABLE 3-8-4:	Microorganisms <i>page 3-8-6</i>
TABLE 3-8-5:	Recombinant Microorganisms <i>page 3-8-7</i>
TABLE 3-8-6:	Action to Take on Animal Tissue <i>page 3-8-8</i>

TABLE 3-8-7:	Live Laboratory Mammals and Their Associated Materials for Research Purposes <i>page 3-8-9</i>
TABLE 3-8-8:	Human Materials <i>page 3-8-11</i>
TABLE 3-8-9:	Nonhuman Primate Materials <i>page 3-8-12</i>
TABLE 3-8-10:	Canine (Dog) and Feline (Cat) Materials <i>page 3-8-13</i>
TABLE 3-8-11:	Materials Derived from Amphibians, Aquatic Animals, and Reptiles <i>page 3-8-14</i>
TABLE 3-8-12:	Regulatory Action to Take on Organisms and Vectors <i>page 3-8-17</i>
TABLE 3-8-13:	Where to Find Regulatory Action on Organisms and Vectors Imported for Research or Biological Use <i>page 3-8-18</i>
TABLE 3-8-14:	Hybridoma Cells, Recombinant and Nonrecombinant Cell Lines, Cell and Tissue Cultures, and Their Products <i>page 3-8-19</i>
TABLE 3-8-15:	Hybridoma, Recombinant and Nonrecombinant Cell Lines, and Rodent Cell Lines Not of Avian or Livestock Origin <i>page 3-8-20</i>
TABLE 3-8-16:	Monoclonal Antibodies, Ascitic Fluid, Tissue Culture Supernatants <i>page 3-8-21</i>
TABLE 3-8-17:	Test Kits and Kit Components <i>page 3-8-23</i>
TABLE 3-8-18:	Semen Originating from Canada <i>page 3-8-25</i>
TABLE 3-8-19:	Semen from Countries Other Than Canada <i>page 3-8-27</i>
TABLE 3-8-20:	Embryos and Ova <i>page 3-8-28</i>
TABLE 3-9-1:	Validate Importation Authorized Entry by a VS Permit <i>page 3-9-3</i>
TABLE 3-9-2:	Where to Find the Regulatory Action on Meat and Meat Products <i>page 3-9-3</i>
TABLE 3-9-3:	Where to Find Regulatory Action on Foreign Origin Commercial Importations of Meat and Meat Products <i>page 3-9-4</i>
TABLE 3-9-4:	Returned U.S. Origin Meat or Meat Products <i>page 3-9-5</i>
TABLE 3-9-5:	Returned U.S. Origin Perishable Meat or Meat Products from a U.S. Military Base or Installation <i>page 3-9-5</i>
TABLE 3-9-6:	Tailgate Inspection and Paperwork Analysis of U.S. Returned Meat <i>page 3-9-6</i>
TABLE 3-10-1:	Regulatory Action on Meat and Meat Products of Horse <i>page 3-10-2</i>
TABLE 3-10-2:	Determine Whether to Authorize Shipment of Horse Meat from Argentina and Paraguay <i>page 3-10-4</i>
TABLE 3-10-3:	Action to Take on Horse Meat from Argentina or Paraguay Dependent upon Consignment to an Approved Establishment <i>page 3-10-4</i>

- TABLE 3-10-4:** Regulatory Action to Take on Horse Meat from a Country Known to Be Free from FMD *page 3-10-5*
- TABLE 3-10-5:** Identification Tests of Horse Meat *page 3-10-6*
- TABLE 3-11-1:** Action to Take for Poultry *page 3-11-3*
- TABLE 3-11-2:** Where to Find the Final Regulatory Action to Take When VS Permit Does Not Authorize Entry (Countries Free from HPAI (H5N1)) *page 3-11-5*
- TABLE 3-11-3:** Carcasses of Game Birds from a Country or Region of Origin Known to Be Free from HPAI (H5N1) *page 3-11-6*
- TABLE 3-11-4:** Carcasses of Game Birds from a Country or Region of Origin Known to Be Free From HPAI (H5N1) but Affected with END or Transited a Country Known to Be Affected with END *page 3-11-7*
- TABLE 3-11-5:** Cooked Meat or Meat Products of Poultry and Fowl from a Country or Region Known to Be Free from HPAI (H5N1) *page 3-11-8*
- TABLE 3-11-6:** Commercial Importations of Cooked Meat or Meat Products of Poultry and Fowl from a Country or Region of Origin Known to Be Free from HPAI (H5N1), but Affected with END *page 3-11-9*
- TABLE 3-11-7:** Cooked Meat or Meat Products of Poultry and Fowl in Passenger Baggage from a Country or Region of Origin Known to Be Free from HPAI (H5N1), but Affected with END *page 3-11-10*
- TABLE 3-11-8:** Locator for Perishable Poultry Pâté from a Country or Region of Origin Known to Be Free from HPAI (H5N1) *page 3-11-11*
- TABLE 3-11-9:** Perishable Poultry Pâté from a Country or Region of Origin Known to Be Free from HPAI (H5N1), and the Pâté Contains Pork or Pork Products of Lard (Rendered Fat) Only *page 3-11-11*
- TABLE 3-11-10:** Pâté from a Country of Origin Known to Be Free from HPAI (H5N1), and the Pâté Contains Pork or Pork Products (Including Unrendered Fat) Other than Lard *page 3-11-14*
- TABLE 3-11-11:** Pâté from a Country or Region of Origin Known to Be Free from HPAI (H5N1), but Does Not Appear to Contain Pork or Pork Products *page 3-11-16*
- TABLE 3-11-12:** Bouillon Cubes of Poultry Origin, Broth Containing Poultry, Meat Extract of Poultry Origin, and Powdered Chicken Meat from a Country or Region of Origin Known to Be Free from HPAI (H5N1) *page 3-11-17*
- TABLE 3-11-13:** Dehydrated (Dry) Soup Mixes Containing Pieces and Chunks, and/or Fat of Poultry Meat from a Country or Region of Origin Known to Be Free from HPAI (H5N1) *page 3-11-18*

-

Purpose

The *Animal Product Manual* (APM) provides the background, procedures, and regulatory actions to enforce the regulations governing the import and export of animals, animal products, and animal by-products. These regulations attempt to reduce the risk of introducing exotic animal diseases into the United States and facilitate the exportation of animal products.

The primary purpose of the APM is to enable Customs and Border Protection-Agriculture Inspectors (CBP-AI) at ports of entry to do the following for animal products offered for importation:

- ◆ Identify and classify the importation
- ◆ Determine if any entry requirements are to be met
- ◆ Identify and validate the accompanying documents
- ◆ Take final regulatory action

The secondary purpose of the APM is to enable Plant Protection and Quarantine (PPQ) Officers to do the following for animal products offered for export:

- ◆ Identify which animal products PPQ is authorized to certify
- ◆ Certify animal products for export
- ◆ Refer other animal products to the government agency responsible for regulating importations of animal products

Scope

The APM covers background information, procedures, and regulatory actions related to animals, animal products, and animal by-products. The procedures listed in this manual concentrate **only** on regulating the importations of animals, animal products, and animal by-products. Procedures for clearing carriers and passengers and controlling garbage and cargo are covered in the *Manual for Agricultural Clearance*.

This manual is divided into three tabbed chapters:

- ◆ Introduction
- ◆ Procedures
- ◆ Reference

The manual also includes tabbed appendixes, a glossary, and an index.

The *Introduction* chapter provides basic information about the manual. The information includes purpose, scope, users, related documents, how to use the manual, and a description of conventions (unfamiliar or unique symbols and highlighting that are used throughout the manual).

The *Procedures* chapter lists the general steps to regulate imports of animal products. This chapter also includes special procedures for disinfecting, authorizing transshipment, clearing mail importations, safeguarding live animals, handling pet birds, and certifying the export of animal by-products. The categories of the *Procedures* chapter are organized into sections as follows:

- ◆ Preparation
- ◆ Cargo
- ◆ Passenger Baggage
- ◆ Special Procedures

The *Reference* chapter provides the regulatory action to take on animal product importations. This chapter is organized by categories of animal products that have similar regulatory actions to take. Titles of the categories are as follows:

- ◆ Introduction
- ◆ Animal Waste and Related By-Products
- ◆ Blood and Related By-Products
- ◆ Bones and Related By-Products

- ◆ Casings
- ◆ Eggs, Egg Products, and Egg By-Products from Poultry, Game Birds, or Other Birds
- ◆ Hides and Related By-Products
- ◆ Live Animals
- ◆ Meat and Meat Products
- ◆ Milk and Milk Products
- ◆ Miscellaneous Products Associated with Animals
- ◆ Organs and Related By-Products
- ◆ Trophies
- ◆ Pet Food, and Livestock, Poultry, and Aquaculture Feed

The *Appendix* is divided into sections containing information such as animal classes, countries' disease status, Spanish terms, label descriptions, approved establishments, Area Veterinarians in Charge, examples of certificates and forms, directions to keep the manual updated, directions for completing and distributing forms, and procedures for collecting user fees.

The *Glossary* defines specialized words, abbreviations and acronyms, and other difficult terms used to regulate animal products.

The *Index* contains topics and page numbers for quick reference.

What the APM Does Not Cover

Some of the guidelines, directions, and policies for clearing carriers and passengers and crew related to the animal product regulations have **not** been included in this manual. Guidelines, directions, and policies for controlling garbage and cargo are **not** included. The following topics are covered in the *Manual for Agricultural Clearance* and will **not** be duplicated in the APM:

- ◆ Allowing movement of residue cargo
- ◆ Controlling cargo
- ◆ Developing compliance agreements for regulated garbage handlers, including companies that handle garbage (transport) and process garbage (sterilize or incinerate)
- ◆ Inspecting the aircraft and vessels including galley areas, stores, quarters, decks, and cargo holds
- ◆ Monitoring and controlling foreign garbage
- ◆ Monitoring caterers and cleaners
- ◆ Processing violations

- ◆ Removing and disposing of regulated garbage
- ◆ Sealing containers and vessels' stores
- ◆ Taking action on live or dead animals **not** intended for entry
- ◆ Transferring meat in vessels' stores

What the APM Covers That Is Also Covered in the *Manual for Agricultural Clearance*

For easier reference, the following topics are covered in this manual as well as in the *Manual for Agricultural Clearance*:

- ◆ Authorizing the transit of animal products or by-products for export
- ◆ Cleaning and disinfection
- ◆ Cooperating with other federal agencies
- ◆ Handling pet birds in baggage and aboard vessels
- ◆ Taking action on prohibited animal products in cargo

Users

CBP-AI and PPQ Officers use this manual to assist them in deciding regulatory issues. The APM spans airport, maritime, and border operations. While primarily for regulatory decisions associated with imported cargo, the manual has an appendix that deals with baggage and the mail. The APM also has sections on procedures that cover such things as disinfection, export certification of animal products, handling pet birds, collecting user fees, and a glossary that provides some background on the variety of animals products the CBP-AI and PPQ Officers may encounter.

PPQ, Veterinary Regulatory Services (VRS), uses this manual to inform and guide PPQ Officers. VS, TTSPS primarily will access the *Reference* chapter to verify the entry status of animal products and by-products.

Secondary users have **no** direct responsibility for regulating importations of animal products and by-products. Therefore, their access to this manual is informational and limited to the *Introduction* and *Reference* sections. Secondary users are as follows:

- ◆ Animal and Plant Health Inspection Service (APHIS) International Services personnel
- ◆ Agricultural Attaches
- ◆ PPQ, Headquarters staff
- ◆ Personnel in other governmental departments

The experience of users will vary, and CBP-AI and PPQ officers having a working knowledge of the following is assumed:

- ◆ APHIS regulatory philosophy
- ◆ Regulatory decision making
- ◆ Codification of animal product regulations
- ◆ Consequences of disease outbreaks
- ◆ Detection and regulation principles
- ◆ Characteristics of viruses

Related Documents

The following act, regulations, VS memorandums, and PPQ manuals relate to the APM. The documents may provide the rules that govern your regulatory action. They may provide the guidelines and procedures for processing animal product importations. Also, they may operationally support the procedures and regulatory actions presented in this manual. The related documents include the following:

- ◆ Tariff Act of 1930
- ◆ Title 9 of the Code of Federal Regulations (CFR) Parts 93, 94, 95, 96, 98, 104, 122, and 156
- ◆ VS Memorandums 516.10, 590.3, 592.111, 593.2, 593.4, 593.5, 593.8, 593.9, 593.10, 593.15, 593.16, and 594.1
- ◆ PPQ Manuals

The Tariff Act of 1930, Section 1306(a) prohibits the importation of fresh (chilled or frozen) meat of ruminant or swine from any country affected with foot-and-mouth disease or rinderpest.

Title 9 of the CFR provides the rules that govern animals and animal products. Chapter I of 9CFR provides the authority for the regulatory programs of APHIS. The following parts of Chapter I, 9CFR give the authority to regulate imports of animals and animal products and to certify animal by-products for export.

These parts provide the basis for the background, procedures, and regulatory actions presented in this manual:

- ◆ Part 93, which is enforced by VS, regulates the importation of live animals and birds. PPQ helps enforce the regulations that deal with live animals, pet birds, hatching eggs, semen, and dogs that are imported to handle livestock

- ◆ Part 94 regulates edible animal products such as meat, milk and milk products, and eggs. This part lists the animal disease status of foreign countries
- ◆ Part 95 regulates inedible animal by-products, such as bones, hides, and skins; animal parts imported for manufacturing; contaminated material such as hay, straw, and meat covers; and provides for the cleaning and disinfection of carriers
- ◆ Part 96 regulates animal parts that are imported to make casings
- ◆ Part 98 regulates the importation of semen and embryos
- ◆ Part 104 regulates the importation of animal by-products as biological products
- ◆ Part 122 regulates the importation of organisms and vectors
- ◆ Part 156 provides certification of animal by-products for export. PPQ is responsible for certifying exports of animal by-products, primarily with reference to freedom from specific animal diseases. The Food Safety and Inspection Service (FSIS) certifies meat products, and VS certifies live animals and animal by-products

The procedures for handling, processing, and treating animal products and animal by-products are described in VS memorandums. VS memorandums are accessible at the following Internet address:

<http://inside.aphis.usda.gov/vs/downloads/memos/>

The following VS memorandums provide the basis for the procedures presented in this manual:

- ◆ VS Memorandum 590.3 re-emphasizes the prohibition established on animals and meat aboard vessels and aircraft
- ◆ VS Memorandum 591.55 provides the procedures and responsibilities for handling legally and illegally imported pet birds arriving in passenger baggage
- ◆ VS Memorandum 592.111 provides the procedures for disinfecting returned animal semen containers
- ◆ VS Memorandum 593.2 provides the procedures to regulate the importation of meat
- ◆ VS Memorandum 593.4 provides the guidelines to inspect and handle imported wool
- ◆ VS Memorandum 593.5 provides the procedures to handle and disinfect restricted imports
- ◆ VS Memorandum 593.8, Exhibit A provides a list of establishments approved to import restricted animal by-products

- ◆ VS Memorandum 593.9 provides the procedures to regulate the importation of horse meat and horse meat by-products
- ◆ VS Memorandum 593.10 provides the procedures to regulate, disinfect, and handle the importation of hay, straw, grasses, and similar materials
- ◆ VS Memorandum 593.15 provides the procedures to regulate the importation of cooked beef. Attachment A provides a list of approved foreign establishments
- ◆ VS Memorandum 593.16 provides instructions regarding VS Form 16-28 (please note that this is an obsolete form) that authorizes the use of VS Form 16-121 (please note that this is an obsolete form)
- ◆ VS Memorandum 593.19 provides guidelines to process VS Form 16-78
- ◆ VS Memorandum 594.1 provides the procedures to certify animal products and by-products for export

Other documents that include information related to regulating the import of animals, animal products, and animal by-products and certifying animal by-products for export are as follows:

- ◆ *Manual for Agricultural Clearance*
- ◆ *PPQ Treatment Manual*
- ◆ *Federal Noxious Weed Inspection Guide* (instructions for inspecting specified animal products to find the propagules of noxious weeds)

Application

Use the APM to regulate importations of animal products and by-products and to certify the export of animal by-products. The *Introduction*, *Procedures*, and *Reference* sections of the APM apply as follows:

- ◆ *Introduction* provides general background information about the manual's purpose, scope, and related documents. The *Introduction* also gives instructions on how to use the manual. This chapter is beneficial for knowledge and education and provides the framework within which the users can apply the manual
- ◆ *Procedures* provide the general steps to follow to regulate imports and to certify exports of animal products. The procedures were written with the understanding that ports operate differently.

Because of the differences, this chapter allows ports the flexibility to regulate animal products within established national policies

- ◆ *Reference* provides the directions necessary to determine the entry status of all animal related importations

How to Use This Manual

Use the APM on the job as a reference when regulating animal product importations. Review other parts of the *Introduction* to understand the scope of the material covered. What is **not** covered in this manual is important. Some policies and procedures that relate to animal product importations are in the *Manual for Agricultural Clearance* and are **not** duplicated here.

You will use the *Reference* chapter most frequently; this contains the regulatory actions to take on animal products and by-products that are imported. This chapter is further divided into sections alphabetically organized by categories of animal products and by-products. Each section has its own table of contents.

Use the *Procedures* chapter to identify general steps and special procedures which relate to processing animal product importations. The general procedures are divided into two parts: clearing regulated cargo and clearing regulated passenger baggage. Therefore, depending on where your tour of duty is, you will access **only** one of the general sections. On the baggage floor, you may access **only** the quick guide to entry status in passenger baggage which is **Appendix A** on **page A-1-1**.

The appendixes are used as they relate to the *Procedures* and *Reference* sections. In some places, an appendix is referenced; while in other places, your accessing an appendix to get the necessary information before taking regulatory action is assumed.

If any table of contents is **not** specific enough, use the index to find a topic and its page number.

Reporting Problems

Use **Table 1-1-1** to report suggestions, problems, situations, and disagreements which directly affect the content of the APM.

TABLE 1-1-1 Procedures to Report a Problem with the Manual

If you:	And the problem is:	Then:
Have a situation that requires an immediate response regarding a procedure or regulatory action	→	CALL PPQ-VRS-HQ, VMO at 301/734-7633
Have comments, suggestions, or complaints about the content of the APM or disagree with a policy, procedure, or regulatory action identified in the manual	→	CONTACT PPQ-VRS-AQI or PPQ-VRS-HQ (see Appendix H) personnel through channels describing why you disagree and what you recommend
Have a suggestion for improving the formatting (design, layout, composition) grammar, spelling, of your APM or you have a problem with accessing or the availability of the on-line APM	Not urgent	CONTACT the Manuals Unit, either John Patterson at <john.l.patterson@aphis.usda.gov> or Deborah Briggs <deborah.j.briggs@aphis.usda.gov> or COMPLETE and MAIL the Comment Sheet which is located at the back of the APM
	Urgent	CALL the Manuals Unit, either John Patterson at 240/629-1934 or Deborah Briggs at 240/629-1928

Conventions

Conventions are established by custom and are widely recognized and accepted. Conventions used in this manual are listed below.

Advisories

Advisories are used throughout the manual to bring important information to your attention. Please carefully review each advisory. The definitions have been updated so that they coincide with ANSI and are in the format shown below.

DANGER indicates that people could **easily** be hurt or killed.

WARNING indicates that people could **possibly** be hurt or killed.

CAUTION indicates that people could possibly be endangered and slightly hurt.

NOTICE indicates a possibly dangerous situation where goods might be damaged.

IMPORTANT indicates helpful information.

EXAMPLE

Examples are graphically placed boxes within the text as a means of visually separating information from other information contained on the page. Examples will always appear in a box.

Boldfacing

Boldfaced type is used to highlight negative or important words throughout the APM. These words are: **cannot, did not, do not, does not, lacks, must, never, no, not, only, other than.**

Bullets

Bulleted lists indicate that there is **no** order to the information being listed.

Chapters

This manual contains the following chapters: *Introduction*, *Procedures*, *Reference*. The manual also has appendixes, a glossary, and an index.

Table of Contents

Most every chapter section has a table of contents that lists the heading titles at the beginning of each chapter section to help facilitate finding information.

Control Data

Information placed at the top and bottom of each page helps users keep track of where they are in the manual and of its updates. At the top of the page is the chapter, section, and first-level heading. At the bottom of the page is the month, year, manual version, title, page number, and unit responsible for content.

Heading Levels

Within each section there are three headings. The first heading is indicated by a horizontal line followed by its title that continues across both the left and right columns. The second heading is in the right-hand column with the text beginning below. The third heading is in the left-hand column and used to easily scan topics.

Highlighting Tables, Figures, and Sections

When tables, figures, or other sections are referenced in the body of the manual, they are emphasized in bold print. For example, refer to the **Glossary** for a definition of albumin.

Indentions

Entry requirements which are summarized from CFRs, permits, or policies are indented on the page.

Numbering Scheme

A three-level numbering scheme is used in this manual for pages, tables, and figures. The first number represents the chapter. The second number represents the section. The third number represents the page, table, or figure. This numbering scheme allows for easier updating and adding of pages **without** having to reprint an entire chapter. Dashes are used in page numbering to differentiate page numbers from decimal points.

Section

Some of the larger chapters in this manual are broken down into sections. Each section begins on a new, right-hand page. Sections are identified by the second number in the numbering scheme used for this manual. The manual chapters with sections are *Procedures* and *Reference*.

Cooperation with Other Federal Agencies

Sometimes the regulations of different Federal agencies govern the same importations. As a result, Plant Protection and Quarantine (PPQ) cooperates with the following Federal agencies at ports of entry regarding importations of animals, animal products, and animal by-products.

Agricultural Marketing Service (AMS)

Commercial importations of shell eggs are regulated by the Agricultural Marketing Service (AMS). Refer to [Appendix I](#) for a list of AMS Regional offices.

Customs and Border Protection (CBP) of the Department of Homeland Security (DHS)

Customs and Border Protection (CBP) of the Department of Homeland Security (DHS) maintains primary control over entries. Maintain communications with CBP when regulatory action is taken on animal products and by-products that are held by PPQ. Once PPQ requirements have been met, release the cargo to CBP if applicable to local operations.

Fish and Wildlife Service of the Department of the Interior (FWS)

Refer the following importations to Customs and Border Protection (CBP) for referral to a Fish and Wildlife Service (FWS) officer or to CBP if an FWS officer is unavailable:

- ◆ All nonfarm animals including birds, but **excepting** horses, cattle, sheep, goats, swine, dogs, cats, and pet birds
- ◆ Animal by-products such as pelts, coats, skins, game trophies, ivory products, and tortoise shell products. Also, egg importations if from an endangered or threatened bird
- ◆ Abandoned pet birds (also contact VS who is the first concern)
- ◆ All amphibians, fish, and reptiles (to determine if they are protected by the Convention on International Trade in Endangered Species of Wild Flora and Fauna [CITES])

Food and Drug Administration of the Department of Health and Human Services (FDA)

Refer the following importations to Customs and Border Protection (CBP) for referral to a Food and Drug Administration (FDA) inspector:

- ◆ Any drug, medication, or food intended for animals that FDA has indicated an interest in. Consult with your local FDA inspector for specific items of interest
- ◆ Commercial importations of food products
- ◆ Wild fowl meat
- ◆ Wild ruminant meat

Food Safety and Inspection Service (FSIS)

Refer all meat and meat products and shell eggs for breaking to Customs for referral to Food Safety and Inspection Service (FSIS). Also, direct exporters to request from FSIS export certification of meat and meat products.

FSIS is responsible for regulating the importation of meat and meat products. FSIS makes sure that the meat and meat products are safe, wholesome, and pure products for human consumption (except wild

ruminant and wild fowl; see FDA). Foreign countries **must** have FSIS approval that the foreign inspection service is the equivalent of FSIS. The foreign country is then allowed to issue certificates for the commercial importation of meat and meat products. In addition, FSIS inspects and samples imported meat and meat products for meeting APHIS requirements and regulations designed to prevent the spread of animal diseases.

Refer importations of shell eggs for breaking to FSIS to issue FSIS Form 5200-8, Import Request Egg Products.

Public Health Service of the Department of Health and Human Services (PHS)

Refer the following importations to Customs for referral to the local Public Health Service (PHS) inspector:

- ◆ Dogs, cats, and monkeys (nonhuman primates)
- ◆ Lather brushes made from hair and bristles
- ◆ Human tissues, serum, blood, secretions, and excretions
 - ❖ If you question whether an importation is of animal origin which is imported for biological use, ask your supervisor or PPQ, Veterinary Regulatory Support (VRS)

Veterinary Services (VS)

Veterinary Services (VS) regulations control domestic and foreign commerce of live animals, live poultry, and their products. Since 1971, VS and PPQ have shared the responsibility for implementing, enforcing, and administering animal product and foreign garbage regulations and policies to prevent the introduction of foreign animal diseases.

Refer the following to the local VS office:

- ◆ All live animals, live birds, and hatching eggs
- ◆ Animal semen, ova, or embryo importations to VS, IEAS (empty containers are handled by PPQ)
- ◆ Dogs imported to handle livestock **except** those dogs from Canada, Mexico, Central America, and the West Indies

For dogs, require freedom from tapeworm *Taenia coenurus*.

- ◆ Abandoned pet birds (also contact FWS)

- ◆ When receiving a question relating to animal disease exclusions, consult your APM. If you **cannot** answer the question, use **Table 2-1-1** to determine who should answer the question.

TABLE 2-1-1 Determine Where to Refer Questions in Veterinary Services (VS)

If the question relates to:	And the APM does not answer the question, then refer the question to:
<ul style="list-style-type: none"> ◆ Live animals including birds ◆ Hatching eggs ◆ Animal semen, ova, and embryos 	<ul style="list-style-type: none"> ◆ The appropriate VS field office ◆ If the question cannot be answered locally, refer the question through normal channels to VS Import-Export Animals staff at 301/734-8364
Organisms and vectors	Contact PPQ-AQI-VMO on page H-1-2 or PPQ-VRS-Headquarters Personnel at 301/734-7633 or VS Technical Trade Services Product Staff (TTSPS) at 301/734-3277
Permit renewals for veterinary biological products	The Center for Veterinary Biologics (VS, CVB) at 301/734-8245
VS permit renewals	VS, TTSPS at 301/734-3277
<ul style="list-style-type: none"> ◆ Meat ◆ Animal products ◆ Animal by-products ◆ Associated materials 	<ul style="list-style-type: none"> ◆ Your supervisor ◆ If the question cannot be answered locally, refer the question by contacting either PPQ-AQI-VMO on page H-1-2 or PPQ-VRS-Headquarters Personnel on page H-1-2

Description of Foreign Animal Diseases

The consequences of a foreign, exotic animal disease outbreak occurring in the United States would be devastating. An outbreak would affect the health and lives of animals, the quantity and quality of our nation's food supply, and the stability of our nation's international trade. The best principle for controlling the introduction of foreign exotic animal diseases into the United States is exclusion. Exclusion prevents the transmission of viruses through direct and indirect contact of an animal disease or contact with a vector.

VS enforces the regulations that exclude the introduction of foreign animal diseases. PPQ is responsible for inspecting animal products and related materials imported from foreign countries.

Foreign animal diseases listed in the regulations that PPQ is involved in controlling are identified below.

African Swine Fever (ASF)

African swine fever (ASF) is also known as Peste porcine africaine, fiebre porcina africana, and maladie de Montgomery. ASF is a highly-contagious viral disease that affects **only** swine. The virus is acute, causing the swine to die within 4-7 days after getting a high fever. Wild swine carry the virus which may be transmitted by ticks. The virus is hardy, remaining viable in meat and by-products for several months.

Bovine Spongiform Encephalopathy (BSE)

Bovine spongiform encephalopathy (BSE) is a neurological disease of ruminants. BSE was first diagnosed in 1986 in Great Britain, and is a serious animal disease that has caused great loss to the cattle industry of Great Britain. BSE can be spread through using ruminant feed containing meat and other products from infected ruminants. Also, BSE can be spread through using veterinary biologic products containing by-products from infected ruminants.

Classical Swine Fever (CSF)

Classical swine fever (CSF) is also known as hog cholera (HC). CSF is an acute, highly-contagious viral disease that affects **only** swine. The disease causes a high fever and kills the animal 5-19 days after exposure. The virus is inactivated by heat and most disinfectants, but may survive several months in pickled pork and bacon, and several years in frozen carcasses. The virus is transmitted by direct animal contact and by animals eating uncooked pork scraps. CSF can also be transmitted indirectly by contaminated feed, water, equipment, or clothing.

Exotic Newcastle Disease (END)

Exotic Newcastle disease (formerly known as viscerotropic velogenic Newcastle disease (VVND)) is also known as Asiatic Newcastle disease, pseudo fowl plague, Doyle's form of Newcastle disease, and Avian pneumoencephalitis. END is an acute, rapidly-spreading viral disease of poultry. The disease is spread primarily by respiratory discharges and feces of infected birds; the disease can be spread when these excretions contaminate tools, boots, and clothing of people. Carcasses of birds being imported may spread the virus, as may raw garbage containing material from bird carcasses. END has been introduced into the United States on several occasions, and each outbreak was eradicated. The most serious outbreak began in 1971, which took three years to eradicate, was traced to the importation of infected pet birds.

Foot-and-Mouth Disease (FMD)

Foot-and-mouth disease (FMD) is also known as Aphthous fever, Aftosa, Epizootic apthae, Fiebre aftosa (Spanish), fièvre aphteuse (French), Maul-und Klauenseuche (German), Afta epizootica (Italian), and Eda Rot Bolezn (Russian). FMD is a contagious, viral infection that affects ruminants and swine. Symptoms of the disease are blisters in the mouth and on the feet. The disease is spread by contact with infected animals or contaminated fomites. The virus is found in the body fluids of live animals and meat or other parts of slaughtered animals. Therefore, restrictions are placed on imports of animals and animal products such as meat, hides, bones, animal casings, and glands. The United States has had nine FMD outbreaks between 1870 and 1929. At least one of the outbreaks was traced to animals that had fed been uncooked garbage from foreign ships. Another outbreak was traced to the use of contaminated biological products of foreign origin such as vaccines and extracts.

Throughout this manual where RP is mentioned, RP will represent both RP and FMD. This is due to the phenomenon of wherever RP occurs FMD does, too.

Highly Pathogenic Avian Influenza (HPAI) Subtype H5N1

Highly pathogenic avian influenza (HPAI) subtype H5N1 is an extremely infectious viral disease of poultry, including chickens, ducks, and turkeys. Migratory wildfowl and other wild birds are considered natural hosts for avian influenza viruses. The disease is spread by bird-to-bird contact through feces and aerosol droplets. These substances can contaminate both equipment, vehicles, boots, and clothing which may then serve as a source of infection. The virus is circulating widely among poultry in Asia, and during an outbreak in poultry there is a risk to people who have contact with infected birds or surfaces contaminated by infected birds. Although HPAI subtype H5N1 virus infection in humans is **not** common, the virus has already crossed the species barrier and has caused severe disease with high mortality in humans.

Rinderpest (RP)

Rinderpest (RP) is also known as cattle plague and pestis bovina. RP is an acute viral disease of ruminants, especially cattle and buffaloes. Historically, RP is one of the most devastating diseases of cattle and has had a major influence on man's food supply. Symptoms of the disease in its initial stages are lack of appetite, high fever, depression, severe panting, and racing pulse. The virus can be inactivated by heat, but will remain viable for weeks in the cold and for months in frozen animal products. The virus is present in all tissues and fluids of infected animals throughout the period of clinical illness. RP is usually

transmitted by direct contact with infected animals, but may also be transmitted by indirect contact with the secretions, excretions, or meat from infected animals.

Throughout this manual where RP is mentioned, RP will represent both RP and FMD. This is due to the phenomenon of wherever RP occurs FMD does, too.

Swine Vesicular Disease (SVD)

Swine vesicular disease (SVD) is a contagious viral infection that infects **only** swine. The symptoms are blisters on the mouth, snout and feet. The symptoms and course of SVD are indistinguishable from those of FMD.

How the Degree of Processing Correlates with Disease Risk

To allow importations of animal products and by-products while controlling the introduction of foreign animal diseases, prescribed procedures are carried out that stop the ability of viruses to infect healthy animals. These prescribed procedures are referred to as processes. The degree of processing is the extent of severity and length of application that makes the virus inactive. The four methods of processing related to animal products and by-products are temperature, pH, drying, and radiation.

Temperature

The temperature process is the heating and cooling of animal products or by-products. Freezing temperatures preserve viruses, while high temperatures (heat) inactivate viruses. The heating process inactivates viruses by raising the temperature above the tolerance level of the virus. The effectiveness of heating depends on the temperature and the exposure. Viruses are inactivated at moderate temperatures with longer exposure, and at higher temperatures with shorter exposure. The tolerance of viruses to heat varies. For example, to inactivate CSF, FMD, and SVD in canned meat, the meat **must** be heated by a commercially-accepted method to an internal (center of the product) temperature of 156° F. However, to inactivate END in poultry meat, the meat **must** be heated by a commercially accepted method to an internal temperature of 161° F.

pH

The pH is a measure of acidity or alkalinity. The pH process inactivates viruses by increasing or reducing the pH level of animal products or by-products. Viruses have a pH range within which they can survive. A pH outside this range inactivates the virus. Of the viral diseases of interest to APHIS, FMD is the most susceptible to pH

changes, while SVD is the least susceptible. Extreme pH inactivates all viruses. The effectiveness of the pH process depends on the exposure, temperature, and pH level. A pH change during rigor mortis will inactivate some viruses in muscle tissue. Soaking products in solutions of extreme pH also inactivates viruses.

Drying

The drying process removes moisture from animal products or by-products. Drying alone preserves viruses. When water is added, the virus is reactivated. Drying permanently inactivates viruses when combined with heat, pH, or exposure. Combining drying, heat, pH, and exposure produces a condition called cured and dried, which inactivates viruses. When meat is dried to a water-to-protein ratio of 2.25:1 (2.25 parts water to 1 part protein), the pH level is low enough to inactivate FMD. CSF is inactivated by curing and drying meat for 90 days.

Radiation

The radiation process is approved to permanently inactivate viruses in **only** animal by-products. Six megarads of radiation inactivates all viruses.

How the Degree of Processing Relates to Meat and Meat Products

The conditions of perishable, chilled, and frozen are considered to be at the same level in regard to disease risk. When determining the degree of processing related to importations of meat and meat products, the following conditions are used:

- ◆ Cured and dried
- ◆ Cooked
 - ❖ Shelf stable
 - ❖ Canned, perishable (pasteurized, canned)
 - ❖ Chilled or frozen
- ◆ Fresh
 - ❖ Chilled or frozen

Cured and Dried

The condition of cured and dried combines the processing of drying, pH, heat, and exposure to render the meat or meat product shelf stable. (See additional information under this section on shelf stability.) For meat to be cured and dried, the meat **must** meet a certain degree of processing, depending on the animal class from which the meat was derived and the country of origin.

Meat from countries affected with FMD **must** have been processed to a degree where **no** refrigeration is needed, and the results of a wet test **cannot** exceed a water-to-protein ratio of 2.25 to 1. A certificate **must** accompany the importation attesting to the degree of processing.

Meat from countries affected with CSF **must** be dried for at least 90 days. When the meat originates in a country free from animal diseases, but is processed in a country affected with CSF, the meat **must** dry for at least 45 days. In either situation, a certificate **must** accompany the importation attesting to the degree of processing.

Cooked

Cooking occurs when meat is heated. The degree of heating results in one of the following: cooked, shelf stable; cooked, canned perishable; or cooked (then chilled or frozen).

Cooked, shelf stable is a condition in which high temperature is applied that renders the meat or meat product shelf stable. (See additional information under this section on shelf stability.) The process used is lock stepped as follows:

1. Pack the meat in containers.
2. Completely seal the containers against the escape or entry of air (hermetically sealed).
3. Cook the meat. The temperature **must** be high enough to produce a fully sterile product (one that is free from bacteria or other micro-organisms).

Cooked, canned perishable (pasteurized canned) is a condition that applies high temperature to canned meat. The process used is the following:

1. Pack the meat in containers.
2. Completely seal the containers against the escape or entry of air (hermetically sealed).
3. Cook the meat using a commercially accepted method. The internal (center of meat) temperature **must** reach a minimum of 156° F.

This condition is hot enough to kill viruses, but **not** hot enough to render the meat or meat product fully sterilized. The meat or meat product requires refrigeration. A certificate **must** accompany the importation attesting to the degree of processing.

Meat that is cooked before being placed in containers is **not** considered cooked, canned perishable. Regulate this meat as cooked (chilled or frozen), cured and dried, or fresh (chilled or frozen).

Cooked (chilled or frozen) is a condition that results from the heating process. The fresh, boneless meat is cooked **without** curing agents, except salt, for a sufficient period and at temperatures so that when inspected, the meat appears to be thoroughly cooked throughout.

Except for meat products which are shelf stable because they were cooked in their container, a certificate **must** accompany all importations of cooked meat attesting to the degree of processing.

Fresh

Fresh (chilled or frozen) is a condition that results from applying **only** cold or freezing temperatures. The meat is **not** canned, cooked, or cured and dried.

Shelf Stability

The condition of shelf stability results from applying heat, alone or in combination with other ingredients and/or other treatments, to render the product free of microorganisms capable of growing in the product under non-refrigerated conditions.

Determining shelf stability of meat in containers accompanying passengers and in passenger baggage is a professional judgement. You **cannot** adequately determine the degree of processing if **no** certificate accompanies the importation. You **must** be confident that the meat or meat products were cooked in the container. If you are **not** sure, then seize the product.

Historically, PPQ, VRS has supported the restrictive actions taken by individual officers based on the lack of evidence necessary to take the proper regulatory action.

Use the following guidelines to determine if meat was cooked sufficiently enough in the containers rendering the meat to be hermetically sealed and shelf stable. Keep in mind that containers vary in appearance. You will need to rely on practical experience and professional judgment.

1. Determine if the container is acceptable.

TABLE 2-1-2 Determine if Meat Is Hermetically Sealed and Shelf Stable Based on How Cooked in the Container

If the container is a:	Then:
<ul style="list-style-type: none"> ◆ Can ◆ Crock ◆ Flexible foil pouch ◆ Jar ◆ Pop-top can 	CONTINUE on to Step 2
<ul style="list-style-type: none"> ◆ Transparent plastic pouch ◆ Container labeled as sterilized filling or pasteurized 	<ol style="list-style-type: none"> 1. JUDGE the contents as not shelf stable 2. TAKE appropriate action

2. Examine the container. Match the properties of the container with those listed in **Figure 2-1-1**. Then follow **Table 2-1-3**

Properties of containers that are hermetically sealed and shelf stable:	Properties of containers that are not hermetically sealed and shelf stable:
<ul style="list-style-type: none"> ◆ The ends or lid of the container is concave, inwardly curved, flat, and smooth ◆ If a can container, the can is seamless with no evidence of soldering ◆ The ends or lid of the container give only slightly when you press on them ◆ If a foil pouch container, there is liquid inside surrounding the meat, and moves when you massage the pouch ◆ There is no odor ◆ The container is dry and clean ◆ The label is commercially printed 	<ul style="list-style-type: none"> ◆ The ends or lid is swelled, bulged, or outwardly curved ◆ The seal shows evidence of soldering ◆ When the container lid is pressed, you feel the lid move inward or you hear the lid click ◆ The foil pouch is molded snugly around the meat with little or no liquid inside ◆ You are unable to move the meat when you massage the pouch ◆ There may be instructions on the pouch to further cook the meat beyond warming ◆ There is an objectionable odor ◆ The container shows evidence of leaking ◆ The label is handwritten

FIGURE 2-1-1 List of Container Properties Describing Both Those That Are and Are Not Hermetically Sealed

TABLE 2-1-3 Determine if Meat Is Hermetically Sealed and Shelf Stable Based on Your Examination of the Container

If:	Then:
One or more of the properties of containers that are not hermetically sealed and shelf stable listed in Figure 2-1-1 applies	<ol style="list-style-type: none"> 1. JUDGE the contents as not hermetically sealed and shelf stable 2. TAKE appropriate action
None of the properties of containers that are not hermetically sealed and shelf stable listed in Figure 2-1-1 apply	<ol style="list-style-type: none"> 1. CONSIDER that, in most probability, the contents are hermetically sealed and shelf stable 2. CONTINUE to Step 3 only if you are still unsure

3. Open a container. Then follow [Table 2-1-4](#).

TABLE 2-1-4 Determine if Meat Is Hermetically Sealed and Shelf Stable Based on Your Inspection of the Contents

If the contents:	Then:
Appear processed and any fat present was melted by cooking EXAMPLE The fat will be greasy, gelatinous, or lard-like in appearance. Think of what bacon fat looks like after frying and the grease has congealed in the pan.	<ol style="list-style-type: none"> 1. JUDGE the contents as hermetically sealed and shelf stable
Are unprocessed or you see pieces of fat EXAMPLE The fat will be more intact. Think of what fat looks like in a can of pork and beans.	<ol style="list-style-type: none"> 1. JUDGE the contents as not hermetically sealed and shelf stable 2. TAKE appropriate action

Introduction

The *Clearing Regulated Cargo* information presented in this section is a supplement to the guidelines, directions, and policy in the *Manual for Agricultural Clearance* (MAC).

Materials Needed

You will need the following items to clear regulated animal importations in cargo operations:

- ◆ Port guidelines for controlling cargo and for holding miscellaneous cargo
- ◆ *Animal Product Manual (APM)*
- ◆ Strip (Tyden), scrap, or button seals
- ◆ Ink pad
- ◆ Various CBP rubber stamps, such as “Shipment Authorized,” “Hold,” “Released for Export”
- ◆ Various forms (VS Forms 1-86A, 10-4, 16-4, 16-78; PPQ Forms 212, 254, 523, and 518)

Step 1: Classify the Importation

After reviewing manifests, air waybills or bills of lading, Customs entries, invoices, shipper and broker forms, endangered species documents, certificates, or permits, decide whether the material or product is of animal origin or may have been associated with an animal, or is intended for use in animals, or otherwise presents a potential for the introduction of a foreign animal disease (FAD). Use other sections of this manual to help clarify the information you are reviewing—*List of Animal Names and Their Classes*, ([Appendix B](#)), *Dictionary of Spanish Words Relating to Animal Product/By-Product Importations* ([Appendix F](#)), the *Glossary*, and the *Index*.

If the documentation reveals any of the following, regulate the material as being of animal origin or having been associated with an animal:

- ◆ Shows the name of an animal
- ◆ Refers to a live animal
- ◆ Shows the name of a product or material that is derived from an animal
- ◆ Suggests something that is likely to have come in contact with animals or parts of animals (for example, semen containers, hay, or straw)

After you determine an importation is of animal origin or related to an animal, then further classify the importation as a live animal, animal product, animal by-product, or related animal product using [Table 2-2-1](#).

VS is responsible for importations of live ruminants, swine, horses, or poultry (including birds). When these importations arrive, consult with local VS for procedures. For animal products, by-products, organisms and vectors, contact [VS-TTSPS](#) on page H-1-4 or [PPQ-AQI-VMO](#) on page H-1-2 or [PPQ-VRS-Headquarters Personnel](#) on page H-1-2.

TABLE 2-2-1 Classify an Importation as Live Animal, Animal Product, Animal By-Product, or Related Animal Product

If the importation is:	And the purpose is for:	Then classify as:
<ul style="list-style-type: none"> ◆ Live hedgehogs, tenrecs, brushtail opossums, ruminants, swine, horses, birds (including poultry) ◆ Eggs for hatching ◆ Semen, embryos ◆ Organisms or vectors 		Live animals
<ul style="list-style-type: none"> ◆ Carriers ◆ Consolidated cargo ◆ Meat covers ◆ Semen and embryo containers ◆ Straw and hay 		Related animal products
From an animal	Human consumption, such as: <ul style="list-style-type: none"> ◆ Bird nests ◆ Casings ◆ Eggs ◆ Meat ◆ Milk ◆ Processed products containing meat 	Animal products
	Pet food or feed, manufacturing or processing, research, biological or pharmaceutical products, testing, exhibition, recreation, such as: <ul style="list-style-type: none"> ◆ Animal waste ◆ Blood ◆ Bones ◆ Casings ◆ Extracts and derivatives of organs and glands ◆ Egg shells ◆ Hides ◆ Organs and glands ◆ Trophies 	Animal by-products

Step 2: Place a Hold on the Importation

There are two reasons for placing a hold on the importation:

- ◆ Importation is of agricultural interest
- ◆ Need to get additional information to decide what to do

By placing a hold on cargo, you are requiring that the cargo either meet specific conditions of entry listed in this manual or you want to inspect the cargo for contamination or pests or to verify the contents. The hold is **not** removed until final action is taken. Depending on local practice, hold the cargo in one or more of the following ways:

- ◆ Stamp “HOLD” on Customs’ papers or shipping forms
- ◆ Complete PPQ Form 212, Cargo Hold and Record
- ◆ Use the Automated Commercial System (ACS) computer to electronically hold cargo

In some cases, the importer will request a special movement of cargo which is intended for off loading at your port. The request may be for movement to another port for clearance by CBP, export, transportation for export, or transfer to another container. To determine your next action, use [Table 2-2-2](#).

TABLE 2-2-2 Action to Take When Importer Requests Special Movement

If the importer requests that PPQ allow:	And when using the <i>Reference</i> chapter, the importation is:	Then:
Movement of held cargo to another port for entry into the U.S.	Ineligible for entry	1. DO NOT allow off loading ¹ 2. Follow procedures in the <i>Manual for Agricultural Clearance (MAC)</i>
	Eligible for entry (authorized to move to an approved establishment or eligible for entry under certification or permit)	AUTHORIZE movement under CBP control, but no further than the port at which the products will first be removed from the carrier ◆ Either FOLLOW the directions on the permit ◆ Or FOLLOW the special procedures for <i>Transiting of Products That Would Be Eligible for Entry</i> on page 2-4-35 under <i>Animal Products or By-Products Transiting for Export</i>
	Unrestricted animal products	1. AUTHORIZE movement 2. FOLLOW procedures in MAC
Exportation of held cargo		1. SAFEGUARD the cargo 2. FOLLOW <i>Animal Products or By-Products Transiting for Export</i> on page 2-4-35 3. If containers are leaking or packaging is flimsy or damaged, GO to Table 2-2-4
Transportation of held cargo for export		
Transfer of held cargo from one container to another		
Movement in transit overland through the U.S.A.	Eligible for entry	1. DO NOT ALLOW transiting ¹ 2. FOLLOW procedures in MAC
	Ineligible for entry	

1 Fresh (chilled or frozen) meat of ruminant or swine from countries known to be affected with FMD are **not** admissible and are **not** allowed to transit the United States. (This footnote **does not** apply to stores for use aboard the vessel.)

Step 3: Determine the Entry Requirements

Before continuing, find out if a VS permit covers the importation authorizing its entry. A VS permit takes precedence over the entry requirements listed in this manual. VS has the authority to write a permit for any animal product except for fresh (chilled or frozen) meat of ruminant or swine from countries or regions known to be affected with FMD. This meat is prohibited by the Tariff Act of June 17, 1930, Section 306(a).

TABLE 2-2-3 Determine Entry Requirements

If the animal product importation is:	Then:
Covered by a VS permit	GO to the Processing Importations Authorized Entry by a VS Permit on page 2-4-30
Not covered by a VS permit	CONTINUE to determine the entry requirements using the <i>Reference</i> chapter

Also, for commercial shipments **only**, FDA and FSIS require that the food product's label shows the container's ingredients and the net weight of the product in English. For meat products FSIS (**not** FDA) approves the label. If a commercial shipment **lacks** this information, you may wish to contact the appropriate agency. Officers are **not** required to translate and validate labels. The importer is responsible for satisfying entry requirements which include providing the proper documents in the proper format and language. If an officer or other capable source **cannot** confidently translate a label, then take the most restrictive action which may be to refuse entry.

Investigate the importation by looking at the accompanying documents and interviewing the importer. Collect the following information that will help you determine if there is any entry requirement that **must** be met regarding the importation of live animals, animal products, animal by-products, or related animal products. Using all the information you collect, look up any requirement that **must** be met in the *Reference* chapter.

- ◆ Name and description of the importation
- ◆ Animal class
- ◆ Country of origin
- ◆ Disease status of the country of origin
- ◆ Itinerary
- ◆ Degree of processing
- ◆ Intended use
- ◆ Certificate statements

◆ Additional information

Name and Description of the Importation

The name and description of the importation are usually listed on accompanying documents as the kind of product, name of product, or description of goods. As part of the description, note the quantity and weight of the importation. Quantity and weight are factors used when deciding to release meat or meat products **without** the importer considering FSIS requirements. Use these sections of this manual to help clarify the name and description: [List of Animal Names and Their Classes \(Appendix B\)](#), [Dictionary of Spanish Words Relating to Animal Product/By-Product Importations \(Appendix F\)](#), the [Glossary](#), and the [Index](#).

Animal Class

Animal class is the kind of animal from which the product was derived. If you **cannot** determine the animal class from the collected information, use [List of Animal Names and Their Classes \(Appendix B\)](#). This appendix will help you find the class of an animal when all you have is its name. [Appendix B](#) lists common, foreign, and scientific names of animals. [Figure 2-2-1](#) shows the designation given for each animal name listed.

(H) = Horse (equine)
(P) = Poultry (avian)
(R) = Ruminant (cattle, deer, goat, sheep)
(nr) = Regulate as a ruminant; although not a ruminant, can transmit diseases of ruminants (e.g., FMD and bovine tuberculosis)
(S) = Swine (pigs and their relatives)
(O) = Other, which represents a class of animal other than horse, poultry, ruminant or swine. Animal products and by-products of other classes are not restricted by the agricultural requirements of APHIS.

FIGURE 2-2-1 Animal Class Designations

Country of Origin

The country of origin can be the country where the product was processed, the country from where the importation was shipped, or the country where the animal was slaughtered. If the importation is frozen, cooked beef from foreign countries affected with FMD, the documents will list a specific, approved establishment within the country of origin. If the importation is meat that was slaughtered in one country and processed in another, and if required by regulation, the documents will list both countries.

Disease Status of the Country of Origin

The status of exotic foreign animal diseases in the country or region of origin is defined in USDA regulations. Use the [Foreign Countries and Disease Status \(Appendix C\)](#) to identify the diseases related to animal

product importations that occur or **do not** occur in a foreign country. **Figure 2-2-2** lists the abbreviations used to identify the disease statuses.

ASF—African swine fever
BSE—Bovine spongiform encephalopathy
CSF—Classical swine fever (also known as hog cholera)
CSF/SR—Classical swine fever with special requirements to apply
END—Exotic Newcastle disease
END/SR—Exotic Newcastle disease with special requirements to apply
FMD—Foot-and-mouth disease
FMD/SR—Foot-and-mouth disease free with special requirements to apply
HPAI (H5N1)—Highly pathogenic avian influenza subtype H5N1
SVD—Swine vesicular disease
SVD/SR—Swine vesicular disease free with special requirements to apply

FIGURE 2-2-2 Abbreviations for Exotic Animal Diseases

For importations of meat, special requirements (/SR) may apply as listed in **Figure 2-2-2**; e.g., CSF/SR, END/SR, FMD/SR, or SVD/SR. Even though a country is free from CSF, END, FMD, or SVD, the country supplements its national meat supply by importing meat from affected countries, imports live ruminants, swine or poultry from affected countries under conditions less restrictive than would be acceptable for importation into the United States, or has a common land border with an affected country. The "/SR" disease status category **only applies to meat, meat products, and edible meat by-products**.

If the country of origin is **not** known, use the most restrictive disease status for the importation.

Itinerary

The importation's itinerary is an account of which country the importation was produced and shipped from, what countries the importation may have transited, and the final destination of the importation.

If the importation transited a country which is known to be affected with diseases of concern, then sealing requirements would have to be met. If sealing requirements are **not** met, then the country of origin becomes that where the product transited, was off-loaded, was reprocessed, or was repackaged.

Some restricted importations are consigned to a final destination for further processing or treatment. In such cases, the final destination **must** be an approved establishment, plant, or warehouse that is listed in the ***Establishments Approved to Receive and/or Process Restricted Imported Animal By-Products (Appendix E)***. This appendix will help you identify and verify establishments in the United States that are approved to store and process restricted importations of

animal by-products. The approval given to each establishment is for a specific animal by-product or for a specific purpose. The establishments are listed alphabetically by State, and the animal by-product or purpose the establishment was approved to handle are also listed.

Use the URL that follows to get the most up-to-date information on approved establishments:

http://www.aphis.usda.gov/import_export/animals/animal_import/downloads/query-app-estab.html

Degree of Processing

The degree to which meat and meat products have been processed may be classified into the following:

- ◆ Cured and dried
- ◆ Cooked
 - ❖ Shelf stable
 - ❖ Canned, perishable (pasteurized canned)
 - ❖ Chilled or frozen
- ◆ Fresh
 - ❖ Chilled or frozen

Intended Use

Determining the intended use of the importation will help you identify the correct entry requirements. For example, the entry requirements for intestines will differ if the intended use is to contain food (casings), or to feed animals, or to make fertilizer (rendered product).

Certificate Statements

Statements that are entered on an accompanying certificate may attest to entry requirements. You need to know what the statements are to match and verify against established entry requirements.

Additional Information

Additional information may be needed for record keeping. This information includes the name of the carrier, date of arrival, nationality of carrier, bill of lading or air waybill number, port of lading, and name of the importer or broker for the shipment. This information is needed to complete other forms.

Step 4: Inspect the Importation

Match the information collected from accompanying documents and from importers with the actual importation. Many importations of animal products or by-products entering through air or maritime cargo are commercial.

Identify and validate that:

- ◆ The importation is what the documents state it is, including its degree of processing, quantity, weight, and packaging
- ◆ An appropriate permit, certificate, or letter from the shipper accompanies the importation
 - ❖ When reviewing permits, verify the identifying number, expiration date, and destination address
 - ❖ When reviewing foreign certificates, verify origin, destination, product description, and statements.

Examples and further information about foreign certificates and permits are detailed under the appropriate animal product or by-product in the *Reference* chapter and under [Appendix G, Certificates and Permits](#)

- ◆ All conditions are being met to allow entry of the importation

If there are major discrepancies between the importation and the accompanying documents or if the documents are missing, then refuse entry.

If there are minor discrepancies, then contact [PPQ-AQI-VMO](#) or [PPQ-VRS-Headquarters Personnel](#) for approval to continue clearing the importation.

Examine the containers to make sure that they are intact and **not** leaking or damaged in any way. All importations of restricted animal products or by-products **must** be in sturdy, leakproof containers. If the containers are flimsy, broken, or leaking, require that they be repackaged in sturdy, clean, leakproof containers. Clean and disinfect any leakage or spills. Seals **must** be intact and unbroken.

CBP-Agriculture Specialists (CBP-AS) at the first port of arrival **must** check all seals of break-bulk vessels carrying meat or milk.

TABLE 2-2-4 Determine Action to Take on Leaking or Damaged Container or Broken or Missing Seals

If the restricted importation is:	Then:
Leaking or packaged in flimsy or damaged containers	1. REQUIRE that the containers be replaced at the port of arrival before permitting the shipment to go forward 2. REQUIRE the importer to destroy any replaced containers by incineration 3. If leakage was detected, TAKE care of the leak; HAVE the importer clean and disinfect any contaminated surfaces (see Step 5: Take Action on Contaminants and Ticks on page 2-2-11)
In a container with a broken or missing seal	1. CONTACT PPQ-AQI-VMO or PPQ-VRS-Headquarters Personnel and provide all the collected information on the importation and the circumstances connected with the broken or missing seal 2. HOLD the importation until a satisfactory explanation is given and guidance from PPQ-AQI-VMO or PPQ-VRS-Headquarters Personnel is received 3. TAKE action according to PPQ, VRS directions

Cleaning and disinfecting **must** occur when contamination is found during your inspection. Also, be aware of possible tick infestation on importations of hides, bones, and trophies.

TABLE 2-2-5 Determine Action to Take Based on Results of Inspection

If as a result of your inspection you find:	Then:
<ul style="list-style-type: none"> ◆ Plant debris, hay and straw, or soil ◆ Manure, blood, or other known animal contaminants because leaking or spilling has occurred ◆ Ticks 	GO to Step 5: Take Action on Contaminants and Ticks on page 2-2-11
Importation to be clean and free of contaminants and ticks	GO to Step 6: Take Final Regulatory Action on page 2-2-15
Animal contamination related to a live animal importation	CONSULT local VS who is responsible for cleaning and disinfecting

Step 5: Take Action on Contaminants and Ticks

When an importation of prohibited or restricted animal products or by-products is contaminated because leaking or spilling has occurred, all the articles and surfaces that come in contact with the importation **must** be cleaned and disinfected before they are reused.

Also, when an importation of animal products or by-products is contaminated with plant debris, hay and straw, or soil all the articles and surfaces that come in contact with the importation **must** be cleaned and disinfected before they are reused.

Empty semen and embryo containers (sometimes manifested as nitrogen containers) and related animal products are included in this step because they automatically are considered contaminated and require cleaning and disinfection.

All ticks found on cargo are of interest to VS because ticks are vectors of animal diseases. It is necessary to identify and confirm the intercepted ticks to determine if quarantine action is needed.

Use [Table 2-2-6](#) that follows to determine your action on animal contaminants and ticks.

TABLE 2-2-6 Determine Action to Take on Contaminants and Ticks

If you find:	On:	Then:
Animal contamination	Containers, crates, boxes, drums, or related articles and surfaces such as docks or warehouses	CONTACT local VS personnel for cleaning and disinfecting
	Aircraft	CONTACT local VS personnel for cleaning and disinfecting
	Trucks transporting livestock from Mexico	GO to Trucks Transporting Livestock from Mexico on page 2-2-12
Plant debris, hay and straw, soil		CLEAN and DISINFECT the affected containers, articles, or surfaces according to Instructions for Cleaning and Disinfection on page 2-4-14
Empty semen or embryo containers		GO to Empty Semen and Embryo Containers on page 2-2-13
Ticks		GO to Ticks on page 2-2-14

Trucks Transporting Livestock from Mexico

If trucks transporting livestock from Mexico are found contaminated with animal material, **do not** allow entry until the trucks are returned to Mexico for cleaning.

Empty Semen and Embryo Containers

First, you **must** ensure that the semen or embryo containers are empty. Then you can take the appropriate action based on the country of origin of the semen or embryo.

Semen and embryo containers contain liquid nitrogen which may freeze or damage your skin. Avoid contact unless the container is free of liquid nitrogen.

1. Inspect the containers to determine whether there are any vials or straws left inside.

TABLE 2-2-7 Inspection of Semen and Embryo Containers

If:	And the containers:	Then:
Semen or embryo containers	Have vials or straws left inside	1. CONTACT PPQ-AQI-VMO or PPQ-VRS-Headquarters Personnel (see Appendix H) 2. TAKE action as directed by PPQ, VRS
	Are empty (free of vials and straws)	PROCEED to Step 2

2. Recall the country of origin and determine if you will clean and disinfect the empty containers.

TABLE 2-2-8 Determine Whether to Clean and Disinfect Empty Semen and Embryo Containers

If the country of origin or the country from where the containers were shipped is:	Then:
Canada	RELEASE; no cleaning and disinfecting are required
Foreign country other than Canada	1. CONTACT local VS personnel for cleaning and disinfecting 2. COMPLETE VS Form 1-86A (see the procedures for completing and distributing forms, Appendix K)

Ticks

All ticks found on cargo are of interest to VS because ticks are vectors of animal diseases. Cargo from the Western Hemisphere infested with the following ticks requires quarantine action because these ticks are the principle agents in the spread of bovine piroplasmosis (cattle fever):

- ◆ *Amblyomma variegatum*
- ◆ *Boophilus annulatus*
- ◆ *B. microplus*

Use [Table 2-2-9](#) to determine your action when ticks are found.

TABLE 2-2-9 Procedures to Follow When Ticks Are Found

If you are located at a PPQ/CBP office:	Then:
Along the Mexican border	1. SEND the ticks to the local PPQ identifier for identification 2. HOLD the infested importation until the ticks are identified and you receive a recommended action
Other than along the Mexican border	1. SEND the ticks to the National VS Laboratory in Ames, IA. Refer to the Steps for Sending Samples to NVSL on page 2-4-33 2. HOLD the infested importation until the ticks are identified and you receive a recommended action

Step 6: Take Final Regulatory Action

Based on the entry requirements and your inspection, take final regulatory action on the importation. Your action will resolve the hold placed on the cargo. To resolve the hold, take **one** of the three following regulatory actions:

- ◆ Release
- ◆ Authorize shipment to an approved establishment or warehouse (including approved defrost facilities)
- ◆ Refuse entry

Depending on the method of holding cargo at your port, document your final regulatory action using one of the following:

- ◆ Stamp the action taken on all copies of the Customs' and shipping forms
- ◆ Write the action taken on all copies of PPQ Form 212
- ◆ Attach a copy of the import documents to PPQ Form 212
- ◆ Use the ACS computer to post the action on the air waybill or the bill of lading

Your recorded action serves as notification to CBP and other interested parties that the cargo has met APHIS requirements or that the cargo is authorized to move. When you refuse entry to the importation and complete the appropriate forms (PPQ 254 or PPQ 523), CBP will get a copy documenting the disposition ordered against products still under their control. Also, if the importation is held pending final regulatory action, apply warning labels (PPQ Forms 214 and 244) according to port policy.

In specific situations identified in the *Reference* chapter of this manual, the final regulatory action will be to hold the importation and contact PPQ, VRS who will make the final decision.

Release

When you release a hold, you are allowing entry of the importation because it complies with APHIS agricultural requirements. Commercial importations of meat **must** also be cleared by FSIS.

Authorize Shipment to an Approved Establishment or Warehouse

When you authorize shipment to an approved establishment or warehouse, you are allowing entry of the importation, but restricting its movement to a final destination within the United States for further processing or treatment. This movement may be to an approved defrost facility. Refer to [Table 2-2-10](#) when authorizing shipment to an approved establishment.

TABLE 2-2-10 Action to Take on Cargo When Authorizing a Shipment to an Approved Establishment

If the importation is:	And the importation is:	Then:
Consigned to an approved establishment or warehouse	→	Go to Action to Take on Importations Consigned to an Approved Establishment or Warehouse on page 2-2-16
Consigned to an establishment or warehouse not approved	Meat or meat products	CONTACT PPQ-AQI-VMO or PPQ-VRS-Headquarters Personnel who will help the importer
	Animal products or by-products other than meat	GO to Action to Take on Importations of Animal Products or By-Products Other Than Meat Consigned to an Establishment or Warehouse Not Approved on page 2-2-17
Not consigned to an establishment, but which needs to be consigned to an approved one	→	GO to Action to Take on Importations Not Consigned to an Establishment or Warehouse, but Which Need to Be Consigned to such an Establishment on page 2-2-17

Action to Take on Importations Consigned to an Approved Establishment or Warehouse

Follow the steps below for action to take on importations consigned to an approved establishment or warehouse:

1. Safeguard the importation.
2. Stamp Customs' entry documents and shipping forms or update PPQ Form 212 or ACS to show the importation is authorized to a specific destination.
3. Examine the containers to make sure that they are intact and **not** leaking or damaged in any way. If the containers are flimsy, broken, or leaking, require that they be repackaged in sturdy, clean leakproof containers. Clean and disinfect any leakage or spills.
4. Ensure that all package labels and accompanying documents show the address of the approved establishment or warehouse. Require labels and documents to be rewritten if **not** accurate.
5. Complete VS Form 16-78. Refer to the procedures for completing and distributing forms in [Appendix K](#).
6. Ensure that the importation is moving under a bonded carrier or under Customs' bond.

Action to Take on Importations of Animal Products or By-Products Other Than Meat Consigned to an Establishment or Warehouse Not Approved

7. Seal the importation.

Provide the following options to the importer or the importer's agent on importations of animal products or by products **other than** meat consigned to an establishment or warehouse **not** approved:

1. Change the consignment to an approved establishment. After the importation is consigned to an approved establishment, follow the directions listed under [Action to Take on Importations Consigned to an Approved Establishment or Warehouse on page 2-2-16](#).
2. Apply to VS for approval of the designated establishment. A PPQ-VRS-Headquarters VMO notifies the port of entry that the establishment is approved. Follow the directions listed under [Action to Take on Importations Consigned to an Approved Establishment or Warehouse on page 2-2-16](#).
3. Export immediately. Follow the directions under the regulatory action, refuse entry.
4. Destroy the importation under APHIS supervision. Follow the directions under the regulatory action, refuse entry.

Action to Take on Importations Not Consigned to an Establishment or Warehouse, but Which Need to Be Consigned to such an Establishment

Take the following action on importations that are **not** consigned to an establishment or warehouse, but need to be consigned to such an establishment:

1. Explain to the importer why the importation **must** go to an approved establishment.
2. Use [Appendix E, List of Establishments Approved to Receive and/or Process Restricted Imported Animal By-Products](#) to help the importer choose an approved establishment, follow the directions under [Step 1: Classify the Importation on page 2-2-2](#).

APHIS **does not** recommend one establishment over another.

3. If the importer chooses to immediately export the importation under APHIS supervision, then refuse entry. Follow the directions under the regulatory action, [Refuse Entry](#).

Refuse Entry

Refuse entry when the importation is **not** eligible for entry¹ according to APHIS' agricultural requirements.

The following options of disposition are available to the importer:

- ◆ Immediate export
- ◆ Destruction by the importer under APHIS supervision

If a shipment is abandoned to CBP, then incinerate the importation and complete PPQ Form 254 to document the incineration.

Continue to [Table 2-2-11](#).

TABLE 2-2-11 Action to Take When a Shipment Is Not Eligible for Entry

If the shipment:	And the importer chooses to:	Then:
Is not eligible for entry	Immediately export	1. SAFEGUARD the importation 2. REQUEST a new air waybill or bill of lading 3. STAMP the shipping document with a warning "For Export Only" 4. WATCH any change of container and loading onto exporting vessel 5. DISINFECT or destroy used containers 6. COMPLETE PPQ Form 523 to document disposition
	Destroy the importation under APHIS or CBP supervision	1. SPECIFY that the importation must be incinerated or sterilized ¹ . If the importer wants to destroy the importation in a different manner, then contact PPQ-AQI-VMO or PPQ-VRS-Headquarters Personnel to approve the final disposition 2. SUPERVISE the destruction 3. COMPLETE PPQ Form 523 to document disposition
	Authorize shipment to an approved establishment ²	1. CONFIRM there is an approved establishment for the specific article before forwarding the shipment (see List of Establishments Approved to Receive and/or Process Restricted Imported Animal By-Products on page E-1-1) 2. If an approved establishment is not listed for the specific article, then contact the local PPQ-AQI-VMO (see PPQ-AQI-VMO on page H-1-2) 3. If there is an approved establishment, then HAVE the importer make arrangements with the approved establishment 4. AUTHORIZE SHIPMENT under seal with VS Form 16-78 (see Appendix K to complete form)

¹ If sterilized, then the importation **must** be cooked to an internal temperature of 212° F for 30 minutes.

² If the importation is meat or related products and by-products, a violation report and investigation may be required. Contact PPQ, VRS.

- 2 There are **no** approved establishments for products (such as bones or trophies) that are prohibited from BSE-affected countries or from countries categorized as being at minimal risk for BSE; these shipments **must** be re-exported or destroyed. Milk and milk products are **not** prohibited from BSE-affected countries. FSIS facilities are **not** considered ASPHIS-approved establishments.

Documenting Violations

When cargo is moved **without** the proper treatment or inspection and CBP release, then regulations have been violated by the individual or party responsible for the movement—the violator moved the cargo which **did not** yet meet the requirements of a regulation. Specifically, when meat or fresh animal products are under a CBP hold and are moved **without** your being presented with the required certification or permit, then regulations have been violated.

Document all violations by completing PPQ Form 518, Report of Violation, and by conducting an investigation of the incident. Refer to the *Manual for Agricultural Clearance (MAC)* for instructions on how to complete PPQ Form 518 and how to conduct an investigation and assemble a case file.

Use [Table 2-2-12 on page 2-2-19](#) to identify your authority when documenting violations.

TABLE 2-2-12 Determine the Authority to Identify When Documenting Violations

If the importation is:	Then your authority is:
<ul style="list-style-type: none"> ◆ Pet birds ◆ Hatching eggs 	9CFR Part 93
<ul style="list-style-type: none"> ◆ Semen ◆ Embryos 	9CFR Part 98
Edible animal products such as: <ul style="list-style-type: none"> ◆ Meat and meat products ◆ Milk and milk products ◆ Eggs 	9CFR Part 94
Inedible animal by-products such as: <ul style="list-style-type: none"> ◆ Bones ◆ Hides ◆ Skins ◆ Hay, straw 	9CFR Part 95
Casings	9CFR Part 96
Biological products such as viruses, serum, toxins that are intended for use in treating animals	9CFR Part 104
<ul style="list-style-type: none"> ◆ Organisms ◆ Vectors 	9CFR Part 122

Step 7: File the Documents and Associated Paperwork

Documents and associated paperwork are kept to provide information in case of litigation. An accessible filing system will enable you to justify the regulatory actions you took in case of audits or requests from the Office of the Inspector General.

1. Decide on the filing system that is most practical for your location. Devise one that keeps the records complete and accessible. File by subject matter (for example, bones, casings, eggs, meat, trophies, etc.). Two methods currently being used are as follows:
 - ❖ Behind subject matter, file alphabetically by permittee, company, or importer's name
 - ❖ Behind subject matter, file chronologically by month and year
2. Select the documents that need to be filed. At a **minimum**, file the following:
 - ❖ Copy of the VS permit (if issued)
 - ❖ Customs entry
 - ❖ Invoice
 - ❖ Lading or airway bill
 - ❖ Meat certificate or other certification accompanying the shipment (certification that details processing, identifies country of origin, or provides country of processing)
3. Maintain each file for a minimum of three years.

Veterinary Regulatory Support will audit these files when conducting Port Reviews.

Introduction

The *Processing Passenger Baggage* information presented in this section is a supplement to the guidelines, directions, and policy in the *Manual for Agricultural Clearance (MAC)*, and the general procedures for clearing regulated cargo in this manual.

Materials Needed

You will need the following items to clear regulated animal importations in passenger baggage:

- ◆ *Animal Product Manual (APM)*
- ◆ Bolt cutters
- ◆ Brochure handouts
- ◆ Can opener
- ◆ Container or receptacle with a tight fitting lid for placing contraband
- ◆ Disinfectants for footwear
- ◆ Disposable gloves
- ◆ Hand lens
- ◆ Luggage keys
- ◆ Paper or plastic bags for separating and identifying contraband
- ◆ Paper towels
- ◆ Pocket knife
- ◆ Tape or twine for resealing and safeguarding packages
- ◆ Various forms (VS Forms 10-4, 16-78, 17-8; PPQ Form 277; Customs Form 6059B; and APHIS Form 7091)

Step 1: Classify the Importation

When reviewing the written Customs Declaration (Customs Form 6059B), interviewing the passenger¹, inspecting passenger's baggage, or screening baggage using a detector dog or an X-ray system, consider the following criteria. Use these criteria when determining if an importation is of animal origin or related to an animal.

¹ If when interviewing the passenger, you discover that the individual **doesn't** speak English, use a Customs Declaration Form (Customs Form 6059B) and point to the appropriate text to ask the questions. See [Customs Form 6059B, Customs Declaration](#) on [page 2-3-16](#) for samples of the form in Arabic, Chinese, English, French, German, Italian, Japanese, Korean, Portuguese, Russian, and Spanish.

Overview of Criteria to Use to Determine if an Importation Is of Animal Origin or Related to an Animal

- ◆ Described using the name of an animal
- ◆ From an animal
- ◆ Is a live animal
- ◆ Likely to have come in contact with animals or parts of an animal

FIGURE 2-3-1 Criteria to Use for Determining Whether an Importation Is of Animal Origin or Related to an Animal

Step 2: Refer the Importation

After you determine the importation is of animal origin or related to an animal, refer the passenger to secondary inspection where a more detailed interviewing of the passenger and a visual examination of the baggage will be done.

In secondary inspection, further classify the importation as a live animal, animal product, animal by-product, or related animal product using **Table 2-3-1**. Use other sections of this manual to help clarify the information you receive from interviewing the passenger and examining the importation. See the *List of Animal Names and Their Classes (Appendix B)*, *Guide to Animal Product and By-Product Labels (Appendix D)*, *Dictionary of Spanish Words (Appendix F)*, the *Glossary*, and the *Index*.

TABLE 2-3-1 Classify an Importation as Live Animal, Animal Product, Animal By-Product, or Related Animal Product

If the importation is:	And its purpose is for:	Then classify as:
<ul style="list-style-type: none"> ◆ Pet birds ◆ Semen, embryos ◆ Organisms or vectors 		Live animals
From an animal	Human consumption such as: <ul style="list-style-type: none"> ◆ Casings ◆ Edible bird nests ◆ Eggs ◆ Meat ◆ Milk ◆ Processed products containing meat 	Animal products
	Manufacturing, research, biological or pharmaceutical products, testing, aesthetics, and recreation such as: <ul style="list-style-type: none"> ◆ Animal waste ◆ Blood ◆ Bones ◆ Casings ◆ Extracts and derivatives of organs and glands ◆ Hides ◆ Organs and glands ◆ Trophies 	Animal by-products
<ul style="list-style-type: none"> ◆ Inedible bird nests ◆ Footwear ◆ Straw and hay 		Related animal products

Handling Passengers in Transit

See [Handling Passengers That Are In Transit](#) on page A-1-2.

Step 3: Determine the Entry Requirements

Veterinary Services **prohibits** the hand carrying of certain biological agents such as those moving in contradiction of the permit. Therefore, follow these directions in handling such hand-carried biological agents:

1. Review the accompanying VS Form 16-6A, Import Permit.
2. Check if the agent is moving in contradiction¹ of the permit.
3. If the biological agent is moving in contradiction of the permit, then confiscate the biological agent, and contact the National Center for Import and Export at 301/734-3277, for directions on proper storage, transport, and destruction of the materials.

- 1 For example, the VS Form 16-6A, Import Permit, specifies that “imported materials **must** be shipped by a commercial carrier,” yet the biological agent is being hand carried. The biological agent would be moving in contradiction of the permit.

Important

Before continuing, find out if a VS permit covers the importation authorizing the importation's entry. A VS permit takes precedence over the entry requirements listed in this manual.

TABLE 2-3-2 Determine if the Importation Is Admissible Using Information Collected

If the importation is:	And the animal product is:	Then for the regulatory action:
Covered by a VS permit	→	GO to Processing Importations Authorized Entry by a VS Permit on page 2-4-30
Not covered by a VS permit	Meat or eggs	Go to Appendix A, Guide to Entry Status of Animal Products in Passenger Baggage or Mail on page A-1-1
	Other than meat or eggs	<ol style="list-style-type: none"> 1. GO to the <i>Reference</i> chapter 2. REGULATE the same as for a commercial entry

Investigate the importation by looking at accompanying documents or labels, and by interviewing the passenger. Officers are **not** required to translate and validate labels. The importer is responsible for satisfying entry requirements which includes providing the proper documents in the proper format and language. If an officer or other capable source

cannot confidently translate a label, then take the most restrictive action which may be to refuse entry. Collect the following information to help you determine if there are entry requirements:

- ◆ Name and description of the importation
- ◆ Animal class
- ◆ Country of origin and the country's disease status
- ◆ Intended use
- ◆ Degree of processing
- ◆ Certificate statements

Name and Description of the Importation

If the item is commercially packaged, the name and description will be identified on the container. If the item is **not** commercially packaged, the name and description **must** come from the passenger. To be enterable, the importation **must** have adequate proof of origin (see [page A-1-19](#)). Use other sections of this manual to help clarify the name and description. See the [List of Animal Names and Their Classes \(Appendix B\)](#), [Guide to Animal Product and By-Product Labels \(Guide to Animal Product and By-Product Labels\)](#), [Dictionary of Spanish Words \(Appendix F\)](#), the [Glossary](#), and the [Index](#).

Your investigative techniques will prove valuable in determining the contents of containers and cans. Be particularly suspicious of canned products from Taiwan. The labels on products regularly sold by some supermarkets and food companies state the product's name in English, but **do not** mention meat. However, on the label in a block about 1 inch square appears the Chinese character for meat (see [Figure 2-3-2](#)). Also, containers and cans labeled as preserved fruit and tea often contain meat (see [Appendix D, A Guide to Animal Product and By-Product Labels](#)).

FIGURE 2-3-2 Chinese Character for Meat

Animal Class

Animal class is the kind of animal from which the product was derived. If you **cannot** determine the animal class from the collected information, use [List of Animal Names and Their Classes](#).

Country of Origin

Unless identified on the package label or documented on an official certificate, company-issued statement, or invoice, consider the country of origin as the country from which the carrier has arrived. If more than one country is involved, consider the most restricted country as the country of origin.

Disease Status of the Country of Origin

The disease status of the country of origin is identifying the exotic animal diseases that are known to exist in that country. Use the [List of Foreign Countries and Their Disease Status](#) on page C-1-1 to identify the disease related to animal importations that occur or **do not** occur in a foreign country. If the country of origin is **not** known, use the most restrictive disease status for the importation.

Destination

Some restricted importations are consigned to a final destination for further processing or treatment. In such cases, the final destination **must** be an approved establishment, plant, or warehouse that is listed in [List of Establishments Approved to Receive and/or Process Restricted Imported Animal By-Products](#) on page E-1-1 ([Appendix E](#)).

Degree of Processing

Degree of processing **only** pertains to importations of animal products and by-products. At the beginning of the *Procedures* chapter, information is given on how the degree of processing correlates with disease risk. The information presented on determining shelf stability has been repeated here.

When products have been made shelf stable by heating in a hermetically sealed container (i.e., retorted), then the products may be released **except** for ruminant products or ruminant material from a country or region that is affected with BSE or poultry products or poultry material from a country or region that is affected with HPAI (H5N1).

Determining shelf stability of meat in containers that accompany passengers is a professional judgement. You **cannot** adequately determine the degree of processing if **no** certificate accompanies the importation. You **must** be confident that the meat or meat products were commercially cooked in the container. If you are **not** sure, then seize the product.

Historically, PPQ, VRS has supported the restrictive actions taken by individual officers based on the lack of evidence necessary to take the proper regulatory action.

Use the following guidelines to determine if meat was cooked sufficiently enough in the containers thereby rendering the meat to be hermetically sealed and shelf stable. Keep in mind that containers vary in appearance. Rely on your practical experience and professional judgement. Take the following steps:

1. Determine if the container is acceptable.

TABLE 2-3-3 Determine if Meat Is Hermetically Sealed and Shelf Stable Based on How the Meat Was Cooked in the Container

If the container is a:	Then:
<ul style="list-style-type: none"> ◆ Can ◆ Crock ◆ Flexible foil pouch ◆ Flexible plastic container ◆ Flexible plastic tray ◆ Jar ◆ Pop-top can 	Examine the container using Figure 2-3-3
<ul style="list-style-type: none"> ◆ Transparent plastic pouch ◆ Container labeled as sterile filling or pasteurized 	1. JUDGE the contents as not shelf stable 2. TAKE appropriate action

2. Examine the container. Match the properties of the container with those listed in Figure 2-3-3. Then follow Table 2-3-4.

Properties of containers that are hermetically sealed and shelf stable:	Properties of containers that are not hermetically sealed and shelf stable:
The ends or lid of the container is concave, inwardly curved, flat, and smooth	The ends or lid is swelled, bulged, or outwardly curved
If the container is a can, the seal is seamless with no evidence of soldering	The seal shows evidence of soldering
When you press the ends or lid of the container, the ends or lid gives only slightly	When the container lid is pressed, you feel the lid move inward or you hear the lid click
If the container is a foil pouch, there is liquid inside surrounding the meat and the meat moves when you massage the foil pouch	<ul style="list-style-type: none"> ◆ The foil pouch is molded snugly around the meat, with little or no liquid inside ◆ You are unable to move the meat when you massage the pouch ◆ There may be instructions on the pouch to further cook the meat beyond warming up
There is no odor	There is an objectionable odor
The container is dry and clean	The container shows evidence of leaking
The label is commercially printed	The label is handwritten
If the container is a flexible plastic container or flexible plastic tray, the container or tray is accompanied by proof (commercially printed label statement, government certification) that the product was hermetically sealed and then cooked by a true retort process	The flexible plastic container or tray is not accompanied by proof (commercially printed label statement, government certification) that the product was hermetically sealed and then cooked by a true retort process

FIGURE 2-3-3 List of Container Properties Describing Both Those That Are and Are Not Hermetically Sealed and Shelf Stable

TABLE 2-3-4 Determine if Meat Is Hermetically Sealed and Shelf Stable Based on Your Examination of the Container

If:	Then:
One or more of the Properties of Containers that Are Not Hermetically Sealed and Shelf Stable, as listed in Figure 2-3-3 applies	<ol style="list-style-type: none"> 1. JUDGE the contents as not hermetically sealed and shelf stable 2. TAKE appropriate action
All of the Properties of Containers that Are Hermetically Sealed and Shelf Stable, as listed in Figure 2-3-3 apply	<ol style="list-style-type: none"> 1. CONSIDER that, in most probability, the contents are hermetically sealed and shelf stable 2. CONTINUE to 3., and OPEN a container, if you are still unsure

3. Open a container. Follow **Table 2-3-5**.

TABLE 2-3-5 Determine if Meat Is Hermetically Sealed and Shelf Stable Based on Your Inspection of the Contents

If the contents:	Then:
Appear processed and any fat present was melted by cooking EXAMPLE The fat will be greasy, gelatinous, or lard-like in appearance. Think of what bacon fat looks like after frying and the grease has congealed in the pan.	1. JUDGE the contents as hermetically sealed and shelf stable
Are unprocessed or you see pieces of fat EXAMPLE The fat will be more intact. Think of what fat looks like in a can of pork and beans.	1. JUDGE the contents as not hermetically sealed and shelf stable 2. TAKE appropriate action

The dry-pack, canned chorizo or sausage **does not** meet the requirements of cooking or sealing. Chorizos are sealed **after** heating and are **not** commercially cooked in the container. Home produced or small butcher shop produced cans are **not** always sterile or completely shelf stable. Therefore, you need to look at labels and markings on the cans that will indicate whether the product was commercially processed.

Intended Use

Determining the intended use of the importation will help you identify the correct entry requirements. An example of an intended use would be a small quantity of milk for personal use from a country free from FMD.

Certificate Statements

Statements that are entered on an accompanying certificate may attest to entry requirements. You need to know what the statements are in order to match and to verify them against established entry requirements.

Step 4: Inspect the Importation

If a certificate, permit, or invoice accompanies the importation, then match the information collected with the actual importation. Identify and validate the following:

- ◆ The importation is what the documents state the importation is, including the degree of processing, quantity, weight, and packaging
- ◆ An appropriate permit or certificate accompanies the importation
 - ❖ When reviewing permits, verify the identifying number, expiration date, and destination address
 - ❖ When reviewing foreign certificates, verify origin, destination, product description, and statements
 - ❖ Examples and further information about foreign certificates and permits are detailed under the appropriate animal product or by-product in the *Reference* chapter and under [Appendix G, Certificates and Permits](#)
- ◆ All conditions are being met that will allow entry of the importation

Look at the packaging and containers for possible breaks, leaks, and spills. All importations of restricted animal products or by-products **must** be in sturdy, leakproof containers. They **must** be intact and **must not** be leaking or damaged in any way that could provide the possibility of contamination. Additional cleaning and disinfecting **must** occur when contamination is found during your inspection. Check the article (like footwear) for animal contamination.

TABLE 2-3-6 Determine Action Based on Results of Inspection

As a result of your inspection you find:	Then:
Restricted animal products or by-products packed in a leaking, damaged, or otherwise unacceptable container	1. SEIZE the restricted animal products or by-products; and/or, 2. CLEAN and DISINFECT any contaminated surfaces according to Instructions for Cleaning and Disinfection on page 2-4-14
Manure, blood, or other animal contaminant	
Plant debris, hay and straw, soil or manure	GO to Table 2-3-7
No contamination; the article is clean	GO to Step 5: Take Final Regulatory Action on page 2-3-12

TABLE 2-3-7 Action to Take on Plant Debris, Hay and Straw, Soil, or Manure Contaminates

If the contamination is associated with:	And the article was used in:	Then:
A live animal importation	→	CONSULT local VS who is responsible for cleaning and disinfecting
Adhering to any of the following: ◆ Farm machinery ◆ Footwear ◆ Vehicle	Canada, but not Newfoundland or that portion of Central Saanich on Vancouver Island in the province of British Columbia east of the West Saanich Road	GO to “Step 5: Take Final Regulatory Action” on page 2-3-12
	A country other than Canada, or if Canada, Newfoundland or that portion of Central Saanich on Vancouver Island in the province of British Columbia east of the West Saanich Road ¹	1. HAVE the individual REMOVE the plant debris, hay and straw, soil or manure 2. DISINFECT the article according to the <i>Special Procedures</i> for Disinfection on page 2-4-13

¹ Countries or regions where harmful, cyst-forming nematodes are found.

Step 5: Take Final Regulatory Action

Given the results of your inspection and determination of the entry requirements, you **must** take final regulatory action on the importation. Take **one** of the following four regulatory actions:

- ◆ Release
- ◆ Refuse entry
- ◆ Authorize shipment to an approved establishment or warehouse (including approved defrost facilities)
- ◆ Give the importer the opportunity to get a permit

In specific situations, the final regulatory action will be to hold the importation and contact PPQ, VRS, who will make the final decision. Occasionally, PPQ will hold an importation until a permit can be obtained from VS. These situations may be as follows:

- ◆ Importer of a costly importation objects to a determination that the importer **does not** meet the entry requirements
- ◆ Importation is intended for scientific research

Clearing passengers and their baggage is a high priority of PPQ since this represents an avenue of risk for an animal disease outbreak. Unless you are clearing an importation that is accompanied by the required certificate or permit, most of your final regulatory actions will be to release or to refuse entry.

Document your final regulatory action by doing the following:

1. Write the action taken, along with your initials, on the Customs Form 6059B, Customs Declaration.
2. Fill in PPQ Form 277, Baggage Information Data.

Release

When you release an importation, you are allowing entry of the importation because the importation complies with APHIS agricultural requirements.

Refuse Entry

When you refuse entry, seize the importation and safeguard the importation to disposition because the importation is **not** eligible for entry according to APHIS' agricultural requirements. Refuse entry to the animal product or by-product for any of the following reasons:

- ◆ You could **not** determine shelf stability
- ◆ You could **not** identify the product, the product's animal class, or the product's origin
- ◆ The product was packed in a leaking, damaged, or unacceptable container

Authorize Shipment to an Approved Establishment or Warehouse

When you authorize shipment to an approved establishment or warehouse, you are allowing entry of the importation, but restricting the importation's movement to a final destination within the United States for further processing or treatment.

Refer to [Table 2-3-8](#) when authorizing shipment to an approved establishment.

TABLE 2-3-8 Action to Take on Passenger Baggage When Authorizing a Shipment to an Approved Establishment

If the product is:	Then:
Consigned to an approved establishment or warehouse	GO to Action to Take on Importations Consigned to an Approved Establishment or Warehouse on page 2-3-14
Consigned to an establishment or warehouse not approved	GO to Options to Give Importer on Importations Consigned to an Unapproved Establishment or Warehouse on page 2-3-14
Not consigned to an establishment, but needs to be consigned to an approved one	GO to Action to Take on Importations Not Consigned to an Establishment or Warehouse, but Needs to Be on page 2-3-15

Action to Take on Importations Consigned to an Approved Establishment or Warehouse

Take the following steps for importations consigned to an approved establishment or warehouse:

1. Safeguard the importation.
2. Stamp Customs' entry documents and shipping forms or update PPQ Form 212 or ACS to show the importation is authorized to a specific destination.
3. Examine the containers to make sure that they are intact and **not** leaking or damaged in any way. If the containers are flimsy, broken, or leaking, then require that they be repackaged in sturdy, clean leakproof containers. Clean and disinfect.
4. Ensure that all package labels and accompanying documents show the address of the approved establishment or warehouse. Require labels and documents to be rewritten if **not** accurate.
5. Complete VS Form 16-78. Refer to the procedures for completing and distributing forms in [Appendix K](#).
6. Ensure that the importation is moving under a bonded carrier or under Customs' bond.
7. Seal the importation.

Options to Give Importer on Importations Consigned to an Unapproved Establishment or Warehouse

Give the importer of importations of animal products or by-products consigned to an **unapproved** establishment or warehouse the following options:

1. Redirect the consignment to an approved establishment. Follow the directions listed under [Action to Take on Importations Consigned to an Approved Establishment or Warehouse](#) listed above.
2. Apply to VS for approval of the designated establishment. Follow the directions listed under Step 1.
3. Export immediately. Follow the directions under the regulatory action [Refuse Entry](#) on page 2-3-13.

**Action to Take
on Importations
Not Consigned
to an
Establishment
or Warehouse,
but Needs to Be**

4. Destroy the importation under APHIS supervision. Follow the directions under the regulatory action **Refuse Entry**.

Take the following steps on importations **not** consigned to an establishment or warehouse, but needs to be:

1. Explain to the importer why the importation **must** go to an approved establishment.
2. Use **Appendix E, List of Establishments Approved to Receive and/or Process Restricted Imported Animal By-Products**, to help the importer choose an approved establishment. When the importation is consigned to an approved establishment, follow the directions under Step 1.

Important

PPQ **never** recommends one establishment over another.

3. Refuse entry if the importer chooses to immediately export the importation under APHIS supervision. Follow the directions under the regulatory action **Refuse Entry** on page 2-3-13.

Assessing Civil Penalties

If you judge the passenger intentionally tried to smuggle animal products or by-products that are prohibited or have restrictions that **cannot** be met, then issue a civil penalty if **all** the following criteria are met:

- ◆ The passenger made a negative declaration (oral or written)
- ◆ You gave the passenger an opportunity to amend their declaration
- ◆ You have the legal authority to assess the civil penalty (see **Table 2-3-9**)

If you have the authority to refuse entry to an article, then you have the legal authority to assess a civil penalty. You have authority to issue a civil penalty for articles that are outright prohibited, that require treatment as a condition of entry, that require foreign certification, but lack that certification, or that require a written permit, but lack such a permit. Go to the procedures on assessing civil penalties and completing PPQ Form 591, Notice of Alleged Violation, in *Manual for Agricultural Clearance*.

Use **Table 2-3-9** to identify your authority when documenting violations.

TABLE 2-3-9 Identify Your Authority When Documenting Violations

If the importation is:	Then your authority is:
<ul style="list-style-type: none"> ◆ Pet birds ◆ Hatching eggs 	9CFR Part 93
<ul style="list-style-type: none"> ◆ Semen ◆ Embryos 	9CFR Part 98
Edible animal products such as: <ul style="list-style-type: none"> ◆ Meat and meat products ◆ Milk and milk products ◆ Eggs 	9CFR Part 94
Inedible animal by-products such as: <ul style="list-style-type: none"> ◆ Bones ◆ Hides ◆ Skins ◆ Hay ◆ Straw 	9CFR Part 95
<ul style="list-style-type: none"> ◆ Casings 	9CFR Part 96
Biological products that are intended for use in treating animals or diagnosing animal diseases, such as the following: <ul style="list-style-type: none"> ◆ Vaccines ◆ Serum ◆ Test kits 	9CFR Part 104
<ul style="list-style-type: none"> ◆ Organisms ◆ Vectors 	9CFR Part 122

美國海關服務處歡迎您來到美國

“美國海關服務處”負責預防違禁物品非法進入美國。海關官員有權可以向您進行盤查以及檢查您和您的個人物品。如果您是被選擇做檢查的旅客之一的話，我們會以禮貌、專業、和尊重的態度對待您。“海關督察員”和“旅客服務代表”可以為您回答問題。您可以利用意見卡來提供意見回饋。

重要資訊

美國居民—申報您在海外獲取並攜帶進入美國的所有物品。
訪客(非居民)—申報所有將留在美國之物品的價值。
 在這張表格中申報所有的物品並以美金價值填寫。若是禮物，請以零售價值填寫。
稅金—稅金由海關官員決定。美國居民通常有資格隨身攜帶價值 800 美元的免付稅物品。訪客(非居民)通常有資格攜帶價值 100 美元的免付稅物品。超過免付稅價值的第一個 1,000 美元將以目前的利率計算稅金。
管制物品、機要物品、以及毒性物品—一般是禁止攜帶入境的。

謝謝，歡迎來到美國。

攜帶貨幣或幣值票據，不論金額多少，都是合法的。但是，如果您攜帶進入美國或從美國帶出超過 10,000 元(美金或等值外幣，或兩者的組合)，根據法律規定，您需要向“美國海關服務處”以“海關表格 4790”(Customs Form 4790) 提出報告。幣值票據包括硬幣、貨幣、旅行支票和持票人形式的流通票據，例如個人或銀行本票、證券或債券。如果是他人替您攜帶貨幣或幣值票據，您也一樣必須用“海關表格 4790”申報。沒有提出必要的報告或申報您攜帶物品的總價值可能會導致所有的貨幣或幣值票據被扣留，並且，您也可能會受到民事和/刑事的制裁。閱讀過以上的重要資訊並做出誠實的申報後，請在本表格反面簽名。

物品描述 (您可以使用另外一張“表格 6059B”來描述列的物品)	價值	僅限海關使用

總價值

減少紙上作業注意通知：1995 年“減少紙上作業法案”頒布，我們一定將會採辦。我們為什麼要收集這些資料，我們能利用這些資料，以及您是否一定要提供這些資料給我們。本表格收集資料是為了執行美國“海關”、“海關”、稅收等法律目的。海關將以此表格上您提供的資料以確保其符合法律規定。並且可以讓我們計算和收繳正確的稅款。您的資料是法律規定的。除非其具有有效的 OMB 控制號碼，否則海關不可進行或資料資料的收集。而個人也不需提供資料的收集。資料人的權利而定，有關此資料的收集。每個海關或記錄保存者平均估計需要幾分鐘的時間來完成，有關此時間估計給予海關官員以及減少時間的資料直接投資於 U.S. Customs Service, Report Customs Office, Information System Branch, Washington, DC 20503。以及 Office of Management and Budget, Paperwork Reduction Project (1015-0041), Washington, DC 20503。未經美國海關收管管理人的批准，不可擅自複製此表格。

Customs Form 6059B (Dutch) (11/02)

FIGURE 2-3-8 Example of Customs Form 6059B, Customs Declaration, in Dutch (front)

**De Amerikaanse douanediens ten u welkom
 in de Verenigde Staten van Amerika**

De Amerikaanse douanediens ten u welkom in de Verenigde Staten te beschermen tegen de illegale invoer van verboden artikelen. Douanebeambten zijn bevoegd om u vragen te stellen en u en uw persoonlijke bezittingen te onderzoeken. Indien u één van de weinige reizigers bent die worden geselecteerd voor een onderzoek, zult u worden behandeld op een beleefde, professionele en waardige manier. Douane-inspecteurs en passagiersservice-vertegenwoordigers zijn beschikbaar om uw vragen te beantwoorden. U kunt commentaar of feedback geven op de daartoe voorziene kaarten.

Belangrijke informatie

Amerikaanse ingezetenen – geef alle artikelen aan die u hebt gekocht in het buitenland en in de Verenigde Staten brengt.

Bezoekers (niet-ingezetenen) – geef de waarde aan van alle artikelen die in de Verenigde Staten zullen blijven.

Geef alle artikelen aan op dit aangifteformulier en geef de waarde in US dollar aan. Geef de kleinhandelsprijs van geschenken aan.

Accijnzen – de douanebeambten zullen de accijnzen bepalen. Amerikaanse ingezetenen kunnen gewoonlijk \$800 aan artikelen belastingvrij invoeren. Voor bezoekers (niet-ingezetenen) is deze vrijstelling gewoonlijk \$100. De accijnzen worden vastgesteld tegen het huidige tarief op de eerste \$1.000 boven de vrijstelling.

Gereguleerde stoffen, obscene artikelen en giftige stoffen worden algemeen beschouwd als verboden artikelen.

Dank u en welkom in de Verenigde Staten.

Het vervoer van geld of **geldelijke instrumenten** is, ongeacht het bedrag, wettelijk. Indien u echter meer dan \$10.000 (Amerikaans geld of het equivalent in buitenlandse valuta's of een combinatie van beide) in of buiten de Verenigde Staten brengt, bent u volgens de wet verplicht om dit aan te geven op douaneformulier 4790 bij de Amerikaanse douanediens. Geldelijke instrumenten omvatten muntstukken, papiergeld, reischeques en stukken aan toonder, zoals persoonlijke cheques of bankcheques en aandelen of obligaties. Indien iemand anders het geld of de geldelijke instrumenten voor u in zijn/haar bezit heeft, moet u ook hiervan aangifte doen op douaneformulier 4790. Indien u hiervan geen aangifte doet of het *totale* bedrag dat u in uw bezit heeft, niet aangeeft, kan dit resulteren in de confiscatie van *alle* geld of geldelijke instrumenten en kunt u worden onderworpen aan burgerrechtelijke straffen en/of strafrechtelijke vervolging. **PLAATS UW HANDTEKENING OP DE ANDERE ZIJDE VAN DIT FORMULIER, NADAT U DE BOVENSTAANDE BELANGRIJKE INFORMATIE HEBT GELEZEN EN EEN WAARHEIDSGETROUWE AANGIFTE HEBT GEDAAN.**

BERICHT M.B.T. PAPERWORK REDUCTION ACT (WET VOOR VERMINDERING ADMINISTRATIE): volgens de Paperwork Reduction Act van 1995 moeten wij u melden waarom wij deze informatie verzamelen, hoe wij deze zullen gebruiken en of u deze aan ons moet verstrekken. De op dit formulier verzamelde informatie is vereist om de Amerikaanse wetten m.b.t. douane, landbouw en valuta uit te voeren. De douane vereist de informatie op dit formulier om te verzekeren dat reizigers deze wetten naleven en om ons in staat te stellen om het juiste bedrag aan accijnzen en belastingen te bepalen en te verzamelen. U bent verplicht om ons een antwoord te geven. Een instantie mag geen informatie verzamelen of deze actie sponsoren en een persoon is niet verplicht om hierop te reageren, tenzij het formulier een geldig OMB-controlnummer heeft (OMB: Office of Management and Budget). De geschatte gemiddelde tijd voor het verzamelen van deze informatie is 4 minuten per respondent of archiver, afhankelijk van de individuele omstandigheden. Opmerkingen betreffende de nauwkeurigheid van deze geschatte tijd en suggesties voor het verminderen van deze tijd kunt u richten aan U.S. Customs Service, Reports Clearance Officer, Information Services Branch, Washington, DC 20229 en het Office of Management and Budget, Paperwork Reduction Project (1515-0041), Washington, DC 20503. **DIT FORMULIER MAG NIET WORDEN VERVEELVOUDIGD ZONDER DE GOEDKEURING VAN DE U.S. CUSTOMS FORMS MANAGER.**

(Signature)

Date (day/month/year)

For Official Use Only

Customs Form 6059B (11/02)

FIGURE 2-3-10 Example of Customs Form 6059B, Customs Declaration, in English (front) (Revised 04/02)

**The U.S. Customs Service Welcomes You
to the United States**

The U. S. Customs Service is responsible for protecting the United States against the illegal importation of prohibited items. Customs officers have the authority to question you and to examine you and your personal property. If you are one of the travelers selected for an examination, you will be treated in a courteous, professional, and dignified manner. Customs Supervisors and Passenger Service Representatives are available to answer your questions. Comment cards are available to compliment or provide feedback.

Important Information

U.S. Residents — declare all articles that you have acquired abroad and are bringing into the United States.

Visitors (Non-Residents) — declare the value of all articles that will remain in the United States.

Declare all articles on this declaration form and show the value in U.S. dollars. For gifts, please indicate the retail value.

Duty — Customs officers will determine duty. U.S. residents are normally entitled to a duty-free exemption of \$800 on items accompanying them. Visitors (non-residents) are normally entitled to an exemption of \$100. Duty will be assessed at the current rate on the first \$1,000 above the exemption.

Controlled substances, obscene articles, and toxic substances are generally prohibited entry.

Thank You, and Welcome to the United States.

The transportation of currency or monetary instruments, regardless of the amount, is legal. However, if you bring in to or take out of the United States more than \$10,000 (U.S. or foreign equivalent, or a combination of both), you are required by law to file a report on Customs Form 4790 with the U.S. Customs Service. Monetary instruments include coin, currency, travelers checks and bearer instruments such as personal or cashiers checks and stocks and bonds. If you have someone else carry the currency or monetary instrument for you, you must also file a report on Customs Form 4790. Failure to file the required report or failure to report the *total* amount that you are carrying may lead to the seizure of *all* the currency or monetary instruments, and may subject you to civil penalties and/or criminal prosecution. **SIGN ON THE OPPOSITE SIDE OF THIS FORM AFTER YOU HAVE READ THE IMPORTANT INFORMATION ABOVE AND MADE A TRUTHFUL DECLARATION.**

PAPERWORK REDUCTION ACT NOTICE: The Paperwork Reduction Act of 1995 says we must tell you why we are collecting this information, how we will use it, and whether you have to give it to us. The information collected on this form is needed to carry out the Customs, Agriculture, and currency laws of the United States. Customs requires the information on this form to insure that travelers are complying with these laws and to allow us to figure and collect the right amount of duty and tax. Your response is mandatory. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information, unless it displays a valid OMB control number. The estimated average burden associated with this collection of information is 4 minutes per respondent or record keeper depending on individual circumstances. Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be directed to U.S. Customs Service, Reports Clearance Officer, Information Services Branch, Washington, DC 20229, and to the Office of Management and Budget, Paperwork Reduction Project (1515-0041), Washington, DC 20503. **THIS FORM MAY NOT BE REPRODUCED WITHOUT APPROVAL FROM THE U.S. CUSTOMS FORMS MANAGER.**

Customs Form 6059B (Farsi) (11/02)

FIGURE 2-3-12 Customs Form 6059B, Customs Declaration, in Farsi (front)

**خدمات گمرک ایالات متحده ورود شما را
 به ایالات متحده خوش آمد می گوید**

خدمات گمرک ایالات متحده مستوابت دارد که ایالات متحده را در برابر ورود کالاهای غیر قانونی محافظت کند. مأمورین گمرک مجاز هستند که از شما سؤال کنند و از شما و اجناس شخصی شما بازرسی بعمل بیاورند. اگر شما یکی از مسافرینی باشید که برای بازرسی انتخاب شده باشید. با شما مؤبایانه، بصورت حرفه ای، و محترمانه رفتار میشود. سرپرستان گمرک و نمایندگان خدمات مسافران برای پاسخ دادن به سئوالات شما حاضر هستند. برگه ارائه نظرات برای تحسین و تمجید یا ارائه پس خورد و واکنش در دسترس میباشد.

اطلاعات مهم

ساکنین ایالات متحده — تمام کالاهائی را که در خارج کسب کرده اید و به داخل ایالات متحده می آورید، اعلان کنید.
 بازدید کنندگان (غیر مقیم) — ارزش تمام اجناسی را که در ایالات متحده باقی می ماند، به دلار آمریکائی اعلان کنید.
 تمام اجناس را در این فرم اعلان کنید و ارزش آنها را به دلار آمریکائی ذکر کنید. در مورد هدایا لطفاً ارزش خرده فروشی را ذکر کنید.
 عوارض گمرکی — مأمورین گمرکی عوارض را تعیین میکنند. افراد مقیم ایالات متحده، معمولاً تا \$800 در مورد اجناسی که به همراه دارند معاف میباشدند. بازدید کنندگان (غیر-مقیم) معمولاً تا \$100 معاف می باشند. عوارض پس از مبلغ معاف شده درمورد \$1000 اولی با نرخ جاری تعیین میشود.
 مواد تحت کنترل، مطالب مبتذل، و مواد مسرم کننده بطور کلی از وارد کردن منع میباشدند.

متشکریم و به ایالات متحده خوش آمدید.

انتقال ارز یا ابزار پول بدون در نظر گرفتن مبلغ آن، غیر قانونی میباشد. با وجود این، اگر بیشتر از \$10,000 (پول آمریکائی یا ارز خارجی برابر آن، یا ترکیبی از هر دو) به ایالات متحده وارد کنید یا از آن خارج، طبق قانون شما موظف هستید که توسط فرم شماره 4790 (4790) گمرک به خدمات گمرک ایالات متحده اقدام به گزارش کنید. ابزار پولی عبارتند از: سکه، ارز، چکهای مسافرتی و اسناد حامل مانده چکهای شخصی یا چک تضمین شده بانکی و سهام و اوراق قرضه. اگر شخص دیگری ارز یا ابزار پولی را برزقی شما حمل میکند، شما همچنین توسط فرم شماره 4790 (4790) گمرک باید به خدمات گمرک اقدام به گزارش کنید. قصور از اقدام به گزارش لازمه، یا قصور از گزارش جمع کل مبلغی که شما حمل میکنید، ممکن است به مضایره تمام ارزها یا ابزار پولی منجر بشود، و ممکن است که شما را تحت مجازات مدنی و/یا تحت تعقیب قانون کیفری قرار دهد. پس از اینکه اطلاعات مهم فوق را خواندید و اعلان صادقانه خود را ارائه دادید، پشت این فرم را امضا کنید.

توضیح کالاها (فهرست ممکن است که به فرم دیگر 6059B ادامه پیدا کند)	ارزش	نقطه برای استفاده گمرک
جمع		

اعلامیه قانون کاهش کار دفتری؛ قانون 1995 کاهش کاردفتری میگوید که ما باید به شما بگوییم که چرا این اطلاعات را جمع آوری میکنیم، چگونه از آن استفاده میکنیم، و آیا آن اطلاعات را باید به ما ارائه بدهید یا نه. قانون 1995 کاهش کاردفتری میگوید که ما باید به شما بگوییم که چرا این اطلاعات را جمع آوری میکنیم، چگونه از آن استفاده میکنیم، و آیا آن اطلاعات را باید به ما ارائه بدهید یا نه. اطلاعات جمع آوری شده از طریق این فرم، برای اجزای امور گمرکی کفایت میکند، و قوانین ایالات متحده لازم است. گمرک اطلاعات را به این جهت لازم میدانند که مطمئن بشود که مسافرین قوانین را رعایت میکنند و به ما اجازه بدهد مقدار صحیح عوارض و مالیات را وصول کنیم، پاسخ شما اجباری میباشد. سازمان میتواند آن را اجرا کند یا از آن حمایت به عمل بیاورد، و فردی اجباری ندارد که به جمع آوری اطلاعات پاسخ بدهد، اگر دارای شماره کنترل جاری OMB را ارائه دهد. میانگین زمان مستوابت برآورده شده مربوط به این جمع آوری اطلاعات برای هر پاسخ دهنده یا نگهدارنده این سبقت اطلاعات 4 دقیقه میباشد، البته این به شرایط هر فردی بستگی دارد. نظرات بر جوده حقوق بودن این مستوابت برآورد شده و پیشنهادات جهت کاهش این مستوابت باید به ششمه خدمات اطلاعات، مأمور گزارش تحسین، خدمات گمرک ایالات متحده (U.S. Customs Service, Report Clearance Officer, Information Services Branch, Washington, DC 20229) و اداره مدیریت و برنامه، طرح کاهش کاردفتری، (Office of Management and Budget, Paperwork Reduction Project (1515-0041), Washington, DC 20503) ارسال شود. این فرم بدون اجازه مدیر فرم های گمرک ایالات متحده نمیتواند دوباره چاپ بشود.

FIGURE 2-3-14 Example of Customs Form 6059B, Customs Declaration, in French (front)

Le service des douanes des tats-Unis vous souhaite la bienvenue sur le territoire am ricain

La mission du service des douanes américain est de protéger les États-Unis contre l'importation d'articles interdits. Les fonctionnaires des douanes ont toute autorité pour vous interroger, ainsi que pour procéder à des fouilles au corps ou de vos biens personnels. Si vous êtes l'un des voyageurs retenus pour examen, vous serez traité(e) de manière courtoise, professionnelle et digne. Des responsables des douanes et du service passager sont à votre disposition pour répondre à vos questions. Des cartes commentaires sont à votre disposition, pour recueillir vos remarques ou vos réactions.

Informations importantes

Résidents des États-Unis – déclarez tous les articles que vous avez achetés à l'étranger et que vous ramenez avec vous aux États-Unis.

Visiteurs (non-résidents) – déclarez la valeur de tous les articles qui resteront aux États-Unis.

Déclarez tous les articles figurant sur ce formulaire de déclaration et indiquez la valeur en dollars des Etats-Unis. En ce qui concerne les cadeaux, veuillez faire figurer la valeur au détail.

Droits – des fonctionnaires des douanes détermineront les droits que vous devez acquitter. Les résidents des États-Unis bénéficient normalement d'une exemption de droits jusqu'à concurrence de l'équivalent de 800 USD en articles les accompagnant. Les visiteurs (non-résidents) bénéficient normalement d'une exemption jusqu'à concurrence de l'équivalent de 100 USD. Les droits seront évalués au taux en vigueur pour les premiers 1 000 USD au-delà du plafond d'exemption.

Il est, de manière générale, interdit d'introduire sur le territoire des substances réglementées, des articles obscènes et des produits toxiques.

Merci et bienvenue aux Etats-Unis.

Le transport de devises ou d'instruments monétaires, quel qu'en soit le montant, est légal. Toutefois, si vous introduisez aux États-Unis, ou que vous sortez de ce pays plus de 10 000 USD (en dollars américains, ou l'équivalent en devises étrangères, ou sous la forme de toute combinaison des deux), vous êtes légalement tenu(e) de déclarer ce montant en douane des États-Unis, au moyen du Formulaire douanier 4790. Les instruments monétaires incluent les pièces de monnaie, la monnaie fiduciaire, les chèques de voyage et les instruments au porteur, tels que les chèques personnels ou de banque, ainsi que les actions et les obligations. Si une autre personne transporte les devises ou instruments monétaires pour vous, vous devez également remplir une déclaration sur le Formulaire douanier 4790. Tout défaut de dépôt de la déclaration exigée, ou de déclaration du montant *total* que vous transportez est susceptible d'entraîner la saisie de la *totalité* des devises ou instruments monétaires, et peut donner lieu à l'application de sanctions civiles et/ou à des poursuites pénales. **APOSEZ VOTRE SIGNATURE AU RECTO DE CE FORMULAIRE, APRES AVOIR LU AVEC ATTENTION LES INFORMATIONS IMPORTANTES CI-DESSUS, ET FAITES UNE DÉCLARATION CONFORME A LA VÉRITÉ.**

AVIS EN VERTU DE LA LOI SUR LA SIMPLIFICATION DES DÉMARCHES ADMINISTRATIVES (PAPERWORK REDUCTION ACT) : la loi américaine de 1995 sur la simplification des démarches administratives prévoit que nous devons vous indiquer les raisons pour lesquelles nous collectons ces informations, de quelle manière nous les utiliserons, ainsi que dans quelle mesure vous êtes tenu(e) de nous les fournir. Les informations recueillies sur le présent formulaire sont nécessaires au respect de la législation des États-Unis en matière douanière, agricole et de devises. Les douanes exigent les informations demandées sur le présent formulaire pour vérifier que les voyageurs se conforment à cette législation, ainsi que pour leur permettre de déterminer le montant (d) au titre des droits et taxes en vigueur, et de le recouvrer. Vous êtes tenu(e) de répondre, de manière obligatoire. Aucune autorité administrative ne peut procéder à, ni superviser une quelconque collecte d'informations, et nul n'est tenu de s'y soumettre, à moins que ladite instance ne soit en mesure de produire un numéro de contrôle valide délivré par l'Office of Management and Budget (OMB). La durée moyenne estimée requise pour cette collecte d'informations est de 4 minutes par déclarant ou responsable de la tenue du registre, en fonction des cas individuels. Les commentaires relatifs à l'exactitude de cette estimation de la durée prévue, et les suggestions concernant la réduction de ces démarches, doivent être transmis à l'adresse suivante : U.S. Customs Service, Reports Clearance Officer, Information Services Branch, Washington, DC 20226, États-Unis, ainsi qu'à l'Office of Management and Budget, Paperwork Reduction Project (1515-0041), Washington, DC 20503, États-Unis. **IL EST INTERDIT DE REPRODUIRE CE FORMULAIRE SANS L'AUTORISATION DU RESPONSABLE DES FORMULAIRES DES DOUANES DES ÉTATS-UNIS.**

Customs Form 6059B (German) (11/02)

FIGURE 2-3-16 Example of Customs Form 6059B, Customs Declaration, in German (front)

Der U.S. Customs Service heißt Sie in den Vereinigten Staaten willkommen.

Die US-Zollbehörde ist dafür verantwortlich, die Vereinigten Staaten vor der illegalen Einfuhr von verbotenen Gegenständen zu schützen. Die Zollbeamten sind dazu befugt, Sie zu befragen und Sie und Ihr persönliches Eigentum zu kontrollieren. Wenn Sie zu den Reisenden gehören, die zur Kontrolle gebeten wurden, werden Sie in einer höflichen, professionellen und würdigen Weise behandelt. Höhere Zollbeamte und Vertreter des Passagierservice stehen Ihnen zur Beantwortung von Fragen zur Verfügung. Darüber hinaus finden Sie Antwortkarten vor, die Sie dazu benutzen können, Lob auszusprechen oder Feedback zu geben.

Wichtige Hinweise

Einwohner der USA – Melden Sie alle im Ausland erworbenen Gegenstände an, die Sie in die USA einführen.

Besucher (Nicht-Einwohner) – Melden Sie alle Gegenstände an, die in den Vereinigten Staaten verbleiben.

Melden Sie alle Gegenstände auf diesem Zollerklärungsformular an und nennen Sie deren Wert in US-Dollar. Geben Sie bei Geschenken bitte den Verkaufspreis an.

Einfuhrzoll – Zölle werden von den Zollbeamten bestimmt. Alle US-Einwohner sind normalerweise zu einem Zollfreibetrag in Höhe von US\$ 800 für mitgeführte Gegenstände berechtigt. Bei Besuchern (Nicht-Einwohner) beläuft sich der Freibetrag auf US\$ 100. Der Zoll wird zu den derzeit gültigen Tarifen auf die ersten US\$ 1.000 über dem Freibetrag festgesetzt.

Die Einfuhr von kontrollierten Substanzen (Betäubungsmittel, gefährliche Medikamente etc.), obszönem Material und Giftstoffen ist gemeinhin untersagt.

Vielen Dank und willkommen in den Vereinigten Staaten.

Das Mitführen von Geld oder **Zahlungsmitteln** ist ungeachtet des Betrages grundsätzlich legal. Wenn Sie jedoch einen Betrag von über US\$ 10.000 in die USA ein- bzw. ausführen (in US-Währung oder den Gegenwert in einer Fremdwährung oder eine Kombination beider), sind Sie von Gesetzes wegen dazu verpflichtet, unter Verwendung des Zollformulars 4790 der US-Zollbehörde Meldung darüber zu erstatten. Als Zahlungsmittel gelten: Münzen, Bargeld, Reiseschecks und Inhaberpapiere wie z.B. Schecks, Bankschecks, Aktien und Anleihen. Wenn eine andere Person Geld oder Zahlungsmittel für Sie mitführt, müssen Sie dennoch über das Zollformular 4790 Meldung erstatten. Das Versäumnis, die erforderliche Meldung zu erstatten, oder die Nichtmeldung des *Gesamtbetrages*, den Sie mit sich führen, kann zur Beschlagnahmung des *gesamten* Geldbetrages bzw. aller Geldmittel und für Sie u.U. zu Geldbußen und/oder einer strafrechtlichen Verfolgung führen. **UNTERSCHREIBEN SIE AUF DER ANDEREN SEITE DIESES FORMULARS, NACHDEM SIE DIE OBIGEN WICHTIGEN HINWEISE GELESEN UND WAHRHEITSGETREUE ANGABEN GEMACHT HABEN.**

Beschreibung der Gegenstände (Die Auflistung kann auf einem zweiten 6059B-Formular fortgesetzt werden)	Gesamtwert	Nur für zollamtliche Vermerke
Gesamtwert		

HINWEIS AUF DEN PAPERWORK REDUCTION ACT (GESETZ ZUR REDUZIERUNG DES FORMULARWESENS): Der Paperwork Reduction Act von 1995 besagt, dass wir Sie darüber informieren müssen, aus welchem Grund wir diese Informationen erfassen, wie wir diese einsetzen werden und ob Sie zur Abgabe dieser Informationen verpflichtet sind. Die mit diesem Formular erfassten Informationen sind notwendig, um die Zoll-, Landwirtschafts- und Währungsregeln der Vereinigten Staaten durchzusetzen. Die Zollbehörde benötigt die auf diesem Formular verlangten Informationen, um sicherzustellen, dass Reisende diese Gesetze befolgen und um es uns zu ermöglichen, die zu erhebenden Zölle und Steuern korrekt festzusetzen und einzufordern. Sie sind zur Beantwortung der Fragen zwingend verpflichtet. Wenn keine gültige OMB-Kontrollnummer angegeben ist, darf eine Behörde die Erfassung von Informationen nicht durchführen oder fördern. In diesem Fall ist eine Person nicht zur Beantwortung verpflichtet. Der erforderliche Aufwand für die Erfassung dieser Informationen wird je nach den individuellen Umständen auf 4 Minuten pro befragte Person oder Archivar geschätzt. (פריטים למכירה, דוגמיות לקידום מכירות, או טובין כלשהם אשר אינם נחשבים לחפצים אישיים)

15 תושבים - הערך הכולל של כל הטובין, כולל סחורה לשימוש מסחרי אשר נרכשו על-ידי (על-ידינו) או הושגו בחו"ל (כולל מתנות עבור מישהו אחר, אך לא פריטים אשר נשלחו לארה"ב) ואשר מובאים על-ידי (על ידינו) לארה"ב הינו \$ _____ דולר ארה"ב

מבקרים - הערך הכולל של כל הפריטים אשר יושארו בארה"ב, כולל סחורה לשימוש מסחרי הינו \$ _____ דולר ארה"ב

קרא את ההנחיות אשר כתובות בגב הטופס. מקום מיוחד מוקצה לצורך פירוט רשימת הפריטים אשר הנך (הנכס) חייב (חייבים) להצהיר עליהם. קראתי את המידע החשוב המצוי בצדו השני של טופס זה, והצהרתי הצהרת אמת.

תתימה _____ תאריך (יום/חודש/שנה) _____

לשימוש משרדי בלבד

Customs Form 6059B (Hebrew) (11/02)

FIGURE 2-3-18 Customs Form 6059B, Customs Declaration, in Hebrew (front)

**שירות המכס של ארה"ב מברכים
 אותך בכניסתך לארה"ב**

שירותי המכס של ארה"ב אחראיים להגן על ארה"ב מפני ייבוא בלתי חוקי של פריטים אסורים. פקידי המכס מורשים לתשאל אותך ולבדוק אותך ואת רכושך הפרטי. במידה והנך אחד מהנוסעים אשר נבחרו לעבור בדיקה, תטופל באופן מסביר פנים, מקצועי ומכובד. שירותי המכס ונציגי שירות הנוסעים עומדים לרשותך על מנת לענות על כל שאלה. אגרות למתן תגובה עומדות לרשותך על מנת לשבח או למתן משוב.

מידע חשוב

תושבי ארה"ב - הצהר על כל הפריטים אותם רכשת בחו"ל ואשר הנך מביא עמך לתוך ארה"ב.

מבקרים (שאינם תושבים) - הצהר ערכם של כל הפריטים אשר יושארו בתוך ארה"ב.

הצהר על כל הפריטים בטופס הצהרה זה וציין את ערכם בדולר ארה"ב. עבור מתנות, אנה ציין את ערכם הקמעונאי.

היטל - פקידי המכס יקבעו את גובה ההיטל. תושבי ארה"ב זכאים בדרך כלל לפטור ממס בגובה של \$800 דולר ארה"ב לאותם פריטים המגיעים עימם. מבקרים (שאינם תושבים) זכאים בדרך כלל לפטור ממס בגובה של \$100 דולר ארה"ב. גובה ההיטל ייקבע על פי שער הדולר הנוכחי, על \$1,000 דולר ארה"ב הראשונים מעל לפטור ממס.

חומרים מבוקרים, חפצים מגונים, וחומרים רעילים אסורה כניסתם באופן כללי. תודה לך, וברוך בואך לארה"ב.

העברת מטבע, או **אמצעי תשלום**, ללא קשר לסכום היא חוקית. אולם, במידה והנך מוכן לתוך או מוציא מתוך ארה"ב מעל ל-\$10,000 דולר ארה"ב, או שווה ערך במטבע זה, או שילוב של שניהם) עליך לפי החוק להצהיר בטופס מס 4790 של שירותי המכס של ארה"ב אמצעי התשלום כוללים מטבעות, כסף, המחאות נוסעים, ומסמכי מוכ"ז כגון המחאות אישיות או המחאות בנקאיות ומניות ואגרות חוב. במידה ואדם אחד נושא בעבורך את הכסף או אמצעי התשלום, עליך לציין למלא טופס מס 4790 של שירותי המכס. אי מלוי טופס זה או אי הצהרת הסכום תכולל אותו אתה נושא, יכול להוביל לעיקול של כל הכסף ואמצעי התשלום, ואף עלולים לגרום אחריותם עונשים אזרחיים ואו תביעה פלילית. חתום בצדו השני של הטופס לאחר שקראת את המידע החשוב הכתוב לעיל ונתת הצהרת אמת.

לשימוש המכס בלבד	ערך	תאור הפריטים (הרשימה יכולה להמשיך בטופס נוסף מס 86059)

סה"כ

הצהרה לצמצום עבודת ניירת: ההצהרה לצמצום עבודת הניירת משנת 1985 אומרת כי עלינו למסור לך מדוע אנו אוספים מידע זה, באיזה אופן בכוונתנו להשתמש בו, והאם מחובתך למסור לנו. המידע הנאסף בטופס זה דרוש על מנת להוציא לפועל את חוקי המכס, החקלאות והמטבע של ארה"ב. המכס דורש המידע שבטופס זה על מנת לוודא כי הנוסעים עומדים בחוקים אלו, ועל מנת לאפשר לנו לחשב ולגבות את הסכום המדויק של ההיטלים והמסים היעומתך היא הכרחית. סוכנות יכולה שלא לנהל או לקחת תחת חסותה, ואדם פרטי אינו חייב היענות לאיסוף המידע, אלא אם כן מופיע מס' בקרת OMB תקף. העומס המשוער הממוצע לגבי איסוף מידע זה הינו 4 דקות לכל משוב או רשם הדבר מוחלת במסגרת אישיות העוזרת לגבי הערכת העומס והיענות להפחתת עומס זה יש להפנות ל- U.S. Customs Service, Reports Clearance Office, Information Services Branch, Office of Management and Budget, Paperwork Reduction Project (1515-0041), Washington, DC 20503. אין לשכפל טופס זה ללא אישור מנהל טפסי המכס של ארה"ב.

Customs Form 6059B (Italian) (11/02)

FIGURE 2-3-20 Example of Customs Form 6059B, Customs Declaration, in Italian (front)

**Il Servizio doganale statunitense vi porge
 il benvenuto negli Stati Uniti**

Il Servizio doganale statunitense è responsabile per la protezione degli Stati Uniti contro l'importazione illegale di articoli proibiti. I funzionari doganali sono autorizzati a farLe domande e ad ispezionare Lei e i Suoi effetti personali. Se Lei sarà uno dei passeggeri selezionati per un'ispezione, verrà trattato/a con cortesia, professionalità e rispetto della Sua dignità. I Responsabili del Servizio doganale e i Rappresentanti dei Servizi per i Passeggeri sono a Sua disposizione per rispondere ad eventuali domande. Sono anche disponibili schede per commenti, che potrà usare per complimentarsi o per esprimere la Sua opinione.

Informazioni importanti

Residenti negli Stati Uniti – dichiarare tutti gli articoli acquistati all'estero, che si stanno riportando negli Stati Uniti.

Visitatori (non residenti) – dichiarare il valore di tutti gli articoli che resteranno negli Stati Uniti.

Dichiarare tutti gli articoli nel presente modulo di dichiarazione e riportarne il valore espresso in dollari statunitensi. Per i regali, si prega di indicarne il valore di acquisto.

Dazio – i funzionari doganali determineranno l'importo del dazio. I residenti negli Stati Uniti normalmente hanno diritto a un'esenzione di US\$ 800 sugli articoli che li accompagnano. I visitatori (non residenti) normalmente hanno diritto ad un'esenzione di US\$ 100. Il dazio viene calcolato all'aliquota attuale sui primi US\$ 1.000 eccedenti l'esenzione.

In generale, non è consentita l'introduzione di sostanze controllate, articoli osceni e sostanze tossiche.

Grazie e benvenuti negli Stati Uniti.

Il trasporto di valuta o strumenti monetari, indipendentemente dall'importo, è legale. Tuttavia, se si imporgano negli Stati Uniti, o si esportano da essi, più di US\$ 10.000 (in dollari o equivalente in valuta estera, o una combinazione di entrambi), è obbligatorio per legge presentare al Servizio doganale statunitense la relativa dichiarazione sul Modulo doganale 4790. Gli strumenti monetari comprendono, fra l'altro, monete, valuta, travelers checks e strumenti al portatore, per esempio assegni personali o circolari, azioni ed obbligazioni. L'obbligo di presentazione della dichiarazione sul Modulo doganale 4790 vige anche se un'altra persona trasporta la valuta o lo strumento monetario per conto del dichiarante. La mancata presentazione della dichiarazione obbligatoria, o la mancata dichiarazione dell'importo totale che si trasporta, potrebbe comportare la confisca dell'intero importo in valuta o strumenti monetari, nonché l'imposizione di sanzioni civili e/o l'avvio di procedimenti penali. **SI PREGA DI APPORRE LA PROPRIA FIRMA SUL RETRO DEL PRESENTE MODULO DOPO AVER LETTO LE IMPORTANTI INFORMAZIONI RIPORTATE QUI DI SOPRA ED AVER RESO UNA DICHIARAZIONE VERA.**

Customs Form 6059B (Japanese) (11/02)

FIGURE 2-3-22 Example of Customs Form 6059B, Customs Declaration, in Japanese (front)

アメリカ合衆国税関局は皆様を歓迎いたします。

アメリカ合衆国税関局には、米国内への禁止品目の不法な輸入を防止する責務があります。税関検査官には、旅行者に質問し、旅行者やその荷物の検査を行う権限があります。税関検査の対象に選ばれた場合でも、旅行者の皆様には専門家としての礼儀正しい尊厳をもった態度で検査官が対応いたします。税関監督者や税関旅客サービス係が皆様のご質問にお答えいたします。コメントカードでお礼やサービスに対するフィードバックをお寄せいただくこともできます。

大切な情報

合衆国居住者 — 海外で得た物品すべてと、アメリカ合衆国に持ち込む物品すべてを申告する義務があります。

旅行者 (非合衆国居住者) — アメリカ合衆国内に残していく物品すべての価値金額を申告する義務があります。

この申告用紙にすべての品目を申告し、価値金額は米国ドルで提示してください。贈答品については、小売価格を記入してください。

関税 — 税関審査官が決定します。アメリカ合衆国居住者には、通常、持ち込み品に対して 800 米国ドルの免税控除があります。旅行者 (非合衆国居住者) には通常、100 米国ドルの免税控除があります。関税は控除額を超えた最初の 1,000 米国ドルに対し、現行の関税率で課金されます。

規制物質、公序良俗に反する物品および毒性薬物は、通常、持ち込みが禁止されています。

ご協力ありがとうございました。アメリカ合衆国へようこそ!

通貨や通貨代替物の輸送は、金額如何にかかわらず合法です。しかし、10,000 米国ドル (米国ドルもしくは外国通貨での同等額、または双方の合計額) を超える金額を米国内に持ち込む、または米国外に持ち出す場合、旅行者はアメリカ合衆国税関局に対して税関用紙 4790 を提出することが法律で義務付けられています。通貨代替物には、コイン、貨幣、トラベラーズ・チェック、および個人小切手、海外送金小切手、証券、債権などの無記名書類が含まれます。他人があなたの通貨や通貨代替物を持っている場合でも、あなたには税関用紙 4790 で報告する必要があります。必要な報告を行わなかった場合、または持ち込む金額の全額を報告しなかった場合は、その通貨や通貨代替物すべてを接収したり、民事罰または刑事訴追に至る場合もあります。上記の大切な情報をよく読み、真実に基づいた申告を行った後に、この用紙の裏側に署名してください。

物品についての記述 (リストは用紙 6059B に続けることができます)	価値金額	税関 使用欄
合計額		

文書業務削減法についての通知：文書業務削減法 (1996 年) によると、税関局にはこの情報を収集している理由、情報の利用方法、および旅行者が強制的に情報を提供する必要があるか否かを旅行者に伝える必要があります。この用紙で収集された情報は、米国内における税関法、農業法および通貨法を実施するために必要です。税関では、旅行者が上記の法律を遵守している点を確認し適切な関税と税金を決定・収集するために、この用紙に記載される情報が必要となります。旅行者の回答は必須です。有効な OAH 管理番号を表示していない限り、ある機関が情報収集を指揮したり支援することはなく、個人にも回答する義務はありません。この情報収集にかかる平均負担時間は、状況にもよりますが回答者もしくは記録係一人あたり約 4 分予想されています。この負担時間予想の正確性に関するコメントやこの負担削減に対するご提案は、U.S. Customs Service, Reports Clearance Officer, Information Services Branch, Washington, DC 20229 および Office of Management and Budget, Paperwork Reduction Project (1515-0041), Washington, DC 20503 までご連絡ください。この用紙は、アメリカ合衆国税関局用紙担当部長の承認なく再生されることはありません。

Customs Form 6059B (Korean) (11/02)

FIGURE 2-3-24 Example of Customs Form 6059B, Customs Declaration, in Korean (front)

미국 관세청은 여러분이 미국에 오신 것을 환영합니다
 미국 관세청은 금지된 품목의 불법적 반입으로부터 미국을 보호할 책임이 있습니다. 세관 공무원들은 귀하를 심문하고 귀하 및 귀하의 개인재산을 조사할 수 있는 권한을 가지고 있습니다. 귀하가 조사 대상으로 선정된 여행자들 중의 한 사람이면, 귀하는 정중하고 전문적이며 품위 있는 방식으로 대우를 받을 것입니다. 귀하의 문의에 답변을 할 수 있는 세관 감독자 및 여행자 안내 요원들을 찾아 문의하실 수 있습니다. 입사말을 전하거나 의견을 제안하시는데 사용할 수 있는 답례용 엽서가 준비되어 있습니다.

중요한 정보
미국 거주자 — 해외에서 취득하여 미국으로 가져오는 모든 물품을 신고합니다.
방문자 (비거주자) — 미국에 남아 있게 될 모든 물품의 가액을 신고합니다. 이 신고서로 모든 물품을 신고하고 미국 달러화로 가액을 표시합니다. 선물의 경우에는 소매가액을 표시합니다.
관세 — 세관 공무원들이 관세액을 결정할 것입니다. 미국 거주자들은 통상적으로 휴대품목에 대하여 800 달러까지 관세를 면제 받을 수 있습니다. 방문자 (비거주자)들은 통상적으로 100 달러까지 관세를 면제 받을 수 있습니다. 관세는 면세액을 초과하는 첫 1천 달러에 대해 현행 세율로 산정합니다.
통제대상 물질, 음란 물질 및 독성 물질은 일반적으로 반입이 금지됩니다. 감사합니다. 그리고 미국 방문을 환영합니다.

통화 또는 금전적 수단
 통화 또는 금전적 수단의 반출 반입은 금액을 불문하고 합법적입니다. 하지만 귀하가 미국 내로 또는 미국 외로 1만 달러 (미화 또는 그에 상당한 외화금액 또는 이 둘의 합산) 이상을 휴대하는 경우에는 법에 의거 세관 서식 4790으로 미국 관세청에 신고서를 제출하여야 합니다. 금전적 수단에는 주화, 통화, 여행자 수표, 그리고 개인수표 또는 자기 앞 수표 및 증권과 채권 등의 소지자 유가증서가 포함됩니다. 귀하가 다른 사람에게 통화 또는 금전적 수단을 휴대 시킨 경우에도 귀하는 또한 세관 서식 4790으로 신고서를 제출해야 합니다. 요구된 신고서를 제출하지 않거나 귀하가 휴대하는 총 금액을 신고하지 않을 시는 모든 통화 또는 금전적 수단을 압수하게 될 수 있으며, 귀하는 민사상의 처벌을 받고/또는 형사상의 기소를 당할 수 있습니다. 귀하는 상기 중요 정보를 읽고 사실 그대로 신고한 후, 이 서식의 반대 면에 서명하십시오.

Customs Form 6059B (Polish) (11/02)

FIGURE 2-3-26 Customs Form 6059B, Customs Declaration in Polish (front)

Urząd Celnny USA wita Państwa w Stanach Zjednoczonych

Urząd Celnny USA jest odpowiedzialny za ochronę Stanów Zjednoczonych przed nielegalnym przywozem zabronionych artykułów. Celnicy mają prawo przeszukiwać przyjezdnych oraz przeszukiwać ich bagaż osobiste. Jeżeli znajdziesz się pośród podróżnych wyselekcjonowanych do rewizji, zostaniesz potraktowany uprzejmie, fachowo i z godnością. Personel nadzoru służby celnej oraz reprezentanci obsługi podróżnych są gotowi udzielić odpowiedzi na pytania. Dostępne są karty do zgłaszania uwag sugestii na temat organizacji odprawy celnej.

Ważne informacje

Stali mieszkańcy USA - proszę zadeklarować wszystkie artykuły uzyskane za granicą i przywożone do USA.

Osoby przyjezdne (bez stałego zamieszkania w USA) - proszę zadeklarować wartość wszystkich artykułów, które pozostaną docelowo w USA.

Zadeklaruj wszystkie artykuły w niniejszej deklaracji celnej i przedstaw ich wartość w USD. W przypadku prezentów podaj cenę, po której zostały nabyte.

Oplata celna - jej wartość zostanie określona przez celników. Stali mieszkańcy USA są zwykle zwolnieni od opłaty celnej za przywożone artykuły o wartości nie przekraczającej 800 USD. Osoby przyjezdne (bez stałego zamieszkania w USA) są zwykle uprawnione do zwolnienia od opłaty celnej w wysokości 100 USD. Oplata celna zostanie określona w oparciu o aktualne taryfy celne obowiązujące dla pierwszego 1000 USD powyżej wysokości zwolnienia od opłaty celnej.

Przywóz substancji kontrolowanych, artykułów obscenicznych i substancji trujących jest ogólnie zabroniony.

Dziękujemy i witamy w Stanach Zjednoczonych.

Przewóz waluty lub **środków walutowych** o dowolnej wartości jest legalny. Jednak osoby przywożące do lub wywożące ze Stanów Zjednoczonych więcej niż 10 tys. USD (lub ekwiwalent w obcej walucie, lub też kombinację obydwóch) mają obowiązek prawny wypełnić i przedłożyć Formularz Celny 4790 w Urzędzie Celnym USA. Do środków walutowych zalicza się monety, walutę, czekki podróżnicze oraz instrumenty na okaziciela, takie jak: czekki osobiste lub bankierskie, akcje giełdowe i obligacje. Jeżeli inna osoba przywozi walutę lub środki walutowe w Twoim imieniu, również należy przedłożyć Formularz Celny 4790. Uchylenie się od przedłożenia wymaganych formularzy lub podania *całkowitej* sumy przywożonych środków walutowych może prowadzić do konfiskaty *wszystkich* pieniędzy i środków walutowych, a także do nałożenia grzywny lub wszczęcia postępowania karnego. **PO PRZECZYTANIU POWYŻSZYCH INFORMACJI I ZŁOŻENIU DEKLARACJI ZGODNEJ Z PRAWDĄ PODPISAC SIĘ NA ODWROTNEJ STRONIE NINIEJSZEGO FORMULARZA.**

Customs Form 6059B (Portuguese) (11/02)

FIGURE 2-3-28 Example of Customs Form 6059B, Customs Declaration in Portuguese (front)

O Serviço de Alfândega Americana lhe dá as boas-vindas aos Estados Unidos

O Serviço de Alfândega Americana é responsável pela proteção dos Estados Unidos contra a importação ilegal de itens proibidos. Os funcionários da Alfândega têm a autoridade para interrogá-lo e para examinar seus bens pessoais. Se você for um dos viajantes selecionados para exame, você será tratado de maneira cortês, profissional e digna. Os Supervisores da Alfândega e os Representantes do Serviço de Passageiros estão à disposição para responder às suas perguntas. Os cartões de comentários estão disponíveis para que você coloque seus elogios ou para nos fornecer feedback.

Informa o importante

Residentes americanos – declare todos os artigos que você adquiriu no estrangeiro e está trazendo para os Estados Unidos.

Visitantes (Não-Residentes) – declare o valor de todos os artigos que permanecerão nos Estados Unidos.

Declare todos os artigos neste formulário de declaração e coloque os valores em dólares americanos. Para presentes, por favor, indique o valor de varejo.

Imposto – Os funcionários determinarão o imposto. Os residentes americanos são, normalmente, contemplados com isenção de imposto para artigos que estão em seu poder no valor total de US\$ 800. Os visitantes (não-residentes) são, normalmente, contemplados com isenção de impostos para artigos que estão em seu poder no valor de US\$ 100. O imposto será avaliado à taxa atual para os primeiros US\$ 1.000 que excederem a isenção.

Substâncias controladas, artigos obscenos e substâncias tóxicas têm, geralmente, entrada proibida.

Obrigado, e seja bem-vindo aos Estados Unidos.

O transporte de meio circulante e instrumentos monetários, independentemente da quantidade, é legal. Porém, se você está trazendo aos, ou levando para fora dos, Estados Unidos mais que US\$ 10.000 (em dólares americanos ou seu equivalente em moeda estrangeira, ou a combinação de ambos) você tem a obrigação, por lei, de preencher o Formulário 4790 da Alfândega, junto ao Serviço da Alfândega Americana. Os instrumentos monetários incluem moeda, meio circulante, cheques de viagem e instrumentos ao portador tais como cheques pessoais ou administrativos, ações e títulos. Se você tem outra pessoa transportando meio circulante ou instrumento monetário para você, você também deve preencher o Formulário 4790 da Alfândega. O não preenchimento dos formulários exigidos ou a ausência em relatar a quantidade total que você está transportando pode conduzir à apreensão de todo o meio circulante e instrumentos monetários em seu poder e pode sujeitá-lo às penalidades civis e/ou a processo criminal. ASSINE NO VERSO DESTES FORMULÁRIOS APÓS VOCÊ TER LIDO A IMPORTANTE INFORMAÇÃO ACIMA E FAÇA UMA DECLARAÇÃO VERDADEIRA.

Descrição dos artigos (relate o poder continuar em outro Formulário 6059B)	Valor	Para uso exclusivo da Alfândega
Total		

AVISO SOBRE A LEI PARA A REDUÇÃO DA BUROCRACIA: A Lei para a Redução da Burocracia de 1995 (Paperwork Reduction Act of 1995) diz que devemos relatar a você porque estamos solicitando esta informação, como a usaremos e se você tem de fornecer-nos. A informação obtida neste formulário é necessária para atender à alfândega, agricultura e às leis monetárias dos Estados Unidos. A Alfândega solicita a informação contida neste formulário para assegurar que os viajantes estão em conformidade com tais leis e para permitir que se faça o cálculo e a arrecadação da quantidade certa de imposto e taxa. Sua resposta é obrigatória. Uma agência pode não conduzir ou solicitar, e uma pessoa pode não ser obrigada a responder a, uma coleta de informações se ela apresentar um número de controle OMB válido. O tempo médio estimado associado a esta solicitação de informações é de 4 minutos por pessoa ou por entrevistador, pois depende das circunstâncias individuais. Comentários a respeito da precisão deste tempo estimado e sugestões para redução deste tempo devem ser dirigidos ao U.S. Customs Service, Reports Clearance Officer, Information Services Branch, Washington, DC 20229, e ao Office of Management and Budget, Paperwork Reduction Project (1515-0041), Washington, DC 20503. ESTE FORMULÁRIO NÃO PODE SER REPRODUZIDO SEM A APROVAÇÃO DO GERENTE DE FORMULÁRIOS DA ALFÂNDEGA AMERICANA.

X _____
 (Подпись) Дата (день/месяц/год)

Только для официального использования

Customs Form 6059B (Russian) (11/02)

FIGURE 2-3-30 Example of Customs Form 6059B, Customs Declaration, in Russian (front)

Таможенная служба США приветствует Вас в Соединенных Штатах Америки

Таможенная служба США несет ответственность за защиту страны от нелегального ввоза запрещенных товаров. Служащие таможни имеют право опросить и обыскать вас, а также произвести досмотр ваших личных вещей. Если Вы будете выбраны для досмотра, с Вами будут обращаться вежливо, профессионально и уважительно. Руководители таможни и представители отдела обслуживания пассажиров всегда готовы ответить на Ваши вопросы. В таможне имеются карточки для положительных отзывов, замечаний и предложений.

Важная информация

Постоянные жители США указывают в декларации все товары, приобретенные за границей и ввозимые в США.

Гости (Лица, не являющиеся постоянными жителями США) указывают в декларации все товары, которые останутся в США.

Перечислите все товары на данном бланке декларации и укажите их стоимость в долларах США. Для подарков укажите, пожалуйста, розничную цену.

Пошлины. Служащие таможни определяют размер пошлины. Постоянные жители США, как правило, имеют право на беспошлинный ввоз товаров на сумму 800 долларов. Лица, не являющиеся постоянными жителями США, как правило, имеют право на беспошлинный ввоз товаров на сумму 100 долларов. Размер пошлины оценивается по действующему тарифу на первую 1 000 долларов сверх суммы, не облагаемой пошлиной.

Вообще запрещен ввоз контролируемых веществ, порнографии и токсических материалов.

Спасибо и добро пожаловать в Соединенные Штаты Америки!

Закон не запрещает провозить любое количество денег и других финансовых инструментов. Однако, если Вы ввозите в Соединенные Штаты или вывозите из страны более 10 000 долларов и (или) их иностранного эквивалента, то по закону обязаны представить в Таможенную службу США отчет по Таможенной форме 4790. К финансовым инструментам относятся монеты, банкноты, дорожные чеки, документы на предъявителя, например, персональные или банковские чеки, а также акции и облигации. Если кто-то другой провозит за Вас деньги или другие финансовые инструменты, Вы также обязаны представить отчет по Таможенной форме 4790. Если Вы не представите такой отчет или не укажете в нем *полную* провозимую Вами сумму, это может привести к конфискации *всей* суммы денег или других финансовых инструментов, гражданско-правовым санкциям и (или) уголовному преследованию. **ОЗНАКОМИВШИСЬ С ПРИВЕДЕННОЙ ВЫШЕ ВАЖНОЙ ИНФОРМАЦИЕЙ И СОСТАВИВ ПРАВДИВУЮ ДЕКЛАРАЦИЮ, ПОСТАВЬТЕ СВОЮ ПОДПИСЬ НА ЛИЦЕВОЙ СТОРОНЕ ЭТОГО ДОКУМЕНТА.**

УВЕДОМЛЕНИЕ В СВЯЗИ С ЗАКОНОМ ОБ УПРОЩЕНИИ ОБОРУДОВАНИЯ ДОКУМЕНТАЦИИ. Закон об упрощении оформления документации (1995 год) гласит, что мы должны сообщать Вам, зачем собирается эта информация, как она будет использоваться и обрнами ли Вы давать такую информацию. Информация, собранная в этом документе, нужна для выполнения законов США, касающихся торговли, внешнего хозяйства и валюты. Таможня требует предоставления информации по данной форме для того, чтобы обеспечить соблюдение таможенного законодательства, а также для того, чтобы правильно рассчитать и собрать требуемые пошлины и налоги. Вы обязаны ответить на наши вопросы. Без предоставления действительного контрольного номера OMB учреждение не имеет права собирать или запрашивать информацию, а пассажир не обязан предоставлять такую информацию. Предполагаемый средний расход времени на сбор информации составляет, с учетом конкретных обстоятельств, около 4 минут на каждого респондента или регистратора. Замечания, касающиеся точности оценки такого расхода времени, и предложения по его сокращению следует направлять по адресу: U.S. Customs Service, Permit Classification Office, Information Services Branch, Washington, DC 20229 or Office of Management and Budget, Paperwork Reduction Project (1915-0041), Washington, DC 20503. ЗАПРЕЩАЕТСЯ КОПИРОВАТЬ ЭТОТ ДОКУМЕНТ БЕЗ РАЗРЕШЕНИЯ РУКОВОДИТЕЛЯ ОТДЕЛА ФОРМ ТАМОЖЕННОЙ СЛУЖБЫ США.

Para uso oficial exclusivamente

Customs Form 6059B (Spanish) (11/02)

FIGURE 2-3-32 Example of Customs Form 6059B, Customs Declaration, in Spanish (front)

El Servicio de Aduanas de los EE.UU. le extiende una cordial bienvenida a los Estados Unidos

El Servicio de Aduanas de los EE.UU. tiene la responsabilidad de proteger a los Estados Unidos contra la importación ilícita de artículos prohibidos. Los funcionarios aduaneros cuentan con la autoridad para formularle preguntas y examinarlo a usted y a su propiedad personal. Si usted fuese escogido para ser examinado, se le brindará un trato cortés y profesional y con dignidad. Los Supervisores Aduaneros y los Representantes de Servicios a los Pasajeros se encuentran a su disposición para contestar sus preguntas. Se dispone asimismo de tarjetas para que escriba comentarios, exprese encomios o nos proporcione sus reacciones.

Información importante

Residentes en los EE.UU. — declaren todos los artículos que hayan sido adquiridos en el extranjero y que ingresen en los Estados Unidos.

Visitantes (no residentes) — declaren el valor de todos los artículos que permanecerán en los Estados Unidos.

Hagan una declaración de todos los artículos en el presente formulario, mostrando el valor en dólares estadounidenses. En el caso de los regalos, sírvanse indicar el valor al por menor.

Impuesto arancelario — Los funcionarios aduaneros determinarán cuál es el impuesto arancelario. Por lo regular, los residentes en los EE.UU. tienen derecho a una exención libre de impuestos de \$800 sobre los artículos que los acompañan. Por lo regular, los visitantes (no residentes) tienen derecho a una exención de \$100. Se cobrará el impuesto arancelario a la tasa actual sobre los primeros \$1,000 después de la exención.

Por lo general, se prohíbe el ingreso de sustancias controladas, artículos obscenos y sustancias tóxicas.

* *Gracias y bienvenidos a los Estados Unidos.*

Transportar divisas o instrumentos monetarios es lícito, independientemente de su valor. Sin embargo, si usted ingresa o saca más de \$10,000 (dólares de los EE.UU. o su equivalencia en moneda extranjera o una combinación de las dos cosas), la ley le exige presentar un informe al Servicio de Aduanas de los EE.UU. utilizando el Formulario 4790 de Aduanas. Los instrumentos monetarios incluyen monedas, dinero en efectivo, cheques de viajero e instrumentos al portador tales como cheques personales y de gerencia, acciones y bonos. Si usted hace que otra persona transporte las divisas o el instrumento monetario por usted, usted también está obligado a presentar un informe utilizando el Formulario 4790 de Aduanas. La no presentación del informe exigido o si no se informa el valor *total* que usted está transportando podría dar lugar al decomiso de la *totalidad* de las divisas o instrumentos monetarios y podría exponerlo a sanciones civiles y/o un proceso penal. **FIRME AL LADO CONTRARIO DEL PRESENTE FORMULARIO UNA VEZ QUE HAYA LEÍDO LA INFORMACIÓN IMPORTANTE MENCIONADA ARRIBA Y HAYA RENDIDO UNA DECLARACIÓN FIDEDIGNA.**

Customs Form 6059B (Vietnamese) (11/02)

FIGURE 2-3-34 Customs Form 6059B, Customs Declaration, in Vietnamese (front)

Thông Tin Quan Trọng Hải Quan Hoa Kỳ xin chào mừng quý vị đến Hoa Kỳ

Hải Quan Hoa Kỳ có nhiệm vụ bảo vệ Hoa Kỳ đối với việc nhập khẩu trái phép những vật phẩm cấm. Nhân viên hải quan có quyền hỏi và khám xét quý vị và tài sản riêng của quý vị. Nếu là khách đến bị khám xét, quý vị được đối xử lịch sự, chuyên nghiệp và tôn trọng. Các Giám Sát Viên Hải Quan và Đại Diện Dịch Vụ Hành Khách luôn sẵn sàng giải đáp thắc mắc của quý vị. Luôn có sẵn phiếu góp ý để quý vị khen tặng hay phản hồi ý kiến.

Thông Tin Quan Trọng

Cư dân Hoa Kỳ — khai mọi vật phẩm có được ở hải ngoại và mang theo vào Hoa Kỳ.

Khách đến (Không là cư dân) — khai giá trị mọi vật phẩm sẽ lưu lại tại Hoa Kỳ.

Khai mọi vật phẩm trong tờ khai này và ghi giá trị bằng Mỹ kim. Đối với quà tặng, xin ghi rõ giá bán lẻ.

Thuế — Nhân viên hải quan sẽ định thuế. Thông thường cư dân Hoa Kỳ được miễn thuế \$800 đối với các vật phẩm mang theo. Khách đến (không là cư dân) thường được miễn thuế \$100, và sẽ trả thuế theo phần suất hiện hành cho \$1.000 đầu tiên vượt quá mức miễn thuế.

Nói chung cấm nhập những chất bị kiểm soát, vật phẩm khiêu dâm và chất độc hại.

Xin cảm ơn, và chào mừng quý vị đến Hoa Kỳ.

Việc vận chuyển tiền hay phương tiện tiền tệ là hợp pháp, bất kể số lượng bao nhiêu. Tuy vậy, nếu quý vị mang vào hoặc mang ra khỏi Hoa Kỳ trên \$10.000 (Mỹ kim hay ngoại tệ tương đương, hoặc kết hợp cả hai), theo luật pháp, quý vị cần trình báo cho Hải Quan Hoa Kỳ trên mẫu khai hải quan 4790. Phương tiện tiền tệ kể cả tiền xu, tiền giấy, chi phiếu du lịch và trái khoán - chẳng hạn như chi phiếu riêng hay ngân phiếu, chứng khoán và công khố phiếu. Nếu nhờ người khác mang tiền hay phương tiện tiền tệ cho mình, quý vị cũng phải trình báo trên mẫu khai hải quan 4790. Nếu không trình báo theo mẫu, hoặc không khai tổng số tiền mang theo, quý vị có thể bị tịch thu toàn bộ tiền hay phương tiện tiền tệ, và có thể bị phạt dân sự và/hoặc truy tố hình sự. **XIN KÝ TÊN VÀO MẶT BÊN KIA CỦA BIỂU MẪU NÀY SAU KHI ĐỌC XONG THÔNG TIN QUAN TRỌNG BÊN TRÊN VÀ KHAI ĐÚNG SỰ THẬT.**

THÔNG BÁO VỀ ĐẠO LUẬT GIẢM CÔNG VIỆC GIẤY TỜ: Đạo Luật Giảm Công Việc Giấy Tờ (Paperwork Reduction Act) năm 1995 yêu cầu chúng tôi cho quý vị biết lợi ích của việc giảm bớt thông tin này, để quý vị có thể quyết định có phải cho chúng tôi biết thông tin đó hay không. Thông tin thu thập trong biểu mẫu này cần dùng để xử lý hành lý Hải Quan, Cảnh Sát và liên hệ của Hoa Kỳ. Hải quan cần có thông tin trong biểu mẫu này để bảo đảm là khách đến tuân hành luật lệ, và để giúp chúng tôi thu toán và thu khoản thuế thích hợp. Quý vị phải trả thuế. Cơ quan nào đó có thể không liên lạc hay báo trợ, vì có nhân viên để không cần đáp ứng việc thu thuế thông tin, trừ khi nó liên hệ để kiểm soát theo OMB. Thời gian trung bình ước lượng cần để thu thập thông tin là 4 phút mỗi người đáp ứng người ghi nhận, trừ vào toàn cảnh riêng biệt. Xin gửi ý kiến về thủ tục này về mặt lợi ích bằng thời gian và để nghị giảm bớt cho U.S. Customs Service, Reports Clearance Officer, Information Services Branch, Washington, DC 20223, và cho Office of Management and Budget, Paperwork Reduction Project (1515-0041), Washington, DC 20503. KHÔNG ĐƯỢC TÁI BẢN BIỂU MẪU NÀY SẼ CHỈ ĐƯỢC CHẤM LỖ BIỂU MẪU CỦA HẢI QUAN HOA KỲ CHỈ THUẬN.

Introduction

The Special Procedures section provides direction and guidance for additional tasks you are responsible for doing. These additional tasks supplement the general procedures for clearing regulated cargo and passenger baggage.

User Fees

See [Appendix L](#) for directions for setting and collecting user fees. These fees are collected each time an officer signs a certificate or an endorsement for the export of animal products.

Certifying Animal Products and By-Products for Export

Introduction

In general, PPQ officers are responsible for certifying both edible and inedible animal products for export. Some special considerations follow.

European Union

The majority of animal products and by-products exported to the European Union¹ (EU) require a veterinary certificate endorsed by an APHIS veterinarian. In those instances, PPQ Officers may **not** issue or endorse an export certificate.

Some by-products, such as treated game trophies² (i.e., bones, horns, hooves, claws, antlers, teeth, hides, or skins) require an EU veterinary certificate. Game trophies that have **not** been finished require an EU veterinary certificate signed by a veterinarian. The U.S. exporter can get an EU veterinary certificate from the exporter's European importer or from the State AVIC.

Refer requests for export certificates for fish meal to the local Area Veterinarian in Charge.

Japan

Fish meal for export to Japan **must** be endorsed by VS.

Refuse to issue export certificates for any product derived from cervidae. Japan has prohibited the importation of such products from the United States because of chronic wasting disease (transmissible spongiform encephalopathy in deer and elk). This prohibition **does not** affect other ruminant products exported to Japan.

Japan bans³ poultry and poultry products from New York, West Virginia, and Virginia (States with avian influenza). Therefore, **do not** issue an export certificate for poultry or poultry products from these States unless the exporter provides a valid Japanese Import Permit.

1 The European Union consists of the following member States: Austria, Belgium, Bulgaria, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, and the United Kingdom. (Canary Islands (Spain), Azores and Madeira (Portugal), and French Guyana, Guadeloupe, Martinique, and Reunion (France) are sometimes listed separately even though they are legally a part of Spain, Portugal, and France.)

2 EU definition of treated refers to: (1) hides and capes which have been either dried or dry-salted or wet-salted for a minimum of 14 days prior to exportation; and (2) bones, horns, hooves, claws, antlers, or teeth which have been (a) immersed in boiling water for an appropriate time to ensure that any other bone, horn, hoof, claw, antler, or tooth is removed or (b) disinfected with a product authorized by VS (hydrogen peroxide is the disinfectant of choice for bony game trophies).

3 The ban covers all heat-treated and otherwise treated poultry products.

You may certify shipments of poultry and poultry products from **other than** New York, West Virginia, or Virginia **without** having a valid Japanese Import Permit.

Mexico

Refuse to issue export certificates for ostrich hides being exported to Mexico.

Special certification is required for milk and milk products, meat products and by-products, and meat and bone meal of ruminants (cow, deer, goat, and sheep). The two required statements are as follows:

The animals from which the product was obtained were **not** fed ruminant-origin meat and bone meal.

In the country of origin, there are animal health regulations that forbid the feed of ruminant-origin meat and bone meal to ruminant animals.

South Africa

PPQ Officers **do not** issue export certificates for animal products to South Africa. Advise the exporter that the **only** certificate acceptable is one provided by the South African government and endorsed by an APHIS veterinarian. Recommend that the exporter contact South African government officials for exact guidelines, and direct them to the nearest AVIC. Refer to [Appendix H](#) for a list of AVICs.

Sri Lanka

Use USDA letterhead certification for animal products or by-products exported to Sri Lanka. (See [USDA Letterhead Certification on page 2-4-8](#).) **Never** issue a VS Form 16-4.

Aquaculture and Fish Products, Including Fish Meal and Fish Oil

U.S. Department of Commerce, National Oceanic and Atmospheric Administration (228/762-7402, xt. 312) provides certification for fish meal and fish oil. FDA, Office of Seafood (202/418-3198) certifies seafood and seafood products.

Dairy Products

PPQ Offices **do not** issue export certificates to India. PPQ Officers should **only** issue export certificates (except to India) for dairy products being exported for human consumption if one or more of the following criteria are met:

- ◆ Importing country requires APHIS certification
- ◆ Certification involves statements regarding the animal health status of specific animals of the United States⁴

⁴ The **only** statements about the health status of animals in the United States that PPQ is authorized to certify refers to the animals receiving ante- and post-mortem inspection. Refer requests for export certificates with any other animal health statement to the nearest Area Veterinarian In Charge (AVIC).

If PPQ is required to endorse a dairy product certificate that includes statements regarding public health, verify the statements by contacting either the USDA Agricultural Marketing Service, Dairy Standardization Branch at 202/720-9382, or U.S. Food and Drug Administration (FDA), Office of Plant and Dairy Foods and Beverages at 202/205-4681.

Meat and Meat Products

If the exporter needs certification about the animal health status of the United States, and if the certification is for personal quantities of meat (that is, **less than** 50 pounds), then PPQ Officers may sign an export certificate. However, PPQ Officers are **never authorized** to sign export certificates for quantities of meat **greater** than 50 pounds. USDA, Food Safety and Inspection Service is responsible for endorsing these certificates. Exporters may call FSIS's Export Services at 1-800-233-3935 for information or for service.

Poultry and Poultry Products and By-Products

Contact your local AQI Veterinarian to determine the appropriate action. Because of the exotic Newcastle disease (END) outbreak in California and Nevada, some countries have imposed restrictions on the importation of poultry and poultry products or by-products from the U.S. Current information on these trade restrictions may be viewed on the Internet at the following URL:

<http://www.aphis.usda.gov/lpa/issues/enc/exoticnc.html>

Ways of Certifying Animal Products, By-Products, or Nonanimal Products for Export

Never endorse a certificate for a product that has already been exported, or that is on HOLD in another country, or that has been rejected by the importing country based on the documentation submitted prior to entry. Refer these requests for endorsement to VS National Center for Import/Export in Riverdale, MD at 301/734-3277.

There are three methods for certifying animal products, by-products, or nonanimal products for export as follows:

- ◆ USDA Letterhead Certification
- ◆ VS Form 16-4, Export Certificate for Animal Products
- ◆ Rubber Stamp Export Certificate

When you receive a request to export animals, animal products, animal by-products, or nonanimal products, first determine what is being exported. See [Table 2-4-1](#).

The exporter is responsible for getting the correct exporting documents and certification statements. PPQ should require a copy of the certification statements before endorsing a certificate that has additional declarations.

TABLE 2-4-1 Determine if PPQ Can Certify the Export Product

If the item being exported is:	And is being exported:	And the quantity is:	Then:
Dairy product	→	→	GO to Table 2-4-2
<ul style="list-style-type: none"> ◆ Fish meal ◆ Fish oil ◆ Seafood 	→	→	GO to Table 2-4-3
<ul style="list-style-type: none"> ◆ Inedible animal product ◆ Inedible by-product 	→	→	ISSUE VS form 16-4
Live animal such as: <ul style="list-style-type: none"> ◆ Semen or embryos ◆ Eggs for hatching ◆ Live aquatics, e.g., fish, fish eggs, prawns, shrimp 	→	→	ADVISE exporter to request a certificate from the nearest AVIC (see VS-AVIC on page H-1-5)
<ul style="list-style-type: none"> ◆ Meat ◆ Meat product, e.g. pot pie, ravioli, or salami 	Commercially	More than 50 pounds	<ul style="list-style-type: none"> ◆ ADVISE the exporter to request a certificate from FSIS ◆ If FSIS will not certify, CONTACT PPQ-AQI-VMO or PPQ-VRS-Headquarters Personnel
	Personally	50 pounds or less (personal quantify)	ISSUE VS Form 16-4
Nonanimal product such as: <ul style="list-style-type: none"> ◆ Farm machinery ◆ Grain¹ ◆ Hay¹ ◆ Lumber¹ ◆ Personal effects ◆ Straw¹ 	→	→	Issue either one: <ul style="list-style-type: none"> ◆ USDA letterhead certificate ◆ Rubber stamp export certificate
Other than listed above	→	→	Contact PPQ-AQI-VMO or PPQ-VRS-Headquarters Personnel for directions

- 1 May also require phytosanitary certification. Grain exported to Russia needs a special certificate which **must** be signed by a veterinarian.

TABLE 2-4-2 Determine if PPQ can Certify the Export of Dairy Products

If the product is for:	And the importing country requires:	And the declarations involve statements regarding:	Then:
Human consumption	Additional declarations	The animal health status of the United States	ISSUE VS Form 16-4
		The animal health status of specific animals	
		Human health	ADVISE the exporter to request a certificate from AMS or FDA ¹
Other than human consumption	No additional declarations	—————→	ISSUE VS Form 16-4
	—————→	—————→	

- 1 If applicable, certification may also be obtained from the dairy authority in the State of origin.

TABLE 2-4-3 Determine if PPQ Can Certify the Export of Fish Meal, Fish Oil, or Seafood

If the certificate is for:	And certification refers to:	Then:
Fish or fish meal	Testing of fish meal or fish oil	ADVISE the exporter to request a certificate from NOAA/ National Marine Fisheries Service (NMFS) ¹
	Fish meal or fish oil coming from an approved facility	
	Only to information referring to animal health ²	ISSUE VS Form 16-4
Seafood	—————→	ADVISE the exporter to request a certificate from FDA ¹

- 1 Once the Fish Meal Program Manager of NOAA or the Office of Seafood of FDA, or an applicable State Agency has issued its document, you may endorse VS Form 16-4 with information regarding animal health issues.
- 2 Refer certification for fish meal or fish oil for export to Japan or the European Union to the local Veterinarian in Charge.

Rubber Stamp Export Certificate

The rubber stamp export certificate is a boxed, certification endorsement for specific diseases. Use a rubber stamp certificate when acceptable to make a general certification. General certification includes statements such as, “This is to certify that foot-and-mouth disease, rinderpest, contagious bovine pleuropneumonia, swine vesicular disease, classical swine fever, and African swine fever **do not** exist in the United States.” A rubber stamp certificate is **never** acceptable for exportations that require additional certification; for example, an anthrax statement.

Place the stamp impression on shipping documents or other papers accompanying the exportation. The wording on the stamp **must** be enclosed in a box to set apart from all other information on the document. See [Figure 2-4-1](#) below for an example of a rubber stamp export certificate.

DATE _____
TO WHOM IT MAY CONCERN:
THIS IS TO CERTIFY THAT FOOT-AND-MOUTH DISEASE, RINDERPEST, CONTAGIOUS BOVINE PLEUROPNEUMONIA, SWINE VESICULAR DISEASE, CLASSICAL SWINE FEVER, AND AFRICAN SWINE FEVER DO NOT EXIST IN THE UNITED STATES OF AMERICA.
_____ INSPECTOR NEW ORLEANS, LA.
U.S. DEPARTMENT OF AGRICULTURE ANIMAL AND PLANT HEALTH INSPECTION SERVICE AGRICULTURAL QUARANTINE INSPECTION PROGRAM
DEPARTMENT CERTIFICATION REFERS ONLY TO MATTERS CONTAINED IN THIS BOX

FIGURE 2-4-1 Example of a Rubber Stamp Export Certificate

USDA Letterhead Certification

Use the USDA letterhead certificate to certify exports of **nonanimal** products. These products include grain, hay, straw, lumber, farm machinery, and personal effects. Also, the USDA letterhead can be used when additional statements are necessary beyond the general certification on VS Form 16-4. **Never** use VS Form 16-4 to certify exports of nonanimal products.

The USDA letterhead certificate is used most often for exports of grain that may require an anthrax statement or additional disease statement. An anthrax statement **must** be confirmed by the AVIC from the State where the grain originated.

"This office has on file an affidavit from *[grain company]*, stating that the grain originated in the following States:
[list the States of origin]
 There have been no outbreaks of anthrax in the States listed above during the past 12 months."

FIGURE 2-4-2 Standard Anthrax Statement Entered on the USDA Letterhead Certificate for the Export of Grain

See [Figure 2-4-2](#) for the standard anthrax statement entered on the USDA letterhead certificate.

See [Figure 2-4-3](#) for the standard disease statement entered on the USDA letterhead certificate.

"This is to certify that rinderpest, foot-and-mouth disease, classical swine fever, swine vesicular disease, African swine fever, and contagious bovine pleuropneumonia **do not** exist in the United States of America."

FIGURE 2-4-3 Standard Disease Statement Entered on the USDA Letterhead Certificate

1. Determine what statements the exporter requires or wants on the USDA letterhead certificate. See [Table 2-4-4](#).

TABLE 2-4-4 Determine Which Statements Exporter Requires or Wants on the USDA Letterhead Certificate

If the exporter:	And an affidavit is:	Then:
Requires an anthrax statement for an export shipment of grain	→	1. CONTACT the AVIC in the State where the grain originated to confirm the anthrax statement 2. ENTER the standard anthrax statement on the USDA letterhead certificate
Wants to make an additional statement  Important	On file for the same product	ENTER the additional statement on the USDA letterhead certificate; for example, "This office has on file a notarized affidavit from <i>[insert name of company]</i> verifying the statements below."
	Not on file	CONTACT PPQ-AQI-VMO or PPQ-VRS-Headquarters Personnel for further action

If the exporter wants to add a disease statement, contact the AVIC to verify the disease status requested.

2. Sign and date the USDA letterhead certificate.
3. Collect the appropriate user fee.
4. Maintain a copy of the USDA letterhead certificate.

VS Form 16-4, Export Certificate for Animal Products

Use **only** VS Form dated March 1999 or later. Earlier forms are obsolete. If an obsolete form is presented for signature, then require the exporter to type a new one.

VS Form 16-4, Export Certificate for Animal Products, is used for exports of **both** edible and inedible animal products and by-products. The certificate can be issued for various animal products **without** inspection if the exporter provides a notarized affidavit.

Never issue VS Form 16-4 for meat or meat products over 50 pounds or for nonanimal products. Shipments of meat or meat products over 50 pounds are certified for export by FSIS. Use a USDA letterhead certificate for nonanimal products.

The exporter will ask for VS Form 16-4. The exporter is responsible for completing the description of the consignment, and will most likely have entered the required and requested additional declarations.

Before signing VS Form 16-4, do the following:

1. Complete the upper, right-hand block of the form which includes the following:
 - ❖ Port—office issuing the form
 - ❖ Date—date the form is issued
 - ❖ And No.—Assigned number unique to the office where the form will be signed. The number **must** be typed on all copies of the form
2. Verify that the form was typewritten or computer generated.

Never accept a handwritten form. The form **must** be typewritten or computer generated. Corrections to typographical errors are acceptable. To correct a form, draw a single thin line through the incorrect word or phrase so that the original may be read; initial each correction. **Never** black out a correction or type over a mistake.

3. Verify that the information is in English (mandatory). Bilingual information is acceptable as long as one of the languages is English.

- Verify that the product information (quantity, unit of measure, and kind) is complete enough to determine the animal class (e.g., ruminant, swine).

Important

If a brand name is used, a brief explanation should be included (e.g., dairy product of bovine origin or collagen product of swine origin).

- Validate that all statements under Additional Declaration are supported by a notarized affidavit or a laboratory report if necessary. Refer to [Table 2-4-5](#) for determining what additional statements are acceptable. If there are **no** statements present or added, continue on to [Step 6](#). If the exporter needs endorsement for statements regarding public health, have the exporter contact AMS or FDA for such endorsement.

TABLE 2-4-5 Validate Additional Declarations on VS 16-4, Export Certificate for Animal Products

If the additional statements are known to be:	And there is:	Then:
Factual and true	A notarized affidavit present or on file supporting the statements presented or added for the same product	<ol style="list-style-type: none"> GO to Notarized Affidavits on page 2-4-12 to verify the supporting statements The first statement on the VS Form 16-4 must read as follows: "This office has on file a notarized affidavit from [<i>insert name of company here</i>] verifying the statements below" RETURN to Step 5.
	No notarized affidavit present on file or if there is one on file, the affidavit for a different product	CONTACT PPQ-AQI-VMO or PPQ-VRS-Headquarters Personnel for further action
False or you are uncomfortable with the affidavit or the nature of the statements to be included on the health certificate		

- Draw a diagonal line from just under the statement to the bottom of the *Additional Declaration* space. Draw a line through any other space left blank to ensure that the form is **not** altered after signature.

7. Verify that the name and title (APHIS Officer) of the endorsing official are **typed** or stamped on the form.
8. Date and sign the form **before** the product is shipped.
9. Distribute copies as follows:
 - A. Give the exporter the original and up to three copies
 - B. File a copy in the office where issued
 - C. File any notarized affidavit or laboratory report

If there are additional declarations, send a copy to PPQ, VRS in Riverdale, MD.

Notarized Affidavits

When notarized affidavits are used to support statements placed under *Additional Declaration* on VS Form 16-4, verify the following information:

1. The affidavit **must** be made on company letterhead.
2. The signing official of the affidavit **must**:
 - A. Be a person of authority within that company who is qualified to verify the affidavit (e.g., owner, president, chief executive officer, or quality control manager)
 - B. Explain the person's authority within the company by describing the person's qualifications to make or verify the statements
 - C. State that the person is authorized to represent the company in this manner
3. The affidavit **must** contain information that the company wishes to have included on an export certificate about the processing and/or quality of the product.
4. The last statement above the signature on the affidavit **must** read as follows:

“I certify that the statements listed above are true to the best of my knowledge and belief.”

(Statements that **may not** be made on a VS Form 16-4 based on a notarized affidavit include those about the animal health status of the United States and those referring to testing of the export products.)

5. The signing official's name and title **must** be typed under the official's signature.

6. The affidavit **must** be notarized (signed before a notary public) within the past year.
7. Attach a copy of the affidavit to the office copy of VS Form 16-4.
8. Obtain information about the animal health status of the United States by reviewing the APHIS Home page at <http://www.aphis.usda.gov> or by contacting **one** of the following offices:
 - ❖ PQ, VRS
 - ❖ VS, Technical Trade Services Product Staff (TTSPS)
 - ❖ AVIC (see [Appendix H](#))
9. Any certificate indicating that a product has been tested may **not** be signed until the test results have been verified. Instruct the exporter to send the test results along with the certificate.

Disinfection

Articles That Require Cleaning and Disinfection

If any article or surface is contaminated with animal material, then the article or surface **must** be cleaned and disinfected. If you encounter an importation of prohibited or restricted animal products, and the packaging or containers holding those products have leaked—then the contaminated pallets, machinery used in handling, dock or warehouse areas used for storage, or trucks or railroad cars used for transporting the products **must** be cleaned and disinfected before they are reused.

Materials for Disinfectant Kit

Collect the following materials for a ready-to-use disinfectant kit:

- ◆ Gallon plastic container filled with water
- ◆ Insulated box, such as an ice chest, for holding the equipment used to disinfect; label the box “Disinfectant Kit” and type and affix directions for its use inside the lid
- ◆ Leakproof, double plastic bags to hold collected material
- ◆ Material Safety Data Sheets (MSDS) for Virkon® S, sodium hypochlorite, and sodium carbonate
- ◆ Pint spray bottle
- ◆ Roll of paper towels
- ◆ Scrub brush and a scraping tool
- ◆ Whisk broom and dust pan

Protective Clothing and Safety Materials

Assemble the following protective clothing and safety materials for use while disinfecting:

- ◆ Disposable, plastic shoe covers
- ◆ Pair of rubber gloves or disposable, plastic gloves
- ◆ Plastic bottle of vinegar (necessary **only** if you use a solution that contains lye; vinegar neutralizes lye)
- ◆ Safety goggles and coveralls (necessary **only** if you **must** prepare a solution that contains lye)

Instructions for Cleaning and Disinfection

Follow the steps listed below for cleaning and disinfection.

Step 1

Select from **Table 2-4-6** the appropriate disinfectant based on the article being disinfected, the animal class involved, and the disease at risk. Then, go to **Step 2** for preparation.

TABLE 2-4-6 Select the Appropriate Disinfectant

If the article is:	And the animal class is:	And the disease status is:	Then use a solution with water that contains:
Empty semen container	—————→	—————→	4 percent sodium carbonate with 0.1 percent sodium silicate
Footwear	—————→	—————→	Sodium hypochlorite ¹ or Virkon® S
Other than an empty semen container; for example storage area, farm machinery, pallet, forklift, pier, stall, railroad car	Swine	FMD only	Sodium hypochlorite, sodium hydroxide, or Virkon® S
		CSF only	Sodium hypochlorite or Virkon® S
		Any combination of ASF, CSF, FMD, and/or SVD	Sodium hypochlorite or Virkon® S
	Ruminant	—————→	Sodium hypochlorite, sodium hydroxide, or Virkon® S
	Poultry	—————→	Sodium hypochlorite, sodium hydroxide, or Virkon® S
	Unknown or combination of animals	—————→	Sodium hypochlorite or Virkon® S

1 Warn passengers that the strength of the solution may bleach out color depending on the type of footwear.

Step 2

Use the formulas and instructions in [Table 2-4-7](#) and [Table 2-4-8](#) for mixing disinfectants.

Never use the disinfectants listed in [Table 2-4-7](#) around food or in areas where food is handled or prepared. When disinfecting such areas, allow the use of a sanitizer that is normally used around foods. The sanitizer **must** be one approved by the EPA.

TABLE 2-4-7 Formulas and Instructions for Mixing Disinfectants

If you need a solution of:	Then:
4 percent sodium carbonate (common name: soda ash)	<div style="display: flex; align-items: center;">  <div style="background-color: #e0f2f1; padding: 5px; border: 1px solid #ccc;"> <p>The solution is only mildly caustic, but can dull paint and varnished surfaces.</p> </div> </div> <ol style="list-style-type: none"> 1. ADD 5.33 ounces of the sodium carbonate to each gallon of water (or 1 pound to 3 gallons of water or 15 pounds to 55 gallons of water) 2. MIX thoroughly 3. CONTINUE to Step 3 on page 2-4-17
4 percent sodium carbonate with 0.1 percent sodium silicate	<ol style="list-style-type: none"> 1. ADD 5.33 ounces of sodium carbonate to each gallon of water 2. ADD 4 ml of sodium silicate solution to each gallon of water 3. MIX thoroughly 4. CONTINUE to Step 3 on page 2-4-17
1 percent Virkon® S	<div style="display: flex; align-items: center;">  <div style="background-color: #e0f2f1; padding: 5px; border: 1px solid #ccc;"> <p>Mixed solutions of Virkon S are stable for 7 days or when the pink color fades, whichever is shorter. Do not soak metal objects longer than 10 minutes.</p> </div> </div> <ol style="list-style-type: none"> 1. ADD 1.3 ounces (8 teaspoons) of the chemical to each gallon of water 2. MIX thoroughly 3. SKIP to Step 4 on page 2-4-17

TABLE 2-4-7 Formulas and Instructions for Mixing Disinfectants (continued)

If you need a solution of:	Then:
Sodium hydroxide (2 percent solution of lye)	<div style="display: flex; align-items: flex-start;"> <div style="margin-right: 20px;">  </div> <div style="background-color: #e0f2f1; padding: 5px;"> <p>This solution is highly caustic. Never use unless you have prior approval from PPQ-VRS-HQ personnel (see Appendix H)</p> </div> </div> <ol style="list-style-type: none"> 1. PUT on protective rubber clothing and safety goggles 2. HAVE some vinegar available to neutralize the lye in case of a spill 3. ADD 1/3 cup NaOH pellets (2.66 ounces of the lye) to 1 gallon of water <div style="display: flex; align-items: flex-start; margin-top: 10px;"> <div style="margin-right: 20px;">  </div> <div style="background-color: #e0f2f1; padding: 5px;"> <p>Never pour the water over the lye because the concentrated lye could splash on you. If any of the solution comes in contact with your eyes, immediately flush with water and immediately get medical attention. If the solution comes in contact with your skin, immediately flush with water and rinse with vinegar.</p> </div> </div> <ol style="list-style-type: none"> 4. WARNING: MIX thoroughly 5. SKIP to Step 4 on page 2-4-17
Sodium hypochlorite (household bleach)	GO to Table 2-4-8

Formulas and instructions for mixing sodium hypochlorite are for practical use. Calculations are approximate.

TABLE 2-4-8 Formulas and Instructions for Mixing Sodium Hypochlorite

If you need a solution of:	And the available concentration of sodium hypochlorite is:	Then:
0.1 percent solution of the disinfectant ¹	5.25% ²	<ol style="list-style-type: none"> 1. ADD 5 tablespoons (2-1/2 ounces) of bleach to each gallon of water (or ADD 1 gallon of bleach to 50 gallons of water) 2. MIX thoroughly 3. SKIP to Step 4 on page 2-4-17
	6% ²	<ol style="list-style-type: none"> 1. ADD 4 tablespoons and 1 teaspoon (2-1/3 ounces or 65 ml) of bleach to each gallon of water (or ADD 13 cups of bleach to 50 gallons of water) 2. MIX thoroughly 3. SKIP to Step 4
1.0 percent solution of the disinfectant ³	5.25% ²	<ol style="list-style-type: none"> 1. ADD 4 cups (32 ounces) of bleach to 1 gallon of water 2. MIX thoroughly 3. SKIP to Step 4
	6% ²	<ol style="list-style-type: none"> 1. ADD 3.2 cups (26 ounces) of bleach to 1 gallon of water 2. MIX thoroughly 3. SKIP to Step 4
3.0 percent solution of the disinfectant ⁴	5.25% ²	<div style="display: flex; align-items: center;">  <div style="background-color: #e0f2f1; padding: 5px; border: 1px solid #ccc;"> Use personal protective equipment (PPE) i.e., gloves and goggles, when applying at this concentration. </div> </div> <ol style="list-style-type: none"> 1. ADD 1.3 gallons (170 ounces) of bleach to 1 gallon of water (or ADD 4 parts bleach to 3 parts water) 2. MIX thoroughly 3. SKIP to Step 4
	6% ²	<div style="display: flex; align-items: center;">  <div style="background-color: #e0f2f1; padding: 5px; border: 1px solid #ccc;"> Use personal protective equipment (PPE) i.e., gloves and goggles, when applying at this concentration. </div> </div> <ol style="list-style-type: none"> 1. ADD 1 gallon of bleach to 1 gallon of water 2. MIX thoroughly 3. SKIP to Step 4

- 1 This is the strength to use in baggage or passenger areas.
- 2 Determine the percent of available chlorine by checking the container's label. Sodium hypochlorite or bleach comes in two concentrations: 5.25 or 6 percent available chlorine.
- 3 This is the strength necessary for **moderately** contaminated materials.
- 4 This is the strength necessary for **heavily** contaminated materials.

Step 3

When applying sodium carbonate, check the concentration of the active ingredient before use. This step is recommended but **not** mandatory **except** for disinfectant used aboard aircraft. Refer to the *Manual for Agricultural Clearance (MAC)*.

If a field test kit is available, use the kit to check the concentration. (These kits are supplied to larger ports.) Otherwise, send a 3- to 4-ounce sample of the solution, accompanied by a completed VS Form 10-4, to the National Veterinary Services Laboratory following the procedures for completing and distributing forms in [Appendix K](#).

If the results of the laboratory test or field test show that the concentration of the sodium carbonate is between 4.0 to 4.5 percent, use the disinfectant. If the results show that the concentration is below 4.0 percent or above 4.5 percent, **do not** use the disinfectant. Mix another batch and return to [Step 2 on page 2-4-14](#).

Never use the premixed solution of sodium carbonate until the test results show the appropriate concentration of active ingredient.

Step 4

Sweep up or scrape off as much of the contaminant as possible. Put the sweepings or scrapings into a leakproof plastic bag for later incineration. Free surfaces from dirt and grease if applicable. For footwear, clean the excess dirt and manure from the boots or shoes using a stiff brush, screwdriver, or other blunt object. Be sure to scrape dirt from crevices in shoes and boots. You may have the passenger clean the footwear.

Step 5

Scrub the contaminated area or the area where the spillage occurred with a good detergent solution.

If the area is **not** effectively scrubbed first, then any viruses embedded below the surface remain untouched and the disinfectant is **not** effective.

Step 6

Flush the scrubbed surfaces with clean water. Flushing is important because the detergent may react with the disinfectant and reduce the disinfectant's activity.

Step 7

If using a premixed solution of disinfectant, then agitate the solution thoroughly. If the temperature is below freezing, delay the application of the disinfectant until the temperature is above freezing. Apply the disinfectant. Following the application of lye, rinse off the disinfectant with water to prevent corrosion.

Step 8

Incinerate all refuse that was swept up or scraped off.

Sources of Supply for Disinfectants and Cleaning Materials

TABLE 2-4-9 Sources of Supply for Disinfectants and Cleaning Materials

Item:	Source of supply:
Bags, leakproof	GSA (National Stock Number 05-01-221-3236)
Bottle, spray	GSA (National Stock Number 25-00-488-7952)
Broom, whisk	GSA (National Stock Number 20-00-240-6350)
Brush, scrub	
◆ Upright	GSA (National Stock Number 20-00-240-7171)

Handling Pet Birds

All birds (**except** birds from Canada), as distinguished from poultry or unaccompanied birds, imported into the United States **must** be quarantined for 30 days at a USDA bird quarantine facility. The importer is responsible for making the necessary arrangements for quarantine as well as obtaining health certificates in the country of origin. Birds including pet birds (**except** for peach-faced lovebirds, budgerigars (budgies), and cockatiels), are also subject to U.S. Department of Interior, Fish and Wildlife Services (FWS) regulations found in 50CFR§14, 15, 21, and 23.

Peach-faced lovebirds, budgerigars (budgies), and cockatiels are **not** protected by the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) or the Wild Bird Conservation Act (WBCA); however, the export or import of these species still need to be declared to the U.S. Fish and Wildlife Service, Office of Law Enforcement (USFWS-OLE). The importer or exporter should contact the USFWS port of entry prior to such activities to meet these requirements. If you have questions, contact the U.S. Fish and Wildlife Service, Division of Management Authority at 1-800-358-2140 or 703-358-2281.

Veterinary Services (VS) is responsible for the handling of legally and illegally imported pet birds. See the regulations governing the importation of birds in 9CFR§93.

Important

Workstations may have established guidelines to coordinate the importation of pet birds beyond those established here.

Pet birds are those imported for the personal pleasure of their owners and are **not** intended for resale. Pet birds are regulated since they can carry the following viral and bacterial diseases of concern:

- ◆ Avian influenza (viral)
- ◆ Exotic Newcastle disease (END) (viral)
- ◆ Psittacosis⁵

In general, pet birds imported into the United States **must** be accompanied by a health certificate and a VS-issued Import Permit. U.S. origin birds returning to the U.S. need **only** a health certificate.

⁵ Psittacosis is an infectious disease of parrots and related birds. This bacterial disease is communicable to humans. In humans, the symptoms of psittacosis include a high fever, severe headache, chills, muscle aches, and a cough.

Bird Quarantine Facility Locations

Quarantine facilities for birds exists at the following locations:

- ◆ J.F.K. International Airport, New York
- ◆ Los Angeles, California
- ◆ Miami, Florida

Responsibilities

Veterinary Services (VS)

Veterinary Services (VS) is responsible for providing personnel during weekends and holidays. If a bird is ineligible for home quarantine, then VS is responsible for inspecting and transporting the bird to a quarantine facility during normal business hours.

VS Port Veterinarians are responsible for the following:

- ◆ Picking up a bird within 12-24 hours of notification by CBP
- ◆ Determining whether a bird is eligible for entry into the U.S.
- ◆ Inspecting the bird
- ◆ Completing all necessary paperwork
- ◆ Transporting the bird to a quarantine facility

CBP

CBP is responsible for the following:

- ◆ Notifying VS (the Port Veterinarian, a field veterinarian, or the AVIC) of a bird's arrival (see [Appendix H](#), for the lists of AVICs, VRS, and VS staff veterinarians)
- ◆ Safeguarding the bird until the VS veterinarian arrives

If a VS official is **not** available when a bird is presented for entry, then CBP personnel will hold the bird until a VS official arrives and can assume responsibility for the bird.

Owner

The owner (or importer) is responsible for the following:

- ◆ Obtaining an import permit if necessary
- ◆ Obtaining a health certificate in the country of origin
- ◆ Paying all user fees and costs associated with importing pet birds
- ◆ Arranging for the quarantine of the bird if necessary

Supplies

Cages or Carriers

VS supplies cages or carriers that can accommodate both small and large birds. CBP is responsible for storing these cages at the port of entry. CBP **must** inventory the cages and let VS know if more are

needed. If a cage or carrier is used, VS is responsible for cleaning and disinfecting the cage or carrier before returning the cage or carrier to the port of entry.

Cartons

CBP supplies the cardboard cartons used to transport the birds in cages or carriers to a quarantine facility. Cartons **must** be large enough to accommodate the cages or carriers. CBP **must** ensure the carton is placed in a room with good ventilation and appropriate temperature. The best way to do this is to get cartons specifically made for shipping live animals. Otherwise, cut a sufficient number of air holes out of the two opposite sides of a solid carton. You can buy suitable cardboard cartons from a commercial rental dealer, self-storage business, or moving company.

Air Filters

VS supplies air filters to CBP that are designed to prevent the spread of viruses and bacteria. **Never** substitute the VS-supplied air filters with other types of filters. Place the air filters over the air holes on the **outside** of the carton. Use a sturdy tape such as duct tape to hold the air filters in place.

Bird Feed

CBP supplies bird feed. Ports of entry are responsible for maintaining a small amount of assorted varieties of bird feed that is available at most pet and grocery stores. Store the bird feed in a freezer to preserve the quality of the feed.

Procedures

To determine which procedures to use for pet birds entering or transiting the United States, see [Table 2-4-10](#) below.

TABLE 2-4-10 Decide Which Procedures to Use for Handling Pet Birds

If the pet bird is:	Then:
Entering the United States	1. CONTACT the VS Port Veterinarian or AVIC ¹ to process and inspect the bird 2. SAFEGUARD the bird until the VS veterinarian arrives
Transiting the United States	GO to Table 2-4-11

¹ See [Figure H-1-4](#) for the list of AVICs.

Pet Birds Transiting the United States

TABLE 2-4-11 Action to Take on Pet Birds Transiting the U.S.

If the owner has:	Then:
Provided VS with advance notification of arrival	SAFEGUARD the bird until the VS veterinarian arrives
Not provided VS with advance notification of arrival	1. SAFEGUARD the bird 2. CONTACT local VS office or AVIC ¹

¹ See [Figure H-1-4](#) for the list of AVICs.

Clearing Mail Importations

Introduction

Foreign origin mail is examined by U.S. Customs on arrival in the United States. Packages containing plant and animal products are referred to PPQ for inspection and disposition. General mail procedures are detailed in the *Port of Entry Manual* (M 351). The following procedures are specific to mail importations of animal products and by-products.

Monitor packages from all countries of origin. If you encounter a package that is accompanied by a permit and if the permit number, date, and addresses all match and the package is intact with **no** evidence of leakage, then **do not** open.

If a package is **not** clearly or appropriately marked, handle as a package **not** covered by a permit.

Prohibit fresh meat and other animal products which **do not** meet USDA entry requirements.

When the manifest or the bill of lading of express or overnight delivered packages **does not** adequately identify the importation, then open the package.

When a package is held, or when part of the contents are removed and destroyed, document the regulatory action on PPQ Form 287, Mail Interception Notice. Refer to [Appendix K, Completing and Distributing Forms](#).

In the rare case when a package **must** be returned to the country of origin, do the following:

1. Line off the U.S. address on the package. Mark the package "Return to Sender."
2. Apply "Refuse Entry" stamp to the outside of the package near the original address.
3. Document your action on PPQ Form 287. Place a copy inside the package.
4. Hand the package to postal authorities with Customs' concurrence along with instructions to return the package to the country of origin.

If packages **do not** have to be returned to the country of origin, continue on to [Table 2-4-12](#).

TABLE 2-4-12 Determine Action to Take on Mail Importations

If the mail importation is:	And is:	Then:
Animal by-product	Fresh, or an organism, or a vector	GO to Importation Authorized Entry by VS Permits on page 2-4-26
	Other than fresh	GO to Table 2-4-13
Meat or meat products		GO to Table 2-4-14
Packed in straw, hay, or grass	From Canada, New Zealand, Norway	<ul style="list-style-type: none"> ◆ DISREGARD the straw, hay, or grass as animal disease vectors ◆ NOTE that the packing material may be subject to plant regulations
	From a country other than listed above (one known to be affected with FMD or infested with ticks)	GO to Straw, Hay, and Grass on page 2-4-25

Animal By-Products

TABLE 2-4-13 Determine Action to Take on Mail Importation of Animal By-Products

If the by-product:	And intercepted in:	Then:
Meets the entry requirements detailed in the <i>Reference</i> chapter		RELEASE
Does not meet the appropriate entry requirements	Regular mail	<ol style="list-style-type: none"> 1. REMOVE the prohibited item 2. COMPLETE PPQ Form 287 and put one copy in the package
	Parcel service other than the mail	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. CONTACT the addressee or broker 3. ALLOW the addressee or broker to make the necessary arrangements to meet the requirements¹

¹ If the requirements **cannot** be met, have the addressee or broker contact the PPQ, VRS Office at 301/734-7633.

Meat or Meat Products

TABLE 2-4-14 Determine Action to Take on Mail Importations of Meat or Meat Products

If the package is from a country known to be:	And the product:	Then:
Free from diseases of concern (ASF, BSE, CSF, END, FMD, or SVD)	Meets the entry requirements detailed in the <i>Reference</i> chapter	RELEASE
	Does not meet the appropriate entry requirements	GO to Table 2-4-15
Affected with a disease of concern		

TABLE 2-4-15 Determine Action to Take on Mail Importations of Meat or Meat Products Not Meeting Entry Requirements or from a Country Known to Be Affected with Diseases of Concern

If the product is:	Then:
Packed in tight, sealed, unsoiled containers	<ol style="list-style-type: none"> 1. REMOVE the meat or meat product for destruction by an approved method 2. ALLOW the remaining contents to go forward to its destination 3. Document action on PPQ Form 287, Mail Interception Notice 4. INCLUDE one copy of PPQ Form 287 in the package
Not packed separately (contaminated other material in the package)	<ol style="list-style-type: none"> 1. RETURN package to the sender along with all other contents of the package 2. DOCUMENT action on PPQ Form 287 3. INCLUDE one copy of PPQ Form 287 in the package 4. MAIL one copy of PPQ Form 287 to the consignee 5. LINE off the U.S. address on the package. Mark the package "Return to Sender" 6. APPLY a "Refuse Entry" stamp to the outside of the package near the original address 7. HAND the package to postal authorities with Customs' concurrence along with instructions to return the package to the country of origin <div style="display: flex; align-items: center; margin-top: 10px;">  <div style="margin-left: 10px;"> <p>Important</p> <p>If no return address is shown, then RETURN the package to postal authorities in the country of dispatch.</p> </div> </div>

Straw, Hay, and Grass

Regulate straw, hay, or grass used as packing when the package is from a country **other than** Canada, New Zealand, or Norway (these countries are free from FMD and ticks). Do the following:

1. Remove packing material if possible. Otherwise, REFUSE ENTRY.
2. Require the packing material to be disinfected or destroyed according to *Disinfection* on page 2-4-13.
3. Complete PPQ Form 287, Mail Interception Notice.

Importation Authorized Entry by VS Permits

Introduction

Veterinary Services (VS) permits take precedence over any entry requirement listed in this manual. VS has the authority to write a permit for any animal product or by-product except for fresh (chilled or frozen) meat of ruminants or swine from countries known to be affected with FMD. This meat is prohibited by the Tariff Act of June 17, 1930, Section 306(a).

There are two types of permits issued by two different units within VS; the units are The National Center for Import and Export Veterinary Services, Technical Trade Services Product Staff (VS, TTSPS) and The Center for Veterinary Biologics (VS, CVB).

The National Center for Import and Export Veterinary Services, Technical Trade Services Product Staff (VS, TTSPS) issues VS Form 16-6, which is a United States veterinary permit for importation and transportation of controlled materials and organisms and vectors.

The Center for Veterinary Biologics (VS, CVB) issues APHIS Form 2006, which is a United States veterinary biological product permit. Examples of these permits are in [Appendix G](#), Certificates and Forms.

Requests for VS Permits

TABLE 2-4-16 Where to Apply for VS Permits

If the consignee requests:	Then have the consignee:
VS Form 16-3, Permit application for VS Form 16-6A, United States Veterinary Permit for Importation and Transportation of Controlled Materials and Organisms and Vectors	DO one of the following: <ul style="list-style-type: none"> ◆ DOWNLOAD and COMPLETE VS Form 16-3, Application for Permit to Import or Transport Controlled Material for Organisms or Vectors at the following Internet URL: http://www.aphis.usda.gov/vs/ncie ◆ CONTACT VS, TTSPS at 301/734-3277
APHIS Form 2005, Permit application for APHIS Form 2006, United States Veterinary Biological Product Permit	CONTACT VS, CVB at 515/232-5785

Renewal of VS Permits

TABLE 2-4-17 Where to Renew VS Permits

If the VS permit is:	Then have the consignee:
VS Form 16-6A, United States Veterinary Permit for Importation and Transportation of Controlled Materials and Organisms and Vectors	DO one of the following: <ul style="list-style-type: none">◆ FAX a renewal request on company letterhead to VS, TTSPS at 301/734-8226◆ CONTACT VS, TTSPS at 301/734-3277
APHIS Form 2006, United States Veterinary Biological Product Permit	VS, CVB at 515/232-5785

Validation of VS Permits Using ePermits

To facilitate compliance with APHIS regulations, ePermits is available to CBP Agriculture Specialists to verify the validity of VS Import Permits (VS Form 16-6A) issued for the importation of animal products, animal by-products, organisms, and vectors; and for in-transit movement of animal products and animal by-products. A USDA eAuthorization account is required to access ePermits.

USDA eAuthentication

To comply with government-wide initiatives, ePermits users are required to complete a registration process called eAuthentication. USDA's eAuthentication is a system used by USDA agencies that enables individuals to obtain user-identification accounts that allow access to certain USDA web applications and services through the Internet. The web-based service identifies and validates USDA customers before they can use participating USDA web-based business applications. This system provides a unique user-identification code that a USDA web user can present to any participating USDA web site, therefore reducing the burden on customers to register for and maintain separate identities with every online system. To learn more about USDA's eAuthentication, please visit <http://www.eauth.egov.usda.gov>.

For more information on ePermits please visit http://www.aphis.usda.gov/permits/learn_epermits.shtml.

To create an eAuthentication account, follow the instructions below:

PROCEDURES

- A. Create an eAuthentication account
 - i. Access the USDA eAuthentication website at: <http://www.eauth.egov.usda.gov>
 - ii. Click on "Create an Account Page"
 - iii. Click on "Level 2 Access"

- iv. Complete the required information (Important: Enter contact information (name, address, and phone number) exactly as it appears on your government issued identification (i.e. State Driver's License, U.S. passport, State Identification Card). Do not enter work information.)
- v. Submit the information
- vi. You will receive a verification e-mail address you provided during the registration process to request your eAuthorization account.
- vii. Open the e-mail message you receive and click on "Activate my Account."

B. Credential verification:

- i. Within seven (7) calendar days from the date of submission, make an appointment and visit a USDA Service Center
- ii. Access a list of USDA Service Centers at <http://offices.sc.egov.usda.gov/locator/app> to locate a USDA Service Center (Important: In certain circumstances, APHIS could arrange for an APHIS LRA (local registration authority) to visit a CBP location to complete the process. Although the entire process could be completed during this single session, eAuthentication would be expedited if the CBP AI officers have completed the initial enrollment steps in Section A above before the LRA visit. Visiting LRAs would need internet access at the CBP location to complete the eAuthentication process.)
- iii. Provide the LRA at the USDA Service Center (or visiting the CBP location) with photo identification to complete the credentialing process.
- iv. Once your credentials have been verified by the LRA you will have access to ePermits.

When accessing ePermits, follow the directions in **Table 2-4-18** to help validate VS permits that accompany an importation of animal products or by-products.

TABLE 2-4-18 Directions to Validate VS Permits Using ePermits

If you want to:	Then:
Log into ePermits	1. Log onto the ePermits system via the internet at https://epermits.aphis.usda.gov/epermits . 2. Click "continue". 3. Enter your assigned eAuthentication ePermits User ID and Password. 4. Select "Log in" to access the ePermits Home Page.

TABLE 2-4-18 Directions to Validate VS Permits Using ePermits (continued)

If you want to:	Then:
Query ePermits by permit number	<ol style="list-style-type: none"> 1. At the ePermits Home Page, in the shaded box on the left side of the screen titled "Search for Permits" enter the permit number. 2. Select "Go" 3. To view the permit resulting from your query, click on the permit number at the left of the screen under the column titled "Permit/response". A pop-up box displaying the permit will appear. 4. Scroll down to view the entire permit. 5. Click the print icon on the top tool bar to print the entire permit. 6. To close the pop-up box, select the "X" in the upper right hand corner of the pop-up screen. 7. To conduct a new query select "Standard Search" in the upper right hand corner of the Permit Search Result screen. Enter the new permit number and select the "Standard Search" grey bar at the bottom of the screen. Repeat steps 3-6. 8. To return to the ePermits Home Page, select "Home" in the upper right hand corner of the screen.
Query ePermits using the advance search option	<ol style="list-style-type: none"> 1. At the ePermits Home Page, in the shaded box on the left side of the screen, click "Advanced Search". 2. Enter the applicant's last name and/or the applicant's company name in the appropriate box. 3. In the box titled "Permit/Response Type" scroll down and highlight "VS 16-3" 4. Click the "Advanced search" grey bar at the bottom of the screen to obtain the results of your query. 5. To view a permit resulting from your query, click on the desired permit at the left of the screen under the column titled "Permit/response". A pop-up box displaying the permit will appear. 6. Scroll down to view the entire permit. 7. Click the print icon on the top tool bar to print the entire permit. 8. To close the pop-up box, select the "X" in the upper left of the pop-up screen. 9. To view another permit resulting from your query, repeat steps 4-7 above. 10. To conduct a new query, select "Advanced search" and repeat steps 2-7 above. 11. To return to the ePermits Home Page, select "Home" in the upper right hand corner of the screen.

Processing Importations Authorized Entry by a VS Permit

Because some animal by-products authorized entry by permit are highly perishable, expedite importations you are authorized to release. Allow the importer to apply dry ice or refrigerate the animal by-product if perishable.

Important

Look for the triple asterisk (***) restrictions on the permit. These restrictions may require additional certification.

Match all of the following information on the VS permit with the shipping documents:

- ◆ Current date
- ◆ Description of material
- ◆ Shipper
- ◆ Consignee
- ◆ Conditions spelled out on the permit

TABLE 2-4-19 Match Information on VS Permit with Shipping Documents

If the permit:	And the VS permit is:	Then:
Matches the shipping documents	→	RELEASE or CONTROL as specified on the permit
Has expired	VS Form 16-6A, United States Veterinary Permit for Importation and Transportation of Controlled Materials and Organisms and Vectors	1. DO NOT RELEASE the HOLD 2. HAVE the consignee contact VS, TTSPS (see Table 2-4-17) 3. SAFEGUARD the importation until you hear from VS, TTSPS
	APHIS 2006, United States Veterinary Biological Product Permit	1. DO NOT RELEASE the HOLD 2. HAVE the consignee contact VS, CVB at 301/734-8245 3. SAFEGUARD the importation until you hear from VS, CVB
Has a discrepancy other than being expired	→	1. DO NOT RELEASE the HOLD 2. CONTACT PPQ-AQI-VMO or PPQ-VRS-Headquarters Personnel for further action

Processing Importations Not Authorized Entry by a VS Permit, but Should Be

To process importations **not** authorized entry by a VS permit, but should be, do as follows:

1. **DO NOT RELEASE** the HOLD.
2. **ADVISE** the importer of the hold that the importation requires a VS permit authorizing its entry.
3. **PROVIDE** the importer with the appropriate options including the option to apply for a VS permit.
4. If the importer chooses to have the consignee apply for a permit, then **INSTRUCT** the importer contact either VS, TTSPS (if they want to apply for a veterinary permit for importing and transporting controlled materials and organisms and vectors) or VS, CVB (if they want to apply for a veterinary biological product permit). Refer to [Requests for VS Permits on page 2-4-26](#).

Do not destroy, return to origin, or allow the importation to proceed to destination until instructions are received from VS, TTSPS or VS, CVB.

5. If the by-product is perishable, then allow the importer to apply dry ice or refrigerate the by-product.

Safeguarding Live Animals

Live ruminants, swine, horses, brushtailed opossums, hedgehogs, tenrecs, and poultry and other birds are the responsibility of VS. Commercial importations of live animals go directly to their destination when they are VS approved. Additionally, VS has the responsibility for cleaning and disinfecting a carrier if the carrier arrived at the U.S. port of entry with live animals.

However, since PPQ is often the first to board a carrier, follow these instructions when you discover animals and VS is **not** present to meet the carrier.

When you discover animals, consider the welfare of the animals in severe weather. If you authorize movement, then clean and disinfect all areas occupied by, or equipment used to move the animals. **Do not** allow movement to an area where other animals are present or away from the immediate area of the point of discovery. If the carrier is moving prior to VS arrival, then require cleaning and disinfecting of the carrier. Refer to [Disinfection on page 2-4-13](#).

TABLE 2-4-20 Determine Action to Take on Discovered Animals

If the animals are:	And the animals are:	Then:
 <p>Dogs kept around livestock may carry tapeworms.</p>	Used with livestock	1. HOLD the animals 2. NOTIFY VS by telephone
	With open sore(s) ²	
	Without open sore(s) or not used with livestock	REFER to PHS or Customs
Feline ¹	Domesticated housecat	REFER to PHS
	Wild cats (leopard, lion, panther, or tiger)	REFER to FWS or Customs
Hedgehogs or tenrecs ¹	From FMD affected country	1. REFUSE ENTRY 2. NOTIFY VS
	From FMD free country	1. HOLD the animals 2. NOTIFY VS by telephone
Horses, ruminants, or swine ¹	Aboard a carrier	1. HOLD the animals aboard the carrier 2. NOTIFY VS by telephone
	Off-loaded from a carrier	HOLD the animals and the associated feed, bedding, etc., at the point of discovery ³
	In passenger baggage	
Poultry (including birds) ¹	A commercial importation	1. HOLD the animals 2. NOTIFY VS by telephone
	Pet birds or poultry maintained aboard vessels for eggs, meat, or as pets	GO to Handling Pet Birds on page 2-4-19
Primates (monkeys) ¹	→	1. REFER to FWS and PHS or Customs
Other than canines, felines, hedgehogs, horses, primates, ruminants, swine, poultry, or birds	→	1. INSPECT cages for prohibited items 2. HAVE prohibited items removed

- 1 Inspect the cages for prohibited items and have the prohibited items removed.
- 2 Could possibly be screw worm which feeds on living tissue.
- 3 This action is to contain ticks or prevent the transmission of foreign animal diseases.

Sending Samples to the National VS Laboratory (NVSL) in Ames, IA

Send samples of animal product importations to the NVSL for the following determinations:

- ◆ Animal species verification
- ◆ pH level (for ruminant hides packed in tight barrels or cases)

Steps for Sending Samples to NVSL

Follow these steps for sending samples to NVSL:

1. Supervise the importer who is preparing a sample representing at least 10 percent of the containers in the importation. The sample size should be a maximum of 1/2 cup. If the sample size is inappropriate, have the importer or importing agent call PPQ, VRS.
2. Complete VS Form 10-4 according to the procedures on completing and distributing forms in [Appendix K](#). If the sample is submitted for pH testing, place “pH” in *Block 7, Examination Requested*.
3. Send the sample and VS Form 10-4 to the following address:

USDA, APHIS
National Veterinary Services Laboratories
1800 Dayton Road
Ames, IA 50010
4. Wait for further action from PPQ, VRS. The action will be based on the laboratory results.

Steps to Take if You Are Contacted by FSIS

If you are contacted by FSIS reporting their finding of pink juices or pieces of bone in commercial importations of cooked, frozen beef from an approved establishment in South America, take the following steps (make sure that the importation is on hold):

1. Take down information supplied by FSIS. Use [Table 2-4-21](#) to determine the appropriate information to take down.

TABLE 2-4-21 Record Information Based on FSIS Report

If FSIS reports that they found:	Then take down the following information:
Only pink juices	<ul style="list-style-type: none"> ◆ Conditions warranting the call ◆ Production code (complete tube and carton identification) ◆ Country of origin and establishment number ◆ Type and amount of product ◆ Location of the held product
Only pieces of bone	<ul style="list-style-type: none"> ◆ Condition warranting the call ◆ Production code (complete tube and carton identification)
Pink juices and pieces of bone	<ul style="list-style-type: none"> ◆ Country of origin and establishment number ◆ Type and amount of product ◆ Location of the held product ◆ Whether bone is attached to the meat ◆ Size (all dimensions) of bone ◆ Whether there is bone marrow. If so, whether the bone marrow is cooked ◆ Whether the bone is cooked

2. Immediately telephone this information to PPQ, VRS at 301/734-7633. If PPQ, VRS is **not** available, telephone VS, TTSPS at 301/734-3277. Take **only** the action specified by PPQ, VRS or VS, TTSPS. **DO NOT TAKE ANY REMEDIAL ACTION** such as refusing entry to the importation or removing the importation from the country. Ensure that the importation will be held until PPQ, VRS or VS, TTSPS is involved.

Animal Products or By-Products Transiting for Export

Transiting of Products That Would Be Eligible for Entry

Classifying a Product as Eligible for Entry

A product is eligible for entry if the product originates from the following:

- ◆ Country free from diseases of concern regardless of the import documents accompanying the shipment
- ◆ Country free from diseases of concern, but with special requirements (for example, CSF/SR, END/SR, FMD/SR, or SVD/SR), and the product is accompanied by the pertinent import documents
- ◆ Country affected with a disease of concern, but the product is accompanied with the pertinent import documents

Any animal product which would be **eligible** for entry into the United States may transit through the United States for immediate export if the following two conditions are met:

- ◆ Port of arrival is notified **prior** to arrival
- ◆ Product is in a sealed, leakproof container

There are **no** restrictions on the means of conveyance. With one exception, products transiting for export **must** exit **without** making any intermediate stops. In the case of overland movement, additional stops are allowed if there is **no** manipulation of cargo (for example, fuel stops, rest stops, and the like).

Transiting of Products That Would Be Ineligible for Entry

Classifying a Product as Ineligible for Entry

A product is **ineligible** for entry if the product **lacks** the pertinent import documents.

Animal products **ineligible** for entry may transit the United States **only** for immediate export and then, **only** if the following conditions are met:

- ◆ Port of arrival is notified **prior** to arrival
- ◆ Product is in a sealed, leakproof container
- ◆ Product will **not** leave the boundaries of the port of arrival
- ◆ Product will remain within the port boundaries for 72 hours or fewer

Never permit overland transit of an animal product that is **ineligible** for entry.

Use the following tables to assist you in deciding whether to allow a product to transit for export.

TABLE 2-4-22 Decide Whether to Allow Animal Products or By-Products to Transit for Export

If the country of origin is:	And the item is:	And is from:	And:	Then:
Mexico	Pork	Mexican States of	Is accompanied by a valid VS permit	ALLOW product to transit overland
		<ul style="list-style-type: none"> ◆ Baja California ◆ Campeche ◆ Chihuahua ◆ Coahuila ◆ Quintana Roo ◆ Sinaloa ◆ Sonora ◆ Sur ◆ Yucatan 	Lacks a valid VS permit	CONTACT <i>PPQ-AQI-VMO</i> or <i>PPQ-VRS-Headquarters Personnel</i> for directions
		Mexican State other than one listed in the cell above	→	GO to Table 2-4-23
	Other than pork		→	
Other than Mexico			→	

TABLE 2-4-23 Additional Criteria for Deciding Whether to Allow Animal Products or By-Products to Transit for Export

If the product:	If the product is:	And:	Then:
Is accompanied by a VS permit authorizing transit		→	ALLOW transiting as specified on the permit
Lacks a VS permit authorizing transit	Eligible for entry into the United States	The following criteria are met: <ul style="list-style-type: none"> ◆ CBP office at the port of arrival was notified ◆ Product is in a leakproof carrier or a container that will remain sealed at all times 	1. Allow transiting for immediate export 2. GO to <i>Directions for Handling Export Transit Shipments for Animal Products or By-Products that Are Eligible for Entry on page 2-4-38</i>
		Above criteria are not met	REFUSE to allow transiting
	Ineligible for entry	The following criteria are met: <ul style="list-style-type: none"> ◆ Product is arriving at an airport or a maritime port ◆ CBP office at the port of arrival was notified ◆ Product is in a leakproof carrier or container that will remain sealed at all times ◆ Product was held or stored at the airport or the maritime port for 72 or fewer hours 	1. ALLOW transiting for immediate export 2. GO to <i>Directions for Handling Export Transit Shipments for Animal Products or By-Products that Are Eligible for Entry on page 2-4-38</i>
		Above criteria are not met	REFUSE to allow transiting

Directions for Handling Export Transit Shipments for Animal Products or By-Products that Are Eligible for Entry

If the animal product or by-product is transiting to a subsequent U.S. port for export, ALLOW movement **only** in sealed containers. The shipment may move overland.

Contact the subsequent port and give them the details of the shipment. The means by which a port **must** be contacted will depend on whether the entry was made on paper or electronically.

Paper Entries

1. Stamp the Customs entry forms "For Exportation Only. Shipment Authorized to Identify Port; No Diversion Permitted."
2. Fax a copy of the stamped Customs forms to the subsequent port.
3. Keep a copy of the stamped Customs form as an official record.

Electronic Entries

Follow these directions for maritime cargo and cargo on trains:

1. Go to the Manifest/Posting screen for a given bill of lading/ container.
2. Enter <99> in the "Action" field.
3. In the "Public Remarks" field, type "USDA RELEASED FOR EXPORT ONLY. SHIPMENT AUTHORIZED TO Identify Port; NO DIVERSION PERMITTED."

See the example of a posting screen in [Figure 2-4-4](#) below.

Transiting Restricted Animal Products or By-Products Into or Between Containers

If the product is transferring into or between containers, then directly supervise the transfer. In all cases, safeguard procedures apply. Disinfect if necessary. See [Disinfection](#) on page 2-4-13.

APHIS policy is **not** to compromise normal activities to facilitate non-U.S. transactions. Therefore, reimbursable overtime may be charged.

Filing Paperwork Accompanying Shipments

Purpose

Documents are filed primarily for trace back in case there is a livestock or avian disease outbreak. They are also filed in case originals are lost or destroyed. Documents may also provide information in case of litigation. An accessible filing system will enable you to justify the regulatory actions you took in case of audits or requests from the Office of Inspector General. See your *APHIS Records Management Handbook* for details on record keeping. A brief description of what you need to do and keep follows.

Steps

Follow these steps when filing paperwork accompanying shipments:

1. Decide on the filing system that is most practical for your location. Devise one that will help you keep complete and easily accessible records. File by subject (for example, casings, eggs, meat, trophies, etc.). The following two methods currently being used:
 - ❖ Behind subject, file alphabetically by permittee, company, or importers name
 - ❖ Behind subject, file chronologically by month and year

2. Select the documents that need to be filed. At a minimum, file the following:
 - ❖ Meat Certificate (copy) and **originals** for other certification accompanying the shipment (like certification that details processing, identifies country of origin, or provides country of processing)
 - ❖ Bill of lading or airway bill
 - ❖ Customs entry
 - ❖ Invoice
 - ❖ VS permit (copy), if a VS permit was issued
3. Maintain each file for **no** less than two years.

Veterinary Regulatory Support audits these files when conducting port reviews.

Returned U.S. Origin Animal Products and By-Products

Introduction

Use [Table 2-4-24](#) to determine where to locate regulatory action for returned U.S. origin products.

TABLE 2-4-24 Where to Locate Regulatory Action on Returned U.S. Origin Products

If the returned U.S. origin animal products or by-products are:	Then for the appropriate regulatory action to take:
Meat or meat products	GO to Meat and Meat Products on page 3-9-1 and on page 3-9-4
Animal products or by-products other than meat	CONTINUE with Procedures below

Procedures

A VS permit is **not** required for returned U.S. origin animal products and by-products; however, the following requirements **must** be met:

- ◆ Written explanation from the importer describing the reason(s) for the return
- ◆ Copy of the exporting certificate with the lot numbers listed
- ◆ Copy of the exporting invoice with the lot numbers listed
- ◆ Declaration from the shipper that the material has **not** been modified in any manner while outside of the United States

Inspect the shipment to verify that the material has **not** been opened and cross check the lot numbers.

If the requirements are **not** met or upon inspection there is evidence that the containers were opened or the lot numbers are different, then regulate as if the animal products or by-products were of foreign origin. Use appropriate *Reference* section to determine the regulatory action to take or contact PPQ, VRS.

Introduction

The *Reference* chapter of the manual is divided into sections that represent categories of animal products and by-products to help find the regulatory actions to take. All the sections are listed with a brief summary of what is covered and **not** covered under each section. Each section is tabbed, with the section for meat and meat products being further divided by its own set of tabs. At the beginning of each section is a table of contents, an introduction, and a locator. These navigational tools will help you quickly find where you need to go within a section.

Animal Waste and Related By-Products

The *Animal Waste and Related By-Products* section covers animal by-products which have been naturally discharged or released as waste, or are leftover parts of carcasses, or are leftover by-products. Animal waste and related by-products are usually dried, ready to be used as animal feed or fertilizer, processed into glue, or manufactured. Examples include manure and urine of livestock; feces and urine of **other than** livestock imported for analysis and diagnosis; collagen and collagenous parts including cartilage, connective tissue, tendons, sinews, and dried intestines; glue stock; ossein; vomitus of birds of prey; and rendered products for animal feed or fertilizer such as blood meal, bone meal, feather meal, horn and hoof meal, meat meal, and tankage.

Blood and Related By-Products

The *Blood and Related By-Products* section covers fractions of blood imported for scientific use. Examples of these blood fractions include antibodies, albumin, plasma, whole blood, antiserum, red blood cells, serum, blood clotting factors, and leukocytes (white blood cells). Also covered under this section are dried blood products such as spray-dried blood and spray-dried plasma.

Not covered in this section are rendered blood products such as blood meal imported for animal feed or fertilizer; regulate these products under ***Animal Waste and Related By-Products*** on page 3-2-1.

Bones and Related By-Products

The *Bones and Related By-Products* section covers the following animal parts and their by-products: bones, antlers, hoofs, horns, skulls, teeth, tusks, gelatin, bone glue, items made of bony material, and the entire carcass with skin, hide, or feathers attached.

Not covered in this section are: bones entering as trophies or consigned to a museum—regulate these importations as ***Trophies*** on page 3-17-1; collagen bones—regulate these products under ***Animal Waste and Related By-Products*** on page 3-2-1; bone, hoof, and horn meal—regulate these products as rendered products under ***Animal Waste and Related By-Products*** on page 3-2-1; and antlers or their products imported for medicinal use—regulate as ***Asian Medicinal Products*** on page 3-15-22 under ***Miscellaneous Products***.

Casings

The *Casings* section covers animal organs used as food containers for processed meat. Examples of animal organs used for casings include bladders, bung caps, ceca (cecum), intestines, stomachs, and rectums.

Not all products derived from an animal's digestive organs or its bladder are casings. Therefore, **not** covered under this section are the following: stomachs imported as edible meat products (tripe)—regulate as ***Meat and Meat Products*** on page 3-9-1; stomachs and goat gullets imported as rennets—regulate as ***Organs*** on page 3-16-1; intestines, bladders, gullets, and weasands imported as inedible animal by-products that are rendered to feed animals or to make fertilizers—regulate as rendered products under ***Animal Waste and Related By-Products*** on page 3-2-1; dried intestines imported for making glue—regulate these by-products as glue stock under ***Animal***

Waste and Related By-Products on page 3-2-1; and moist intestines and bung caps imported for manufacturing into articles such as prophylactics—regulate as **Organs** on page 3-16-1.

Eggs and Egg Products from Poultry, Game Birds, or Other Birds

The *Eggs and Egg Products from Poultry, Game Birds, or Other Birds* section covers eggs and egg products that are imported for both edible and inedible purposes. For example:

- ◆ Boiled eggs (hard-boiled eggs, salted eggs, pickled eggs)
- ◆ Uncooked, preserved eggs (like hundred-year eggs and peedon eggs)
- ◆ Fresh, unfertilized eggs for breaking and pasteurization
- ◆ Fresh, unfertilized eggs for food
- ◆ Baluts (fertile eggs incubated 17 days)
- ◆ Inedible egg products imported for research (e.g., liquid yokes)
- ◆ Egg shells

Not covered in this section are inedible eggs (fresh, fertilized) imported for hatching, including commercial importations of uncooked baluts—regulate as **Live Animals and Related Material** on page 3-8-1; and egg cartons, crates, flats, or liners used as packing material—regulate these products as fomites under **Miscellaneous Products** on page 3-15-1.

Hides and Related By-Products

The *Hides and Related By-Products* section covers parts and by-products that come from the exterior of animals and birds. Examples include rawhide, hides, skins, capes (with or **without** feathers), wool of sheep, hair, bristles of swine and feathers **only**.

Not covered in this section are hides and related by-products imported as trophies or that have been processed—regulate these products as **Trophies** on page 3-17-1; meals derived from exterior animal parts and ground hides—regulate these products as **Animal Waste and Related By-Products** on page 3-2-1; and samples imported for research or diagnostic purposes—regulate as **Live Animals and Related Material** on page 3-8-1.

Live Animals

The *Live Animals* section covers importations of living organisms for which PPQ has approval to take regulatory action. Examples include embryos, ova, and semen imported for research purposes; and organisms and vectors imported for research purposes, including microorganisms, antisera, diagnostic reagents, monoclonal antibodies, test kits, and antivenin.

Not covered in this section are eggs for hatching, including commercial importations of uncooked baluts—contact the nearest VS office for further action; pet birds in passenger baggage and aboard vessels or yachts and pleasure vessels—refer to the special procedures for ***Handling Pet Birds*** on page 2-4-19; importations of live animals, consult with local VS office; live animals found while clearing aircraft or vessel—refer to ***Live Animals and Related Material*** on page 3-8-1; blood or a derivative of blood—regulate these by-products under ***Blood and Related By-Products*** on page 3-3-1; extracts or derivatives of animal organs or glands—regulate these by-products under ***Organs*** on page 3-16-1; and used semen and embryo containers—refer to procedures for empty semen and embryo containers under ***Empty Semen and Embryo Containers*** on page 2-2-13.

Meat and Meat Products

The *Meat and Meat Products* section covers meat and meat products of animals and poultry. Examples include:

- ◆ Edible meat and meat products of ruminant, swine, and poultry
- ◆ Inedible meat of horse
- ◆ Products containing meat, such as soup mixes, stocks, extracts, pates
- ◆ Organs and glands imported for human consumption

Not covered in this section are casings—regulate under ***Casings*** on page 3-5-1; pet food—regulate under ***Miscellaneous Products*** on page 3-15-1; and organs and glands imported for purposes **other than** eating—regulate under ***Organs*** on page 3-16-1.

Milk and Milk Products

The *Milk and Milk Products* section covers all products derived from milk. Examples include cultured milk products, dry milk products, fresh (chilled or frozen) milk products that are pasteurized and require

refrigeration, shelf-stable milk products that are heat processed to an extent that refrigeration is **not** necessary, and other products derived from milk that **do not** logically fit into the previously mentioned examples.

Miscellaneous Products

The *Miscellaneous Products* section covers products that **do not** fit appropriately under any other section within the *Reference* chapter, but are regulated because they are at risk of transmitting animal disease viruses. Examples include birds' nests; Asian medicinal products of animal origin; fomites such as used meat covers, hay, straw, grass, and egg cartons; pet food products and pet toys; and biotechnology material.

Organs and Related By-Products

The *Organs and Related By-Products* section covers the internal structures of animals that are imported for purposes **other than** human consumption. This includes whole or partial organs and glands and the excretions, secretions, extracts, and derivatives of organs and glands. Examples include bile, bone marrow, fat, gall, gall stone (bovine), gullet (goat), heart, ingesta, intestine, kidneys, lips, liver, lungs, maw, musk including grains and pods, ox gall (bile), pancreas, parathyroid gland, pituitary gland, pyloric value, rennet extract, spleen, stomach, thyroid gland, tripe, and vell (calf stomach).

Not covered in this section are blood imported for biological use—regulate under ***Blood and Related By-Products*** on page 3-3-1; internal animal parts **other than** organs and glands imported as rendered products—regulate under ***Animal Waste and Related By-Products*** on page 3-2-1; living cultures or collections which may introduce or disseminate animal diseases as organisms and vectors—regulate under ***Live Animals and Related Material*** on page 3-8-1; internal animal parts imported as pet food—regulate under ***Miscellaneous Products*** on page 3-15-1; and animal parts imported for human consumption—regulate under ***Meat and Meat Products*** on page 3-9-1.

Trophies

The *Trophies* section covers animal products imported for the purpose of mounting or preserving. Trophies are usually obtained during hunting expeditions. Ruminant and swine trophies include hides and

skins, horns, hoofs, tusks, and other bony tissues. Bird trophies may consist of the entire carcass, an eviscerate carcass, or **only** the skin and feathers with head and feet attached.

Not covered in this section are bones entering as commercial importations—regulate under ***Bones and Related By-Products*** on page 3-4-1.

Introduction

The *Animal Waste and Related By-Products* section covers animal by-products which have been naturally discharged or released as waste, are leftover parts of carcasses, or are leftover by-products. Animal waste and related by-products are usually dried, ready to be used as animal feed or fertilizer, processed into glue, or manufactured. Following are examples of animal waste and related by-products:

- ◆ Manure of livestock (horse, ruminant, swine, poultry and/or birds) or other mammals such as bats (guano). Manure is the feces of livestock and poultry, with or **without** litter. Bat guano is regulated because of possible contamination with bird feathers and manure
- ◆ Urine of livestock and poultry. The feces of birds and bats includes a urine component
- ◆ Feces and urine of **other than** livestock for analysis and diagnosis. These by-products originate from felines (cats), canines (dogs), laboratory mammals (rats, mice, gerbils, guinea pigs, rabbits, and hamsters), amphibians, reptiles, fish, and marine mammals
- ◆ Glue stock, which consists of hide cuttings, tendons, or other collagenous parts of animal carcasses
- ◆ Glue made from hide (hide glue) or bone (bone glue). This may be imported as granules, flakes, or powder. Regulate as animal glue
- ◆ Vomitus of birds of prey in the form of pellets
- ◆ Rendered products for animal feed or fertilizer. These products are usually finely ground and rendered and include blood meal, bone meal, feather meal, fish emulsion, fish hydrolysate, horn and hoof meal, meat meal, and tankage
- ◆ Processed animal proteins. These are products which are processed by cooking or drying, but are **not** considered to be rendered

Rendered products and processed protein products from countries affected with BSE are **prohibited** entry unless accompanied by a VS-issued permit.

- ◆ Collagen as bulk or a component of, for use in cosmetics, cell culture media, and reagents

Not covered in this section are the following animal products and by-products:

- ◆ Dried blood such as spray dried blood and freeze dried blood (except for that from countries affected with BSE); regulate these products as ***Blood and Related By-Products*** on **page 3-3-1**
- ◆ Cartilage and ossein; regulate these products as ***Bones and Related By-Products*** on **page 3-4-1**
- ◆ Collagen casings; regulate these products as ***Casings*** on **page 3-5-1**
- ◆ Finished suture material derived from intestines and packed in liquid; this material is unrestricted

When a VS permit authorizes entry of the animal waste or related by-product, match the shipping documents with the information on the permit that follows:

- ◆ Current date
- ◆ Description of the material
- ◆ Shipper
- ◆ Consignee
- ◆ Conditions spelled out on the permit

Follow [Table 3-2-1](#) as you match the permit with the shipping documents.

TABLE 3-2-1 Validate Importation Authorized Entry by a VS Permit

If the importation is:	And the shipping documents:	And the:	Then:
Authorized entry by a VS permit	Match the permit	→	RELEASE or CONTROL as specified on the permit
	Do not match the permit	Permit has expired	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. HAVE the consignee contact VS, TTSPS (see Table 2-4-16) 3. SAFEGUARD the importation until you hear from VS, TTSPS
		Discrepancy is other than an expired permit	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. CONTACT PPQ-AQI-VMO or PPQ-VRS-Headquarters Personnel for further action (see Appendix H)

Locator

When a VS permit **does not** accompany an importation of the animal waste or related by-products, use [Table 3-2-2](#) to determine the appropriate regulatory action to take.

TABLE 3-2-2 Where to Find the Regulatory Action on Animal Waste or Related By-Products that Are Not Authorized by a VS Permit

If the importation is:	And the importation is:	Then:
Animal waste or related by-products that are not authorized entry by a VS permit	<ul style="list-style-type: none"> ◆ Feces ◆ Guano ◆ Manure ◆ Urine 	GO to Table 3-2-3 on page 3-2-5

Collagen and Collagenous Parts or Products of Ruminants from a Country Known to Be Affected with BSE

TABLE 3-2-10 Collagen and Collagenous Parts or Products of Ruminants from a Country Known to Be Affected with BSE

If the importation is:	And the country or region of export is:	And the importation is:	And the intended use of the product is:	And the source of the collagen or collagenous parts is:	And the importation:	Then:
<ul style="list-style-type: none"> ◆ Collagen from ruminants ◆ Collagenous parts or products from ruminants 	Affected with BSE	Not reconstituted collagen casings from ruminant collagen	Ingredient in cosmetics	→	Is accompanied by a VS permit	RELEASE
				→	Lacks a VS permit	REFUSE ENTRY
			Other than an ingredient in cosmetics	Ruminant hide	Is accompanied by a VS permit	RELEASE
				Lacks a VS permit	REFUSE ENTRY	
		Other than ruminant hide	→	REFUSE ENTRY		
Reconstituted collagen casings from ruminant collagen	→	GO to Table 3-5-2 on page 3-5-4				

Ruminant Glue Stock from a Country Affected with BSE

TABLE 3-2-11 Ruminant Glue Stock or Hide Glue from a Country Affected with BSE

If the importation is:	And the country or region of export is:	And the importation is derived from:	And the importation:	Then:
◆ Ruminant glue ◆ Stock or hide glue	Affected with BSE	Hide cuttings or parings	Is accompanied by a VS import permit	RELEASE
			Lacks a VS import permit	REFUSE ENTRY
		Fleshings, tendons, or other collagenous parts	—————→	REFUSE ENTRY

Ruminant Glue Stock from a Country Affected with FMD

Review the accompanying documentation or inspect the importation to determine if the glue stock is hard dried or flint dried.

TABLE 3-2-12 Ruminant Glue Stock from a Country Affected with FMD

If:	And the country or region of export is:	And the glue stock is:	And the importation is:	Then:
Ruminant glue stock	Affected with FMD	Hard dried or flint dried	—————→	RELEASE
		Not hard dried or flint dried	Consigned to an approved establishment	AUTHORIZE shipment under seal with VS 16-78 (see Appendix K for completing form)
			Not consigned to an approved establishment	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)

Swine Glue Stock from a Country Affected with ASF, CSF, FMD, or SVD; or Glue Stock from an Unknown Animal Class

TABLE 3-2-13 Swine Glue Stock from a Country Affected with ASF, CSF, FMD, or SVD; or Glue Stock from an Unknown Animal Class

If:	And the country or region of export is:	And the importation is:	Then:
<ul style="list-style-type: none"> ◆ Swine glue stock ◆ Glue stock from and unknown animal class 	Affected with ASF, CSF, FMD, or SVD	Consigned to an approved establishment	AUTHORIZE shipment under seal with VS Form 16-78 (see Appendix K for completing form)
		Not consigned to an approved establishment	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)

Pellets from Birds of Prey

Pellets may enter **only** if accompanied by a VS permit or if consigned to an approved establishment. If the pellets are accompanied by a VS permit, then see [Table 3-2-14](#) to validate the permit, or to determine the appropriate regulatory action to take if consigned to an approved establishment.

TABLE 3-2-14 Pellets from Birds of Prey

If the importation is:	And:	And:	Then:
Pellets from birds of prey	Shipping documents match the VS permit	—————→	RELEASE or CONTROL as specified on the permit
	Shipping documents do not match the VS permit	VS permit has expired	<ol style="list-style-type: none"> DO NOT RELEASE the HOLD HAVE the consignee contact VS, TTSPS (see Table 2-4-16) SAFEGUARD the importation until you hear from VS, TTSPS
		Discrepancy is other than an expired VS permit	<ol style="list-style-type: none"> DO NOT RELEASE the HOLD CONTACT PPQ-AQI-VMO or PPQ-VRS-Headquarters Personnel for further action (see Appendix H)
	Is consigned to an approved establishment	—————→	AUTHORIZE shipment under seal with VS Form 16-78 (see Appendix K to complete the form)
	Not consigned to an approved establishment	—————→	<ol style="list-style-type: none"> DO NOT RELEASE the HOLD PROVIDE the importer with the appropriate options (see Table 2-2-11 on page 2-2-18)

Rendered Products and Processed Proteins

Rendered products and processed protein products from countries affected with BSE are **prohibited** entry unless they are accompanied by a VS-issued permit.

Rendering is a process by which animal tissue is treated by heat or chemical processes to separate fat from protein and mineral components. Usually the products are finely ground before rendering. Rendered products may be imported for animal feed or as fertilizer. Animal by-products that could be rendered are listed below:

- ◆ Blood meal
- ◆ Bone meal (ground bones, de gelatinized bone meal)
- ◆ Fish emulsion
- ◆ Fish hydrolysate
- ◆ Feather meal
- ◆ Fish meal
- ◆ Greaves cakes
- ◆ Hoof and horn meal
- ◆ Meat meal
- ◆ Poultry meal
- ◆ Shellfish meal
- ◆ Tankage

Except from countries affected with BSE, **do not** consider spray dried blood or freeze dried blood as rendered products; regulate these products under **Blood**. Neither product is subjected to a process that inactivates exotic animal disease agents.

If a product is identified as a nutritional supplement, feed or food additive, or premixture or fertilizer, then review the accompanying documents thoroughly to determine if a rendered or processed protein product is present. If a rendered or processed protein product is present, then see [Table 3-2-15](#).

Rendered or Processed Protein Products from All Species of Animals from a Country Affected With BSE or Designated at Minimal Risk for BSE

To regulate rendered processed protein products from all species of animals from a country either affected with or designated as minimal risk for BSE (currently Canada is the only country considered to be at minimal risk for BSE), see [Table 3-2-15](#).

Important

Rendered or processed protein products from ruminants from countries affected with BSE are **prohibited** from all species of animals, regardless of the purpose for which they are imported. Rendered or processed fish and shellfish products from a country affected with BSE require a VS permit for entry.

TABLE 3-2-15 Rendered or Processed Protein Products from a Country Affected With BSE, Designated at Minimal Risk for BSE, or Free from BSE

If the importation is:	And is derived from:	And the country or region of export is:	And the product is:	And the importation:	Then:	
Rendered ¹ or processed protein products	Ruminant	Free from BSE	→	→	Go to Table 3-2-16	
		Affected with BSE			REFUSE ENTRY	
		Minimal risk for BSE ²	Edible tallow	Is appropriately certified ³		REFER to FSIS
				Lacks certification ³		REFUSE ENTRY
			Inedible tallow	Is appropriately certified ⁴		RELEASE
				Lacks certification ⁴		REFUSE ENTRY
	Other than the above		→	REFUSE ENTRY		
	Other than ruminant	Free from BSE			→	Go to Table 3-2-16
		Affected with BSE		→	Is accompanied by a VS permit	RELEASE
					Lacks a VS permit	REFUSE ENTRY
Minimal risk for BSE ²			→	Is accompanied by a VS permit	RELEASE	
				Lacks a VS permit	REFUSE ENTRY	

1 A partial list of rendered products: animal fat blends, animal digest, blood meal, bone meal, crab meal, fish by-products, fish meal, fish protein, fish solubles, hydrolyzed hair, hydrolyzed animal fat, inedible tallow, lard, meat meal, oil, poultry meal, poultry waste, poultry litter, dried poultry feathers, and shrimp meal. Both edible and inedible tallow are allowed from a country at minimal risk for BSE. Does **not** include tallow derivatives which are not considered prohibited materials, even if from BSE-affected countries (for tallow derivatives see [Table 3-15-2](#))

- 2 Currently Canada is the **only** country designated at minimal risk for BSE.
- 3 Is accompanied by CFIA Annex A-3, Veterinary Certificate for Edible Tallow Destined to the USA (see [Figure G-1-24](#)).
- 4 Is accompanied by a CFIA Veterinary Certificate for Inedible Tallow Destined to the USA (see [Figure G-1-33](#)).

Rendered or Processed Protein Products from All Species of Animals from a Country Free from BSE

TABLE 3-2-16 Rendered or Processed Protein Products from All Species of Animals from a Country Free from BSE

If the importation is:	And the country or region of export is:	And is for use in:	And the importation is:	And:	Then:

Blood and Related By-Products

Contents

- Introduction [page 3-3-1](#)
- Locator [page 3-3-2](#)
- Blood for Scientific Use or Research [page 3-3-3](#)
- Blood for Pharmaceutical Use [page 3-3-5](#)
- Dried Blood Products Not Fully Rendered [page 3-3-6](#)

Introduction

The *Blood and Related By-Products* section covers fractions (parts) of blood imported for pharmaceutical or scientific use (includes biological research and diagnostic testing). Examples of blood fractions regulated for scientific use are listed under [Blood for Scientific Use or Research](#) on page 3-3-3.

Also covered under this section are dried blood products such as spray dried blood and spray dried plasma. **Do not** consider these products rendered; regulate them under this section. These products have **not** been subjected to high temperatures long enough to inactivate exotic animal disease agents. Dried blood products are used as a protein supplement in livestock feed and are used to increase the palatability of foods for dogs and cats.

Blood importations or their fractions drawn from avian (bird), equine (horse), ruminant, or swine from any country require a VS permit authorizing entry. If the importation is human or nonhuman primate blood or its fractions, advise the shipper to contact the Public Health Service of the Department of Health and Human Services (PHS). This Agency regulates such products.

Not covered in this section are rendered blood products such as blood meal imported for animal feed or fertilizer; regulate these products under [Animal Waste and Related By-Products](#).

When a VS permit authorizes entry of the blood or related by-product, match the shipping documents with the information on the permit that follows:

- ◆ Current date
- ◆ Description of the material
- ◆ Shipper

- ◆ Consignee
- ◆ Conditions spelled out on the permit

Follow [Table 3-3-1](#) as you match the permit with the shipping documents.

TABLE 3-3-1 Validate the Importation Is Authorized Entry by a VS Permit

If the shipping documents:	And the:	Then:
Match the permit	→	RELEASE or CONTROL as specified on the permit
Do not match the permit	Permit has expired	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. HAVE the consignee contact VS, TTSPS (see Table 2-4-16) 3. SAFEGUARD the importation until you hear from VS, TTSPS
	Discrepancy is other than an expired permit	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. CONTACT PPQ-VRS-AQI or PPQ-VRS-HQ personnel for further action (see Appendix H)

Locator

When a VS permit **does not** accompany an importation of blood, blood fraction, or related by-product, use [Table 3-3-2](#) to determine the appropriate regulatory action to take.

TABLE 3-3-2 Where to Find Regulatory Action on Blood and Related By-Products Not Authorized by a VS Permit

If the importation is imported for:	Then:
Scientific use or research (e.g., antibodies, antigens, albumin, blood, plasma, serum)	GO to Table 3-3-3
Pharmaceutical use (products usually for manufacturing cosmetics ¹ , human nutritional supplements, and test kit components)	GO to Table 3-3-4
Veterinary biological use (also called veterinary biologics) are those used for the diagnosis and treatment of diseases in animals including vaccines, bacterins, antitoxins, toxoids, immunomodulators	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. ADVISE the importer of the hold because the importation requires a VS permit authorizing its entry 3. PROVIDE the importer with the appropriate options including applying for a veterinary biological product permit issued by VS, CVB (see Table 2-4-16)
Animal feed (protein supplement; not fully rendered)	GO to Table 3-3-5

- 1 If the product is an ingredient in a cosmetic that is in final, finished packaging and ready for sale, then the cosmetic is **unrestricted**. However, if the product is a bulk component to be incorporated into cosmetics, then continue to [Table 3-3-4](#).

Blood for Scientific Use or Research

Fractions (parts) of blood may be imported for research or diagnostic testing. The products are usually liquid, but can be imported as a powder. They are shipped in small quantities. Usually, if the importation is a liquid, there is less than 200 milliliters; if the importation is a powder, then the products are in small vials. Following are examples of blood fractions imported for research or diagnostic testing.

- ◆ Albumin
- ◆ Antibodies
- ◆ Antiserum
- ◆ Blood clotting factors
- ◆ Leukocytes (white blood cells)
- ◆ Plasma
- ◆ Red blood cells
- ◆ Serum
- ◆ Whole blood

Some blood products are highly perishable. Therefore, expedite an importation when you are authorized to release the importation. If you **cannot** release the hold, allow the importer to apply dry ice or refrigerate the by-product.

Continue on to [Table 3-3-3](#).

TABLE 3-3-3 Blood and Blood Fractions Imported for Research or Scientific Use

If:	And was collected from:	And:	Then:
Blood or blood fraction is one specifically listed below: ◆ Albumin ◆ Antibodies ◆ Antiserum ◆ Blood clotting factors ◆ Leukocytes (white blood cells) ◆ Plasma ◆ Red blood cells ◆ Serum ¹ ◆ Whole blood	◆ Birds ◆ Equine (horses) ◆ Poultry ◆ Ruminants ◆ Swine	Is accompanied by a VS permit	RELEASE or CONTROL as specified on the permit
		Lacks a VS permit	1. DO NOT RELEASE the HOLD 2. ADVISE the importer of the hold because the importation requires a VS permit authorizing its entry 3. PROVIDE the importer with the appropriate options including applying for a VS permit (see Table 2-4-16)
	◆ Amphibians ◆ Fishes ◆ Marine mammals ◆ Reptiles	Is accompanied by the shipper or producer's declaration ²	RELEASE
		Lacks the shipper or producer's declaration statements ²	DO NOT RELEASE the HOLD until the producer or shipper provides the required statement
	◆ Laboratory mammals (gerbils, guinea pigs, hamsters, mice, rabbits, rats)	→	GO to Table 3-8-7
	◆ Canines (dogs) ◆ Felines (cats)	→	GO to Table 3-8-10
	◆ Nonhuman primates (apes, lemurs, monkeys)	→	GO to Table 3-8-9
	◆ Humans	→	GO to Table 3-8-8
Not listed above	→	1. DO NOT RELEASE the HOLD 2. ADVISE the importer of the hold because the importation requires a VS permit authorizing its entry 3. PROVIDE the importer with the appropriate options including apply for a VS permit (see Table 2-4-16)	

1 Includes adult and fetal bovine serum.

2 A declaration which provides, in a clear and concise manner, the following information:

- ◆ Identification of the material and species of origin
- ◆ Material **does not** contain any avian, equine, ruminant, or swine species productions (such as in transport media or stabilizers)

Blood for Pharmaceutical Use

Blood and fractions of blood may be imported for pharmaceutical use. Such uses include manufacturing cosmetics, drugs, medicines, and human nutritional supplements. Blood fractions for pharmaceutical use are usually imported in bulk and can be in the form of a liquid, a powder, or a paste. Usually if the importation is a liquid, there is more than a liter; if the importation is a powder, there is more than a gram. However, the blood or blood fraction may also be imported in pre-filled vials or containers of varying sizes. Continue on to [Table 3-3-4](#).

Some blood products are highly perishable. Therefore, expedite an importation when you are authorized to release the importation. If you **cannot** release the hold, then allow the importer to apply dry ice or refrigerate the by-product.

TABLE 3-3-4 Blood Imported for Pharmaceutical Use

If the blood or blood fraction was derived from:	And the importation:	Then:
<ul style="list-style-type: none"> ◆ Ruminants ◆ Birds or poultry ◆ Equine (horses) ◆ Swine 	Is accompanied by a VS permit	RELEASE
	Lacks a VS permit	REFUSE ENTRY
Unknown animal		REFUSE ENTRY

Dried Blood Products Not Fully Rendered

Dried blood products **not** fully rendered are **not** subjected to high temperatures long enough to inactivate exotic animal disease agents. Such dried blood products may be used as a protein supplement in livestock feed and to increase the palatability of pet food. Continue on to [Table 3-3-5](#).

TABLE 3-3-5 Dried Blood Products Not Fully Rendered

If the blood or blood fraction was derived from:	And the importation:	Then:
◆ Ruminants ◆ Birds or poultry ◆ Equine (horses) ◆ Swine	Is accompanied by a VS permit	RELEASE
	Lacks a VS import permit	REFUSE ENTRY
Unknown animal		REFUSE ENTRY

Bones and Related By-Products Not Specifically Mentioned Elsewhere	page 3-4-15

Introduction

What Is Covered

The *Bones and Related By-Products* section covers the following animal parts and by-products, or cross-references to other categories within the *Reference* section:

- ◆ Antlers
- ◆ Bones
- ◆ Carcass, entire, with skin, hide, or feathers attached
- ◆ Chondroitin sulfate
- ◆ Gelatin
- ◆ Hoofs
- ◆ Horns
- ◆ Items made of bony material
- ◆ Skulls
- ◆ Teeth
- ◆ Tusks

If a commercial importation, then regulate an importation of bones as bone. Also, consider a large quantity of unfinished bones as a commercial importation, and regulate as bones rather than trophies.

What Is Not Covered

Not covered in this section are the following animal products and by-products:

- ◆ Antlers or their products imported for medicinal use such as an aphrodisiac; regulate as Asian medicinal products under *Miscellaneous Products*
- ◆ Bone, hoof, and horn meal; regulate these products as rendered products under *Animal Waste and Related By-Products*
- ◆ Bones consigned to a museum
- ◆ Bones or skulls entering as trophies or souvenirs; regulate these importations under *Trophies*. Trophies and souvenirs would include:
 - ❖ One to two skulls or horns
 - ❖ Skulls or horns that have been lacquered or painted
 - ❖ Clean, dry ruminant skulls free from undried pieces of hide, flesh, and sinew imported for display
- ◆ Bones, horns, or hoofs imported for pet toys; regulate these importations under *Pet Food, and Livestock, Poultry, and Aquaculture Feed*
- ◆ Collagen of bones; regulate these products under *Animal Waste and Related By-Products*
- ◆ Gelatin capsules containing human medication and in final, finished form ready for distribution; such capsules are **unrestricted**
- ◆ Gelatin-containing food products (such as candy, drinks with gelatin, film, gelatin desserts (Royal and Jello), jams, jellies, marshmallows, pudding, and sherbert)

When a VS permit authorizes entry of the bones or related by-product, match the following information on the shipping documents with that on the permit:

- ◆ Current date
- ◆ Description of the material
- ◆ Shipper
- ◆ Consignee
- ◆ Conditions spelled out on the permit

Follow [Table 3-4-1](#) as you match the permit with the shipping documents.

TABLE 3-4-1 Validate Importation Authorized Entry by a VS Permit

If the shipping documents:	And the:	Then:
Match the permit	→	RELEASE or CONTROL as specified on the permit
Do not match the permit	Permit has expired	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. HAVE the consignee contact VS, TTSPS (see Table 2-4-16) 3. SAFEGUARD the importation until you hear from VS, TTSPS
	Discrepancy is other than an expired permit	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. CONTACT PPQ-VRS-AQI or PPQ-VRS-HQ personnel for further action (see Appendix H)

Locator

When a VS permit **does not** authorize entry, use [Table 3-4-2](#) to determine the appropriate regulatory action to take.

TABLE 3-4-2 Where to Find the Regulatory Action on Bones and Related By-Products that Are Not Authorized by a VS Permit

If the bones or related by-products are:	And the importation is entering:	Then:
Bone ash, bone black, or bone char	—————▶	GO to Table 3-4-3
Bones: horns, antlers, skulls, teeth, tusks, dried bones, granulated bones, crushed bones	For manufacturing or as manufactured items such as pistol grips, knife handles, buttons, souvenirs	GO to Table 3-4-6
	For purposes other than described in the cell above	GO to Table 3-4-12
Chondroitin sulfate	—————▶	GO to Table 3-4-11
Entire carcass with skin, hide, or feathers attached	—————▶	GO to Table 3-4-12
Gelatin	As bulk gelatin or empty gel caps	Go to Table 3-4-4
	Other than described in the cell above	Go to Table 3-4-5
Gelatin-containing foods	—————▶	Unrestricted
Hoofs	As pet chews or toys	GO to Table 3-18-17
	As other than for pet chews or toys	GO to Table 3-4-10

Bone Ash, Bone Black, or Bone Char

TABLE 3-4-3 Bone Ash, Bone Black, or Bone Char

If the importation is derived from:	And the bones originated from a region:	And were processed in a region:	And the importation:	Then:
Ruminant	Affected with BSE		Is accompanied by a VS permit	RELEASE
			Lacks a VS permit	REFUSE ENTRY
	Free from BSE	Affected with BSE	Is accompanied by a VS permit	RELEASE
			Lacks a VS permit	REFUSE ENTRY
		Free from BSE	Is appropriately certified ¹	RELEASE
			Lacks appropriate certification ¹	REFUSE ENTRY
Other than ruminant				RELEASE

¹ A government certificate stating that (a) the product was derived from ruminant bones from a region (**must** state the region) **other than** those considered by the USDA to be affected with BSE, and (b) during processing, there was **no** commingling with any ruminant material from a region considered by the USDA to be affected with BSE.

Gelatin

To determine the regulatory action to take on gelatin, see [Table 3-4-4](#) (Gelatin as Bulk Gelatin or Empty Gel Caps) or [Table 3-4-5](#) (Gelatin other than Bulk Gelatin or Empty Gel Caps).

Gelatin as Bulk Gelatin or Empty Gel Caps

TABLE 3-4-4 Gelatin as Bulk Gelatin or Empty Gel Caps

					Lacks a VS permit ⁷	REFUSE ENTRY

1 Gelatin derived from hides or bones of ruminants originating from BSE affected regions. VS import permits for gelatin/empty gelatin capsules derived from ruminants originating from BSE affected regions do not require certification from the exporting government because there is nothing to certify. The permit will read, "Imported product is for INDUSTRIAL or NON-ANIMAL use only. Permit does not authorize use as livestock feed ingredient, veterinary pharmaceutical or veterinary biological product. The permittee is responsible for ensuring that (a) the gelatin/gelatin capsules are not distributed to animal feed industries, (b) the gelatin/gelatin capsules are industrial or non-animal use only, (c) the gelatin/gelatin capsules will not be used as livestock feed ingredient or in veterinary pharmaceutical or veterinary biological product, and (d) any unused gelatin/gelatin capsules will be destroyed by incineration or burial at a landfill.

- 2 Gelatin derived from hides or bones of ruminants originating from BSE free regions may be accompanied by an official certificate issued by a veterinarian employed by the national government of the region of origin stating the species of animal from which the gelatin was derived and certifying that the gelatin was not derived from ruminants that have been in any region listed in 9CFR 94.18(a) or may be accompanied by a VS import permit which identifies the region of origin of the ruminants from which the gelatin was derived.
- 3 Gelatin derived from hides or bones of ruminants originating from BSE free regions may be accompanied by an official certificate issued by a veterinarian employed by the national government of the region of origin stating the species of animal from which the gelatin was derived and certifying that the gelatin was not derived from ruminants that have been in any region listed in 9CFR 94.18(a).
- 4 Gelatin, from Canada, may be accompanied by an original certificate issued by a full-time salaried veterinary officer of the national government of the region of origin, or issued by a veterinarian designated or accredited by the national government of the region of origin and endorsed by a full-time salaried veterinary officer of the national government of the region of origin, representing that the veterinarian issuing the certificate was authorized to do so, certifying that the gelatin is (1) derived from the bones of bovines subject to a ruminant feed ban equivalent to the requirements established by the U. S. Food and Drug Administration at 21 CFR 589.2000, from which the specific risk materials (SRMs) were removed and has not been commingled with materials ineligible for entry into the U.S.; or (2) derived from the hides of bovines and the gelatin has not been commingled with materials ineligible for entry into the U.S. As an alternative to CFIA certification, either commodity may be accompanied by a VS import permit (see footnote #1).
- 5 Gelatin derived from equine, swine, and/or fish must be accompanied by an official certificate issued by a veterinarian employed by the national government of the region of origin stating the species of animal from which the gelatin was derived.
- 6 Gelatin derived from avian species originating from regions classified by the USDA as free from highly pathogenic avian influenza subtype H5N1 (HPAI H5N1) may be accompanied by an official certificate stating the region of origin of the birds from which the gelatin was derived or may be accompanied by a VS import permit which identified the region of origin of the birds from which the gelatin was derived.
- 7 Gelatin derived from avian species originating from regions classified by the USDA as affected with highly pathogenic avian influenza subtype H5N1 (HPAI H5N1) must be accompanied by a VS import permit.

Gelatin Other Than Bulk Gelatin or Empty Gel Caps

TABLE 3-4-5 Gelatin Other Than Bulk Gelatin or Empty Gel Caps

If the type product is:	Imported as:	And the importation:	Then:
Gel caps containing pharmaceuticals, in final dosage form, finished packaging, for human use, ready for retail	→	Is accompanied by a written producer's or shipper's statement ¹	RELEASE
		Lacks the written producer's and shipper's statement ¹	REFUSE ENTRY
Gelatin-containing food products for human consumption, e.g., candy, drinks with gelatin, film, gelatin desserts, jams, jellies, pudding, sherbet, marshmallows	→		RELEASE
Gelatin-containing food products not for human consumption, e.g., pet food, livestock feed	→	Is accompanied by a VS permit ²	RELEASE or CONTROL as specified on the permit
		Lacks a VS permit ²	REFUSE ENTRY
Dietary supplements and nutraceuticals containing gelatin as an ingredient, gel caps with nutraceuticals	→	Is accompanied by a VS permit ³	RELEASE or CONTROL as specified on the permit
		Lacks a VS permit ³	REFUSE ENTRY

TABLE 3-4-5 Gelatin Other Than Bulk Gelatin or Empty Gel Caps (continued)

If the type product is:	Imported as:	And the importation:	Then:
Veterinary pharmaceutical gel caps, in bulk or final, finished form		Is accompanied by a VS permit ⁴	RELEASE or CONTROL as specified on the permit
		Lacks a VS permit ⁴	REFUSE ENTRY
Gelatin-containing human pharmaceuticals and placebos for use in clinical trials or other analytical testing		Is accompanied by a VS permit ⁵	RELEASE or CONTROL as specified on the permit
		Lacks a VS permit ⁵	REFUSE ENTRY
Technical gelatin (AKA animal glue)	Single commodity		RELEASE ⁶
		Culture media or imported as an ingredient in a commodity	Is accompanied by a VS permit ⁷
	Lacks a VS permit ⁷	REFUSE ENTRY	

- 1 Human pharmaceuticals containing animal-origin components (such as gelatin), prepared, packaged, and physically labeled in final dosage form ready for sale to the consumer, are enterable if accompanied by a written statement, on producer/shipper letterhead.
 - ◆ The written statement must provide the following information:
 - ◆ A detailed and accurate description of the product
 - ◆ A statement that the product is intended for human use only (written on label)
 - ◆ A statement that the product **does not** contain live livestock and poultry viral agents, and
 - ◆ A statement that the product is prepared, packaged, and physically labeled in the final dosage form ready for sale to the consumer.
 - ◆ This provision **does not** apply to nutraceuticals or dietary supplements-these products require a VS import permit (see footnote #3 below) regardless of form (i.e. bulk, or packaged, or in final dosage form). Likewise, since gelatin-containing pharmaceuticals and placebos containing animal-origin components destined for use in clinical trials or analytical testing typically do not meet the labeling requirements associated with "final dosage form, ready for sale to the consumer," they also require a VS import permit (see footnote #5 below).
- 2 Pet food and livestock feed containing animal origin ingredients requires a VS import permit, whether or not gelatin is an ingredient.
- 3 Dietary supplements and nutraceuticals require a VS import permit, regardless of whether they are in bulk or final dosage form, finished packaging, ready for retail sale.
- 4 Veterinary pharmaceutical ingredients containing gelatin require a VS import permit. Veterinary pharmaceuticals containing gelatin and **not** approved by the FDA require a VS import permit. Veterinary pharmaceuticals in gelatin capsules or veterinary pharmaceuticals containing gelatin approved by the FDA do not require a VS import permit. FDA approved veterinary pharmaceutical are regulated by the FDA's Center for Veterinary Medicine.
- 5 Gelatin-containing pharmaceuticals and placebos containing animal origin ingredients destined for clinical trials or other analytical testing require a VS import permit.
- 6 Technical gelatin (also known as animal glue) as a single commodity is unrestricted.
- 7 Technical gelatin (also known as animal glue) as an ingredient in a commodity requires a VS import permit to address all animal origin ingredients.

Bones, Etc. for Manufacturing

Bones (horns, antlers, skulls, teeth, tusks, dried bones, granulated bones, crushed bones) imported for manufacturing may still require some drilling, shaping, or grinding. If the bones require further processing, then they **must** be finished at an establishment that is approved to properly dispose of the residue (pieces, chips, or dust).

TABLE 3-4-6 Bones for Manufacturing

If the bones are:	And the bones are from:	Then:
Fully finished, ready to use such as: ◆ Buttons ◆ Knife handles ◆ Pistol grips ◆ Souvenirs	→	RELEASE
Not fully finished; still requiring some drilling, shaping, sanding, or grinding	Ruminant	GO to Table 3-4-8
	Other than a ruminant	GO to Table 3-4-7

Bones Not Fully Finished, and from Other than Ruminants

TABLE 3-4-7 Bones that Are Not Fully Finished, and Are from Other Than Ruminants

If the importation is:	And is:	Then:
Bones that are not fully finished, and are from other than ruminants	Consigned to an approved establishment	AUTHORIZE shipment under seal with VS 16-78 (see Appendix K to complete form)
	Not consigned to an approved establishment	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)

Ruminant Bones Not Fully Finished

TABLE 3-4-8 Ruminant Bones that Are Not Fully Finished

If the ruminant bones are:	And the bones are derived from:	And the country or region of export is:	And the importation:	Then:
Not fully-finished	Cervid, not including antlers	Affected with BSE	→	REFUSE ENTRY
		Minimal risk for BSE ¹	Consigned to an approved establishment ²	AUTHORIZE shipment under seal with VS Form 16-78 (see Appendix K to complete the form)
			Not consigned to an approved establishment ²	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)
		Free from BSE	Consigned to an approved establishment ²	AUTHORIZE shipment under seal with VS Form 16-78 (see Appendix K to complete the form)
	Not consigned to an approved establishment ²		1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)	
	Cervid, antlers only	Affected with BSE	→	REFUSE ENTRY
		Minimal risk for BSE ¹	→	GO to Table 3-4-9
		Free from BSE	→	GO to Table 3-4-9
	<ul style="list-style-type: none"> ◆ Bovine ◆ Ovine (sheep) ◆ Caprine (goat) 	Affected with BSE	→	REFUSE ENTRY
		Minimal risk for BSE ¹	Is accompanied by a VS permit	RELEASE
			Lacks a VS permit	REFUSE ENTRY
		Free from BSE	Is consigned to an approved establishment ²	AUTHORIZE shipment under seal with VS Form 16-78 (see Appendix K to complete the form)
Is not consigned to an approved establishment ²			1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)	

1 Currently Canada is the **only** country designated at minimal risk for BSE.

2 Since **cervid** commodities from a country at minimal risk for BSE are **not** restricted because of BSE, the approved establishments will treat materials for other diseases.

TABLE 3-4-9 Cervid Antlers from a Region Known to Be Free from BSE or Minimal Risk for BSE

If:	And the country or region of origin is:	And:	And the shipment is:		
Cervid antlers	Free from both BSE and FMD	Is accompanied by the appropriate certification ¹		RELEASE	
		Not accompanied by the appropriate certification ¹	Consigned to an approved establishment	AUTHORIZE shipment under seal with VS Form 16-78 (see Appendix K to complete the form)	
			Not consigned to an approved establishment	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)	
	Free from BSE, but affected with FMD		Consigned to an approved establishment	AUTHORIZE shipment under seal with VS Form 16-78 (see Appendix K to complete the form)	
			Not consigned to an approved establishment	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)	
	Minimal risk for BSE ² , and free from FMD	Is accompanied by the appropriate certification ¹		RELEASE	
			Not accompanied by the appropriate certification ¹	Consigned to an approved establishment	AUTHORIZE shipment under seal with VS Form 16-78 (see Appendix K to complete the form)
				Not consigned to an approved establishment	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)
	Minimal risk for BSE ² , but affected with FMD		Consigned to an approved establishment	AUTHORIZE shipment under seal with VS Form 16-78 (see Appendix K to complete the form)	
				Not consigned to an approved establishment	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)

1 An original health certificate endorsed by a full-time salaried veterinarian of the agency responsible for animal health of the country of origin certifying the:

- ◆ Name of the FMD-free country of origin
- ◆ Antlers are clean, dry, and free of soil, clay, sand, tissue, and undried pieces of hide, flesh, sinew, and other related materials

2 Currently Canada is the **only** country designated at minimal risk for BSE.

Hoofs Other than for Pet Toys

To determine the action to take for importations of hoofs that are for other than pet toys, see [Table 3-4-10](#).

TABLE 3-4-10 Hoofs Other Than for Pet Toys

If the importation is:	And the hoofs are derived from:	And the country or region of export is:	And the importation:	And is:	Then:	
Hoofs other than for pet toys	Ruminant	Affected with BSE	→	→	REFUSE ENTRY	
		Minimal risk for BSE ¹	Is appropriately certified ²	→	→	RELEASE
			Lacks appropriate certification ²	Consigned to an approved establishment		Authorize shipment under seal with VS Form 16-78 (see Appendix K to complete the form)
				Not consigned to an approved establishment		1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)
			Free from BSE	Is appropriately certified ²	→	→
		Lacks appropriate certification ²		Consigned to an approved establishment		Authorize shipment under seal with VS Form 16-78 (see Appendix K to complete the form)
			Not consigned to an approved establishment		1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)	
	Swine	→	Is appropriately certified ²	→	→	RELEASE
			Lacks appropriate certification ²	Consigned to an approved establishment		Authorize shipment under seal with VS Form 16-78 (see Appendix K to complete the form)

TABLE 3-4-10 Hoofs Other Than for Pet Toys (continued)

If the importation is:	And the hoofs are derived from:	And the country or region of export is:	And the importation:	And is:	Then:
Hoofs other than for pet toys	Swine	→	Lacks appropriate certification ²	Not consigned to an approved establishment	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)
	Other than ruminant or swine	→			RELEASE

1 Currently Canada is the only country designated at minimal risk for BSE.

2 One of the following approved methods for processing **must** appear on the certificate from the government of origin:

- ◆ Dry heat at 180°F (82.2°C) for 30 minutes
- ◆ Soaking in boiling water for 20 minutes
- ◆ Soaking for 2 hours in a 0.1 percent solution of chlorine bleach
- ◆ Soaking for 2 hours in a 5 percent solution of acetic acid
- ◆ Soaking for 2 hours in a 5 percent solution of hydrogen peroxide

Chondroitin Sulfate and Glucosamine

TABLE 3-4-11 Chondroitin Sulfate and Glucosamine

If the importation is:	And is derived from:	And:	Then:
Chondroitin sulfate and/or glucosamine	◆ Ruminant	Is accompanied by a VS permit	RELEASE
	◆ Swine	Lacks a VS permit	REFUSE ENTRY
	◆ Avian		
	◆ Equine (horses) ◆ Other than listed above		
Marine species (usually shark)		Is appropriately certified ¹	RELEASE
		Lacks appropriate certification ¹	REFUSE ENTRY

1 A declaration which provides, in a clear and concise manner, the following information:

- ◆ Identification of the material and species of origin
- ◆ Written declaration indicating the material **does not** include any equine, ruminant, swine, or avian species or their materials (such as in transport media or stabilizers)

Bones and Related By-Products Not Specifically Mentioned Elsewhere

Use [Table 3-4-12](#) when the importation is bones (horns, antlers, skulls, teeth, tusks, dried bones, granulated bones, crushed bones) or entire carcasses with skin, hide, or feathers attached that are being imported for purposes **other than** what is covered in this section.

TABLE 3-4-12 Bones and Related By-Products Not Specifically Mentioned Elsewhere

If the importation is:	And is derived from:	And the country or region of export is:	And:	And is:	Then:

Foreign Certificate for Animal Casings	page 3-5-13

Introduction

The *Casings* section covers the decision making necessary to regulate importations of animal casings (natural casings) as well as collagen casings (reconstituted casings). Casings are membranous covers used as food containers for processed meat. Following are examples of animal organs used for natural animal casings:

- ◆ Bladders
- ◆ Bung caps
- ◆ Ceca (cecum)
- ◆ Intestines
- ◆ Stomachs
- ◆ Rectums

Not all products derived from an animal's digestive organs or bladder are casings. Some products are imported for different purposes. Also, there are artificial casings made primarily from cellulose. Therefore, the following animal products and by-products are **not** covered under the casings section:

- ◆ Stomachs imported as edible meat products, like tripe; regulate these products under *Meat and Meat Products*
- ◆ Ruminant stomachs and goat gullets imported for the rennet; regulate these products under *Organs*

- ◆ Intestines, bladders, gullets, and weasands imported as inedible animal by-products that are rendered to feed **other than** livestock or to make fertilizers; regulate these products as rendered products under *Animal Waste and Related By-Products*
- ◆ Dried intestines imported for manufacturing into strings for instruments or racquets (gut strings); regulate gut strings under *Animal Waste and Related By-Products*
- ◆ Dried intestines imported for manufacturing into glue; regulate this by-product as glue stock under *Animal Waste and Related By-Products*
- ◆ Moist intestines and bung caps, primarily of ruminant (sheep), imported for manufacturing into articles such as prophylactics. Regulate these products under *Organs*
- ◆ Intestines imported as finished suture material packed in liquid; these products are **unrestricted**
- ◆ Salt scrapings which are the reclaimed salt from casings; scrapings are covered under *Miscellaneous Products*
- ◆ Artificial casings made from cellulose are unrestricted

Certification

Except for artificial casings made from cellulose, all importations of animal casings **must** be accompanied by foreign government certification.¹ The kind of certification will depend upon the following:

- ◆ The species of animal from which the casings were derived
- ◆ The country of origin for the casings (where the animals were slaughtered and the casings collected)
- ◆ The country in which the casings were processed (graded, sized, and sorted)
- ◆ The country where the casings were stored (this pertains **only** to ruminant casings stored in a region affected with BSE)
- ◆ Whether the casings are natural or reconstituted

¹ Ask importers if they plan to re-export the casings. If they do, advise them to make a copy of the *Foreign Official Certificate for Animal Casings* along with your release stamp. Food Safety and Inspection Service (FSIS) will require a copy of this certificate along with the APHIS Release Stamp to verify that the casings were legally imported into the U.S. **Without** this copy, FSIS **cannot** issue their Export Certificate.

Certificates **must** meet the following criteria:

- ◆ Be both in both English and the language of the foreign country of origin (certificates required by FSIS [9CFR§327.4])
- ◆ Be issued by a veterinarian authorized by the national government of the country of origin and/or where the casings were processed
- ◆ Have an **original** signature of the person issuing the certificate (printed or stamped signatures are **not** allowed)
- ◆ Bear the insignia of the national government of the country of origin or country in which the casings were processed or stored

Locator

Determining if Casings Are of Animal Origin

Use [Table 3-5-1](#) to determine if the casings are of animal origin.

TABLE 3-5-1 Determine if Casings Are of Animal Origin

If the casings are:	And derived from:	And they are:	Then:
Animal origin	Collagen (collagen is an animal protein derived from skin, intestines, tendons, bones, cartilage, or connective tissue)	Ruminant origin	GO to Table 3-5-2
		Swine origin	GO to Table 3-5-3
	Organs such as bladders, bung caps, ceca (cecum), intestines, esophagi, or stomachs (natural casings)	Packed in leakproof containers such as barrels, casks, tierces, or plastic containers	GO to Table 3-5-4
		Packed in animal skins as containers	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)
Not derived from an animal product; synthetic or artificial (usually appear as pleated like an accordion's bellows)	—————→		RELEASE

Reconstituted Casings

Reconstituted Collagen Casings Derived from Ruminant Collagen

Reconstituted casings are made of collagen. Most of the collagen is obtained from food grade, lined and split ruminant hides. Swine hides are rarely used, and collagen obtained from non-hide sources (such as intestines) are more rare. Reconstituted casings and reconstituted collagen casings are one and the same.

TABLE 3-5-2 Reconstituted Collagen Casings Derived from Ruminant Collagen

If:	And the ruminant material originated in a region:	And the collagen was derived from ruminant:	And:	Then:
Reconstituted collagen casings derived from ruminant collagen	Affected with BSE	Hides or skins	Is accompanied by the proper certification ¹	RELEASE
			Lacks the proper certification ¹	REFUSE ENTRY
		Bones, cartilage, connective tissue, intestines, or tendons	→	
	Minimal risk for BSE ²	Hides or skins	Is accompanied by the proper certification ¹	RELEASE
			Lacks the proper certification ¹	REFUSE ENTRY
		Bones, cartilage, connective tissue, intestines, or tendons	→	
Free from BSE		→	RELEASE	

1 The certificate **must** be signed by an official employed by the agency which regulates animal health. The certificate **must** carry the declaration stating that the collagen was derived **only** from hides or skins. For Canada, a NAFTA certificate with the same statement is also acceptable.

2 Currently Canada is the **only** country designated at minimal risk for BSE.

Reconstituted Collagen Casings Derived from Swine Collagen

TABLE 3-5-3 Regulatory Action on Reconstituted Collagen Casings Derived from Swine Collagen

If:	And the country of origin is known to be:	Then:

				Lacks the certification described above		REFUSE ENTRY
Free from BSE				Dried like parchment (a crease is made when folded)		RELEASE
				Not dried like parchment (a crease is not made when folded)		REFUSE ENTRY
				Wet or brined (If packed in sealed, leakproof containers then likely to be wet)		GO to Table 3-5-6

1 Currently Canada is the **only** country designated at minimal risk for BSE.

Ruminant Casings from a Country Known to Be Free from BSE

TABLE 3-5-6 Ruminant Casings from a Country Known to Be Free from BSE

If:	And from a country known to be:	And the casings were:	And the importation:	Then:
Ruminant casings	Free from BSE	Both stored and processed in the same country in which the casings originated	Is accompanied by a <i>Foreign Official Certificate for Animal Casings</i> ^{1, 2}	RELEASE
		Either processed or stored in a country other than that in which the casings originated	Lacks the <i>Foreign Official Certificate for Animal Casings</i> 	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options, including getting the <i>Foreign Official Certificate for Animal Casings</i> (see Table 2-2-11) GO to Table 3-5-7

1 Foreign Meat Inspection Certificates and Meat Product Certificates are **unacceptable** for casings.

2 FSIS now requires that bovine casings from small intestines include the following statement on the Official Certificate: "If derived from bovine small intestines, (the casings) exclude the distal ileum and meet the requirements of CFR 310.22(a)(3)."

Ruminant Casings Originating in a Country Known to Be Free from BSE, but Processed and Stored in a Country Other than that in Which the Casings Originated

TABLE 3-5-7 Ruminant Casings Originating in a Country Known to Be Free from BSE, but Processed and Stored in a Country Other than That in Which the Casings Originated

If the importation is:	And the casings were processed in a region:	And:	And stored in a region known to be:	And:	And the casings are:	Then:
Ruminant casings	Free from BSE	Either one: ◆ Stored in the same country where the casings were processed ◆ There is no evidence that the casings were stored in another country	Free from BSE	Accompanied by both :	Filled	REFER to FSIS
				◆ Foreign Official Certificate for Animal Casings ¹ ◆ Certification as to processing that parallels that shown in Figure 3-5-3	Not filled	RELEASE
			Lacks either the Foreign Official Certificate for Animal Casings or certification as to processing		REFUSE ENTRY	
			Stored in a different country from where the casings were processed	Free from BSE	Accompanied by both :	Filled
		◆ Foreign Official Certificate for Animal Casings ¹ ◆ Certification as to processing that parallels that shown in Figure 3-5-3			Not filled	RELEASE
		Lacks either the Foreign Official Certificate for Animal Casings or certification as to processing		REFUSE ENTRY		
		Affected with BSE			REFUSE ENTRY	
		Minimal risk for BSE ²	Is accompanied by CFIA Annex C	Filled	REFER TO FSIS	
Not filled	RELEASE					

TABLE 3-5-7 Ruminant Casings Originating in a Country Known to Be Free from BSE, but Processed and Stored in a Country Other than That in Which the Casings Originated (continued)

If the importation is:	And the casings were processed in a region:	And:	And stored in a region known to be:	And:	And the casings are:	Then:
Ruminant casings	Free from BSE	Stored in a different country from where the casings were processed	Minimal risk for BSE ²	Lacks the CFIA Annex C	→	REFUSE ENTRY

- 1 FSIS now requires that bovine casings from small intestines include the following statement on the Official Certificate: "If derived from bovine small intestines, (the casings) exclude the distal ileum and meet the requirements of CFR 310.22(a)(3)."
- 2 Currently Canada is the **only** country designated at minimal risk for BSE.

Swine Casings Originating in a Foreign Country Free from ASF

TABLE 3-5-8 Swine Casings Originating in a Foreign Country Free from ASF

If:	And the country of origin is:	And the casings were:	And the casings:	Then:
Swine casings	Free from ASF	Processed in the same region where the animal was slaughtered	Are accompanied by certification as to processing that parallels that shown in Figure 3-5-2 ¹	RELEASE
			Lack the processing certificate	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)
		Processed in a different country or region from that where the animal was slaughtered	→	GO to Table 3-5-9

- 1 You may accept **other** official certificates in lieu of the *Foreign Official Certificate of Animal Casings* if the information **parallels** that required on this official certificate (see [Figure 3-5-2](#) for an example of the certificate). However, Foreign Meat Inspection Certificates and Meat Product Certificates are **unacceptable** for casings.

TABLE 3-5-9 Natural Swine Casings from a Country of Origin Free from ASF, and Processed in a Country Other than the Country of Origin

If:	And the country of origin is:	And the country or region of processing is:	And the casings:	Then:
Natural swine casings	Free from ASF	Free from ASF	Are accompanied by certification as to processing that parallels that shown in Figure 3-5-3	RELEASE
			Lack the processing certification	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)
		Affected with ASF ¹	Were shipped from an approved establishment listed in Figure 3-5-1	RELEASE
			Were not shipped from an approved establishment listed in Figure 3-5-1	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)

¹ Swine casings that originate in a country known to be free from ASF, and are sent to a country affected with ASF to be processed **must** go to an approved foreign establishment (see [Figure 3-5-1, "List of U.S. Department of Agriculture \(USDA\) Approved Official Establishment in the continent of Africa Authorized to Process Swine Casings,"](#) on page 3-5-11).

FIGURE 3-5-1 List of U.S. Department of Agriculture (USDA) Approved Official Establishment in the continent of Africa Authorized to Process Swine Casings

Establishment Number	Name and Address of Establishment

B-14-3/94	Boyauderie Drimano Sari Quartier Industriel Sidi Brahim 81 Fez - Morocco
B -34-1/94	Boyauderie De L'Atlas Z.I. route de Tetouan 90000 Tanger - Morocco

The certificate issued by the country of processing **must** have the following additional statements:

- ◆ The animal casings herein described are casings which originated in *[country of origin]* and were accompanied by official documentation attesting that the casings were derived from animals which received ante-mortem and post-mortem veterinary inspection

- ◆ The casings have **not** been in contact with other casings, meat, or animal products while in *[country of processing]*
- ◆ The casings have been handled and processed in a clean, sanitary manner

TABLE 3-5-10 Swine Casings from a Country of Origin Known to Be Free from ASF, and Processed at an Approved Foreign Establishment in an ASF Affected Country

If:	And the country of origin is:	And the casings were:	And the importation was:	And is:	Then:
Swine casings	Free from ASF	Processed at an approved foreign establishment in a country that is affected with ASF	Shipped from an approved establishment listed in Figure 3-5-1	Accompanied by the appropriate certification	RELEASE
				Not accompanied by the appropriate certification	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)
			Not shipped from an approved establishment	→	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)

Foreign Certificate for Animal Casings

One example of a foreign official certificate for animal casings is shown in **Figure 3-5-2**. The official certificate must contain the required information, but may be in a format other than shown below.

FOREIGN OFFICIAL CERTIFICATE FOR ANIMAL CASINGS

Place _____ *[City]* _____ *[Country]* _____ *[Date]*

I hereby certify that:

The animal casings herein described were derived from healthy animals (cattle, sheep, swine, or goats), which received ante-mortem and post-mortem veterinary inspections at the time of slaughter, are clean and sound, and were prepared and handled only in a sanitary manner, and were not subject to contamination prior to exportation.

Kinds of casings	Number of packages	Weight
_____	_____	_____
_____	_____	_____
_____	_____	_____

Identification marks on the packages _____

Consignor _____ *[Address]*

Consignee _____ *[Destination]*

Shipping marks _____

Signature _____ *[Official issuing the certificate]*
(Non-government veterinarian authorized to issue the certificate by the national government of the region in which the animals were slaughtered and the casings were collected.)

Official title _____

Signature _____ *[Official issuing the certificate]*
(Veterinarian salaried by the national government of the region in which the animals were slaughtered and the casings were collected.)

Official title _____

FIGURE 3-5-2 Example of a Foreign Official Certificate for Animal Casings

Certification Requirements

Certification—when animal casings are processed (graded, sized, and sorted) in a country **other than** the country in which the animals were slaughtered and the casings were collected, the importation **must** be accompanied by certification which is issued in the country of processing.

This certification **must** contain the following information:

- ◆ City and country in which the casings were processed
- ◆ Date
- ◆ Kind of casings (species of animal slaughtered and casings collected from)
- ◆ Number of packages
- ◆ Weight of casings
- ◆ Identification marks on packages
- ◆ Consignor and consignor's address
- ◆ Consignee and consignee's address
- ◆ Shipping marks
- ◆ Signature of official issuing the certification
- ◆ Name (typed or printed) of official making the certification
- ◆ Official title of person issuing the certification

FIGURE 3-5-3 Information Which Must Appear on Certification of Animal Casings from a Country of Processing that Differs from the Country in Which the Casings Originated

Fresh, Unfertilized Eggs	page 3-6-12
Fresh, Unfertilized Eggs from the Mexican States of Sonora or Sinaloa	page 3-6-13
Commercial Shipments of Canned Quail Eggs	page 3-6-13

Introduction

The *Eggs and Egg Products from Poultry, Game Birds, and Other Birds* section covers eggs and egg products that are imported for both edible and inedible purposes, as follows:

- ◆ Baluts (fertile eggs incubated 17 days)
- ◆ Boiled eggs (hard-boiled eggs, salted eggs, pickled eggs)
- ◆ Eggs which are preserved, but uncooked (like hundred-year eggs and pedan eggs)
- ◆ Egg shells
- ◆ Fresh, unfertilized eggs for breaking and pasteurization
- ◆ Fresh, unfertilized eggs for food
- ◆ Inedible egg products (e.g., liquid yolks)
- ◆ Moon cakes
- ◆ Noodle soups, fresh, frozen, or dried (like ramen), containing eggs or egg products

Not covered in this section are the following:

- ◆ Egg-containing foods and processed products (such as baked goods (excluding moon cakes), drink mixes, egg protein shampoos, mayonnaise, pasta, salad dressings, and sauces)

- ◆ Eggs which are fertilized and ready for hatching, including commercial importations of uncooked baluts. Contact the nearest VS office for further action
- ◆ Eggs being imported for research; consider as embryos and refer to [Table 3-8-20](#)
- ◆ Egg cartons, crates, flats, or liners used as packing material (these are of concern because of possible contamination with blood, feathers, manure, or shells); regulate these products as fomites under *Miscellaneous Products*. If found contaminated, refer to [Step 5: Take Action on Contaminants and Ticks](#) on page 2-2-11 under *Clearing Regulated Cargo*.
- ◆ Commercial importations of shell eggs, which are regulated by the Agricultural Marketing Service (AMS). Refer to [Appendix I](#) for a list of AMS regional offices

Some egg products are highly perishable. Therefore, expedite an importation when you are authorized to release the importation. If you **cannot** release the hold, allow the importer to apply dry ice or refrigerate the product.

When a VS permit authorizes the entry of eggs or egg products, match the following information on the shipping documents with that on the permit:

- ◆ Current date
- ◆ Description of the material
- ◆ Shipper
- ◆ Consignee
- ◆ Conditions spelled out on the permit

Follow [Table 3-6-1](#) as you match the permit with the shipping documents.

TABLE 3-6-1 Validate Importation Authorized Entry by VS Permit

If the shipping documents:	And the:	Then:
Match the permit	→	RELEASE or CONTROL as specified on the permit
Do not match the permit	Permit has expired	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. HAVE the consignee contact VS, TTSPS (see Table 2-4-16) 3. SAFEGUARD the importation until you hear from VS, TTSPS
	Discrepancy is other than an expired permit	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. CONTACT PPQ-VRS-AQI or PPQ-VRS-HQ personnel for further action

Locator

When a VS permit does **not** accompany an importation of eggs or egg products, use [Table 3-6-2](#) to determine the appropriate regulatory action to take.

TABLE 3-6-2 Where to Find the Regulatory Action on Eggs and Egg Products Not Authorized by a VS Permit

If the importation is:	And:	Then:
Canned quail eggs	—————▶	Go to Table 3-6-10
Edible eggs and egg products	—————▶	GO to Table 3-6-4
Fresh, unfertilized eggs	Originated in the Mexican States of Sonora or Sinaloa ¹	GO to Table 3-6-9
	Originated in a country or region other than the Mexican States of Sonora or Sinaloa	GO to Table 3-6-8
Inedible egg products (e.g. liquid yolks)	Is accompanied by a VS Permit	RELEASE
	Lacks a VS Permit	REFUSE ENTRY
Whole, empty egg shells	—————▶	GO to Table 3-6-3

¹ Veterinary Services has determined that the Mexican States of Sonora and Sinaloa are of negligible risk for exotic Newcastle disease (END).

Inedible Egg Products

Egg products such as liquid yolks imported for research, scientific, educational, or another inedible purpose require a VS permit authorizing their entry. In addition, if the egg product is from an endangered or threatened bird, then the importation also may be subject to FWS regulations.

If you encounter a shipment which lacks a permit, then refuse entry.

Whole, Decorated Empty Egg Shells

Faberge eggs or articles (such as jewelry boxes) decorated with pieces of eggshells that are encountered in passenger baggage may enter **without** restriction.

Reference: Eggs and Egg Products from Poultry, Game Birds, or Other Birds
 Whole, Decorated Empty Egg Shells

TABLE 3-6-3 Whole, Decorated Empty Egg Shells

If the importation is:	And the country or region of origin is known to be:	And the shipment is:	And:	Then:
Whole, decorated empty egg shells	Affected with END	Commercial ¹	Is accompanied by a VS-issued Import Permit	RELEASE
			Lacks the VS-issued Import Permit	REFUSE ENTRY
		Not commercial ²	Is clean and dry	RELEASE
			Is not clean and dry	REFUSE ENTRY
	<ul style="list-style-type: none"> ◆ Affected with HPAI (H5N1) only ◆ Affected with HPAI (H5N1) in combination with END 	→	Is accompanied by a VS-issued Import Permit	RELEASE or CONTROL as specified on the permit
			Lacks a VS-issued Import Permit	REFUSE ENTRY
	Free from both END and HPAI (H5N1)	→	Is clean and dry	RELEASE
			Is not clean and dry	REFUSE ENTRY

1 Quantity of decorated, etched, or painted empty eggshells exceeds 10 per passenger.

2 Quantity of decorated, etched, or painted empty eggshells is 10 eggs or less per passenger.

Edible Eggs and Egg Products

Commercial importations of edible eggs and egg products **not** accompanied by a VS permit authorizing their entry **must** be of Canadian origin for **unrestricted** entry or from the Mexican States of Sonora and Sinaloa for restricted entry.

Use **Table 3-6-4** to determine the appropriate regulatory action to take for all shipments of edible eggs and egg products which are **not** accompanied by a permit that authorizes their entry.

Go to **Appendix A** for the **Guide to Entry Status of Animal Products in Passenger Baggage or Mail** when edible eggs and egg products are encountered in passenger baggage.

Never handle or break eggs outside of the package when those eggs are from Afghanistan, Albania, Azerbaijan, Bangladesh, Benin, Burkina Faso, Cambodia, Cameroon, China, Côte d'Ivoire (Ivory Coast), Czech Republic¹, Djibouti, Egypt, England¹, Germany¹, Ghana, Hungary¹, India, Indonesia, Iran, Israel, Japan, Jordan, Kazakhstan, Kuwait, Laos, Malaysia, Myanmar (Burma), Niger, Nigeria, Pakistan, Palestinian Autonomous Territories, Poland¹, Romania, Russia, Saudi Arabia, South Korea, Sudan, Sweden¹, Thailand, Togo, Turkey, Ukraine, or Vietnam. You risk contracting exotic strains of avian influenza. (Country listing will be updated as country status changes.)

- ¹ Regionalized country. **Only** VS-defined areas are considered to be affected with HPAI (H5N1). The VS defined areas follow: Czech Republic (Kraj of Kralovehradecky and Pardubicky, District Usti nad Orliem), England (Suffolk and Norfolk Counties), Germany (Kreis of Bamberg, Kreis of Dobeln, Kreis of Havelland, Kreis of Erlangen-Hochstadt, Kreis of Jerichowerland, Kreis of Kitzingen, Kreis of Mecklenburg-Strelitz, Kreis of Muldentale, Kreis of Neustadt A.D. Aisch, Kreis of Oberhavel, Kreis of Ostprignitz-Ruppin, Kreis of Potsdam-Mittelmark, Kreis of Saalfeld-Rudolstadt, Kreis of Schwandorf, Kreis of Torgue-Oschatz, Kreis of Uckermark), Great Britain (Suffolk and Norfolk Counties), Hungary (Bacs-Kiskun, Csongrad Counties), Poland (voivodships of Warminsko-Mazurskie, Mazowiekie, and Kujawsko-Pomorskie only) and Sweden (Kalmar County). Contact your local PPQ-VRS-AQI Veterinarian or a PPQ-VRS-HQ Staff Veterinarian for current information on VS-defined areas for regionalized countries.

If the edible eggs and egg products are from:	And the importation is:	And:	And the importation:	Then:
Other than Canada, the Mexican States of Sonora or Sinaloa, and countries free from HPAI (H5N1)	Other than eggs and egg products listed in the cells above		→	1. DO NOT RELEASE the HOLD 2. CONTACT a PPQ-AQI-VMO

- 1 For example, the baluts have been cooked.
- 2 Raw eggs (usually duck eggs), that have been covered with a mixture of wood ash and slaked lime, and left for up to a hundred days. By the time the eggs are used, the egg whites will have turned to pale-brown jelly and the yolks will be creamy and tinged green.
- 3 Raw eggs (usually duck eggs), that are coated in a salt-and-mud (clay) paste, then rolled in rice husks until the eggs are completely covered. At this stage, the eggs are packed into an earthenware urn, then tightly sealed and stored in a cool, dark place for one- to two months.
- 4 Eggs that are immersed in a super-saturated solution of salt for 2 weeks or more, and then the eggs are removed from the salt solution. In the Philippines, the eggs are also boiled and then colored red to distinguish the salted eggs from uncooked eggs; called itlog na pula or itlong na maalat.
- 5 However, the hardboiled eggs may be in vinegar.

Eggs (**other than** hatching eggs) from poultry, game birds, or other birds may be imported only in accordance with 9CFR 94.6 if they: are laid by poultry, game birds, or other birds that were raised in any region **except** Canada; are imported from any region **except** Canada; or are moved into or through any region except Canada at any time before importation or during shipment to the United States.

The eggs may be imported if they are accompanied by a certificate signed by a salaried veterinarian of the national government of the region of origin and:

(i) The eggs are imported in cases marked with the identity of the flock of origin and sealed with the seal of the national government of the region of origin.

(ii) The certificate accompanying the eggs is presented to an authorized inspector when the eggs reach the port of arrival in the United States.

(iii) The certificate identifies the flock of origin and shows the region of origin, the port of embarkation, the port of arrival, the name and address of the exporter and importer, the total number of eggs and cases (30 dozen equivalent) of eggs, shipped with the certificate, and the date the certificate was signed.

(iv) The certificate states that the eggs qualify for importation in accordance with 9CFR 94.6.

(v) **No** more than 90 days before the certificate was signed, a salaried veterinary officer of the national government of the region of origin inspected the flock of origin and found **no** evidence of communicable diseases of poultry.

(vi) The eggs were washed, to remove foreign material from the surface of the shells, and sanitized on the premises of origin with a hypochlorite solution of from 100 ppm to 200 ppm available chlorine.

(vii) The eggs were packed on the premises of origin in previously unused cases.

(viii) Before leaving the premises of origin, the cases in which the eggs were packed were sealed with a seal of the national government of the region of origin by the salaried veterinarian who signed the certificate.

(ix) And, if the eggs were laid in any region **other than** Australia, Canada, Chile, Costa Rica, Denmark, Fiji, Finland, France, Great Britain (England, Scotland, Wales, and the Isle of Man), Greece, Iceland, Luxembourg, New Zealand, Republic of Ireland, Spain, Sweden, and Switzerland:

(a) **No** END occurred on the premises of origin or on adjoining premises during the 90 days before the certificate was signed.

(b) There is **no** evidence that the flock of origin was exposed to END during the 90 days before the certificate was signed.

(c) The eggs are from a flock of origin found free of END in one of the following ways:

(1) Sentinel birds were present in the flock of origin for at least 60 days before the certificate was signed. There was at least 1 sentinel bird per 1,000 poultry with at least 30 sentinel birds per house. The sentinel birds remained free of clinical and immunological evidence of END as demonstrated by negative hemagglutination inhibition tests conducted on blood samples drawn at 10-day intervals by a salaried veterinary officer of the national government of the region of origin. The tests were conducted in a laboratory located in the region of origin, and the laboratory was approved to conduct the tests by the national government of that region; OR

(2) Once every week, beginning at least 60 days before the certificate was signed, a salaried veterinary officer of the national government of the region of origin collected carcasses of all poultry that died during that week, and the carcasses were examined for END using the embryonically egg inoculation technique. Once a month, beginning at least 60 days before the certificate was signed, a salaried veterinary officer of the national government of the region of origin collected tracheal and cloacal swabs from **not** less than 10 percent of the poultry in the flock, and the swabs were tested for END. All examinations and tests were conducted in a laboratory located in the region of origin, and the laboratory was approved to conduct the tests and examinations by the national government of that region. All results were negative for END.

FIGURE 3-6-1 Requirements for a Foreign Official Veterinary Certificate Issued for Fresh, Unfertilized, Eggs for Food, for Eggs from Other Than: Canada and the Mexican States of Sonora and Sinaloa

Shipments of table eggs from the Mexican States of Sonora and Sinaloa to the United States must be accompanied by a certificate issued by the Mexican Animal Health Authorities that contains the following information and certification statements:

- ◆ Certificate number on all pages of certification
- ◆ Country/territory exporting the product
- ◆ City where issued and date issued
- ◆ Name and address of farm(s) of origin of the eggs
- ◆ Name and address of exporter
- ◆ Name and address of importer
- ◆ Quality or description of eggs
- ◆ Number of cases and total quantity
- ◆ Identification marks on containers
- ◆ Method of transportation
- ◆ Port of export
- ◆ Port of arrival
- ◆ Certification statement listed below

I, the undersigned accredited veterinarian, certify that:

- ◆ No more than 90 days before the certificate was signed, a Mexican accredited veterinarian inspected the flock of origin and found no evidence of communicable diseases of poultry
- ◆ The eggs originate from [*Sonora or Sinaloa*] region of Mexico which is recognized by the United States Department of Agriculture in Title 9, Code of Federal Regulations, Part 94.22, as eligible for the importation of poultry and other poultry products
- ◆ The eggs were washed to remove foreign material from the surface of the shells and sanitized on the premises of origin with a hypochlorite solution containing 100-200 ppm of available chlorine
- ◆ The eggs have been graded to the grade stated on the cases and packed on the premises of origin in new packing and packaging material
- ◆ The eggs were stored after packaging and transported under refrigeration at an ambient temperature of **no** greater than 45° F (7.2° C)
- ◆ Either the eggs were transported directly into the United States without transiting regions considered by the U.S. as affected with exotic Newcastle disease OR the shipment of eggs was sealed at the premises of origin using seal number [*seal number*]

Introduction

The *Hides and Related By-Products* section covers parts and by-products that come from the exterior of animals and birds. Following are examples of hides and related by-products:

- ◆ Bristles (of swine)
- ◆ Capes (with or **without** feathers)
- ◆ Feathers **only**
- ◆ Hair
- ◆ Hides
- ◆ Rawhide
- ◆ Skins

- ◆ Wool (of sheep)

What Is Not Covered

Not covered in this section are the following animal products and by-products:

- ◆ Animal glue and glue stock made from hide. May be imported as granules, flakes, or powder. Regulate as hide glue under [Animal Waste and Related By-Products](#)
- ◆ Hides and related by-products imported as trophies or that have been processed. Consider hides or skins attached to carcasses as trophies; regulate these products under [Trophies](#)
- ◆ Meals derived from exterior animal parts and ground hides; regulate these products under [Animal Waste and Related By-Products](#)
- ◆ Rawhide (as such, chopped, extruded, or coated) imported as toys or food for pets; regulate such products under [Pet Food, and Livestock, Poultry, and Aquaculture Feed](#)
- ◆ Collagen casings made from collagen obtained from hides; regulate such products under [Casings](#)

Since anthrax may be acquired by handling contaminated hides, wool, hair, or other similar material, carefully inspect such articles. Wear gloves and a face mask when handling these articles; and wash your hands thoroughly following handling. See the [Glossary](#) for more information about anthrax.

Validation of Authorized Entry by VS Permit

When a VS permit authorizes entry of hides or related by-products, match the following information on the shipping documents with that on the permit:

- ◆ Current date
- ◆ Description of the material
- ◆ Shipper
- ◆ Consignee
- ◆ Conditions spelled out on the permit

Follow [Table 3-7-1](#) as you match the permit with the shipping documents.

TABLE 3-7-1 Validate Importation Authorized Entry by a VS Permit

If the shipping documents:	And the:	Then:
Match the permit	→	RELEASE or CONTROL as specified on the permit
Do not match the permit	Permit has expired	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. HAVE the consignee contact VS, TTSPS (see Importation Authorized Entry by VS Permits on page 2-4-26) 3. SAFEGUARD the importation until you hear from VS, TTSPS
	Discrepancy is other than an expired permit	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. CONTACT PPQ-VRS-AQI or PPQ-VRS-HQ personnel for further action (see Appendix H)

Locator

When a VS permit **does not** accompany an importation of hides or related by-products, use [Table 3-7-2](#) to determine the appropriate regulatory action to take.

TABLE 3-7-2 Where to Find Regulatory Action on Hides and Related By-Products Not Authorized by a VS Permit

If the hides or their by-products are:	And the importation is being entered as:	Then:
Rawhide	Other than pet food or toys ¹	RELEASE
<ul style="list-style-type: none"> ◆ Capes ◆ Hides ◆ Skins 		GO to Table 3-7-3
Feathers only		GO to Table 3-7-13
<ul style="list-style-type: none"> ◆ Bristles ◆ Hair ◆ Wool 		GO to Table 3-7-14

¹ Rawhide chews, toys, and pet paraphernalia are regulated under [Pet Food, and Livestock, Poultry, and Aquaculture Feed](#) on page 3-18-1.

Hides, Skins, and Capes

TABLE 3-7-3 Regulatory Action on Hides, Skins, and Capes

If the importation is:	And is from:	Then:
Leather	Any animal	RELEASE
Tanned hides, skins, or capes	All animals except birds	RELEASE
	Birds	GO to Table 3-7-10
Chrome-tanned hides, skins, or capes	All animals except birds	RELEASE
	Birds	GO to Table 3-7-10
Hard-dried or flint-dried hides, skins, or capes	Goat, lamb, or sheep	GO to Table 3-7-5
	Other than goat, lamb, or sheep	GO to Table 3-7-4
<div style="display: flex; align-items: center;">  <div style="margin-left: 10px;"> <p>Important</p> <p>Fresh hides may also harbor noxious weeds.</p> </div> </div> Untanned hides, skins, or capes	Swine	GO to Table 3-7-6
	Ruminants	GO to Table 3-7-7
	Birds	GO to Table 3-7-12
	Animals other than listed above	RELEASE

Hard-Dried or Flint-Dried Untanned Hides or Skins of Animals Other Than Goat, Lamb, or Sheep

Hard-dried or flint-dried untanned hides or skins **must** be dried to the extent that they look brittle enough to crack when bent. Continue to **Table 3-7-4** to determine the action to take.

TABLE 3-7-4 Hard-Dried or Flint-Dried Untanned Hides or Skins of Animals Other than Goat, Lamb, or Sheep

If the importation is:	And is from:	And the country or region of export is:	Then:
Hard-dried or flint-dried hides or skins of animals other than goat, lamb, or sheep	Swine	Affected with ASF	GO to Table 3-7-6
		Free from ASF	RELEASE
	Ruminants other than goat, lamb or sheep	→	RELEASE
	Birds	→	GO to Table 3-7-11
	Other than an animal class listed in the three cells above	→	RELEASE

Hard-Dried or Flint-Dried Untanned Hides or Skins of Goat, Lamb, or Sheep

Hard-dried or flint-dried hides or skins **must** be dried to the extent that they look brittle enough to crack when bent. Hard-dried or flint-dried hides or skins of goat, sheep, or lamb from countries where the khapra beetle are endemic **must** be inspected for this pest to prevent its entry. Because of a higher risk of khapra beetle on hides and skins from India and Sudan, a **mandatory** fumigation for this pest is required. Continue to **Table 3-7-5** to determine the action to take.

TABLE 3-7-5 Hard-Dried or Flint-Dried Untanned Hides or Skins of Goat, Lamb, or Sheep

If the importation is:	And the importation originated in or transited:	And upon inspecting the hides or skins you:	Then:
Hard-dried or flint-dried hides or skins of goat, lamb, or sheep	Afghanistan, Algeria, Bangladesh, Burkina Faso, Cyprus, Egypt, Iran, Iraq, Israel, Libya, Mali, Mauritania, Morocco, Myanmar (Burma), Niger, Nigeria, Pakistan, Saudi Arabia, Senegal, Sri Lanka, Syria, Tunisia, or Turkey	Find khapra beetle	REQUIRE treatment, following T416 ¹ in the <i>Treatment Manual</i>
		Do not find khapra beetle	RELEASE
	India or Sudan	→	1. REQUIRE a written permit (7CFR§319.75) issued by PPQ's Permit Services Branch of Biological and Technical Services in Riverdale, MD 2. REQUIRE treatment, following T416 ¹ in the <i>Treatment Manual</i>
	Country other than one listed above	→	RELEASE

1 Methyl bromide was a fumigant listed in the Treatment Manual (T416). Treatment with methyl bromide may result in foul odors because of the fumigant reacting with proteins in the hides or skins. Once formed, these disagreeable odors may be difficult or impossible to remove.

Hides, Skins, or Capes of Swine

To determine the action to take on hides, skins, or capes of swine, see [Table 3-7-6](#).

TABLE 3-7-6 Regulatory Action on Hides, Skins, or Capes of Swine

If the importation is:	And the country or region of export is:	And the importation is:	Then:
Hides, skins, or capes of swine	Free from ASF	—————→	GO to Table 3-7-7
	Affected with ASF	Consigned to an approved establishment	AUTHORIZE shipment under seal with VS 16-78 (see Appendix K to complete form)
		Not consigned to an approved establishment	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)

Untanned Hides, Skins, or Capes of Ruminants or Swine

To determine the action to take on untanned hides, skins, or capes of ruminants or swine, see [Table 3-7-7](#).

TABLE 3-7-7 Untanned Hides, Skins, or Capes of Ruminants or Swine

If the importation is:	And the country or region of export is:	And the hides, skins, or capes:	Then:
Untanned hides, skins, or capes of ruminants and swine	Free from FMD	Are accompanied by adequate proof of origin ¹	RELEASE 
		Lack adequate proof of origin	REFUSE ENTRY
	Affected with FMD	Are moist or salted and packed in bundles or on pallets	GO to Table 3-7-8

		Are soaking in a salt solution containing mineral acid	GO to Table 3-7-9
		Are pickled and packed in barrels, casks, plastic bags, or tight cases	GO to Table 3-7-8
		<ul style="list-style-type: none"> ◆ Are dehaired from being treated with lime ◆ Are pliable ◆ Are obviously processed (usually referred to as blue-chrome) 	RELEASE

Be aware of ticks on fresh hides, primarily from Mexico. See [Table 3-17-5](#)

1 Documentary evidence of the country from which the product originates. Examples include a bill of lading, certificate of origin, invoice, label, or document on official letterhead prepared by the manufacturer, seller, or shipper.

Untanned Hides, Skins, or Capes of Ruminants and Swine from a Region of Origin Known to Be Affected with FMD and Packed in Bundles

Untanned hides, skins, or capes of ruminants and swine from a region of origin known to be affected with FMD, and packed in bundles are **not** dried to the extent that they look brittle enough to crack if bent. They are moist or salted and packed in bundles or on pallets and are usually referred to as wet salted or green salted. They are **not** soaking in a solution; therefore, collecting 5 ml of solution for testing (see [Table 3-7-9](#)) is impossible.

TABLE 3-7-8 Regulatory Action on Untanned Hides, Skins, or Capes of Ruminants and of Swine from a Region of Origin Known to Be Affected with FMD and Packed in Bundles

If the importation is:	And the country or region of export is:	And the importation is:	Then:
Untanned hides, skins, or capes of ruminants packed in bundles	Affected with FMD	Consigned to an approved establishment	AUTHORIZE shipment under seal with VS 16-78 (see Appendix K to complete form)
		Not consigned to an approved establishment	<ol style="list-style-type: none"> DO NOT RELEASE the HOLD PROVIDE the importer with the appropriate options (see Table 2-2-11)

Untanned Hides, Skins, or Capes of Ruminant and Swine from a Region of Origin Known to Be Affected with FMD and Pickled in Salt Solution Containing Mineral Acid

Untanned hides, skins, or capes of ruminant and swine from a region of origin known to be affected with FMD and pickled in salt solution containing mineral acid are contained so that at least 5 ml (about a teaspoon) can be collected. (These hides, skins, or capes are usually pickled in a salt solution containing mineral acid and packed in barrels, casks, tight cases, or plastic bags).

PPQ **must** test the pH level using a pH determination paper strip. Paper strips can be purchased at medical supply stores. The paper strips **must** be able to determine a pH level between 4 and 9. Follow the directions that accompany the paper strips.

Continue to [Table 3-7-9](#) to determine the action to take.

TABLE 3-7-9 Untanned Hides, Skins, or Capes of Ruminant or Swine from a Region of Origin Known to Be Affected with FMD, and Are Pickled in a Salt Solution Containing Mineral Acid

If the importation is:	And the country or region of export is:	And the pH level of the importation is:	And the importation is:	Then:

Feathers Only or Products that Contain Feathers

Never cut into or otherwise open finished products with feathers inside (such as comforters, crafts, and pillows) from Afghanistan, Albania, Azerbaijan, Bangladesh, Benin, Burkina Faso, Cambodia, Cameroon, China, Côte d'Ivoire (Ivory Coast), Czech Republic¹, Djibouti, Egypt, England¹, Germany¹, Ghana, Hungary¹, India, Indonesia, Iran, Israel, Japan, Jordan, Kazakhstan, Kuwait, Laos, Malaysia, Myanmar (Burma), Niger, Nigeria, Pakistan, Palestinian Autonomous Territories, Poland¹, Romania, Russia, Saudi Arabia, South Korea, Sudan, Sweden¹, Thailand, Togo, Turkey, Ukraine, or Vietnam. You risk contracting exotic strains of avian influenza. (Country listing will be updated as country status changes.)

- 1 Regionalized country. **Only** VS-defined areas are considered to be affected with HPAI (H5N1). The VS defined areas follow: Czech Republic (Kraj of Kralovehradecky and Pardubicky, District Usti nad Orliem), England (Suffolk and Norfolk Counties), Germany (Kreis of Bamberg, Kreis of Dobeln, Kreis of Havelland, Kreis of Erlangen-Hochstadt, Kreis of Jerichowerland, Kreis of Kitzingen, Kreis of Mecklenburg-Strelitz, Kreis of Muldenthal, Kreis of Neustadt A.D. Aisch, Kreis of Oberhavel, Kreis of Ostprignitz-Ruppin, Kreis of Potsdam-Mittelmark, Kreis of Saalfeld-Rudolstadt, Kreis of Schwandorf, Kreis of Torgue-Oschatz, Kreis of Uckermark), Great Britain (Suffolk and Norfolk Counties), Hungary (Bacs-Kiskun, Csongrad Counties), Poland (voivodships of Warminsko-Mazurskie, Mazowiekie, and Kujawsko-Pomorskie only) and Sweden (Kalmar County). Contact your local PPQ-VRS-AQI Veterinarian or a PPQ-VRS-HQ Staff Veterinarian for current information on VS-defined areas for regionalized countries.

Continue to **Table 3-7-13**.

TABLE 3-7-13 Feathers Only or Products that Contain Feathers

If:	And the country or region of export is:	And the feathers are:	And:	And the importation:	Then:
<ul style="list-style-type: none"> ◆ Feathers only ◆ Products that contain feathers (such as coats, comforters, crafts and pillows) 	<ul style="list-style-type: none"> ◆ Affected with HPAI (H5N1) only ◆ Affected with HPAI (H5N1) in combination with END 	In bulk or part of items needing further processing	→	Is accompanied by a VS permit ¹	RELEASE or CONTROL as specified on the permit
			→	Lacks a VS permit ¹	REFUSE ENTRY
		In fully-finished ² items, including coats, comforters, crafts, and pillows	→	Visible feathers are clean and dry, and free from blood, skin, and manure	RELEASE
			→	Visible feathers are contaminated with blood, skin, or manure	REFUSE ENTRY

TABLE 3-7-13 Feathers Only or Products that Contain Feathers (continued)

If:	And the country or region of export is:	And the feathers are:	And:	And the importation:	Then:
<ul style="list-style-type: none"> ◆ Feathers only ◆ Products that contain feathers (such as coats, comforters, crafts and pillows) 	Affected with END only	In bulk or part of items needing further processing	Is accompanied by a VS permit ¹	→	RELEASE or CONTROL as specified on the permit
			Lacks a VS permit ¹	Is consigned to an approved establishment	AUTHORIZE shipment under seal with VS 16-78 (see Appendix K to complete form)
				Is not consigned to an approved establishment	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)
	In fully-finished ² items, including coats, comforters, crafts, and pillows	→	RELEASE		
	Free from both HPAI (H5N1) and END	→	Is accompanied by either a certificate of origin or a VS permit ¹	→	RELEASE or CONTROL as specified on the permit
			Lacks both a certificate of origin and a VS permit ¹	→	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)

- 1 Bulk feathers or feathers needing further processing from an HPAI (H5N1) affected country, that were legally-imported into another country and then re-exported as bulk feathers or feathers needing further processing to the United States still require a VS permit.
- 2 Fully-finished is defined as needing **no** further processing and ready for sale to the consumer.

Wool, Hair, and Bristles

TABLE 3-7-14 Regulatory Action on Wool, Hair, and Bristles

If the importation is:	And the source of the wool, hair, or bristles is:	And when inspected, the articles are:	And the country or region of export is:	And the articles:	Then:		
<ul style="list-style-type: none"> ◆ Wool¹ ◆ Hair ◆ Bristles 	<ul style="list-style-type: none"> ◆ Ruminant (alpaca, bison, camel, cow, deer, goat, sheep, vicuna, or yak for example) ◆ Swine (boar, peccary, or pig for example) 	Free from blood stains	Free from FMD	→	RELEASE		
			Affected with FMD	Have been scoured, thoroughly washed, or dyed			
				Have not been scoured, washed, or dyed	GO to Table 3-7-15		
			Bloodstained		→	Are consigned to an approved establishment	AUTHORIZE shipment under seal with VS 16-78 (see Appendix K to complete form)
					→	Are not consigned to an approved establishment	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)
						→	
	◆ Neither ruminant nor swine (badger, beaver, cat, dog, fox, hare, rabbit, sable, seal, squirrel, or weasel for example)			→			

1 Wool comes **only** from ruminants such as alpaca, goat, or sheep.

Ruminant or Swine Wool, Hair, or Bristles Free from Blood Stains, but Not Washed, Scoured, or Dyed, and from a Region of Origin Known to Be Affected with FMD

To determine the action to take on wool, hair, or bristles that are free from blood stains, but have **not** been washed, scoured, or dyed, and from a country or region of origin that is known to be affected with FMD, see [Table 3-7-15](#).

TABLE 3-7-15 Wool, Hair, or Bristles Free from Blood Stains, but Not Washed, Scoured, or Dyed and from a Region of Origin Known to Be Affected with FMD

If the importation is:	And is:	And country or region of export is:	And the articles are:	Then:
Wool from ruminant ¹	Free from bloodstains, but has not been washed, scoured, or dyed	Affected with FMD	Free from contamination by manure or dunglocks, but may show grease tags	RELEASE
			Contaminated with manure or dunglocks	GO to Table 3-7-16
Hair or bristles from ruminant or swine	Free from bloodstains, but has not been washed, scoured, or dyed	Affected with FMD	Free from contamination by manure or dunglocks	RELEASE
			Lightly contaminated (less than 20 percent) with manure	GO to Table 3-7-17

¹ Wool comes **only** from ruminants such as alpaca, goats, and sheep.

Wool that Is Lightly Contaminated With Manure

To determine the action to take on wool that is contaminated with manure, both lightly (less than 20%) or heavily (more than 20% contaminated), see [Table 3-7-16](#).

TABLE 3-7-16 Wool that Is Contaminated with Manure

If the importation is:	And is:	And is:	Then:
Wool ¹ that is lightly (less than 20%) contaminated with manure	<ul style="list-style-type: none"> ◆ Is accompanied by a certificate from the agency responsible for animal health in the exporting region OR ◆ Is accompanied by a declaration from the exporter that verifies the wool is sheep body wool, farm or full skirted 	→	RELEASE
	Lacks the certification or declaration described in the cell above	Consigned to an approved establishment	AUTHORIZE shipment under seal with VS Form 16-78 (see Appendix K to complete form)
		Not consigned to an approved establishment	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)
Wool that is heavily (more than 20%) contaminated with manure	→	Consigned to an approved establishment	AUTHORIZE shipment under seal with VS Form 16-78 (see Appendix K to complete form)
		Not consigned to an approved establishment	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)

¹ Wool **only** comes from ruminants alpaca, goats, and sheep.

Swine Hair or Bristles Heavily Contaminated with Manure

To determine the action to take on swine hair or bristles that are heavily (more than 20%) contaminated with manure, see [Table 3-7-17](#).

TABLE 3-7-17 Swine Hair or Bristles that Are Heavily Contaminated with Manure

If the importation is:	And the country or region of export is:	And the importation is:	Then:
Swine hair or bristles heavily (more than 20%) contaminated with manure	Affected with FMD	Consigned to an approved establishment	AUTHORIZE shipment under seal with VS Form 16-78 (see Appendix K to complete form)
		Not consigned to an approved establishment	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)

Introduction

The *Live Animals and Related Material* section covers importations of living organisms and related material for which DHS-CBP has approval to take regulatory action. Examples include embryos, ova, and semen; organisms and vectors, including microorganisms (viruses, bacteria) imported for research purposes; antisera; diagnostic reagents; monoclonal antibodies; test kits; and antivenin.

Not covered in this section are the following live animal importations:

- ◆ Blood or a derivative of blood; regulate these by-products under ***Blood and Related By-Products***

- ◆ Eggs for hatching, including commercial importations of uncooked baluts. Contact the nearest VS office for further action. Consider eggs being imported for research as embryos; see [Table 3-8-20](#)
- ◆ Extracts or derivatives of animal organs or glands; regulate these by-products under [Organs](#)
- ◆ Human pharmaceuticals and human vaccines in final dosage form; see [Human Pharmaceuticals and Human Vaccines](#)
- ◆ Importations of live animals, except for laboratory animals (see [Animal Tissue](#) on [page 3-8-8](#)). Consult with local VS for notification and procedures for any live animal import **other than** those handled by the U.S. Public Health Service (PHS)
- ◆ Live animals found while clearing aircraft or vessels; see [Safeguarding Live Animals](#)
- ◆ African rodents, bats, cats, civets, dogs, and nonhuman primates; see PHS, and also refer nonhuman primates to FWS. The Centers for Disease Control and Prevention (CDC) has jurisdiction over the importation of African rodents, bats, cats, civets, dogs, and nonhuman primates. The importer should contact the CDC for import restrictions (phone 404/639-2540 or 404-498-1600)
- ◆ Pet birds in passenger baggage and aboard vessels or yachts and pleasure vessels; see [Handling Pet Birds](#)
- ◆ Used semen and embryo containers; see [Empty Semen and Embryo Containers](#) for action to take
- ◆ Veterinary biologics such as bacterins, vaccines, toxins, toxoids, and test kits for the diagnosis of animal diseases. These animal products are authorized entry under a veterinary biological product permit issued by VS, Center for Veterinary Biologics; see [Requests for VS Permits Table 2-4-16](#)

When a VS permit authorizes entry of live animals, match the following information on the shipping documents with that on the permit:

- ◆ Current date
- ◆ Description of the material
- ◆ Shipper
- ◆ Consignee
- ◆ Conditions spelled out on the permit

Follow [Table 3-8-1](#) as you match the permit with the shipping documents.

TABLE 3-8-1 Validate Importation Authorized Entry by a VS Permit

If the shipping documents:	And the:	Then:
Match the permit		RELEASE or CONTROL as specified on the permit
Do not match the permit	Permit has expired	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. HAVE the consignee contact VS, TTSPS, IEAS, or CVB (see page 2-4-27) 3. SAFEGUARD the importation until you hear from VS, TTSPS
	Discrepancy is other than an expired permit	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. CONTACT PPQ-VRS-AQI or PPQ-VRS-HQ personnel for further action (see Appendix H)

Locator

When a VS permit **does not** accompany an importation of live animals, use [Table 3-8-2](#) to determine the appropriate regulatory action to take.

TABLE 3-8-2 Where to Find Regulatory Action on Live Animals and Related Material Not Authorized By a VS Permit

If the importation is:	Then:
Amphibians	Go to Table 3-8-11
Aquatic animals (including fish, sharks, shellfish, and whales)	
Animal tissue	Go to Table 3-8-6
Cat (feline) materials	Go to Table 3-8-10
Dog (canine) materials	
Earthworms	GO to Table 3-8-3
Human materials	Go to Table 3-8-8
Laboratory mammals and their associated materials	GO to Table 3-8-7
Microorganisms (bacteria, viruses, fungi)	GO to Table 3-8-4
Organisms and vectors	GO to Table 3-8-12
Nonhuman primate materials	GO to Table 3-8-9
Ova and embryos	GO to Table 3-8-20
Reptiles	Go to Table 3-8-11
Semen from equine	GO to Table 3-8-18
Semen from other than equine	GO to Table 3-8-19
Used embryo, ova, or semen containers	GO to Empty Semen and Embryo Containers on page 2-2-13
Other than described above	CONTACT PPQ-VRS-AQI or PPQ-VRS-HQ personnel for further action (see Appendix H)

Earthworms

TABLE 3-8-3 Earthworms

If:	And the country or region of export is:	And the earthworms are:	And from:	And:	Then:
<ul style="list-style-type: none"> ◆ Live earthworms ◆ Freeze-dried earthworms ◆ Earthworms in any form other than pelletized, or in capsules 	Canada	In soil	<ul style="list-style-type: none"> ◆ Newfoundland ◆ Portion of the Municipality of Central Saanich on Vancouver Island in the Province of British Columbia east of West Saanich Road 	→	REFUSE ENTRY
			Part of Canada other than that described in the cell above	→	RELEASE ¹
		Not in soil	→		
	Other than Canada	In alcohol	→		RELEASE
		Not in alcohol	→	Is accompanied by PPQ Form 526, Permit to Move Live Plant Pests ²	RELEASE ¹ or CONTROL as specified on the permit
				Lacks the permit	REFUSE ENTRY
Earthworms, pelletized, or in capsules and packaged for human consumption	→			→	RELEASE

1 Because live earthworms are perishable, expedite shipments that you are authorized to release.

2 Since earthworms may harbor plant pathogens in their guts, earthworms are regulated by 7CFR 330.200.

Microorganisms (Bacteria, Viruses, Fungi)

TABLE 3-8-4 Microorganisms

If:	And:	Then:
Recombinant microorganism	→	GO to Table 3-8-5
Recombinant microorganism that poses a threat to humans	→	CDC Permit required, CONTACT the Centers for Disease Control and Prevention at 404/639-2540 or 404-498-1600
Nonrecombinant microorganism ¹	Is accompanied by shipper or producer's declaration ²	RELEASE
	Lacks the shipper or producer's declaration or statements ²	DO NOT RELEASE the HOLD until the importer provides the required documentation

- 1 Examples of nonrecombinant, nonpathogenic microorganisms are as follows: *Lactobacillus* (used to manufacture yogurt); *Micrococcus* (skin bacterium); *Penicillium* (used to produce penicillin, an antibiotic); and *Serratia* (soil microbe).

Examples of microorganisms requiring a permit to authorize entry are as follows: *Hemophilus influenzae*, *Actinobacillus equuli*, *Actinomyces bovis*, *Streptococcus bovis*, *Rhodococcus equi*, *Helicobacter pylori*, *Lawsonia intracellularis*, *Clostridium perfringens*, *Pasteurella multocida*, Bluetongue virus, Vesicular stomatitis virus, porcine parvovirus, and epizootic hemorrhagic disease virus.

- 2 A declaration which provides, in a clear and concise manner, the following information:
- ◆ Genus and species of the microorganism
 - ◆ Microorganism is **not** considered to be pathogenic to livestock or poultry

Recombinant Microorganisms

Recombinant microorganisms can be bacteria, viruses, or yeast. Recombinant technology involves the transfer of genes from one organism into another organism. Examples of transference include the following:

- ◆ Transferring insect or herbicide resistance to plants
- ◆ Transferring normal human genes to replace defective ones
- ◆ Transferring genes which manufacture hormones or enzymes to those that **do not**

The most common recombinant microorganisms are as follows:

- ◆ Bacteria, *Escherichia coli* and *Bacillus subtilis*
- ◆ Yeasts, *Streptomyces* and *Saccharomyces*
- ◆ Virus, *Vaccinia*

TABLE 3-8-5 Recombinant Microorganisms

If:	And the microorganism:	And the importation:	Then:
Recombinant microorganisms	Contains animal-derived additive or stabilizer, e.g., albumin	Is accompanied by shipper or producer's declaration ¹	RELEASE
		Lacks the shipper/producer's declaration ¹	REFUSE ENTRY
	Does not contain animal-derived additive or stabilizer	Is accompanied by shipper or producer's declaration ²	RELEASE
		Lacks the shipper/producer's declaration	REFUSE ENTRY

1 A declaration which provides, in a clear and concise manner, the following information:

- ◆ A detailed name or description of the microbe/recombinant product, including genetic insert
- ◆ Identification of additive or stabilizer
- ◆ Confirmation that the material is produced by recombinant microbial expression (vector **must not** be considered pathogenic for livestock or avian species)
- ◆ Confirmation that the organism **does not** contain genes or express antigens of livestock or poultry disease agents
- ◆ Confirmation that the product will be used **only** in vitro

2 A declaration which provides, in a clear and concise manner, the following information:

- ◆ A detailed name or description of the microbe/recombinant product, including genetic insert
- ◆ Confirmation that the preparation does not contain any animal-derived additives, such as albumin
- ◆ Confirmation that the material is produced by recombinant microbial expression (vector **must not** be considered pathogenic for livestock or avian species)
- ◆ Confirmation that the organism **does not** contain genes or express antigens of livestock or poultry disease agents

Animal Tissue

TABLE 3-8-6 Action to Take on Animal Tissue

If the tissue originated from:	Then:
Amphibians, aquatic species, or reptiles	GO to Table 3-8-11
Canines (dogs)	GO to Table 3-8-10
Felines (cats)	
Humans	GO to Table 3-8-8
Live laboratory animals (including ferrets, gerbils, guinea pigs, hamsters, mice, rabbits, or rats)	GO to Table 3-8-7
Live laboratory animals regulated by CDC (including African rodents, bats, and civets)	GO to Table 3-8-7
Livestock (horses, ruminants, swine or avian species (birds and poultry)	<ol style="list-style-type: none">1. DO NOT RELEASE the HOLD2. ADVISE the importer of the HOLD because the importation may require a VS permit authorizing the entry3. PROVIDE the importer with the appropriate options, including applying for a VS permit issued by VS, TTSPS (see Table 2-4-16)
Nonhuman primates	GO to Table 3-8-9

Live Laboratory Mammals and Their Associated Materials for Research Purpose

Important

The Centers for Disease Control and Prevention (CDC) regulates the importation of African rodents, bats, cats, civets, dogs, and nonhuman primates; see [Table 3-8-7](#) on page 3-8-9 for African rodents, bats, and civets; see [Table 3-8-9](#) on page 3-8-12 for nonhuman primates; and see [Table 3-8-10](#) on page 3-8-13 on page for cats and dogs.

For the purposes of this section, laboratory mammals (and their products) include ferrets, gerbils, guinea pigs, hamsters, mice, rabbits, rats, transgenic rabbits, transgenic rats, and transgenic/knockout mice; see [Table 3-8-7](#) on page 3-8-9.

If the cages containing the animals also contain fruits or vegetables (used as a source for water), then have the importer or the importer's agent remove any prohibited material prior to being released to a consignee.

TABLE 3-8-7 Live Laboratory Mammals and Their Associated Materials for Research Purposes

If the importation is:	And is:	And is:	And is:	And:	Then:
Live laboratory mammals for research purposes	African rodents, bats, civets				CONTACT the Centers for Disease Control and Prevention which has jurisdiction over these items at 404/639-2540 or 404/498-1600
	◆ Ferrets, gerbils, guinea pigs, hamsters, mice, rabbits, rats, transgenic rabbits, transgenic/knockout rats, transgenic/knockout mice			Is accompanied by VS-recommended documentation ¹	RELEASE; a USDA permit is not required
	◆ Other than listed above			Lacks the VS-recommended documentation ¹	CONTACT USDA-APHIS-VS National Center for Import and Export at 301/734-3277 to determine if a USDA permit is required

TABLE 3-8-7 Live Laboratory Mammals and Their Associated Materials for Research Purposes (continued)

If the importation is:	And is:	And is:	And is:	And:	Then:	
Laboratory mammal materials for research purposes	→	Blood fractions include albumin, antibodies, antisera, blood clotting factors, red or white blood cells, plasma, whole blood	Less than one (1) liter	Is accompanied by VS-recommended documentation ²	RELEASE; a USDA permit is not required	
				Lacks the VS-recommended documentation ²	CONTACT USDA-APHIS-VS National Center for Import and Export at 301/734-3277 to determine if USDA permit is required	
			One (1) liter or greater	Is accompanied by a USDA permit	RELEASE	
	Lacks a USDA permit	REFUSE ENTRY				
	→	DNA, Enzymes, Extracts, Feces, Fluids, Hormones, Peptides, RNA, Semen, Tissue, Other than listed above	→	→	Is accompanied by VS-recommended documentation ²	RELEASE; a USDA permit is not required
					Lacks the VS-recommended documentation ²	CONTACT USDA-APHIS-VS National Center for Import and Export at 301/734-3277 to determine if USDA permit is required

1 VS recommends the following documentation accompany each shipment: a written statement confirming that the live laboratory mammals:

- ◆ Have **not** been exposed to or inoculated with any livestock or poultry disease agents exotic to the United States
- ◆ **Do not** originate from a facility where work with exotic disease agents affecting livestock or poultry is conducted

2 VS recommends that the following documentation accompany each shipment; a written statement:

- ◆ Identifying the material and naming the animal species
- ◆ Confirming that the material was derived **only** from laboratory mammals that have **not** been inoculated with or exposed to any livestock or poultry disease agents exotic to the United States
- ◆ Confirming that the material was derived **only** from laboratory mammals that **did not** originate from a facility where work with exotic disease agents affecting livestock or avian species is conducted
- ◆ If applicable, identifying the immunogen for antibodies/antiserum

Human Materials

TABLE 3-8-8 Human Materials

If the importation is:	And is:	And:	Then:
Material collected from humans	<ul style="list-style-type: none"> ◆ Blood fractions¹ ◆ DNA ◆ Enzymes ◆ Extracts ◆ Feces ◆ Fluids ◆ Hormones ◆ Peptides ◆ RNA ◆ Semen ◆ Tissue ◆ Urine ◆ Other than listed above 	Is accompanied by VS-recommended documentation ²	<ol style="list-style-type: none"> 1. FIGURE 3-8-1 List of Laboratories Working with Exotic Viruses, Including FMD

Organisms and Vectors

Organisms are living cultures or collections of animals or their derivatives which may introduce or disseminate any contagious or infectious disease of animals, including poultry. Importations regulated as organisms include the following:

- ◆ Bacterial cultures
- ◆ Culture medium
- ◆ Excretions
- ◆ Fungi (including yeast)
- ◆ Ticks, mites, sand flies, mosquitoes
- ◆ Tissues of livestock and birds
- ◆ Viruses

A vector can be an animal (to include arthropods [which include insects]), or an organism that: (1) has been exposed to or inoculated with any contagious, infectious, or communicable disease agent of livestock or poultry; and (2) is capable of transmitting this agent to livestock or poultry.

EXAMPLE

Examples of animals that can serve as vectors include chickens and other avian species, ferrets, horses, ruminants (cattle, sheep, goats), or swine.

Examples of arthropods that can serve as vectors include ticks, mites, sand flies, and mosquitoes.

Refer live animals, excluding laboratory animals, to the nearest VS office. Refer arthropods (including insects), and other biting/blood sucking organisms, either whole or parts thereof, that can serve as vectors to VS, TTSPS. at 301-734-3277.

When a VS permit **does not** authorize entry to the importation of organisms or vectors, use [Table 3-8-12](#) which directs you to the final regulatory action to take.

TABLE 3-8-12 Regulatory Action to Take on Organisms and Vectors

And the product is:	And the importation is for:	Then:
Veterinary biologic used for the diagnosis, treatment, or prevention of animal diseases including bacterins and vaccines	Research or biological use	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. ADVISE the importer of the HOLD because the importation requires a VS permit authorizing its entry 3. PROVIDE the importer with the appropriate options, including applying for a veterinary biological product permit issued by VS, CVB (see Table 2-4-16)
Other than a veterinary biologic	→	GO to Table 3-8-13
Bulk shipment to be used as drugs, medicine, nutritional supplements, or in test kits	Pharmaceutical use	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. ADVISE the importer of the HOLD because the importation may require a VS permit authorizing its entry 3. PROVIDE the importer with the appropriate options including applying for a VS permit issued by VS, TTSPS (see Table 2-4-16)
In final dosage form	→	GO to Human Pharmaceuticals and Human Vaccines on page 3-15-12

Organisms and Vectors for Research or Biological Use

Organisms and vectors may be imported for scientific studies. They include such materials as microorganisms (bacteria, viruses, fungi), sera, cell lines and their products, antitoxins, and proteins such as hormones and enzymes. They are used to diagnose, treat, or prevent human and animal diseases.

Some examples of organisms and vectors which are regulated for research or biological use follow:

- ◆ Antitoxins and antivenoms
- ◆ Ascitic fluid from mouse or rat
- ◆ Cell and tissue cultures
- ◆ Cell line
- ◆ Culture media
- ◆ Enzymes
- ◆ Hybridoma cells
- ◆ Microorganisms (bacteria, fungi, protozoans, and viruses)

- ◆ Monoclonal antibodies
- ◆ Reagents
- ◆ Tissue samples

Some biological products are highly perishable. Therefore, expedite an importation when you are authorized to release the importation. If you **cannot** release the HOLD, then allow the importer to apply dry ice or refrigerate the by-product.

When a VS permit **does not** authorize entry to the importation of organisms or vectors, use [Table 3-8-13](#) that directs you to the final regulatory action to take.

TABLE 3-8-13 Where to Find Regulatory Action on Organisms and Vectors Imported for Research or Biological Use

If the importation is:	Then:
Amphibians, fish, reptiles, shellfish	GO to Table 3-8-11
Canines (dogs) or felines (cats)	GO to Table 3-8-10
Cell and tissue cultures, hybridoma cells, recombinant and nonrecombinant cell lines, and their products	GO to Table 3-8-14
Live laboratory animals	GO to Table 3-8-7
Microorganisms (bacteria, fungi, protozoans, and viruses)	GO to Table 3-8-4
Monoclonal antibodies, ascitic fluid, and tissue culture supernatants	GO to Table 3-8-16
Test kits and kit components	GO to Table 3-8-17
Organisms and vectors not listed above	1. DO NOT RELEASE the HOLD 2. CONTACT PPQ-VRS-AQI or PPQ-VRS-HQ personnel for further action (see Appendix H)

Hybridoma Cells, Recombinant and Nonrecombinant Cell Lines, Cell and Tissue Cultures, and Their Products

Recombinant cell lines are those which have foreign genetic material inserted into their genetic material. The purpose is to produce many copies of a specific product, such as a human viral gene, in a system which is capable of replicating rapidly or expressing a desired protein. Some examples of cell lines which are often recombinant are NSO, Chinese hamster ovary (CHO), human stromal cell line containing genes for SV40, and mouse embryonic stem cell line transfected with human 2 virus gene.

Nonrecombinant cell lines have **not** had their genetic material manipulated. Many of the recombinant cell lines can also be nonrecombinant. CHO, NSO, COS-1, *Spodoptera frugiperda* (SF9), and mouse embryonic stem cells (HM1) are sometimes non-recombinant.

Some biological products are highly perishable. Therefore, expedite an importation when you are authorized to release the importation. If you **cannot** release the hold, allow the importer to apply dry ice or refrigerate the by-product.

When a VS permit **does not** authorize entry to the importation the following products, then use [Table 3-8-14](#) that directs you to the final regulatory action to take:

- ◆ Ascitic fluid
- ◆ Cell and tissue cultures
- ◆ Cell lines
- ◆ Hybridoma cells
- ◆ Monoclonal antibodies
- ◆ Tissue culture supernatant

TABLE 3-8-14 Hybridoma Cells, Recombinant and Nonrecombinant Cell Lines, Cell and Tissue Cultures, and Their Products

If the importation is:	And is of:	And is for:	Then:
Cell lines	<ul style="list-style-type: none"> ◆ Avian origin ◆ Equine origin ◆ Ruminant origin ◆ Swine origin 	In vivo use or in vitro use	<ol style="list-style-type: none"> 1. PROVIDE the importer with the appropriate options including applying for a VS permit issued by VS, TTSPS (see Table 2-4-16)

1 A declaration which provides, in a clear and concise manner, the following information:

- ◆ Identifies the material as a monoclonal antibody
- ◆ Identifies the name of the immunogen
- ◆ States the antibodies are for in vitro use, or if applicable, in vivo use in humans
- ◆ States that the material **did not** originate from a facility where work with exotic viruses affecting livestock and avian species is conducted
- ◆ States that the material is **not** recombinant, or if recombinant, states that the material contains **no** genes and expresses **no** products of exotic livestock or poultry disease agents

Reagents

Reagents are used to detect the presence of substances by the chemical reactions or biological activity they cause. Reagents may be of animal origin or chemically synthesized and are usually imported for biological use. Reagents of animal origin can be regulated under different animal by-products. Some of these are monoclonal antibodies, bovine serum albumin, ruminant and porcine enzymes, collagen, heparin, rabbit antibodies, and cholesterol. When a VS permit **does not** authorize entry to the importation of the reagent, use the index to find the specific reagent and see that page.

Test Kits and Kit Components

Test kits manufactured to diagnose human conditions (e.g., diseases, metabolic imbalances, pregnancy, etc.) or for general laboratory uses unrelated to the diagnosis of human conditions (e.g., DNA sequencing) **do not** require a VS permit, regardless of any animal-derived component in the kits. These test kits **must** be prepackaged, labeled, and ready for use.

Individual kit components that are packaged for final use (e.g., vials of bovine enzyme, goat antiserum, albumin) **do not** require a VS permit.

What does require a VS permit are animal-derived kit components that are imported in bulk (e.g., drum of powdered bovine enzyme) and are **not** packaged for final use.

Test kits which are manufactured to diagnose animal diseases require APHIS Form 2006, United States Veterinary Biological Product Permit. This permit is issued by the Center of Veterinary Biologics. See [Processing Importations Authorized Entry by a VS Permit](#) on page 2-4-30 for processing animal products and by-products imported under permit. See [Table 3-8-17](#) that directs you to the final regulatory action to take.

TABLE 3-8-17 Test Kits and Kit Components

If:	And is:	And is for:	And the importation:	Then:

¹ A declaration which provides, in a clear and concise manner, the following information:

- ◆ Test kits and/or kit components are **not** intended to diagnose infectious animal diseases
- ◆ Test kits and/or kit components are prepackaged and ready for use

Semen, Ova, and Embryos

Semen is live animal sperm. Ova are live animal eggs. Embryos are live, fertilized eggs. Semen, ova, and embryos are imported either for reproductive (i.e. breeding), or research purposes.

Some biological products are highly perishable. Therefore, expedite an importation when you are authorized to release the importation. If you **cannot** release the hold, allow the importer to apply dry ice or refrigerate the by-product.

When a VS permit **does not** authorize entry for the importation of equine semen, use **Table 3-8-18**; for semen other than from equine, use **Table 3-8-19**; and for ova, or embryos, use **Table 3-8-20** which directs you to the final regulatory action to take.

Semen Originating from Canada

TABLE 3-8-18 Semen Originating from Canada

Meat and Meat Products

Contents

Introduction [page 3-9-1](#)

Locator [page 3-9-3](#)

Returned U.S. Origin Meat or Meat Products [page 3-9-5](#)

Returned U.S. Meat or Meat Products from Countries Free from Diseases of Concern
[page 3-9-6](#)

Introduction

The *Meat and Meat Products* section covers meat and meat products of animals and poultry. Included are the following examples:

- ◆ Edible meat and meat products, and meat by-products¹ of ruminant, swine, and poultry
- ◆ Meat of horse
- ◆ Products containing meat such as soup mixes, stocks, extracts, pâtés
- ◆ Organs and glands imported for human consumption

This section does **not** cover animal products such as casings, pet food, feed, or organs and glands imported for purposes **other than** eating; refer to other categories in the *Reference* sections, [Casings](#), [Pet Food, and Livestock, Poultry, and Aquaculture Feed](#), or [Organs](#).

A quick reference guide to the entry requirements of meat and meat product importations in passenger baggage and the mail can be found in [Appendix A](#). Using either the *Reference* section or [Appendix A](#) will result in the same regulatory action to take for meat in passenger baggage. Use **only** the *Reference* section for **commercial** importations.

All importations of meat and meat products, regardless of their amount or purpose, **must** meet APHIS entry requirements. Importations of meat and meat products imported for human consumption also are regulated by FSIS.

Importations which meet **all** the following criteria are exempt from FSIS requirements:

¹ Meat by-products (formerly called edible offal) include beef feet, brain, cheeks, heart, hog stomach, kidney, lips, liver, lung, spleen, tails, thymus (sweetbread), tongue, and tripe.

- ◆ Weigh 50 pounds or less
- ◆ For importer's personal consumption
- ◆ Accompanied by adequate proof of origin²

Advise Customs that an importation **must** be cleared by FSIS when a commercial importation of meat or meat products imported for human consumption weighs over 50 pounds. For meat and poultry products also regulated by FSIS, the **original** meat certificate is to be provided to FSIS, and a **copy** of the original is to be given to CBP.

As a reminder, the following abbreviations are used to describe the disease status categories:

- ◆ **ASF**—African swine fever
- ◆ **BSE**—bovine spongiform encephalopathy
- ◆ **CSF**—classical swine fever (also known as hog cholera)
- ◆ **CSF/SR**—classical swine fever with special requirements to apply
- ◆ **END**—exotic Newcastle disease
- ◆ **END/SR**—exotic Newcastle disease with special requirements to apply
- ◆ **FMD**—foot-and-mouth disease
- ◆ **FMD/SR**—foot-and-mouth disease free with special requirements to apply
- ◆ **RP**—rinderpest
- ◆ **SVD**—swine vesicular disease
- ◆ **SVD/SR**—swine vesicular disease free with special requirements to apply

When a VS permit authorizes entry of meat or meat products, match the following information on the shipping documents with that on the permit:

- ◆ Current date
- ◆ Description of the material
- ◆ Shipper
- ◆ Consignee
- ◆ Conditions spelled out on the permit

² Documentary evidence of where an animal product comes from. Examples includes meat inspection certificate, certificate of origin, bill of lading, invoice, label, and document on official letterhead prepared by the manufacturer, shipper, or seller.

Follow [Table 3-9-1](#) as you match the permit with the shipping documents.

TABLE 3-9-1 Validate Importation Authorized Entry by a VS Permit

If the shipping documents:	And the:	Then:
Match the permit	—————→	RELEASE or CONTROL as specified on the permit
Do not match the permit	Permit has expired	<ol style="list-style-type: none"> DO NOT RELEASE the HOLD HAVE the consignee contact VS, TTSPS (see Table 2-4-15 on page 2-4-24) SAFEGUARD the importation until you hear from VS, TTSPS
	Discrepancy is other than an expired permit	<ol style="list-style-type: none"> DO NOT RELEASE the HOLD CONTACT PPQ-VRS-AQI or PPQ-VRS-HQ personnel for further action (see Appendix H)

Locator

When a VS permit does **not** authorize entry, use [Table 3-9-2](#) which directs you to the final regulatory action to take.

TABLE 3-9-2 Where to Find the Regulatory Action on Meat and Meat Products

If the importation is:	And you determine that the mixes or bases contain: ¹	Then:
Foreign origin sauce mixes or instant noodle soup bases	Meat extract which has a powdery to granular appearance with no identifiable chunks or pieces of meat	GO to Table 3-9-3
	Identifiable chunks or pieces of meat	
	No meat extract or identifiable chunks or pieces of meat ²	RELEASE
	Unknown ingredients	CONTACT PPQ-VRS-AQI or PPQ-VRS-HQ personnel for further action (see Appendix H)
Foreign origin meat or meat products that are not in sauce mixes or soup bases	—————→	GO to Table 3-9-3
Returned U.S. meat or meat products including that of the U.S. military	—————→	GO to on page 3-9-4

- 1 Read the list of ingredients first. If inconclusive, contact the importer or the importer's agent for a list of ingredients.
- 2 Bouillon cubes, stock, dehydrated soup mixes, and extracts with an original manufacturer's label indicating that the product contains animal-origin ingredients, AND with additional labeling, applied with an adhesive (i.e., stick-on label), indicating that the product actually contains only artificial or no animal-origin ingredients, can be released if accompanied by a government of origin certificate stating that the ingredients or flavors are of non-animal origin (artificial).

TABLE 3-9-3 Where to Find Regulatory Action on Foreign Origin Commercial Importations of Meat and Meat Products

If the animal class of meat is from: ¹	Then:
Equine (Horse)	GO to <i>Foreign Meat and Meat Products, Equine</i> on page 3-10-1
Poultry	GO to <i>Foreign Origin Meat and Meat Products, Poultry</i> on page 3-11-1
Ruminant	GO to <i>Foreign Origin Meat and Meat Products, Ruminants</i> on page 3-12-1
Swine	GO to <i>Foreign Origin Meat and Meat Products, Swine</i> on page 3-13-1
An animal other than listed above and you know what the animal is (such as a fish, snake, monkey, hippopotamus, elephant)	RELEASE; not subject to APHIS agricultural requirements, but may be subject to other agency requirements
Unknown	<ol style="list-style-type: none"> 1. DETERMINE the country of origin 2. IDENTIFY the country of origin's disease status 3. FOLLOW the most restrictive requirements

- 1 Mixed Shipments—when a meat or meat product importation contains more than one class of animal, and is usually divided and packaged by entry documents and separate requirements would have to be met. If the importation is **not** divided, evaluate the packaging and determine the disease status of the country of origin. Then follow the most restrictive requirements.

Returned U.S. Origin Meat or Meat Products

Use [Table 3-9-4](#) for returned U.S.-origin, fresh (chilled or frozen) or cured, dried meat or meat products from ruminants, swine, or poultry.

TABLE 3-9-4 Returned U.S. Origin Meat or Meat Products

If the importation is returning from:	And the meat or meat products are:	Then:
U.S. military base or installation	Cooked, shelf stable (see Table 2-3-3)	RELEASE; ALLOW re-entry
	Other than cooked, shelf stable	GO TO Table 3-9-5
◆ Other than a U.S. military base or installation	Cooked, shelf stable	RELEASE; ALLOW re-entry
◆ Unmarked as from a U.S. military base or installation	Cured and dried or fresh (chilled or frozen)	GO TO Consignment Inspection for Required Conditions on page 3-9-5

TABLE 3-9-5 Returned U.S. Origin Perishable Meat or Meat Products from a U.S. Military Base or Installation

If the cartons are:	And:	Then:
Marked by the Defense Procurement Services Center (DPS.C) as a product of the U.S.A.	Cartons are unopened	RELEASE; ALLOW re-entry
	Cartons are opened	PROVIDE one of the following options allowing the meat products to be: <ul style="list-style-type: none"> ◆ Incinerated under APHIS supervision ◆ Transferred to another vessel or base ◆ Used as ship's stores
Not marked as described above	Meat or meat product is cooked, shelf stable	RELEASE; ALLOW re-entry
	Meat or meat product is fresh (chilled or frozen) or cured and dried	See Consignment Inspection for Required Conditions below

Consignment Inspection for Required Conditions

Check the consignment using a tailgate inspection (unless you have good reason to believe that there are unopened cartons in the rest of an individual container) to make sure the required conditions are met:

- ◆ If the product is returning from Canada, then the consignment is covered by FSIS Form 9135-3, Certificate for Export of Meat and Poultry Products
- ◆ If the product is returning from **other than** Canada, then the consignment is covered by FSIS Form 9060-5, Export Certificate

- ◆ Shipping documents match the information on either FSIS Form 9060-5, Export Certificate, or FSIS Form 9135-3, Certificate for Export of Meat and Poultry Products
- ◆ Boxes or cartons and their contents are as identified on the accompanying documentation
- ◆ Boxes or cartons are individually packed as originally shipped; **only** unopened boxes or cartons may be returned to the U.S.

Important

Boxes or cartons that were opened for inspection or sampling are **not** admissible.

- ◆ Boxes or cartons are marked to confirm that the consignment is of U.S. origin

Continue to [Table 3-9-6](#).

TABLE 3-9-6 Tailgate Inspection and Paperwork Analysis of U.S. Returned Meat

If your inspection reveals that containers are:	And:	Then:
Intact and unopened	The following conditions are met: <ul style="list-style-type: none"> ◆ Consignment is covered by FSIS Form 9060-5, Export Certificate or FSIS Form 9135-3, Certificate for Export of Meat and Poultry Products ◆ Information on the certificate matches information on the shipping documents 	RELEASE; ALLOW re-entry
	Either condition listed above is not met	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)
Opened or not intact		

Returned U.S. Meat or Meat Products from Countries Free from Diseases of Concern

Do as follows for returned U.S. origin fresh or frozen meat or meat products from ruminant, swine, or poultry from a country known to be free from diseases of concern or that are cured, dried meat or meat products:

- 1. Ask the consignee or the consignee's agent for the shipping documents and, if available, the corresponding FSIS Export Certificate, FSIS Form 9060-5.**
- 2. Inspect the shipment to see if the packages are closed, and look to see if the meat is intact and matches the accompanying documents.**

Foreign Meat and Meat Products, Equine

Contents

- Introduction and Subsidiary Locator [page 3-10-1](#)
Horse Meat from Argentina, Canada, New Zealand, and Paraguay [page 3-10-2](#)
Horse Meat from a Country Known to Be Free from FMD [page 3-10-5](#)
Identification Tests [page 3-10-6](#)

Introduction and Subsidiary Locator

The *Foreign Meat and Meat Products, Equine* section covers horse meat and horse meat products.

No specific regulations govern the importation of horse meat. Horses **do not** get BSE and FMD. However, unless horse meat can be differentiated from that of ruminants, then horse meat **cannot** enter U.S. commerce if the meat is from a country affected with BSE or FMD. When a VS permit does **not** authorize entry, continue to [Table 3-10-1](#) which directs you to the final regulatory action to take. Inspect the importation to determine if there is bone-in meat with hoof attached (the hoof is attached by natural attachments to each portion of the carcass).

TABLE 3-10-1 Regulatory Action on Meat and Meat Products of Horse

If there is:	And the country or region of export is:	And:	Then:
Hoof attached	_____	_____ →	REFER to FSIS
No hoof attached	Affected with BSE or FMD	Argentina or Paraguay	GO to Table 3-10-3
		Other than Argentina or Paraguay	<ul style="list-style-type: none"> ◆ REFUSE ENTRY ◆ PROVIDE the importer with the appropriate options including the option to have an identification test done (see Table 2-2-11)
	Minimal risk for BSE ¹ and Free from FMD	_____ →	GO to Table 3-10-4
	Free from BSE and FMD	_____ →	

1 Currently Canada is the **only** country designated at minimal risk for BSE.

Horse Meat from Argentina, Canada, New Zealand, and Paraguay

Argentina and Paraguay, which are known to be affected with FMD, are the **only** FMD-affected countries that have horse meat inspection systems approved by USDA for exporting edible (human or animal consumption) horse meat to the United States.

New Zealand, which is free from FMD and BSE, and Canada, which is free from FMD and at minimal risk for BSE, are also allowed to export horse meat to the United States. Canada and New Zealand require **only** a horse meat certificate.

Determine if the importation is accompanied by a USDA approved edible horse meat certificate; see [Figure 3-10-1](#) for an example.

OFFICIAL HORSE MEAT CERTIFICATE FOR HORSE MEAT FOOD PRODUCTS

Place: _____ Date: _____
(City) (Country)

The undersigned Official Medical Veterinary, CERTIFIES: That the horse meat and/or horse food products herein described were derived from horses which received ante mortem and post mortem veterinary inspection at the time of slaughter, and that such horse meat products are sound, healthful, wholesome, and otherwise fit for human consumption and have not been treated with, and do not contain any preservative, coloring matter, or other substance not permitted by the regulations governing the horse meat inspection of the U.S. Department of Agriculture, filed with me, and that said horse meat and horse meat food products have been handled only in a sanitary manner in this country.

Introduction and Subsidiary Locator

The *Foreign Origin Meat and Meat Products, Poultry* section covers carcasses of migratory and non-migratory game birds; cooked, smoked or cured, and fresh (chilled or frozen) meat and meat products of poultry and fowl; perishable poultry pate; and bouillon cubes and dry soup mixes containing pieces of poultry and fowl.

Never handle or break eggs outside of the package when those eggs are from Afghanistan, Albania, Azerbaijan, Bangladesh, Benin, Burkina Faso, Cambodia, Cameroon, China, Côte d'Ivoire (Ivory Coast), Czech Republic¹, Djibouti, Egypt, England¹, Germany¹, Ghana, Hungary¹, India, Indonesia, Iran, Israel, Japan, Jordan, Kazakhstan, Kuwait, Laos, Malaysia, Myanmar (Burma), Niger, Nigeria, Pakistan, Palestinian Autonomous Territories, Poland¹, Romania, Russia, Saudi Arabia, South Korea, Sudan, Sweden¹, Thailand, Togo, Turkey, Ukraine, or Vietnam. You risk contracting exotic strains of avian influenza. (Country listing will be updated as country status changes.)

- ¹ Regionalized country. **Only** VS-defined areas (VS restricted zone) are considered to be affected with HPAI (H5N1). The areas in regionalized countries NOT listed in the VS-restricted zone are considered free from HPAI (H5N1). The VS defined areas follow: Czech Republic (Kraj of Kralovehradecky and Pardubicky, District Usti nad Orliel), England (Suffolk and Norfolk Counties), Germany (Kreis of Bamberg, Kreis of Dobeln, Kreis of Havelland, Kreis of Erlangen-Hochstadt, Kreis of Jerichowerland, Kreis of Kitzingen, Kreis of Mecklenburg-Strelitz, Kreis of Muldentel, Kreis of Neustadt A.D. Aisch, Kreis of Oberhavel, Kreis of Ostprignitz-Ruppin, Kreis of Potsdam-Mittelmark, Kreis of Saalfeld-Rudolstadt, Kreis of Schwandorf, Kreis of Torgue-Oschatz, Kreis of Uckermark), Great Britain (Suffolk and Norfolk Counties), Hungary (Bacs-Kiskun, Csongrad Counties), Poland (voivodships of Warminsko-Mazurskie, Mazowiekie, and Kujawsko-Pomorskie only) and Sweden (Kalmar County). Contact your local PPQ-VRS-AQI Veterinarian or a PPQ-VRS-HQ Staff Veterinarian for current information on VS-defined areas for regionalized countries.

Unprocessed poultry or poultry products which originated from countries where HPAI (H5N1) is known to occur are **only** admissible for research, scientific, or educational purposes, and then **only** under a VS-issued permit.

Commercial poultry products NOT from the VS-defined zone for HPAI (H5N1) in a regionalized country must be accompanied by a government veterinary export health certificate that states that the avian meat, meat by-products, and other avian products in the shipment were handled in facilities that do not receive, store, slaughter, or process any avian products derived from birds that originated in or were processed in the VS-restricted zone.

Processed poultry or poultry products which originated from countries where HPAI (H5N1) is known to occur are **only** admissible under a VS-issued permit.

Bouillon cubes, stock, dehydrated soup mixes, and extracts with an original manufacturer's label indicating that the product contains animal-origin ingredients, AND with additional labeling, applied with an adhesive (i.e., stick-on label), indicating that the product actually contains only artificial or no animal-origin ingredients, can be released if accompanied by a government of origin certificate stating that the ingredients or flavors are of non-animal origin (artificial). If this government of origin certificate is not presented, then regulate using the table below.

TABLE 3-11-1 Action to Take for Poultry

And the country or region of export is:	And the importation is:	And is for:	And:	Then:		
<ul style="list-style-type: none"> ◆ Affected with HPAI (H5N1)^{1 and 2} ◆ Affected with HPAI (H5N1)^{1 and 2} in combination with END 	<p>Processed, such as:</p> <ul style="list-style-type: none"> ◆ Bouillon cubes³ ◆ Broth containing poultry ◆ Game birds ◆ Poultry extract ◆ Powdered chicken meat 	→	Is accompanied by a VS permit	RELEASE		
			Lacks a VS permit	REFUSE ENTRY		
		Unprocessed	Educational, research, or scientific purposes		Is accompanied by a VS permit	RELEASE
					Lacks a VS permit	REFUSE ENTRY
			Other than educational, research, or scientific purposes	→	REFUSE ENTRY	
		◆ Affected with END			→	GO to Table 3-11-2
◆ Free from HPAI (H5N1) and END			→	GO to Table 3-11-2		

- 1 In regionalized countries only VS-defined areas are considered to be affected with HPAI (H5N1). See [page 3-11-2](#) for a list of regionalized countries with HPAI (H5N1)-affected regions identified.
- 2 Commercial poultry shipments from regionalized countries must indicate the **region of origin**, to ensure that the poultry **does not** originate from an HPAI (H5N1)-affected area (VS-restricted zone) in the country. If the region of origin in the country **cannot** be determined, the shipment must be accompanied by a VS permit.
- 3 Bouillon cubes, stock, dehydrated soup mixes, and extracts with an original manufacturer's label indicating that the product contains animal-origin ingredients, AND with additional labeling, applied with an adhesive (i.e., stick-on label), indicating that the product actually contains only artificial or no animal-origin ingredients, can be released if accompanied by a government of origin certificate stating that the ingredients or flavors are of non-animal origin (artificial).

When a VS permit does **not** authorize entry, use the following table, **Table 3-11-2**, which directs you to the final regulatory action to take.

Bouillon cubes, stock, dehydrated soup mixes, and extracts with an original manufacturer's label indicating that the product contains animal-origin ingredients, AND with additional labeling, applied with an adhesive (i.e., stick-on label), indicating that the product actually contains only artificial or no animal-origin ingredients, can be released if accompanied by a government of origin certificate stating that the ingredients or flavors are of non-animal origin (artificial). If this government of origin certificate is not presented, then regulate using the table below.

TABLE 3-11-2 Where to Find the Final Regulatory Action to Take When VS Permit Does Not Authorize Entry (Countries Free from HPAI (H5N1))

If the importation is:	And the meat or meat products are:	And are:	Then:	
Carcass of a wild, free-flying game bird that has been hunted (usually shot, netted, or trapped)		→	GO to Table 3-11-3

2 Commercial poultry shipments from regionalized countries must indicate the **region of origin**, to ensure that the poultry **does not** originate from an HPAI (H5N1)-affected area (VS-restricted zone) in the country. If the region of origin in the country **cannot** be determined, the shipment must be accompanied by a VS permit.

- 3 In addition to the foreign meat inspection certificate required by 9CFR§327.4 (see [page G-1-50](#) through [page G-1-51](#)), the meat **must** be accompanied by a certificate issued by an official of the national government of the region of origin who is authorized to issue the foreign meat inspection certificate which states:
 - ◆ All bones were completely removed prior to cooking
 - ◆ The pork product was heated by **other than** a flash-heating method to an internal temperature of 156°F (69°C) throughout
- 4 In addition to the foreign meat inspection certificate required by 9CFR§327.4 (see [page G-1-50](#) through [page G-1-51](#)), the meat **must** be accompanied by a certificate issued by an official of the national government of the region of origin who is authorized to issue the foreign meat inspection certificate which states:
 - ◆ All bones were completely removed prior to cookingand also includes either **one** of the statements below (but **not** both):
 - ◆ The pork product received heat treatment in a commercially-accepted manner used for perishable canned pork products so that it reached an internal temperature of 156°F (69°C) throughout
 - OR
 - ◆ The pork received continual treatment in an oven for a minimum of 10 hours so that it reached an internal temperature of 56°F (69°C) throughout. The oven temperature started at a minimum of 62°C (143°F) and reached at least 85°C (185°F)
- 5 A certification from the government of origin stating that the product was thoroughly cooked to a minimum temperature of 161°F (72°C).

Perishable Poultry Pâté from a Country or Region of Origin Known to Be Free from HPAI (H5N1), and the Pâté Does Not Appear to Contain Pork or Pork Products

To determine the action to take on perishable poultry pâté from a country or region of origin known to be free from HPAI (H5N1), and the pâté **does not** appear to contain pork or pork products, see [Table 3-11-11](#).

TABLE 3-11-11 Pâté from a Country or Region of Origin Known to Be Free from HPAI (H5N1), but Does Not Appear to Contain Pork or Pork Products

If:	And the country or region of export is:	And the importation:	Then:
Perishable poultry pâté that does not appear to contain pork or pork products	Free from both HPAI (H5N1) ^{1 and 2} and END	—————→	REFER to FSIS
	Free from HPAI (H5N1) ^{1 and 2} , but affected with END	Is appropriately certified ³	REFER to FSIS
		Lacks certification ³	REFUSE ENTRY

- 1 In regionalized countries only VS-defined areas are considered to be affected with HPAI (H5N1). See [page 3-11-2](#) for a list of regionalized countries with HPAI (H5N1)-affected regions identified.
- 2 Commercial poultry shipments from regionalized countries must indicate the **region of origin**, to ensure that the poultry **does not** originate from an HPAI (H5N1)-affected area (VS-restricted zone) in the country. If the region of origin in the country **cannot** be determined, the shipment must be accompanied by a VS permit.
- 3 A certification from the government of origin stating that the product was thoroughly cooked to a minimum temperature of 161°F (72°C).

Bouillon Cubes, Broth Containing Poultry, Meat Extract, and Powdered Chicken Meat from a Country or Region of Origin Known to Be Free from HPAI (H5N1)

Important

Bouillon cubes, stock, dehydrated soup mixes, and extracts with an original manufacturer's label indicating that the product contains animal-origin ingredients, AND with additional labeling, applied with an adhesive (i.e., stick-on label), indicating that the product actually contains only artificial or no animal-origin ingredients, can be released if accompanied by a government of origin certificate stating that the ingredients or flavors are of non-animal origin (artificial). If this government of origin certificate is not presented, then regulate using the table below.

To determine the action to take on bouillon cubes of poultry origin, meat extract of poultry origin, and powdered chicken meat from a country or region of origin known to be free from HPAI (H5N1), see [Table 3-11-12](#).

TABLE 3-11-12 Bouillon Cubes of Poultry Origin, Broth Containing Poultry, Meat Extract of Poultry Origin, and Powdered Chicken Meat from a Country or Region of Origin Known to Be Free from HPAI (H5N1)

If:	And the country or region of export is:	And the importation:	Then:
◆ Bouillon cubes of poultry origin ¹	Free from both HPAI (H5N1 and END ^{2 and 3})	→	RELEASE
◆ Broth containing poultry ¹	Free from HPAI (H5N1), but affected with END ^{2 and 3}	Is accompanied by the appropriate certification ⁴	RELEASE
		Lacks certification ⁴	REFUSE ENTRY
◆ Meat extract of poultry origin ¹			
◆ Powdered chicken meat			

- 1 Bouillon cubes, stock, dehydrated soup mixes, and extracts with an original manufacturer's label indicating that the product contains animal-origin ingredients, AND with additional labeling, applied with an adhesive (i.e., stick-on label), indicating that the product actually contains only artificial or no animal-origin ingredients, can be released if accompanied by a government of origin certificate stating that the ingredients or flavors are of non-animal origin (artificial).
- 2 In regionalized countries only VS-defined areas are considered to be affected with HPAI (H5N1). See [page 3-11-2](#) for a list of regionalized countries with HPAI (H5N1)-affected regions identified.
- 3 Commercial poultry shipments from regionalized countries must indicate the **region of origin**, to ensure that the poultry **does not** originate from an HPAI (H5N1)-affected area (VS-restricted zone) in the country. If the region of origin in the country cannot be determined, the shipment must be accompanied by a VS permit.
- 4 A meat inspection certificate stating that the meat product has been concentrated by boiling or heated to a temperature of 212°F (100°C)

Dehydrated (Dry) Soup Mixes With Poultry Meat from a Country or Region of Origin Known to Be Free from HPAI (H5N1)

Determine if the importation of dehydrated (dry) soup mixes containing pieces of poultry meat is accompanied by government of origin certification stating that the product was heated to a minimum internal temperature of 161°F (72°C).

Certification validated by a government veterinarian in the country of origin is acceptable. If you are **not** satisfied with the accompanying documentation, contact PPQ, VRS.

TABLE 3-11-13 Dehydrated (Dry) Soup Mixes Containing Pieces and Chunks, and/or Fat of Poultry Meat from a Country or Region of Origin Known to Be Free from HPAI (H5N1)

If:	And the country or region of export is:	And the importation is:	And the importation:	Then:
Dehydrated soup mixes containing pieces and chunks, and/or fat of poultry meat	Free from HPAI (H5N1) ^{1 and 2} , but affected with END	From game birds	Is accompanied by the appropriate certification ³	RELEASE
			Lacks the certification ³	REFUSE ENTRY

Fresh (Chilled or Frozen) Meat or Meat Products of Poultry and Fowl from a Country or Region Known to Be Free from HPAI (H5N1) and Free from END

Determine if there is adequate proof of origin present for the importation of fresh (chilled or frozen) meat or meat products of poultry and fowl from a country or region known to be free from HPAI (H5N1) and Free from END.

EXAMPLE

The importation accompanied by an official meat inspection certificate or the packaging labels showing the country of origin would constitute adequate proof of origin.

Continue on to [Table 3-11-18](#).

TABLE 3-11-18 Fresh (Chilled or Frozen) Meat or Meat Products of Poultry and Fowl from a Country or region Known to Be Free from HPAI (H5N1) and END

If:	And the country or region of export is:	And there is:	And the importation:	And is:	Then:
Fresh (chilled or frozen) meat or meat products of poultry and fowl	Free from HPAI (H5N1) ^{1 and 2} and END	Adequate proof of origin ³	Did not transit a country known to be affected with END	From game birds	RELEASE
				From ratites (e.g., cassowary, emu, kiwi, ostrich, and rhea)	REFER to FSIS
				From other than game birds and ratites	REFER to FSIS
			Transited a country known to be affected with END	→	GO to Table 3-11-19
		No adequate proof of origin		→	REFUSE ENTRY

- 1 In regionalized countries only VS-defined areas are considered to be affected with HPAI (H5N1). See [page 3-11-2](#) for a list of regionalized countries with HPAI (H5N1)-affected regions identified.
- 2 Commercial poultry shipments from regionalized countries must indicate the **region of origin**, to ensure that the poultry **does not** originate from an HPAI (H5N1)-affected area (VS-restricted zone) in the country. If the region of origin in the country **cannot** be determined, the shipment must be accompanied by a VS permit.
- 3 Documentary evidence of the origin of the animal product. Examples includes meat inspection certificate, certificate of origin, bill of lading, invoice, label, and document on official letterhead prepared by the manufacturer, shipper, or seller.

Fresh Meat of Poultry from a Country or Region of Origin Known to Be Free from HPAI (H5N1) and END, but Transited a Country Known to Be Affected with END

Review the accompanying documents to verify that the importation of fresh meat of poultry from a country or region of origin known to be free from HPAI (H5N1) and END, which transited a country known to be affected with END met transiting requirements which are summarized below:

- ◆ Meat was sealed in the country of origin by an official of that country with serially-numbered seals
- ◆ Serial numbers of the seals are recorded on the accompanying documentation
- ◆ Seals are intact, and there is **no** evidence indicating that the seals were tampered with
- ◆ Meat matches what is described on the accompanying documentation

TABLE 3-11-19 Determine Status of Fresh Meat of Poultry from a Country of Origin Known to Be Free from HPAI (H5N1) and END, but Transited a Country Known to Be Affected with END

If:	And the country or region of export is:	And the importation transited a country known to be:	And the importation:	And is:	Then:

				From ratites (e.g., cassowary, emu, kiwi, ostrich, and rhea)	REFER to FSIS
				From other than game birds or ratites	REFER to FSIS
			Does not meet transiting requirements ³	→	REFUSE ENTRY

- 1 In regionalized countries only VS-defined areas are considered to be affected with HPAI (H5N1). See [page 3-11-2](#) for a list of regionalized countries with HPAI (H5N1)-affected regions identified.
- 2 Commercial poultry shipments from regionalized countries must indicate the **region of origin**, to ensure that the poultry **does not** originate from an HPAI (H5N1)-affected area (VS-restricted zone) in the country. If the region of origin in the country **cannot** be determined, the shipment must be accompanied by a VS permit.
- 3 Review of the accompanying documents verify the importation meets the following transiting requirements:
 - ◆ Meat was sealed in the country of origin by an official of that country with serially-numbered seals
 - ◆ Serial numbers of the seals are recorded on the accompanying documentation
 - ◆ Seals are intact, and there is no evidence indicating that the seals were tampered with
 - ◆ Meat matches what is described on the accompanying documentation

Fresh (Chilled or Frozen) Poultry from Argentina

To determine the action to take on importations of fresh (chilled or frozen) poultry from Argentina, see [Table 3-11-20](#)

TABLE 3-11-20 Fresh (Chilled or Frozen) Poultry from Argentina

IF:	And the country or region of origin is:	And the poultry was:	And the importation:	And the poultry is:	Then:
Fresh (chilled or frozen poultry)	Argentina	Processed in an APHIS-approved processing plant	Is appropriately certified ¹	From game birds	REFUSE ENTRY ²
				From ratites (e.g., cassowary, emu, kiwi, ostrich and rhea)	REFUSE ENTRY ²
				From other than game birds and ratites	REFUSE ENTRY ²
			Lacks certification ¹		REFUSE ENTRY ²

1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ The poultry meat or other poultry products are derived from poultry that meet all requirements of 9CFR§94.26 and that have been slaughtered in a region designated in 9CFR§94.6 as free of END at a federally inspected slaughter plant that is under the direct supervision of a full-time salaried veterinarian of the national Government of the exporting region and that is approved to export poultry meat and other poultry products to the United States in accordance with 9CFR§381.196.
- ◆ The poultry meat or other poultry products have not been in contact with poultry meat or other poultry products from any region where END is considered to exist.
- ◆ The poultry meat or other poultry products have not transited through a region where END is considered to exist unless moved directly through the region in a sealed means of conveyance with the seal intact upon arrival at the point of destination; and,
- ◆ If processed, the poultry meat or other poultry products were processed in a region designated in 9CFR§94.6 as free of END in a federally inspected processing plant that is under the direct supervision of a full-time salaried veterinarian of the national Government of the exporting region.

2 At the current time, there are no approved poultry processing plants in Argentina; therefore, refuse entry on all poultry shipments.

Introduction and Subsidiary Locator

The *Foreign Origin Meat or Meat Products, Ruminants* section covers beef extract, bone stock, bouillon cubes, dehydrated soup containing pieces and chunks of ruminant meat, and fresh, cooked, cured and dried meat of ruminants.

Ruminant meat and meat products from BSE-affected countries are **prohibited** entry.

Ruminant meat and meat products from a country designated at minimal risk for BSE are **restricted**.

Regulations provide the authority to regulate specific products such as fresh (chilled or frozen) meat, cured and dried meat, and cooked meat from affected foreign countries. Policy has been established to control other products that are imported which may pose a risk to U.S. agriculture.

When a VS permit does **not** authorize entry, use [Table 3-12-1](#) which directs you to the final regulatory action to take.

Bouillon cubes, stock, dehydrated soup mixes, and extracts with an original manufacturer's label indicating that the product contains animal-origin ingredients, AND with additional labeling, applied with an adhesive (i.e., stick-on label), indicating that the product actually contains only artificial or no animal-origin ingredients, can be released if accompanied by a government of origin certificate stating that the ingredients or flavors are of non-animal origin (artificial). If this government of origin certificate is not presented, then regulate using the table below.

TABLE 3-12-1 Where to Find Regulatory Action on Ruminant Meat and Meat Products

If the importation is:	And the country or region of export is:	And:	Then:
Beef bone stock ¹	→	→	GO to Table 3-12-2
Beef extract ¹			
Bouillon cubes ¹			
Cooked meat, perishable	→		GO to Table 3-12-10
Cooked, shelf-stable meat (in hermetically-sealed cans or flexible, retorted pouches)	Affected with BSE	→	REFUSE ENTRY

	Ovine (sheep)		GO to Table 3-12-7
Cured and dried meat	→		GO to Table 3-12-17

TABLE 3-12-1 Where to Find Regulatory Action on Ruminant Meat and Meat Products (continued)

If the importation is:	And the country or region of export is:	And:	Then:
Dehydrated soup mixes containing pieces and chunks of meat		Flavored with beef extract or bone stock	GO to Table 3-12-2
		Containing pieces of meat	GO to Table 3-12-3
Edible tallow (rendered fat; i.e., from heart, lips, beef feet, etc.) ⁴	Affected with BSE		REFUSE ENTRY
	Minimal risk for BSE ²	Is accompanied by CFIA Annex A-3	REFER to FSIS
		Lacks CFIA Annex A-3	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the option of obtaining appropriate certification 3. If the importer is unable to obtain the appropriate certification, PROVIDE the appropriate options (see Table 2-2-11)
	Free from BSE	Is accompanied by a certificate of origin	REFER to FSIS
Lacks the required certificate of origin		REFUSE ENTRY	
Fresh (chilled or frozen) meat		GO to Table 3-12-21	
Meat by-products (formerly called edible offal); includes beef feet, brain, cheeks, heart, kidney, lips, liver, lung, spleen, tail, thymus (sweetbread), tongue, and tripe	Affected with BSE		REFUSE ENTRY
	Minimal risk for BSE ²		REGULATE as meat and run through the first column of this table (cooked, shelf-stable, fresh, cured and dried, etc.)
	Free from BSE	Is accompanied by a certificate of origin	REGULATE as meat and run through the first column of this table (cooked, shelf-stable, fresh, cured and dried, etc.)
Lacks the required certificate of origin		REFUSE ENTRY	
Suet or products containing suet		GO to Table 3-12-8	

- 1 Bouillon cubes, stock, dehydrated soup mixes, and extracts with an original manufacturer's label indicating that the product contains animal-origin ingredients, AND with additional labeling, applied with an adhesive (i.e., stick-on label), indicating that the product actually contains only artificial or no animal-origin ingredients, can be released if accompanied by a government of origin certificate stating that the ingredients or flavors are of non-animal origin (artificial).
- 2 Currently Canada is the **only** country designated at minimal risk for BSE.
- 3 Determine shelf stability in cargo just as you would in baggage; see [Table 2-3-3](#).
- 4 Edible tallow listed as an ingredient in a food product ready for human consumption, and food products cooked in tallow (such as french fries and hash browns) are allowed unrestricted entry.

Beef/Goat/Sheep Extract and Bone Stock; Bouillon Cubes or Dehydrated Soup Mix Flavored With Beef Extract or Bone Stock

Bouillon cubes, stock, dehydrated soup mixes, and extracts with an original manufacturer's label indicating that the product contains animal-origin ingredients, AND with additional labeling, applied with an adhesive (i.e., stick-on label), indicating that the product actually contains only artificial or no animal-origin ingredients, can be released if accompanied by a government of origin certificate stating that the ingredients or flavors are of non-animal origin (artificial). If this government of origin certificate is not presented, then regulate using the table below.

TABLE 3-12-2 Beef/Goat/Sheep Extract, Beef/Goat Bone Stock, and Bouillon Cubes or Dehydrated Soup Mix Flavored With Beef/Goat/Sheep Extract or Bone Stock

If the meat product is:	And the country or region of export is:	And the importation:	Then:	
<ul style="list-style-type: none"> ◆ Beef, goat, or sheep extract¹ ◆ Beef, goat, or sheep bone stock¹ ◆ Bouillon cubes or dehydrated soup mixes flavored with beef, goat, sheep extract or beef bone stock¹ 	Affected with BSE or BSE in combination with FMD	→	REFUSE ENTRY	
	Minimal risk for BSE ²	Is accompanied by CFIA Annex A-1		RELEASE
		Lacks the required CFIA Annex A-1		1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the option of obtaining the appropriate certification 3. If the importer is unable to obtain the certification, PROVIDE with the appropriate options (see Table 2-2-11)
		Is accompanied by CFIA Annex A-4		RELEASE
		Lacks the required CFIA Annex A-4		1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the option of obtaining the appropriate certification 3. If the importer is unable to obtain the certification, PROVIDE with the appropriate options (see Table 2-2-11)
	Affected with FMD, but not BSE	Is accompanied by a meat inspection certificate ³		RELEASE
		Lacks the meat inspection certification ³		REFUSE ENTRY
	Free from both BSE and FMD		→	RELEASE
	Free from BSE and FMD, but FMD/SR		→	RELEASE

- 1 Bouillon cubes, stock, dehydrated soup mixes, and extracts with an original manufacturer's label indicating that the product contains animal-origin ingredients, AND with additional labeling, applied with an adhesive (i.e., stick-on label), indicating that the product actually contains only artificial or no animal-origin ingredients, can be released if accompanied by a government of origin certificate stating that the ingredients or flavors are of non-animal origin (artificial).
- 2 Currently Canada is the **only** country designated at minimal risk for BSE.
- 3 A meat inspection certificate declaring that:
 - ◆ The meat product was concentrated by boiling, and
 - ◆ The meat product has not been associated, in any way, with any BSE affected region listed in 9 CFR 94.18(a)(1) and 94.18(a)(2)

Dehydrated Soup Mixes Containing Pieces of Ruminant Meat

To regulate dehydrated soup mixes that contain pieces of bovine meat, see [Table 3-12-3](#). To regulate dehydrated soup mixes that contain pieces of caprine or ovine meat, see [Table 3-12-4](#).

Dehydrated Soup Mixes Containing Pieces of Bovine Meat

Currently Canada is the **only** country designated at minimal risk for BSE.

TABLE 3-12-3 Dehydrated Soup Mixes Containing Pieces of Bovine Meat

If:	And the country or region of export is:	And the meat source is:	And:	Then:
Dehydrated soup mix containing pieces of bovine meat	Affected with BSE or BSE in combination with FMD	→		REFUSE ENTRY

			◆ Bison ◆ Buffalo ◆ Yak	→

1 Currently Canada is the **only** country designated at minimal risk for BSE.

2 A meat inspection certificate declaring that:

- ◆ All meat is free of bones
- ◆ All meat has been cooked to a minimum internal temperature of 175°F (79.4°C)
- ◆ The meat product has not been associated, in any way, with any BSE affected region listed in 9 CFR 94.18(a)(1) and 94.18(a)(2)

Dehydrated Soup Mixes Containing Pieces of Caprine or Ovine Meat

To regulate dehydrated soup mixes that contain pieces of caprine (goat) or ovine (sheep) meat, use [Table 3-12-4](#).

TABLE 3-12-4 Dehydrated Soup Mixes Containing Pieces of Caprine or Ovine Meat

If:	And the country or region of export is:	And:	Then:
Dehydrated soup mix containing pieces of caprine (goat) or ovine (sheep) meat	Affected with BSE or BSE in combination with FMD	→	REFUSE ENTRY
	Minimal risk for BSE ¹	Is accompanied by CFIA Annex A-2	RELEASE
		Lacks the required CFIA Annex A-2	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the option of obtaining the appropriate certification 3. If the importer is unable to obtain the appropriate certification, PROVIDE with the appropriate options (see Table 2-2-11)
	Affected with FMD only	Is accompanied by the appropriate certification ²	RELEASE
		Lacks certification ²	REFUSE ENTRY
Free from BSE and FMD	→	RELEASE	

1 Currently Canada is the **only** country designated at minimal risk for BSE.

2 A government of origin certificate declaring that:

- ◆ All meat is free of bones
- ◆ All meat was heated to a minimum internal temperature of 175° F (79.4°C), AND
- ◆ The meat product has not been associated, in any way, with any BSE affected region listed in 9 CFR 94.18(a)(1) and 94.18(a)(2)

Shelf Stable Meat in Hermetically Sealed Cans or Retorted, Flexible Pouches

To process shelf-stable beef in retorted, flexible pouches, the meat is typically first heated in a kettle, then poured or pumped into a flexible pouch. Next, the product undergoes an additional cooking step; a retort (a larger version of the stove-top pressure cooker) cooks the product in the flexible pouch under pressure and allows the temperature to exceed 212° F. During this retort process, the container is sterilized along with the product.

To regulate shelf-stable beef in hermetically sealed cans, see [Table 3-12-5 on page 3-12-11](#). To regulate shelf-stable beef in retorted, flexible pouches, see [Table 3-12-6 on page 3-12-13](#).

To regulate shelf-stable caprine (goat) and ovine (sheep) meat in cans or retorted, flexible pouches, see [Table 3-12-7 on page 3-12-16](#).

Shelf-Stable Beef in Hermetically Sealed Cans

To determine how to regulate shelf-stable beef in hermetically sealed cans, see [Table 3-12-5](#).

TABLE 3-12-5 Shelf-Stable Beef in Hermetically Sealed Cans

If the ruminant meat is:	And the country or region of export is:	And is arriving from:	And:	And:	Then:	
Shelf-stable beef in hermetically sealed cans	Affected with BSE only	—————→			REFUSE ENTRY

Free from BSE and FMD				→	REFER to FSIS

1 Currently Canada is the **only** country designated at minimal risk for BSE.

2 A government certificate from Brazil declaring:

- ◆ All bones have been completely removed in the region of origin
- ◆ This product was hermetically sealed and then cooked via a true retort process to insure a commercially sterile, shelf-stable product
- ◆ The ruminant products being exported are obtained from:

(1) Animals that were born and raised in Brazil and were: (a) born after July 3, 1996 when the ruminant-to-ruminant feed ban was decreed and (b) exclusively grass fed and **not** fed any animal proteins

or

(2) Animals that were born outside Brazil in countries **not** considered by USDA to be affected with bovine spongiform encephalopathy (BSE) or having a significant risk of BSE according to 9CFR §94.18 and were slaughtered in Brazil

or

(3) Animals that were born, raised, and slaughtered outside of Brazil in countries **not** considered by USDA to be affected with bovine spongiform encephalopathy (BSE) or having a significant risk of BSE according to 9CFR §94.18

3 A government certificate declaring:

- ◆ All bones have been completely removed in the region of origin
- ◆ This product was hermetically sealed and then cooked via a true retort process to insure a commercially sterile, shelf-stable product

Shelf-Stable Caprine and Ovine Meat in Hermetically Sealed Cans or Retorted, Flexible Pouches

To determine how to regulate shelf-stable ovine (sheep) and caprine (goat) meat in hermetically sealed cans or retorted, flexible pouches, see [Table 3-12-7](#).

TABLE 3-12-7 Shelf-Stable Caprine and Ovine Meat in Hermetically Sealed Cans or Retorted, Flexible Pouches

If the ruminant meat is:	And the country or region of export is:	And is arriving from:	And:	And:	Then:	
Shelf-stable caprine (goat) or ovine (sheep) meat in hermetically sealed cans or retorted, flexible pouches	Affected with BSE only	—————→			REFUSE ENTRY	
	Affected with BSE in combination with FMD	—————→			REFUSE ENTRY

			Is in flexible, retorted pouches	Is accompanied by a meat inspection certificate ²	REFER to FSIS	
				Lacks the meat inspection certificate ²	REFUSE ENTRY	
		Other than Brazil	Is in hermetically-sealed cans	—————→		REFER to FSIS
			Is in flexible, retorted packages	Is accompanied by a meat inspection certificate ³	REFER to FSIS	
				Lacks the meat inspection certificate ³	REFUSE ENTRY	
Free of BSE and FMD	—————→			REFER to FSIS		

1 Currently Canada is the **only** country designated at minimal risk for BSE.

- 2 A government certificate from Brazil that states the following:
- ◆ All bones have been completely removed in the country of origin; **or** all bones have been completely removed in Brazil (one statement or the other, but **not** both)
 - ◆ This product was hermetically sealed and then cooked via a true retort process to ensure a commercially sterile, shelf-stable product
 - ◆ The ruminant products being imported into the United States were obtained from **one** of the three options below (one statement **only**):
 - ※ Animals that were born and raised in Brazil and were (a) born after July 3, 1996 when the ruminant-to-ruminant feed ban was decreed; and (b) exclusively grass fed and **not** feed any animal proteins
 - Or**
 - ※ Animals that were born outside Brazil in countries **not** considered by USDA to be affected with bovine spongiform encephalopathy (BSE) or having a significant risk of BSE according to 9CFR§94.18 and were slaughtered in Brazil
 - Or**
 - ※ Animals that were born, raised, and slaughtered outside of Brazil in countries not considered by USDA to be affected with bovine spongiform encephalopathy (BSE) or having a significant risk of BSE according to 9CFR§94.18
- 3 A government certificate declaring:
- ◆ All bones have been completely removed in the country of origin
 - ◆ This product was hermetically sealed and then cooked via a true retort process to ensure a commercially sterile, shelf-stable product

Suet or Products Containing Suet

Suet is derived from cattle and sheep (ovine) **only**. Products which have suet as an ingredient include various puddings (Christmas, holiday, plum, or Yorkshire puddings), and fruit duff.

If suet or product containing suet is derived from bovine cattle, then see [Table 3-12-8](#). If suet or products containing suet are derived from ovine (sheep), then see [Table 3-12-9 on page 3-12-19](#).

Suet or Products Containing Suet Derived from Bovine Cattle

TABLE 3-12-8 Suet or Products Containing Suet Derived from Bovine Cattle

If the suet or product is from:	And the country or region of export is:	And the level of risk for BSE is:	And the importation:	Then:	
Bovine cattle	<ul style="list-style-type: none"> ◆ Affected with BSE ◆ Affected with BSE in combination with FMD 	Unassigned	→	REFUSE ENTRY

		Cooked ovine meat	Sheep	Is accompanied by CFIA Annex A-2	REFER to FSIS	
				Lacks the required CFIA Annex A-2	REFUSE ENTRY	

¹ Currently Canada is the **only** country designated at minimal risk for BSE.

Cooked Meat of Ruminants from a Country Known to Be Free from BSE and FMD, but FMD/SR

Review the accompanying documents to verify that a meat inspection certificate is present with the statements cited in 9CFR 94.11(c)(1)-(4) which are summarized as follows:

- ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in a region listed in §94.1(a) as a region affected with rinderpest or foot-and-mouth disease
- ◆ The slaughtering establishment is **not** permitted to receive meat or other animal products derived from ruminants or swine which originated in such a FMD affected region, or meat or other animal products from a FMD free region transported through a FMD affected region except in a container sealed with serially-numbered seals of the national government of the non-affected region of origin
- ◆ The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed in §94.1(a)(2) as free of FMD and the meat or other animal product has **never** been in any region in which FMD existed
- ◆ The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that **do not** comply with the conditions in the certificate

Continue to [Table 3-12-12](#)

TABLE 3-12-12 Cooked Meat of Ruminants from a Country Known to Be Free from BSE and FMD, but FMD/SR

If:	And the country or region of export is:	And the importation is:	And the certificate:	Then:
Cooked meat of ruminants	Free from BSE and FMD, but FMD/SR	Is accompanied by a meat inspection certificate	Has the required certification [9CFR 94.11(c)(1)-(4)]	REFER to FSIS
			Lacks the required certification	REFUSE ENTRY
		Not accompanied by a meat inspection certificate		

Cooked Meat of Ruminants from a Country Known to Be Affected with Only FMD

The following determinations are for boneless, cooked, frozen meat.

Step 1: Insure Movement to APHIS Approved Defrost Facility

Insure movement of meat to an approved defrost facility as follows:

- ◆ Port of arrival **must** be equipped with APHIS approved rapid defrost facilities; see [Figure 3-12-1 on page 3-12-24](#) for a list of ports equipped with rapid defrost facilities which are approved by APHIS
- ◆ Meat **must** be consigned to one of the defrost facilities listed for the port of arrival (where off-loaded from the carrier)
- ◆ Meat **cannot** be transported over land from one port to another; see if the port of arrival and defrost facilities are listed in [Figure 3-12-1](#)

Not all FSIS approved facilities are APHIS approved rapid defrost facilities.

Continue on to [Table 3-12-13 on page 3-12-29](#)

List of APHIS-FSIS Approved Rapid Defrost Facilities and FSIS Approved Pink Juice Test Facilities

Some (but **not** all) of the APHIS-FSIS approved rapid defrost facilities are also FSIS approved pink juice test facilities. The facilities which are approved to conduct the pink juice test are identified in [Figure 3-12-1](#).

FIGURE 3-12-1 List of Approved Rapid Defrost Facilities (continued)

**Step 2: Verify
the Port of
Arrival Is
Equipped With
Approved
Defrost
Facilities**

Important

Importations of cooked, frozen beef (including sample importations) aboard a vessel or aircraft may transit a U.S. port for offloading and inspection at another U.S. port (which becomes the port of arrival) **only** if the importation remains aboard the vessel or aircraft at the first U.S. port.

TABLE 3-12-13 Verify That the Port of Arrival Is Equipped With Approved Defrost Facilities

If the port of arrival:	Then:
Is listed in Figure 3-12-1 as equipped with APHIS approved rapid defrost facilities	CONTINUE in this section
Is not listed in Figure 3-12-1	<ol style="list-style-type: none"> DO NOT RELEASE the HOLD CONTACT PPQ-VRS-AQI or PPQ-VRS-HQ personnel for further action (see Appendix H)

**Step 3:
Determine if
Meat Is from a
Foreign
Establishment
Approved for
Cooked Beef**

To determine if the importation is from a foreign establishment approved for cooked beef, see [Figure 3-12-2](#). Then continue to [Table 3-12-14](#) on [page 3-12-31](#).

List of Foreign Establishments APHIS Approved for Perishable Cooked Beef

Country	Establishment Number	Establishment Name and Location
Argentina	13	Swift-Armour S.A.A., Rosario, Santa Fe
	1311	Friar, S.A., Santa Fe City, Santa Fe
	1399	Rafaela Alimentos, S.A. I.C., Casilda, Santa Fe
	1920	Frigorífico Rioplatense, Avda de los Constituyentes 2801, General

	SF 2979	Friboi LTDA (Arapuntanga) Av. Hamilton Simioni s/n, Araputanga, MT
Uruguay	2 ²	Establecimientos Colonia S.A., Ruta 22, Tarariras, Colonia ³
	8	Frigorífico Canelones S.A., Calle Pando, Canelones

FIGURE 3-12-2 List of Foreign Establishments APHIS Approved for Perishable Cooked Beef

- 1 Number changed; formerly SIF 736.
- 2 Meat cooked in Establishment #2 is shipped from Establishment #8. Continue on to [Table 3-12-3](#). The foreign establishment should be identified in the additional certification on the meat inspection certificate stated in [Table 3-12-14](#).

Cooked Meat of Ruminants from a Country Known to Be Affected With FMD Only

TABLE 3-12-14 Cooked Meat of Ruminants from a Country Known to Be Affected With FMD Only

If:	And the country or region of export is:	And:	And is:	And the certificate:	And is:	Then:
Cooked meat of ruminants	Affected with FMD only	Is accompanied by a meat inspection certificate	Identified as an IQF product (cooked in plastic tubes)	→		GO to Table 3-12-15
				Has the required certification 9CFR 94.4(b)(1)-(2) and the additional certification ¹	From a foreign establishment approved for cooked beef	1. COMPLETE a USDA-PPQ-FSIS Notification for Perishable Cooked Ruminant or Cooked Swine Meat from Restricted Countries ² Sheet
		2. AUTHORIZE movement to the defrost facility ³ at the port where the meat is off-loaded (never authorize shipment of the meat to a defrost facility at another port)				
		Lacks the required certification	→		3. DO NOT complete VS Form 16-78 since the product is not moving to another port	
→			REFUSE ENTRY			

1 A government of origin certificate that declares the following:

- ◆ All bones have been completely removed in the country of origin
- ◆ The meat has been thoroughly cooked in the country of origin

And the certificate **must** additionally state the following:

- ◆ The beef covered by this certificate was thoroughly cooked throughout *[name and establishment number of approved plant]* under the conditions approved by the meat inspection service of *[country of origin]* to prevent contact with uncooked products
- 2 Send this FSIS Notification Sheet by courier to the FSIS defrost facility. Attach a copy of the notification sheet to the import documents and keep the documents on file for 5 years from the date of arrival of the shipment.
- 3 If the facility is **not** located within the port boundaries, then ensure that the container is sealed prior to movement. **Do not** complete Form 16-78.

Cooked Meat of Ruminants Identified as an IQF Product from a Country Known to Be Affected Only With FMD

To regulate cooked meat of ruminants identified as an IQF product (cooked in a plastic tube) from a country known to be affected with FMD only, see [Table 3-12-15](#).

Action to Take Based on Results of the Pink Juice Test

TABLE 3-12-15 Cooked Meat of Ruminants Identified as an IQF Product from a Country Known to Be Affected Only With FMD

If:	And the country or region of export is:	And the product:	And is:	Then:
Cooked meat of ruminants identified as an IQF product	Affected with FMD only	Has the required certification 9CFR 94.4(b) and the additional certification ¹	From a foreign establishment approved for cooked beef	<ol style="list-style-type: none"> 1. COMPLETE a USDA-PPQ-FSIS Notification for Perishable Cooked Ruminant or Cooked Swine Meat from Restricted Countries² Sheet 2. AUTHORIZE movement to the defrost facility³ at the port where the meat is off-loaded (never authorize shipment of the meat to a defrost facility at another port) 3. DO NOT complete VS Form 16-78 since the product is not moving to another port
			Not from an approved foreign establishment approved for cooked beef	REFUSE ENTRY
		Lacks the required certification		

1 A government of origin certificate that declares the following:

This cooked meat produced for export to the United States meets the requirements of Title 9, Code of Federal Regulations, Sec. 94.4(b)

No more than two tubes were randomly selected per batch per cooker for cutting an indicator piece or obtaining a piece containing a TID. The indicator piece or piece containing a TID represents a shipment of *[describe form of processed product, e.g., diced cubes of a particular size]*. A piece containing a TID or a piece 3.8 cm (1.5 in) or larger in each dimension was cut from the cold spot of the tube, and was sealed and marked with the following cooking date, cooker, and batch: *[cooking date]* and the following date of selection of the tube *[date the tube was selected]*. The total number of indicator pieces or pieces containing TID's enclosed in a sealed box is *[number]*

2 Send this FSIS Notification Sheet by courier to the FSIS defrost facility. Attach a copy of the notification sheet to the import documents and keep the documents on file for 5 years from the date of arrival of the shipment.

3 If the facility is **not** located within the port boundaries, then ensure that the container is sealed prior to movement. **Do not** complete Form 16-78.

Use **Table 3-12-16** to determine the action to take based on the results of the pink juice test.

TABLE 3-12-16 Regulatory Action to Take Based on Pink Juice Test Results

If FSIS notifies you that the product:	Then:
Contains pink juices	REFUSE ENTRY
Does not contain any pink juices	RELEASE

Cured and Dried Meat of Ruminants

TABLE 3-12-17 Cured and Dried Meat of Ruminants

If:	And the country or region of export is:	And the country of origin is known to be:	And:	Then:	
Cured and dried meat of ruminants ¹	Affected with BSE only	—————→		GO to Table 3-12-18	
	Minimal risk for BSE ²	Minimal risk for BSE	—————→	GO to Table 3-12-18

	Camelid		—————→	RELEASE; unrestricted
	Cervid (caribou, deer, elk, moose, reindeer)	—————→	RELEASE; unrestricted	

¹ For example, bresaola from Italy or bunderfleisch from Switzerland.

- 1 No processing is allowed in BSE-affected countries.
- 2 Currently Canada is the **only** country designated at minimal risk for BSE.

Cured and Dried Meat of Ruminants from a Country Known to Be Free from BSE and FMD, but FMD/SR

The requirements cited in 9CFR 94.4(a)(1)-(4) were established for processed meat from a country of origin known to be affected with FMD. However, cured and dried meat from a country of origin known to be free from FMD/SR may be certified as being processed according to these requirements and would be allowed entry. For details of the requirements cited in 9CFR 94.4(a)(1)-(4), go to *Cured and Dried Meat of Ruminants from a Country of Origin Known to Be Affected With Only FMD* on page 3-12-38.

Otherwise, review the accompanying documents to verify that a meat inspection certificate is present with the statements cited in 9CFR 94.11(c)(1)-(4) which are summarized as follows:

- ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in, or have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in, a region listed in §94.1(a) as a region affected with rinderpest or FMD
- ◆ The slaughtering establishment is **not** permitted to receive meat or other animal products derived from ruminants or swine which originated in such a FMD affected region, or meat or other animal products from a FMD free region transported through a FMD affected region except in a container sealed with serially-numbered seals of the national government of the non-affected region of origin
- ◆ The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed in §94.1(a)(2) as free of FMD and the meat or other animal product has **never** been in any region in which FMD existed
- ◆ The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that **do not** comply with the conditions in the certificate

Continue on to [Table 3-12-19](#).

TABLE 3-12-19 Cured and Dried Meat of Ruminants from a Country Known to Be Free from BSE and FMD, but FMD/SR

If:	And the country or region of export is:	If the importation is:	And the certificate:	Then:
Cured and dried meat of ruminants	Free from BSE and FMD	Is accompanied by a meat inspection certificate	Has the required certification 9CFR 94.11(c)(1)-(4)	REFER to FSIS
		Not accompanied by a meat inspection certificate	Lacks the required certification	REFUSE ENTRY
			→	

Cured and Dried Meat of Ruminants from a Country of Origin Known to Be Affected With Only FMD

Determine if a foreign meat inspection certificate is present for cured and dried meat of ruminants from a country of origin known to be affected with **only** FMD. This certificate **must** accompany the importation and **must** have been issued by an authorized official of the national government of the country of origin as cited in 9CFR 94.4(a)(4).

The certificate **must** state that the meat has been processed according to the conditions cited in 9CFR 94.4(a)(1)-(3) which are summarized below.

- ◆ All bones were completely removed in the country of origin
- ◆ The meat was held in an unfrozen, fresh condition for at least 3 days immediately following the slaughter of the animals from which it was derived
- ◆ The meat was thoroughly cured and fully dried to the extent that the product is shelf stable **without** refrigeration
- ◆ The meat was dried to the extent that the water-to-protein ratio in the wet-test portion of the product **does not** exceed 2.25 to 1

Continue to [Table 3-12-20](#).

TABLE 3-12-20 Cured and Dried Meat of Ruminants from a Country Known to Be Affected with Only FMD

If:	And the country or region of export is:	And the importation is:	And the certificate:	Then:
Cured and dried meat of ruminants	Affected with FMD only	Accompanied by a meat inspection certificate	Has the required certification ¹	REFER to FSIS
			Lacks the required certification	REFUSE ENTRY
		Not accompanied by a meat inspection certificate	→	

1 A foreign meat inspection certificate issued by an authorized official of the national government of the country of origin as cited in 9CFR 94.4(a)(4). The certificate **must** state that the meat has been processed according to the conditions cited in 9CFR 94.4(a)(1)-(3) which are summarized below:

- ◆ All bones were completely removed in the country of origin
- ◆ The meat was held in an unfrozen, fresh condition for at least 3 days immediately following the slaughter of the animals from which it was derived
- ◆ The meat was thoroughly cured and fully dried to the extent that the product is shelf stable **without** refrigeration
- ◆ The meat was dried to the extent that the water-to-protein ratio in the wet-test portion of the product **does not** exceed 2.25 to 1

Fresh (Chilled or Frozen) Meat of Ruminants

		Affected with FMD	—————→		Is unassigned risk level	REFUSE ENTRY
					Is negligible risk level ⁴	GO to Table 3-12-27

1 Accompanied by an official Japanese Meat Inspection Certificate that certifies to the following conditions:

- ◆ The beef was derived from cattle that were born, raised, and slaughtered in Japan
- ◆ The beef was prepared in an establishment that is eligible to have its products imported to the United States under the Federal Meat Inspection Act (21 USC 601 esq) and the regulations of 9CFR§327.2 and the beef met all other applicable requirements of the Federal Meat Inspection Act and regulations thereunder (9CFR, chapter III). This includes provisions that specified-risk materials (SRMs) must be removed under appropriate conditions and also prohibits the use of air-injection stunning devices
- ◆ The beef must be derived from cattle that are not subjected to a pithing process at slaughter

The mitigation measures must be certified on an original certificate issued by an authorized veterinary official of the Japanese government. The original certificate is to be provided to FSIS; whereas a copy of the original will be provided to CBP.

2 Because Japan is classified as an FMD-SR (special restrictions) region, the certificate will also need to include the following:

- ◆ The meat or other meat products covered by this certificate was derived from animals which have been slaughtered at the under mentioned establishment [*slaughter establishment name and establishment number*]
- ◆ The slaughtering establishment is not permitted to receive animals that originate in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in a country listed in the regulations of USDA as a county affected with rinderpest or FMD
- ◆ The slaughtering establishment is not permitted to receive meat or other animal products derived from ruminants or swine which originate in such rinderpest or FMD disease affected country or meat or other animal products from a rinderpest or FMD-free country, transported through a rinderpest or FMD-affected country except in containers sealed with serially numbered seals of the National Government of the non-affected country of origin
- ◆ The meat or other animal product covered by this certificate was derived from animals born and raised in Japan and the meat or other animal product has never been in any country listed in the regulation of USDA as a country affected with rinderpest or FMD
- ◆ The meat or other animal product has been processed, stored and transported to the ship or flight described in this certificate in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that do not comply with the conditions contained in this certificate

3 Currently Canada is the **only** country designated at minimal risk for BSE.

4 Currently **only** Uruguay is at negligible risk for foot-and-mouth disease (FMD).

Fresh Meat of Ruminants from a Country Known to Be Free from BSE and FMD

Determine if adequate proof of origin is present for fresh meat of ruminants from a country known to be free from BSE and FMD. For example, the importation is accompanied by an official meat inspection certificate, or the packaging labels show the country of origin.

TABLE 3-12-22 Fresh Meat of Ruminants from a Country Known to Be Free from BSE and FMD

If:	And the country or region of export is:	And there is:	And the importation:	And the meat is:	Then:
Fresh meat of ruminants	Free from both BSE and FMD	Adequate proof of origin ¹	Did not transit a country known to be affected with FMD	<ul style="list-style-type: none"> ◆ Cattle ◆ Goats ◆ Sheep 	REFER to FSIS
				Other than listed in the cell immediately above	RELEASE
			Transited a country known to be affected with FMD	→	GO to Table 3-12-23
		No adequate proof of origin	Is a commercial importation	→	REFUSE ENTRY

¹ Documentary evidence of where an animal product comes from. Examples includes meat inspection certificate, certificate of origin, bill of lading, invoice, label, and document on official letterhead prepared by the manufacturer, shipper, or seller.

Fresh Meat of Ruminants from a Country Known to Be Free from BSE and FMD Which Transited a Country Known to Be Affected with FMD

Review the accompanying documents to verify that a meat inspection certificate is present for fresh meat of ruminants from a country known to be free from BSE and FMD which transited a country known to be affected with FMD. Determine if the importation met the transiting requirements cited in 9CFR§94.1(d)(2)-(5) which are summarized as follows:

- ◆ The meat is placed in the transporting carrier in a hold or compartment which was sealed in the country of origin by an official of that country with serially-numbered seals approved by APHIS²
- ◆ The serial numbers of the seals used to seal the hold or compartment of the transporting carrier are recorded on the foreign meat inspection certificate which accompanies the meat
- ◆ Upon arrival of the carrier in the U.S. port of arrival, you find the seals intact, and there is **no** evidence that the seals were tampered with
- ◆ You find the meat to be as represented on the foreign meat inspection certificate

Continue on to [Table 3-12-23](#).

TABLE 3-12-23 Fresh Meat of Ruminants from a Country of Origin Known to Be Free from BSE and FMD Which Transited a Country Known to Be Affected with FMD

If:	And the country or region of export is:	And the meat:	And the transiting requirements are:	Then:
Fresh meat of ruminants	Free from both BSE and FMD	Transited a country known to be affected with FMD	Met	REFER to FSIS
			Not met	REFUSE ENTRY

If the importation is break-bulk cargo, then all seals **must** be checked at the first port of arrival.

² Sealing prevents contact of the meat with any other cargo, prevents handling of the meat after the hold or compartment is sealed, and prevents the loading of any cargo into and the removal of any cargo from the sealed hold or compartment while en route to the United States.

Fresh Meat of Ruminants from a Country Known to Be Free from BSE and FMD, but FMD/SR

For fresh meat of ruminants from a country known to be free from BSE and FMD, but FMD/SR, review the accompanying documents to verify that a meat inspection certificate is present with the statements cited in 9CFR 94.11(c)(1)-(4) which are summarized as follows:

- ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in, or have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in a region listed in §94.1(a) as a region affected with rinderpest or FMD
- ◆ The slaughtering establishment is **not** permitted to receive meat or other animal products derived from ruminants or swine which originated in such a FMD affected region, or meat or other animal products from a FMD free region transported through a FMD affected region except in a container sealed with serially-numbered seals of the national government of the non-affected region of origin
- ◆ The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed in §94.1(a)(2) as free of FMD and the meat or other animal product has **never** been in any region in which FMD existed
- ◆ The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that **do not** comply with the conditions in the certificate

See [Table 3-12-24](#).

TABLE 3-12-24 Fresh Meat of Ruminants from a Country Known to Be Free from BSE and FMD, but FMD/SR

If:	And the country or region of export is:	If the importation is:	And the certificate:	Then:
Fresh meat of ruminants	Free from both BSE and FMD, but is FMD/SR	Is accompanied by a meat inspection certificate	Has the required certification [9CFR 94.11)(c)(1)-(4)]	GO to Table 3-12-25
			Lacks the required certification	REFUSE ENTRY
		Not accompanied by a meat inspection certificate	→	

TABLE 3-12-25 Fresh Meat of Ruminants from a Country Known to Be Free from BSE and FMD, but FMD/SR with the Required Certification (9CFR 94.11(c)(1)-(4))

If:	And the country or region of export is:	And the importation:	Then:
Fresh meat of ruminants	Free from BSE and FMD, but is FMD/SR	Did not transit a country known to be affected with FMD	REFER to FSIS
		Transited a country known to be affected with FMD	1. REVIEW the meat inspection certificate to determine if the importation met the transiting requirements cited in 9CFR 94.1(c)(2)-(5) which are summarized below 2. CONTINUE on to Table 3-12-26

A summary of the transiting requirements cited in 9CFR 94.1(c)(2)-(5) follows:

- ◆ The meat is placed in the transporting carrier in a hold or compartment which was sealed in the country of origin by an official of that country with serially-numbered seals approved by APHIS³
- ◆ The serial numbers of the seals used to seal the hold or compartment of the transporting carrier are recorded on the foreign meat inspection certificate which accompanies the meat
- ◆ Upon arrival of the carrier in the U.S. port of arrival, you find the seals intact, and there is **no** evidence indicating that the seals were tampered with
- ◆ You find the meat to be as represented on the foreign meat inspection certificate

³ Sealing prevents contact of the meat with any other cargo, prevents handling of the meat after the hold or compartment is sealed, and prevents the loading of any cargo into and the removal of any cargo from the sealed hold or compartment while en route to the United States.

TABLE 3-12-26 Verify Transiting Requirements of Fresh Meat of Ruminant from a Country Known to Be Free from BSE and FMD, but FMD/SR and Meeting Certification Requirements

If:	And the country or region of export is:	And you verify that the transiting requirements are:	Then:
Fresh meat of ruminant	Free from BSE and FMD, but is FMD/SR and meets certification requirements	Met	AUTHORIZE to transit
		Not met	REFUSE ENTRY

Important

If the importation is break-bulk cargo, then all seals **must** be checked at the first port of arrival.

Fresh or Cooked Beef of Ruminant from a Country Known to Be Free from BSE, but at Negligible Risk for FMD

Currently **only** Uruguay is at negligible risk for foot-and-mouth disease (FMD).

TABLE 3-12-27 Fresh or Cooked Beef from a Country Known to Be Free from BSE, but at Negligible Risk for FMD

If:	And the country or region of export is:	And the beef:	And:	And:	Then:
Fresh beef or cooked beef	Free from BSE, but a negligible risk for FMD ¹	Is accompanied by a meat inspection certificate ^{2 and 3}	Transited a country known to be affected with FMD	Meets the transit requirements ⁴	REFER to FSIS
				Does not meet the transit requirements ⁴	REFUSE ENTRY
			Did not transit a country known to be affected with FMD	→	REFER to FSIS
		Lacks the appropriate meat inspection certificate ^{2 and 3}	→	REFUSE ENTRY	

1 Currently Uruguay is the **only** country considered to be at negligible risk for FMD.

2 A meat inspection certificate signed by a veterinary official of the Government of Uruguay that certifies the following:

- ◆ The meat is beef from bovines that have been born, raised, and slaughtered in Uruguay
- ◆ Foot-and-mouth disease has **not** been diagnosed in Uruguay within the previous 12 months
- ◆ The beef came from bovines that originated from premises where foot-and-mouth disease has **not** been present during the lifetime of any bovines slaughtered for export of beef to the United States
- ◆ The beef came from bovines that were moved directly from the premises of origin to the slaughtering establishment **without** any contact with other animals
- ◆ The beef came from bovines that received ante-mortem and post-mortem veterinary inspections, paying particular attention to the head and feet at the slaughtering establishment, with **no** evidence found of vesicular disease
- ◆ The beef consists **only** of bovine parts that are by standard practice, part of the animal's carcass that is placed in a chiller for maturation after slaughter. Bovine parts that may **not** be imported include all parts of bovine heads, feet, hump, hooves, and internal organs
- ◆ All bone and visually identifiable blood clots and lymphoid tissue have been removed from the beef
- ◆ The beef came from bovine carcasses that were allowed to mature at 40° to 50° F (4° to 10° C) for a minimum of 36 hours after slaughter and that reached a pH of 5.8 or less in the loin muscle at the end of the maturation period. Measurements for pH **must** be taken at the middle of both longissimus dorsi muscles. Any carcass in which the pH **does not** reach 5.8 or less may be allowed to mature an additional 24 hours and be retested, and if the carcass still has **not** reached a pH of 5.8 or less after 60 hours, the meat from the carcass may **not** be exported to the United States

3 The fresh beef inspection certificate from Uruguay may also be used for cooked beef products from Uruguay. If arriving with the fresh beef certificate, cooked beef from Uruguay **does not** require a pink juice test.

4 If during shipment to the United States, the meat enters a port or otherwise transits a region where FMD exists, then the meat may be imported provided that **all** of the following conditions are met:

- ◆ The meat is placed in the transporting carrier in a hold, compartment, or if the meat is containerized in a container that was sealed in the region of origin by an official of such region, with serially-numbered seals approved by APHIS
- ◆ The serial numbers of the seals used to seal the hold, compartment, or container are recorded on the foreign meat inspection certificate which accompanies the meat
- ◆ Upon arrival of the carrier in the United States port of arrival, the seals are found by an APHIS representative to be intact, and the representative finds that there is **no** evidence indicating that any seal has been tampered with
- ◆ The meat is found by an authorized inspector to be as represented on the foreign meat inspection certificate

Introduction and Subsidiary Locator

The *Foreign Origin Meat and Meat Products, Swine* section covers cooked, cured and dried, and fresh (chilled or frozen) swine meat and meat products, including bouillon cubes, lard, meat extract, dehydrated and dry soup mix, cooked skins or rinds, and perishable pork pâté, and meat by-products¹ (swine feet, brain, cheeks, heart, hog stomach, kidney, lips, liver, lung, spleen, tail, thymus (sweetbread), tongue, and tripe).

Regulations provide the authority to regulate specific products such as fresh (chilled or frozen) meat, cured and dried meat, and cooked meat from disease affected foreign countries. Policy has been established to control other products that are imported which may pose a risk to U.S. agriculture.

When a VS permit **does not** authorize entry, use [Table 3-13-1](#) which directs you to the final regulatory action to take.

Currently the "APHIS-defined EU CSF region" is considered a single region of low risk for CSF. The APHIS-defined EU CSF region is comprised of the European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland).

¹ These meat by-products were formerly called edible offal.

Special Requirements (SR) Designation

A country or region known to be free from CSF, FMD, or SVD is considered to have special requirements (SR) when one or more of the following conditions apply:

- ◆ The region supplements its national meat supply by importing meat from countries affected with CSF, FMD, or SVD
- ◆ The region imports live ruminants or swine from affected countries under conditions less restrictive than would be accepted for importation into the United States
- ◆ The region borders an affected country

There exists a possibility that pork or pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may be commingled with pork or pork products from disease-affected regions, resulting in a risk of disease introduction into the United States. Therefore, pork or pork products from CSF/SR, FMD/SR, or SVD/SR countries or regions may **not** be imported into the United States unless certain requirements are met.

Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD.

For details of the requirements for the importation of pork or pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR, see the footnotes in the applicable pork and pork products tables addressing CSF/SR, FMD/SR, or SVD/SR.

In the *Foreign Origin Meat and Meat Products, Swine* section, you must regulate products for each disease status of the country or region of export to determine all the requirements that must be met before releasing the products. For example, if a country or region of export has two disease conditions (e.g. FMD and SVD/SR), you must check the tables for each disease designation. If you have questions, contact your local PPQ AQI VMO.

Bouillon cubes, stock, dehydrated soup mixes, and extracts with an original manufacturer's label indicating that the product contains animal-origin ingredients, AND with additional labeling, applied with an adhesive (i.e., stick-on label), indicating that the product actually contains only artificial or no animal-origin ingredients, can be released if accompanied by a government of origin certificate stating that the ingredients or flavors are of non-animal origin (artificial). If this government of origin certificate is not presented, then regulate using the table below.

TABLE 3-13-1 Swine Meat and Meat Products, and Meat By-products

If:	And the importation is:	And:	Then:	
<ul style="list-style-type: none"> ◆ Swine meat ◆ Swine meat products ◆ Swine meat by-products 	◆ Bouillon cubes ¹	→	GO to Table 3-13-2

		Lacks a certificate of origin ⁴		REFUSE ENTRY
Cooked, prepared food (such as carnitas, empanadas, sandwiches, tacos, or tamales) containing pork from Mexico and entering only at land border ports	→	GO to Table A-1-6		
Irish pork purchased at Dublin and Shannon Airports	→	GO to Table A-1-4		

- 1 Bouillon cubes, stock, dehydrated soup mixes, and extracts with an original manufacturer's label indicating that the product contains animal-origin ingredients, AND with additional labeling, applied with an adhesive (i.e., stick-on label), indicating that the product actually contains only artificial or no animal-origin ingredients, can be released if accompanied by a government of origin certificate stating that the ingredients or flavors are of non-animal origin (artificial).
- 2 Determine shelf stability in cargo just as you would in baggage. See [Table 2-3-3](#).
- 3 Formerly called edible offal.
- 4 A government of origin certificate declaring that the meat by-product was derived from swine from *[must state country or region]*.

Bouillon Cubes, Meat Extract of Swine Origin, and Dehydrated Soup Mixes Containing Swine Meat Extract

Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD.

Bouillon cubes, stock, dehydrated soup mixes, and extracts with an original manufacturer's label indicating that the product contains animal-origin ingredients, AND with additional labeling, applied with an adhesive (i.e., stick-on label), indicating that the product actually contains only artificial or no animal-origin ingredients, can be released if accompanied by a government of origin certificate stating that the ingredients or flavors are of non-animal origin (artificial). If this government of origin certificate is not presented, then regulate using the table below.

TABLE 3-13-2 Bouillon Cubes, Meat Extract of Swine Origin, and Dehydrated Soup Mixes Containing Swine Meat Extract

- 1 Bouillon cubes, stock, dehydrated soup mixes, and extracts with an original manufacturer's label indicating that the product contains animal-origin ingredients, AND with additional labeling, applied with an adhesive (i.e., stick-on label), indicating that the product actually contains only artificial or no animal-origin ingredients, can be released if accompanied by a government of origin certificate stating that the ingredients or flavors are of non-animal origin (artificial).
- 2 Certificate stating that the meat product has been concentrated by boiling or heated to a temperature of 212° F (100° C).
- 3 Currently the "APHIS-defined EU CSF region" is considered a single region of low risk for CSF. The APHIS-defined EU CSF region is comprised of the European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland).

- 4 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ The pork or pork products **must not** have been derived from swine that were in any of the following regions, unless the swine were slaughtered after the periods described:
Any region when the region was classified in 9CFR§94.9(a) and 9CFR§94.10(a) as one in which CSF is known to exist, **except** for the APHIS-defined EU CSF Region; OR a restricted zone in the APHIS-defined EU CSF region established because of detection of classical swine fever in domestic swine, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of the APHIS-defined EU CSF region Member State or until 6 months following depopulation of the swine on affected premises in the restricted zone and the cleaning and disinfection of the last affected premises in the zone, whichever is later; OR a restricted zone in the APHIS-defined EU CSF region established because of the detection of classical swine fever in wild boar, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of an APHIS-defined EU CSF region Member State
 - ◆ The pork or pork products **must not** have been commingled with pork or pork products derived from other swine that were in any of the regions or zones described 9CFR§94.24, unless the other swine were slaughtered after the periods described. Additionally, the pork and pork products **must not** have been derived from swine that were commingled with other swine that were in any of the regions or zones described in 9CFR§94.24, unless the swine from which the pork or pork products were derived were slaughtered after the periods described
 - ◆ The swine from which the pork or pork products were derived **must not** have transited any region or zone described in 9CFR§94.24, unless the swine were moved directly through the region or zone described in a sealed means of conveyance with the seal determined to be intact upon arrival at the point of destination, or unless the swine were slaughtered after the periods described
 - ◆ **No** equipment or materials used in transporting the swine from which the pork or pork products were derived from the farm of origin to the slaughtering establishment may have been used previously for transporting swine that do **not** meet the requirements of this section, unless the equipment and materials have first been cleaned and disinfected
- 5 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ The pork or pork products were derived from swine that were born and raised in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF and were slaughtered in such a region at a federally inspected slaughter plant that is under the direct supervision of full-time salaried veterinarian of the national government of that region and that is eligible to have its products imported into the United States under the Federal Meat Inspection Act (21 U.S.C. 601 et seq.) and the regulations in 9CFR§327.2
 - ◆ The pork or pork products were derived from swine that have not lived in a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
 - ◆ The pork or pork products have never been commingled with pork or pork products that have been in a region that is designated in 9CFR§94.9 and 9CFR§94.10
 - ◆ The pork or pork products have not transited through a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF unless moved directly through the region to their destination in a sealed means of conveyance with the seal intact upon arrival at the point of destination
 - ◆ If processed, the pork or pork products were processed in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF in a federally inspected processing plant that is under the direct supervision of a full-time salaried veterinary official of the national government of that region
- 6 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ The slaughtering establishment is not permitted to receive animals that originated in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in a region listed in §94.1(a) as a region affected with rinderpest or foot-and-mouth disease
 - ◆ The slaughtering establishment is not permitted to receive meat or other animal products derived from ruminants or swine which originated in such a rinderpest or foot-and-mouth disease-affected region, or meat or other animal products from a rinderpest and foot-and-mouth disease-free region transported through a rinderpest or foot-and-mouth disease-affected region, except in containers sealed with serially-numbered seals of the national government of the non-affected region of origin
 - ◆ The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed in §94.1(a)(2) as free of rinderpest and foot-and-mouth disease and the meat or other animal product has never been in any region in which rinderpest or foot-and-mouth disease existed
 - ◆ The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that do not comply with the conditions contained in this certificate

- 7 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ The slaughtering establishment is not permitted to receive animals that originated in, or have ever been in a region listed in 9CFR§ 94.12(a) as a region in which swine vesicular disease is considered to exist
 - ◆ The slaughtering establishment is not permitted to receive pork derived from swine which originated in such a region of pork from swine from a swine vesicular disease free region which has been transported through a region where swine vesicular disease is considered to exist, except pork which was transported in containers sealed with serially-numbered seals of the national government of a region of origin listed in 9CFR§94.12 as a region considered free of the disease
 - ◆ The pork has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner that precludes its being commingled or otherwise coming in contact with pork or pork products that have not been handled in accordance with the requirements of this section

Dehydrated (Dry) Soup Mixes Containing Swine Meat

Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD.

				Lacks certification ^{4 and 7}	REFUSE ENTRY
	SVD/SR	→	→	Is appropriately certified ^{5 or 8}	RELEASE
				Lacks certification ^{5 and 8}	REFUSE ENTRY

1 Currently the "APHIS-defined EU CSF region" is considered a single region of low risk for CSF. The APHIS-defined EU CSF region is comprised of the European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland).

2 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ The pork or pork products **must not** have been derived from swine that were in any of the following regions, unless the swine were slaughtered after the periods described:

Any region when the region was classified in 9CFR§94.9(a) and 9CFR§94.10(a) as one in which CSF is known to exist, **except** for the APHIS-defined EU CSF region; OR a restricted zone in the APHIS-defined EU CSF region established because of detection of classical swine fever in domestic swine, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of the APHIS-defined EU CSF region Member State or until 6 months following depopulation of the swine on affected premises in the restricted zone and the cleaning and disinfection of the last affected premises in the zone, whichever is later; OR a restricted zone in the APHIS-defined EU CSF region established because of the detection of classical swine fever in wild boar, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of an APHIS-defined EU CSF region Member State

- ◆ The pork or pork products **must not** have been commingled with pork or pork products derived from other swine that were in any of the regions or zones described 9CFR§94.24, unless the other swine were slaughtered after the periods described. Additionally, the pork and pork products **must not** have been derived from swine that were commingled with other swine that were in any of the regions or zones described in 9CFR§94.24, unless the swine from which the pork or pork products were derived were slaughtered after the periods described
- ◆ The swine from which the pork or pork products were derived **must not** have transited any region or zone described in 9CFR§94.24, unless the swine were moved directly through the region or zone described in a sealed means of conveyance with the seal determined to be intact upon arrival at the point of destination, or unless the swine were slaughtered after the periods described
- ◆ **No** equipment or materials used in transporting the swine from which the pork or pork products were derived from the farm of origin to the slaughtering establishment may have been used previously for transporting swine that do **not** meet the requirements of this section, unless the equipment and materials have first been cleaned and disinfected

3 A government of origin certificate declaring that:

- ◆ All meat is free of bones
- ◆ The meat was heated to a minimum internal temperature of 156° F (69° C)

4 A government of origin certificate declaring that:

- ◆ All meat is free of bones
- ◆ The meat was heated to a minimum internal temperature of 175° F (79.4° C)

- 5 A government of origin certificate declaring that:
- ◆ All meat is free of bones
 - ◆ The meat was heated to a minimum internal temperature of 166° F (75° C)
- 6 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ The pork or pork products were derived from swine that were born and raised in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF and were slaughtered in such a region at a federally inspected slaughter plant that is under the direct supervision of full-time salaried veterinarian of the national government of that region and that is eligible to have its products imported into the United States under the Federal Meat Inspection Act (21 U.S.C. 601 et seq.) and the regulations in 9CFR§327.2.
- ◆ The pork or pork products were derived from swine that have not lived in a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
- ◆ The pork or pork products have never been commingled with pork or pork products that have been in a region that is designated in 9CFR§94.9 and 9CFR§94.10
- ◆ The pork or pork products have not transited through a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF unless moved directly through the region to their destination in a sealed means of conveyance with the seal intact upon arrival at the point of destination
- ◆ If processed, the pork or pork products were processed in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF in a federally inspected processing plant that is under the direct supervision of a full-time salaried veterinary official of the national government of that region

- 7 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

The slaughtering establishment is not permitted to receive animals that originated in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in a region listed in §94.1(a) as a region affected with rinderpest or foot-and-mouth disease

The slaughtering establishment is not permitted to receive meat or other animal products derived from ruminants or swine which originated in such a rinderpest or foot-and-mouth disease-affected region, or meat or other animal products from a rinderpest and foot-and-mouth disease-free region transported through a rinderpest or foot-and-mouth disease-affected region, except in containers sealed with serially-numbered seals of the national government of the non-affected region of origin

The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed in §94.1(a)(2) as free of rinderpest and foot-and-mouth disease and the meat or other animal product has never been in any region in which rinderpest or foot-and-mouth disease existed

The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that do not comply with the conditions contained in this certificate

- 8 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

The slaughtering establishment is not permitted to receive animals that originated in, or have ever been in a region listed in 9CFR§ 94.12(a) as a region in which swine vesicular disease is considered to exist

The slaughtering establishment is not permitted to receive pork derived from swine which originated in such a region of pork from swine from a swine vesicular disease free region which has been transported through a region where swine vesicular disease is considered to exist, except pork which was transported in containers sealed with serially-numbered seals of the national government of a region of origin listed in 9CFR§94.12 as a region considered free of the disease

The pork has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner that precludes its being commingled or otherwise coming in contact with pork or pork products that have not been handled in accordance with the requirements of this section

Lard and Pork Fat

Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD..

TABLE 3-13-4 Lard (Rendered Fat) and Pork Fat

- 1 A government of origin certificate declaring that the lard was derived from swine from *[must state country or region]*
- 2 A government of origin certificate declaring that the fat was heated to a minimum internal temperature of 175° F (79.4° C).
- 3 Currently the "APHIS-defined EU CSF region" is considered a single region of low risk for CSF. The APHIS-defined EU CSF region is comprised of the European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland)

- 4 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ The pork or pork products **must not** have been derived from swine that were in any of the following regions, unless the swine were slaughtered after the periods described:

Any region when the region was classified in 9CFR§94.9(a) and 9CFR§94.10(a) as one in which CSF is known to exist, **except** for the APHIS-defined EU CSF region; OR a restricted zone in the APHIS-defined EU CSF region established because of detection of classical swine fever in domestic swine, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of the APHIS-defined EU CSF region Member State or until 6 months following depopulation of the swine on affected premises in the restricted zone and the cleaning and disinfection of the last affected premises in the zone, whichever is later; OR a restricted zone in the APHIS-defined EU CSF region established because of the detection of classical swine fever in wild boar, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of an APHIS-defined EU CSF region Member State

- ◆ The pork or pork products **must not** have been commingled with pork or pork products derived from other swine that were in any of the regions or zones described 9CFR§94.24, unless the other swine were slaughtered after the periods described. Additionally, the pork and pork products **must not** have been derived from swine that were commingled with other swine that were in any of the regions or zones described in 9CFR§94.24, unless the swine from which the pork or pork products were derived were slaughtered after the periods described
- ◆ The swine from which the pork or pork products were derived **must not** have transited any region or zone described in 9CFR§94.24, unless the swine were moved directly through the region or zone described in a sealed means of conveyance with the seal determined to be intact upon arrival at the point of destination, or unless the swine were slaughtered after the periods described
- ◆ **No** equipment or materials used in transporting the swine from which the pork or pork products were derived from the farm of origin to the slaughtering establishment may have been used previously for transporting swine that do **not** meet the requirements of this section, unless the equipment and materials have first been cleaned and disinfected

- 5 A government of origin certificate declaring that the fat was heated to a minimum internal temperature of 156° F (69° C).
- 6 A government of origin certificate declaring that the fat was heated to a minimum internal temperature of 166° F (75° C).
- 7 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ The pork or pork products were derived from swine that were born and raised in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF and were slaughtered in such a region at a federally inspected slaughter plant that is under the direct supervision of full-time salaried veterinarian of the national government of that region and that is eligible to have its products imported into the United States under the Federal Meat Inspection Act (21 U.S.C. 601 *et seq.*) and the regulations in 9CFR§327.2.
- ◆ The pork or pork products were derived from swine that have **not** lived in a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
- ◆ The pork or pork products have **never** been commingled with pork or pork products that have been in a region that is designated in 9CFR§94.9 and 9CFR§94.10
- ◆ The pork or pork products have **not** transited through a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF unless moved directly through the region to their destination in a sealed means of conveyance with the seal intact upon arrival at the point of destination
- ◆ If processed, the pork or pork products were processed in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF in a federally inspected processing plant that is under the direct supervision of a full-time salaried veterinary official of the national government of that region

- 8 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in a region listed in §94.1(a) as a region affected with rinderpest or foot-and-mouth disease
 - ◆ The slaughtering establishment is **not** permitted to receive meat or other animal products derived from ruminants or swine which originated in such a rinderpest or foot-and-mouth disease-affected region, or meat or other animal products from a rinderpest and foot-and-mouth disease-free region transported through a rinderpest or foot-and-mouth disease-affected region, **except** in containers sealed with serially-numbered seals of the national government of the non-affected region of origin
 - ◆ The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed in §94.1(a)(2) as free of rinderpest and foot-and-mouth disease and the meat or other animal product has **never** been in any region in which rinderpest or foot-and-mouth disease existed
 - ◆ The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that **do not** comply with the conditions contained in this certificate
- 9 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in a region listed in 9CFR§ 94.12(a) as a region in which swine vesicular disease is considered to exist
 - ◆ The slaughtering establishment is **not** permitted to receive pork derived from swine which originated in such a region of pork from swine from a swine vesicular disease free region which has been transported through a region where swine vesicular disease is considered to exist, except pork which was transported in containers sealed with serially-numbered seals of the national government of a region of origin listed in 9CFR§94.12 as a region considered free of the disease
 - ◆ The pork has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner that precludes its being commingled or otherwise coming in contact with pork or pork products that have **not** been handled in accordance with the requirements of this section

Pork Filled Pasta Products from Italy

Pasta products from Italy which are filled with dry-cured (for 400 days), cooked, or shelf-stable ham are admissible when accompanied by the appropriate official export health certificate and *Annex H, Health Warranties for Pork-filled Pasta Products* (see [Figure G-1-14](#)).

TABLE 3-13-5 Pork-filled Pasta Products from Italy

If the importation is:	And the importation is:	And:	Then:
Pasta products filled with dry-cured, cooked, or shelf-stable pork	From an approved establishment (See Figure 3-13-1 on page-3-13-16)	Is appropriately certified ¹	REFER to FSIS
		Lacks certification	REFUSE ENTRY
	Not from an approved establishment		REFUSE ENTRY

¹ In addition to an Official Italian Health Certificate for Meat Products (see [Figure G-1-42](#)), the product must be accompanied by Italian Health Warranty Annex H (see [Figure G-1-14](#))

Establishment Number	Establishment Name and Address

- 1 Currently the "APHIS-defined EU CSF region" is considered a single region of low risk for CSF. The APHIS-defined EU CSF region is comprised of the European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland)
- 2 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The pork or pork products **must not** have been derived from swine that were in any of the following regions, unless the swine were slaughtered after the periods described:
 - ◆ Any region when the region was classified in 9CFR§94.9(a) and 9CFR§94.10(a) as one in which CSF is known to exist, **except** for the APHIS-defined EU CSF region; OR a restricted zone in the APHIS-defined EU CSF region established because of detection of classical swine fever in domestic swine, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of the APHIS-defined EU CSF region Member State or until 6 months following depopulation of the swine on affected premises in the restricted zone and the cleaning and disinfection of the last affected premises in the zone, whichever is later; OR a restricted zone in the APHIS-defined EU CSF region established because of the detection of classical swine fever in wild boar, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of an APHIS-defined EU CSF region Member State
 - ◆ The pork or pork products **must not** have been commingled with pork or pork products derived from other swine that were in any of the regions or zones described 9CFR§94.24, unless the other swine were slaughtered after the periods described. Additionally, the pork and pork products **must not** have been derived from swine that were commingled with other swine that were in any of the regions or zones described in 9CFR§94.24, unless the swine from which the pork or pork products were derived were slaughtered after the periods described
 - ◆ The swine from which the pork or pork products were derived **must not** have transited any region or zone described in 9CFR§94.24, unless the swine were moved directly through the region or zone described in a sealed means of conveyance with the seal determined to be intact upon arrival at the point of destination, or unless the swine were slaughtered after the periods described
 - ◆ **No** equipment or materials used in transporting the swine from which the pork or pork products were derived from the farm of origin to the slaughtering establishment may have been used previously for transporting swine that do **not** meet the requirements of this section, unless the equipment and materials have first been cleaned and disinfected
- 3 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ All bones were completely removed prior to cooking; and,
 - ◆ The pork or pork product was heated by other than a flash-heating method to an internal temperature of 156° F (69° C) throughout

- 4 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ The pork or pork products were derived from swine that were born and raised in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF and were slaughtered in such a region at a federally inspected slaughter plant that is under the direct supervision of a full-time salaried veterinarian of the national government of that region and that is eligible to have its products imported into the United States under the Federal Meat Inspection Act (21 U.S.C. 601 et seq.) and the regulations in 9CFR§327.2.
 - ◆ The pork or pork products were derived from swine that have not lived in a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
 - ◆ The pork or pork products have never been commingled with pork or pork that have been in a region that is designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
 - ◆ The pork or pork products have not transited through a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF unless moved directly through the region to their destination in a sealed means of conveyance with the seal intact upon arrival at the point of destination
 - ◆ If processed, the pork or pork products were processed in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF in a federally inspected processing plant that is under the direct supervision of a full-time salaried veterinary official of the national government of that region
- 5 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states either:
- ◆ All bones were completely removed prior to cooking; and,
 - ◆ The pork or pork product received heat treatment in a commercially accepted manner used for perishable canned pork products so that it reached an internal temperature of 69° C. (156° F.) throughout
- OR
- ◆ All bones were completely removed prior to cooking; and,
 - ◆ The pork or pork product received continual heat treatment in an oven for a minimum of 10 hours so that it reached an internal temperature of 149° F (65° C) throughout. The oven temperature started at a minimum of 143° F (62° C) and reached at least 185° F (85° C)
- 6 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- The slaughtering establishment is not permitted to receive animals that originated in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in a region listed in §94.1(a) as a region affected with rinderpest or foot-and-mouth disease
- The slaughtering establishment is not permitted to receive meat or other animal products derived from ruminants or swine which originated in such a rinderpest or foot-and-mouth disease-affected region, or meat or other animal products from a rinderpest and foot-and-mouth disease-free region transported through a rinderpest or foot-and-mouth disease-affected region, except in containers sealed with serially-numbered seals of the national government of the non-affected region of origin
- The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed in §94.1(a)(2) as free of rinderpest and foot-and-mouth disease and the meat or other animal product has never been in any region in which rinderpest or foot-and-mouth disease existed
- The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that do not comply with the conditions contained in this certificate
- 7 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ The slaughtering establishment is not permitted to receive animals that originated in, or have ever been in a region listed in 9CFR§ 94.12(a) as a region in which swine vesicular disease is considered to exist
 - ◆ The slaughtering establishment is not permitted to receive pork derived from swine which originated in such a region of pork from swine from a swine vesicular disease free region which has been transported through a region where swine vesicular disease is considered to exist, except pork which was transported in containers sealed with serially-numbered seals of the national government of a region of origin listed in 9CFR§94.12 as a region considered free of the disease
 - ◆ The pork has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner that precludes its being commingled or otherwise coming in contact with pork or pork products that have not been handled in accordance with the requirements of this section

Pork Skins or Rinds

Cooked pork skins or rinds (called chicharrones in Spanish) are admissible if these products originate from countries free of swine diseases.

TABLE 3-13-7 Pork Skins or Rinds

If the importation is:	And the country or region of export is:	And is:	And the importation:	Then:
<ul style="list-style-type: none"> ◆ Pork skins ◆ Pork rinds 	Free from ASF, CSF, FMD, and SVD	—————→		REFER to FSIS

- 1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The pork or pork products were derived from swine that were born and raised in a region designated in 9CFR§94.9 and §94.10 as free of CSF, and were slaughtered in such a region at a federally-inspected slaughter plant that is under the direct supervision of a full-time salaried veterinarian of the national government of that region, and that is eligible to have its products imported into the United States under the Federal Meat Inspection Act
 - ◆ The pork or pork products were derived from swine that have **not** lived in a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
 - ◆ The pork or pork products have **never** been commingled with pork or pork products that have been in a region that is designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
 - ◆ The pork or pork products have **not** transited through a region designated in §94.9 and §94.10 as affected with CSF, unless moved directly through the region to their destination in a sealed means of conveyance with the seal intact upon arrival at the point of destination
 - ◆ If processed, the pork or pork products were processed in a region designated in §94.9 and §94.10 as free of CSF, in a federally-inspected processing plant that is under the direct supervision of a full-time salaried veterinary official of the national government of that region
- 2 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in a region listed in 9CFR§94.1(a) as a region affected with rinderpest or foot-and-mouth disease
 - ◆ The slaughtering establishment is **not** permitted to receive meat or other animal products derived from ruminants or swine which originated in such a rinderpest or foot-and-mouth disease affected region, or meat or other animal products from a rinderpest and foot-and mouth disease-free region transported through a rinderpest or foot-and-mouth disease affected region, **except** in containers with serially-numbered seals of the national government of the non-affected region of origin
 - ◆ The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed in §94.1(a)(2) as free of rinderpest and foot-and-mouth disease, and the meat or other animal product has **never** been in any region in which rinderpest or foot-and-mouth disease existed
 - ◆ The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article into the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that **do not** comply with the conditions contained in the certificate
- 3 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in a region listed in 9CFR §94.12(a) as a region in which swine vesicular disease is considered to exist
 - ◆ The slaughtering establishment is **not** permitted to receive pork delivered from swine which originated in such a region or pork from swine from a swine vesicular disease-free region which has been transported through a region where swine vesicular disease is considered to exist, **except** pork which was transported in containers sealed with serially-numbered seals of the national government of a region of origin listed in 9CFR§94.12 as a region considered free of the disease
 - ◆ The pork has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner that precludes its being commingled or otherwise coming in contact with pork or pork products that have **not** been handled in accordance with the requirements of this section

Cooked Shelf Stable Swine Meat in Retorted, Flexible Pouches

In the process for shelf stable swine meat in retorted, flexible pouches, the meat is typically first heated in a kettle and then poured or pumped into a flexible pouch. Next, the product undergoes an additional cooking step; a retort (a larger version of a stove-top pressure cooker), cooks the product in the pouch under pressure and allows the temperature to exceed 212° F. During this retort process, the flexible container is sterilized along with the product.

Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD.

TABLE 3-13-8 Determine Whether to Admit Shelf Stable Swine Meat in Retorted, Flexible Pouches

- 1 A government certificate declaring:
 - ◆ This product was placed in a container which was hermetically sealed and then cooked via a true retort process to insure a commercially sterile, shelf-stable productOR
A government certificate declaring:
 - ◆ This product has been fully cooked by a commercial method in a container hermetically sealed promptly after filling, but before cooking, so that such cooking and sealing produced a fully sterilized product, which is shelf-stable without refrigeration
- 2 Currently the "APHIS-defined EU CSF region" is considered a single region of low risk for CSF. The APHIS-defined EU CSF region is comprised of the European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland)
- 3 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The pork or pork products **must not** have been derived from swine that were in any of the following regions, unless the swine were slaughtered after the periods described:

Any region when the region was classified in 9CFR§94.9(a) and 9CFR§94.10(a) as one in which CSF is known to exist, **except** for the APHIS-defined EU CSF region; OR a restricted zone in the APHIS-defined EU CSF region established because of detection of classical swine fever in domestic swine, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of the APHIS-defined EU CSF region Member State or until 6 months following depopulation of the swine on affected premises in the restricted zone and the cleaning and disinfection of the last affected premises in the zone, whichever is later; OR a restricted zone in the APHIS-defined EU CSF region established because of the detection of classical swine fever in wild boar, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of an APHIS-defined EU CSF region Member State
 - ◆ The pork or pork products **must not** have been commingled with pork or pork products derived from other swine that were in any of the regions or zones described 9CFR§94.24, unless the other swine were slaughtered after the periods described. Additionally, the pork and pork products **must not** have been derived from swine that were commingled with other swine that were in any of the regions or zones described in 9CFR§94.24, unless the swine from which the pork or pork products were derived were slaughtered after the periods described
 - ◆ The swine from which the pork or pork products were derived **must not** have transited any region or zone described in 9CFR§94.24, unless the swine were moved directly through the region or zone described in a sealed means of conveyance with the seal determined to be intact upon arrival at the point of destination, or unless the swine were slaughtered after the periods described
 - ◆ **No** equipment or materials used in transporting the swine from which the pork or pork products were derived from the farm of origin to the slaughtering establishment may have been used previously for transporting swine that do **not** meet the requirements of this section, unless the equipment and materials have first been cleaned and disinfected
- 4 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The pork or pork products were derived from swine that were born and raised in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF and were slaughtered in such a region at a federally inspected slaughter plant that is under the direct supervision of a full-time salaried veterinarian of the national government of that region and that is eligible to have its products imported into the United States under the Federal Meat Inspection Act (21 U.S.C. 601 *et seq.*) and the regulations in 9CFR§327.2
 - ◆ The pork or pork products were derived from swine that have **not** lived in a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
 - ◆ The pork or pork products have **never** been commingled with pork or pork that have been in a region that is designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
 - ◆ The pork or pork products have **not** transited through a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF unless moved directly through the region to their destination in a sealed means of conveyance with the seal intact upon arrival at the point of destination
 - ◆ If processed, the pork or pork products were processed in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF in a federally inspected processing plant that is under the direct supervision of a full-time salaried veterinary official of the national government of that region

- 5 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in a region listed in 9CFR§94.1(a) as a region affected with rinderpest or foot-and-mouth disease
 - ◆ The slaughtering establishment is **not** permitted to receive meat or other animal products derived from ruminants or swine which originated in such a rinderpest or foot-and-mouth disease affected region, or meat or other animal products from a rinderpest and foot-and-mouth disease-free region transported through a rinderpest or foot-and-mouth disease affected region, **except** in containers with serially-numbered seals of the national government of the non-affected region of origin
 - ◆ The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed in §94.1(a)(2) as free of rinderpest and foot-and-mouth disease, and the meat or other animal product has **never** been in any region in which rinderpest or foot-and-mouth disease existed
 - ◆ The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article into the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that **do not** comply with the conditions contained in the certificate
- 6 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in a region listed in 9CFR §94.12(a) as a region in which swine vesicular disease is considered to exist
 - ◆ The slaughtering establishment is **not** permitted to receive pork delivered from swine which originated in such a region or pork from swine from a swine vesicular disease-free region which has been transported through a region where swine vesicular disease is considered to exist, **except** pork which was transported in containers sealed with serially-numbered seals of the national government of a region of origin listed in 9CFR§94.12 as a region considered free of the disease
 - ◆ The pork has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner that precludes its being commingled or otherwise coming in contact with pork or pork products that have **not** been handled in accordance with the requirements of this section

Cooked Swine Meat

Important

Small amounts of pork processed by heat may be imported for purposes of examination, testing, or analysis **only** when authorized by a VS permit. Release or control as specified on the permit. When a VS permit **does not** authorize the entry of cooked, perishable swine meat, use [Table 3-13-9](#) which directs you to the regulatory action you **must** take.

TABLE 3-13-9 Cooked Swine Meat

If the importation is:	And the country or region of export is:	And is:	Then:

- 1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ All bones have been completely removed prior to cooking; and
 - ◆ The pork product or pork product was heated by other than a flash-heating method to an internal temperature of 156° F (69° C) throughout

Cooked Swine Meat from a Country or Region Affected with SVD

TABLE 3-13-15 Cooked Swine Meat from a Country or Region Affected with SVD

If the importation is:	And the country or region of export is:	And the importation:	Then:
Cooked swine meat	Affected with SVD	Is appropriately certified ¹	REFER to FSIS
		Lacks certification ¹	REFUSE ENTRY

1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states either:

- ◆ All bones were completely removed prior to cooking; and,
- ◆ The pork or pork product received heat treatment in a commercially accepted manner used for perishable canned pork products so that it reached an internal temperature of 69° C. (156° F.) throughout

OR

- ◆ All bones were completely removed prior to cooking; and,
- ◆ The pork or pork product received continual heat treatment in an oven for a minimum of 10 hours so that it reached an internal temperature of 149° F (65° C) throughout. The oven temperature started at a minimum of 143° F (62° C) and reached at least 185° F (85° C)

Cooked Swine Meat from a Country or Region Considered CSF/SR

Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD.

TABLE 3-13-16 Cooked Swine Meat from a Country or Region Considered CSF/SR

If the importation is:	And the country or region of export is:	And the importation:	Then:
Cooked swine meat	CSF/SR	Is appropriately certified ^{1 or 2}	REFER to FSIS
		Lacks certification ^{1 and 2}	REFUSE ENTRY

- 1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The pork or pork products were derived from swine that were born and raised in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF and were slaughtered in such a region at a federally inspected slaughter plant that is under the direct supervision of a full-time salaried veterinarian of the national government of that region and that is eligible to have its products imported into the United States under the Federal Meat Inspection Act (21 U.S.C. 601 et seq.) and the regulations in 9CFR§327.2
 - ◆ The pork or pork products were derived from swine that have not lived in a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF.
 - ◆ The pork or pork products have never been commingled with pork or pork that have been in a region that is designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
 - ◆ The pork or pork products have not transited through a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF unless moved directly through the region to their destination in a sealed means of conveyance with the seal intact upon arrival at the point of destination
 - ◆ If processed, the pork or pork products were processed in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF in a federally inspected processing plant that is under the direct supervision of a full-time salaried veterinary official of the national government of that region
- 2 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ All bones have been completely removed prior to cooking; and
 - ◆ The pork product or pork product was heated by other than a flash-heating method to an internal temperature of 156°F (69°C) throughout

Cooked Swine Meat from a Country or Region Considered FMD/SR

◆ Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD.

TABLE 3-13-17 Cooked Swine Meat Shipped from a Country or Region Considered FMD/SR

If the importation is:	And the country or region of export is:	And the importation:	Then:
Cooked swine meat	FMD/SR	Is appropriately certified ¹	REFER to FSIS
		Lacks certification ¹	REFUSE ENTRY

- 1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in a region listed in §94.1(a) as a region affected with rinderpest or foot-and-mouth disease
 - ◆ The slaughtering establishment is **not** permitted to receive meat or other animal products derived from ruminants or swine which originated in such a rinderpest or foot-and-mouth disease-affected region, or meat or other animal products from a rinderpest and foot-and-mouth disease-free region transported through a rinderpest or foot-and-mouth disease-affected region, **except** in containers sealed with serially-numbered seals of the national government of the non-affected region of origin
 - ◆ The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed in §94.1(a)(2) as free of rinderpest and foot-and-mouth disease and the meat or other animal product has **never** been in any region in which rinderpest or foot-and-mouth disease existed
 - ◆ The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that **do not** comply with the conditions contained in this certificate

Cooked Swine Meat from a Country or Region Considered SVD/SR

Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD.

TABLE 3-13-18 Cooked Swine Meat from a Country or Region Considered SVD/SR

If the importation is:	And the country or region of export is:	And the importation:	Then:
Cooked swine meat	SVD/SR	Is appropriately certified ^{1 or 2}	REFER to FSIS
		Lacks certification ^{1 and 2}	REFUSE ENTRY

- 1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in region listed in 9CFR§94.12(a) as a region in which swine vesicular disease is considered to exist
 - ◆ The slaughtering establishment is **not** permitted to receive pork derived from swine which originated in such a region of pork from swine from a swine vesicular disease-free region which has been transported through a region where swine vesicular disease is considered to exist, except pork which was transported in containers sealed with serially-numbered seals of the national government of a region of origin listed in 9CFR§94.12 as a region considered free of the disease
 - ◆ The pork has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner that precludes its being commingled or otherwise coming in contact with pork or pork products that have not been handled in accordance with the requirements of this section

- 2 A meat inspection certificate prescribed in 9CFR§327.4 and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states either:
 - ◆ All bones were completely removed prior to cooking; and,
 - ◆ The pork or pork product received heat treatment in a commercially accepted manner used for perishable canned pork products so that it reached an internal temperature of 156°F (69°C) throughout

OR

 - ◆ All bones were completely removed prior to cooking; and,
 - ◆ The pork or pork product received continual heat treatment in an oven for a minimum of 10 hours so that it reached an internal temperature of 149°F (65°C) throughout. The oven temperature started at a minimum of 143°F (62°C) and reached at least 185°F (85°C)

Cured and Dried Swine Meat

Important

Small amounts of pork meat that is cured and dried may be imported for purposes of examination, testing, or analysis **only** when authorized by a VS permit. See [Table 2-4-16](#) for processing animal products imported under permit.

TABLE 3-13-19 Cured and Dried Swine Meat

If the importation is:	And the country or region of export is:	And is:	And the importation is:	Then:	
Cured and dried swine meat	Italy	—————→	—————→	GO to Table 3-13-20	
	Spain	—————→	—————→	GO to Table 3-13-21	
	Free from ASF, CSF, FMD, and SVD	—————→	—————→	REFER to FSIS	
	Affected with ASF	—————→	—————→	REFUSE ENTRY	
	Affected with CSF	Member State of APHIS-defined EU CSF region ¹ (Other than Italy or Spain)	—————→	—————→	GO to Table 3-13-22
			Mexico	—————→	GO to Table 3-13-23
		Other than listed above	Bone-in		REFUSE ENTRY

SVD/SR	—————→	—————→	GO to Table 3-13-29		

1 Currently the "APHIS-defined EU CSF region" is considered a single region of low risk for CSF. The APHIS-defined EU CSF region is comprised of the European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland)

Cured and Dried Pork Products from Italy and Spain

For cured and dried pork products from Italy and Spain, review the accompanying meat inspection certificates to verify that the applicable certificates, as specified in the tables for cured and dried pork products from Italy ([Table 3-13-20](#)) or Spain ([Table 3-13-21](#)), have

been provided. If the specified Italian or Spanish certificates are **not** presented then refuse entry for the products. Continue to [Table 3-13-20](#) for cured and dried pork products from Italy. Continue to [Table 3-13-21](#) for cured and dried pork products from Spain.

Cured and Dried Pork Products from Italy

TABLE 3-13-20 Cured and Dried Products from Italy

If the importation is:	And the product is:	And the product:	And the meat is:	And the product:	And:	Then:		
Cured and dried pork product from Italy Examples include: Italian brands of hams (such as Modena, Parma, and San Daniele), and other cured and dried pork products	Deboned meat products cured at least 45 ¹ /90 ² days	—————→			Is appropriately certified ³	REFER TO FSIS		
					Lacks certification ³	REFUSE ENTRY		
	Dry hams cured for at least 400 days obtained from hams of swine born and raised in Italy	Is from an approved processing establishment (see Figure 3-13-2)	Bone-in (whole ham)	—————→		Is appropriately certified ⁴	REFER TO FSIS

Cured and Dried Swine Meat from a Country or Region Affected with CSF That is a Member State of the APHIS-defined EU CSF Region Other than Italy or Spain

TABLE 3-13-22 Cured and Dried Swine Meat from a Country or Region Affected with CSF That is a Member State of the APHIS-defined EU CSF Region Other than Italy or Spain

If the importation is:	And the country or region of export is:	And is:	And the importation:	Then:
Cured and dried swine meat	Affected with CSF	Member State of the APHIS-defined EU CSF region ¹ other than Italy or Spain	Is appropriately certified ^{2 or 3}	REFER to FSIS
			Lacks the appropriate certification ^{2 and 3}	REFUSE ENTRY

1 Currently the "APHIS-defined EU CSF region" is considered a single region of low risk for CSF. The APHIS-defined EU CSF region is comprised of the European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland)

- 2 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ The pork or pork products **must not** have been derived from swine that were in any of the following regions, unless the swine were slaughtered after the periods described:

Any region when the region was classified in 9CFR§94.9(a) and 9CFR§94.10(a) as one in which CSF is known to exist, **except** for the APHIS-defined EU CSF region; OR a restricted zone in the APHIS-defined EU CSF region established because of detection of classical swine fever in domestic swine, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of the APHIS-defined EU CSF region Member State or until 6 months following depopulation of the swine on affected premises in the restricted zone and the cleaning and disinfection of the last affected premises in the zone, whichever is later; OR a restricted zone in the APHIS-defined EU CSF region established because of the detection of classical swine fever in wild boar, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of an APHIS-defined EU CSF region Member State

- ◆ The pork or pork products **must not** have been commingled with pork or pork products derived from other swine that were in any of the regions or zones described 9CFR§94.24, unless the other swine were slaughtered after the periods described. Additionally, the pork and pork products **must not** have been derived from swine that were commingled with other swine that were in any of the regions or zones described in 9CFR§94.24, unless the swine from which the pork or pork products were derived were slaughtered after the periods described
- ◆ The swine from which the pork or pork products were derived **must not** have transited any region or zone described in 9CFR§94.24, unless the swine were moved directly through the region or zone described in a sealed means of conveyance with the seal determined to be intact upon arrival at the point of destination, or unless the swine were slaughtered after the periods described
- ◆ **No** equipment or materials used in transporting the swine from which the pork or pork products were derived from the farm of origin to the slaughtering establishment may have been used previously for transporting swine that do **not** meet the requirements of this section, unless the equipment and materials have first been cleaned and disinfected

- 3 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ All bones have been completely removed in the region of origin
- ◆ The meat was held in an unfrozen, fresh condition for at least 3 days immediately following the slaughter of the animals from which it was derived

AND either one below, but not both:

- ◆ The meat was thoroughly cured and fully dried for not less than 90 days so that it is shelf stable without refrigeration
- OR

- ◆ The meat was thoroughly cured and fully dried for not less than 45 days so that the product is shelf stable without refrigeration and the dried and cured product is accompanied to the processing establishment by a certificate of an official of the national government of a CSF-free region, which specifies that:

- ❖ The pork involved originated in that CSF-free region and was consigned to a processing establishment in [name of country or region not CSF-free], in a closed container sealed by the national veterinary authorities of the CSF-free region by seals of a serially numbered type
- ❖ The numbers of the seals used were entered on the meat inspection certificate of the CSF-free region which accompanied the shipment from such CSF-free region; and, the container seals were found intact and free of any evidence of tampering on arrival at the processing establishment by a national veterinary inspector; and, the processing establishment from which the dried and cured product is shipped to the United States does not receive or process any live swine, and uses only pork or pork products which originates in regions listed as CSF free and processes all such pork or pork products in accordance with 9CFR§94.9(c)(1)(i), (ii), or (iii)

Cured and Dried Swine Meat from Mexico

Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD.

TABLE 3-13-23 Cured and Dried Swine Meat from Mexico

If the importation is:	And the Mexican State of export is:	And the importation is:	And:	Then:	
Cured and dried swine meat	Baja California Baja California Sur Campeche Chihuahua Nayarit Quintana Roo Sinaloa Sonora or Yucatan	Bone in or boneless	Is appropriately certified ^{1 or 2}	REFER to FSIS	
			Lacks certification ^{1 and 2}	REFUSE ENTRY	
	State other than listed above	Bone in	—————→		REFUSE ENTRY
		Boneless	Is appropriately certified ²	REFER to FSIS	
			Lacks certification ²	REFUSE ENTRY	

1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ The pork or pork products were derived from swine that were born and raised in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF and were slaughtered in such a region at a federally inspected slaughter plant that is under the direct supervision of a full-time salaried veterinarian of the national government of that region and that is eligible to have its products imported into the United States under the Federal Meat Inspection Act (21 U.S.C. 601 et seq.) and the regulations in 9CFR§327.2
- ◆ The pork or pork products were derived from swine that have not lived in a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
- ◆ The pork or pork products have never been commingled with pork or pork that have been in a region that is designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
- ◆ The pork or pork products have not transited through a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF unless moved directly through the region to their destination in a sealed means of conveyance with the seal intact upon arrival at the point of destination
- ◆ If processed, the pork or pork products were processed in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF in a federally inspected processing plant that is under the direct supervision of a full-time salaried veterinary official of the national government of that region

2 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ All bones have been completely removed in the region of origin
- ◆ The meat was held in an unfrozen, fresh condition for at least 3 days immediately following the slaughter of the animals from which it was derived

AND either one below, but not both:

- ◆ The meat was thoroughly cured and fully dried for not less than 90 days so that it is shelf stable without refrigeration

OR

- ◆ The meat was thoroughly cured and fully dried for not less than 45 days so that the product is shelf stable without refrigeration and the dried and cured product is accompanied to the processing establishment by a certificate of an official of the national government of a CSF-free region, which specifies that:
 - ◆The pork involved originated in that CSF-free region and was consigned to a processing establishment in [name of country or region not CSF-free], in a closed container sealed by the national veterinary authorities of the CSF-free region by seals of a serially numbered type
 - ◆The numbers of the seals used were entered on the meat inspection certificate of the CSF-free region which accompanied the shipment from such CSF-free region; and, the container seals were found intact and free of any evidence of tampering on arrival at the processing establishment by a national veterinary inspector; and, the processing establishment from which the dried and cured product is shipped to the United States does not receive or process any live swine, and uses only pork or pork products which originates in regions listed as CSF free and processes all such pork or pork products in accordance with 9CFR§94.9(c)(1)(i), (ii), or (iii)

Cured and Dried Swine Meat from a Country or Region Affected with CSF Other Than a Member State of the APHIS-defined EU CSF Region or Mexico

TABLE 3-13-24 Cured and Dried Swine Meat from a Country or Region Affected with CSF Other Than a Member State of the APHIS-defined EU CSF Region or Mexico

			Lacks certification ¹	REFUSE ENTRY

¹ A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ All bones have been completely removed, either in the region of origin or in the region where the pork or pork products are processed; and
- ◆ Such pork or pork products have been accompanied from the swine vesicular disease free region of origin to the processing establishment in the swine vesicular disease infected region by a certificate signed by an official of the national government of the swine vesicular disease free region specifying that the pork or pork product involved originated in that region and the pork or pork product was consigned to a processing establishment in [region not listed in 9CFR§94.12(a) as free of swine vesicular disease], in a closed container sealed by the national veterinary authorities of the swine vesicular disease free region of origin by seals of a serially numbered type, and the numbers of these seals shall be entered on this certificate; and
- ◆ The container seals were found intact and free of any evidence of tampering on arrival at the processing establishment in the swine vesicular disease infected region by a national veterinary inspector of that region; and
- ◆ The processing establishment from which the pork or pork product was shipped to the United States does not receive or process any live swine, and uses only pork or pork products which originate in regions listed in 9CFR§94.12(a) as free of swine vesicular disease; and
- ◆ That such establishment processes all such pork or pork products in accordance with 9CFR§94.12(b)(1)(i), (ii), (iii), or (iv)

Cured and Dried Swine Meat from a Country or Region Considered CSF/SR

Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD.

TABLE 3-13-27 Cured and Dried Swine Meat from a Country or Region Considered CSF/SR

If the importation is:	And the country or region of export is:	And the importation:	Then:
Cured and dried swine meat	CSF/SR	Is appropriately certified ^{1 or 2}	REFER to FSIS
		Lacks certification ^{1 and 2}	REFUSE ENTRY

1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ The pork or pork products were derived from swine that were born and raised in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF and were slaughtered in such a region at a federally inspected slaughter plant that is under the direct supervision of a full-time salaried veterinarian of the national government of that region and that is eligible to have its products imported into the United States under the Federal Meat Inspection Act (21 U.S.C. 601 et seq.) and the regulations in 9CFR§327.2
- ◆ The pork or pork products were derived from swine that have not lived in a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
- ◆ The pork or pork products have never been commingled with pork or pork that have been in a region that is designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF
- ◆ The pork or pork products have not transited through a region designated in 9CFR§94.9 and 9CFR§94.10 as affected with CSF unless moved directly through the region to their destination in a sealed means of conveyance with the seal intact upon arrival at the point of destination
- ◆ If processed, the pork or pork products were processed in a region designated in 9CFR§94.9 and 9CFR§94.10 as free of CSF in a federally inspected processing plant that is under the direct supervision of a full-time salaried veterinary official of the national government of that region

- 2 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ All bones have been completely removed in the region of origin.
- ◆ The meat was held in an unfrozen, fresh condition for at least 3 days immediately following the slaughter of the animals from which it was derived

AND either one below, but not both:

- ◆ The meat was thoroughly cured and fully dried for not less than 90 days so that it is shelf stable without refrigeration

OR

- ◆ The meat was thoroughly cured and fully dried for not less than 45 days so that the product is shelf stable without refrigeration and the dried and cured product is accompanied to the processing establishment by a certificate of an official of the national government of a CSF-free region, which specifies that:
 - ❖ The pork involved originated in that CSF-free region and was consigned to a processing establishment in [name of country or region not CSF-free], in a closed container sealed by the national veterinary authorities of the CSF-free region by seals of a serially numbered type
 - ❖ The numbers of the seals used were entered on the meat inspection certificate of the CSF-free region which accompanied the shipment from such CSF-free region; and, the container seals were found intact and free of any evidence of tampering on arrival at the processing establishment by a national veterinary inspector; and, the processing establishment from which the dried and cured product is shipped to the United States does not receive or process any live swine, and uses only pork or pork products which originates in regions listed as CSF free and processes all such pork or pork products in accordance with 9CFR§94.9(c)(1)(i), (ii), or (iii)

Cured and Dried Swine Meat from a Country or Region Considered FMD/SR

Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD.

TABLE 3-13-28 Cured and Dried Swine Meat from a Country or Region Considered FMD/SR

If the importation is:	And the country or region of export is:	And the importation:	Then:
Cured and dried swine meat	FMD/SR	Is appropriately certified ¹ or ²	REFER to FSIS
		Lacks certification ¹ and ²	REFUSE ENTRY

- 1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ The slaughtering establishment is not permitted to receive animals that originated in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in a region listed in §94.1(a) as a region affected with rinderpest or foot-and-mouth disease
 - ◆ The slaughtering establishment is not permitted to receive meat or other animal products derived from ruminants or swine which originated in such a rinderpest or foot-and-mouth disease-affected region, or meat or other animal products from a rinderpest and foot-and-mouth disease-free region transported through a rinderpest or foot-and-mouth disease-affected region, except in containers sealed with serially-numbered seals of the national government of the non-affected region of origin
 - ◆ The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed in §94.1(a)(2) as free of rinderpest and foot-and-mouth disease and the meat or other animal product has never been in any region in which rinderpest or foot-and-mouth disease existed
 - ◆ The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that do not comply with the conditions contained in this certificate
- 2 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
- ◆ All bones were completely removed in the region of origin
 - ◆ The meat was held in an unfrozen, fresh condition, for at least 3 days immediately following the slaughter of the animals from which it was derived
 - ◆ The meat was thoroughly cured and fully dried to the extent that it is shelf stable without refrigeration (thoroughly dried means to the extent that the water-to-protein ratio in the wettest portion of the product does not exceed 2.25 to 1

Cured and Dried Swine Meat from a Country or Region Considered SVD/SR

Pork and pork products from countries or regions designated as CSF/SR, FMD/SR, or SVD/SR may make entry with EITHER certification statements that meet SR requirements OR with certification statements that meet the requirements of countries or regions affected with CSF, FMD, or SVD.

TABLE 3-13-29 Cured and Dried Swine Meat from a Country or Region Considered SVD/SR

If the importation is:	And the country or region of export is:	And the importation:	Then:
Cured and dried swine meat	SVD/SR	Is appropriately certified ¹ or ²	REFER to FSIS
		Lacks certification ¹ and ²	REFUSE ENTRY

- 1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ The slaughtering establishment is not permitted to receive animals that originated in, or have ever been in a region listed in 9§CFR94.12(a) as a region in which swine vesicular disease is considered to exist
 - ◆ The slaughtering establishment is not permitted to receive pork derived from swine which originated in such a region of pork from swine from a swine vesicular disease free region which has been transported through a region where swine vesicular disease is considered to exist, except pork which was transported in containers sealed with serially-numbered seals of the national government of a region of origin listed in 9§CFR 94.12 as a region considered free of the disease
 - ◆ The pork has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner that precludes its being commingled or otherwise coming in contact with pork or pork products that have not been handled in accordance with the requirements of this section

- 2 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:
 - ◆ All bones have been completely removed, either in the region of origin or in the region where the pork or pork products are processed; and
 - ◆ Such pork or pork products have been accompanied from the swine vesicular disease free region of origin to the processing establishment in the swine vesicular disease infected region by a certificate signed by an official of the national government of the swine vesicular disease free region specifying that the pork or pork product involved originated in that region and the pork or pork product was consigned to a processing establishment in [region not listed in 9CFR§94.12(a) as free of swine vesicular disease], in a closed container sealed by the national veterinary authorities of the swine vesicular disease free region of origin by seals of a serially numbered type, and the numbers of these seals shall be entered on this certificate; and
 - ◆ The container seals were found intact and free of any evidence of tampering on arrival at the processing establishment in the swine vesicular disease infected region by a national veterinary inspector of that region; and
 - ◆ The processing establishment from which the pork or pork product was shipped to the United States does not receive or process any live swine, and uses only pork or pork products which originate in regions listed in 9CFR§94.12(a) as free of swine vesicular disease; and
 - ◆ That such establishment processes all such pork or pork products in accordance with 9CFR§94.12(b)(1)(i), (ii), (iii), or (iv)

Fresh (Chilled or Frozen) Swine Meat

If the importation is break-bulk cargo, then all seals **must** be checked at the first port of arrival.

TABLE 3-13-30 Fresh (Chilled or Frozen) Swine Meat

If the importation is:	And the country or region of export is:	And is:	Then:	
Fresh (chilled or frozen) swine meat	Free from ASF, CSF, FMD, and SVD	→	GO to Table 3-13-31	
	Affected with ASF, FMD, or SVD	→	REFUSE ENTRY	
	Affected with CSF	Mexico		GO to Table 3-13-32
		Member State of APHIS-defined EU CSF region ¹		GO to Table 3-13-34
		Other than listed above		REFUSE ENTRY
	CSF/SR	→	GO to Table 3-13-33	
	FMD/SR	→	GO to Table 3-13-35	
	SVD/SR	→	GO to Table 3-13-36	

¹ Currently the "APHIS-defined EU CSF region" is considered a single region of low risk for CSF. The APHIS-defined EU CSF region is comprised of the European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland)

Fresh (Chilled or Frozen) Swine Meat from a Country or Region that is Free from ASF, CSF, FMD, and SVD

If the importation is break-bulk cargo, then all seals **must** be checked at the first port of arrival.

TABLE 3-13-31 Fresh (Chilled or Frozen) Swine Meat from a Country or Region that is Free from ASF, CSF, FMD, and SVD

If the importation is:	And the country or region of export is:	And the importation:	And:	Then:
Fresh (chilled and frozen) swine meat	Free from ASF, CSF, FMD, and SVD	Transited a country affected with FMD	Has met transit requirements ¹	REFER to FSIS
			Has not met transit requirements ¹	REFUSE ENTRY
		Did not transit a country affected with FMD	→	REFER to FSIS

1 If during shipment to the United States, the meat enters a port or otherwise transits a region where FMD exists, it may be imported provided that all of these conditions are met:

- ◆ The meat is placed in the transporting carrier in a hold, compartment, or, if the meat is containerized, in a container which was sealed in the region of origin by an official of such region with serially numbered seals approved by APHIS
- ◆ The serial numbers of the seals used to seal the hold, compartment, or container are recorded on the foreign inspection certificate which accompanies the meat
- ◆ Upon arrival of the carrier in the United States port of arrival, the seals are found by an APHIS representative to be intact, and the representative finds that there is no evidence indicating that any seal has been tampered with
- ◆ The meat is found by an authorized inspector to be represented on the foreign meat inspection certificate

Fresh (Chilled or Frozen) Swine Meat from Mexico

If the importation is break-bulk cargo, then all seals **must** be checked at the first port of arrival.

TABLE 3-13-32 Fresh (Chilled or Frozen) Swine Meat from Mexico

If the importation is:	And Mexican state of export is:	And the importation:	And:	And:	Then:

		Other than Spain	Is appropriately certified ³	REFER to FSIS
			Lacks certification ³	REFUSE ENTRY

- 1 Currently the "APHIS-defined EU CSF region" is considered a single region of low risk for CSF. The APHIS-defined EU CSF region is comprised of the European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland)
- 2 Accompanied by Spanish Official Meat Inspection Certificate for Fresh Meat and Meat Byproducts (Ref.: ASE-755, 02/08) (see [Figure G-1-56](#))
- 3 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

The pork or pork products **must not** have been derived from swine that were in any of the following regions, unless the swine were slaughtered after the periods described:

Any region when the region was classified in 9CFR§94.9(a) and 9CFR§94.10(a) as one in which CSF is known to exist, **except** for the APHIS-defined EU CSF region; OR a restricted zone in the APHIS-defined EU CSF region established because of detection of classical swine fever in domestic swine, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of the APHIS-defined EU CSF region Member State or until 6 months following depopulation of the swine on affected premises in the restricted zone and the cleaning and disinfection of the last affected premises in the zone, whichever is later; OR a restricted zone in the APHIS-defined EU CSF region established because of the detection of classical swine fever in wild boar, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of an APHIS-defined EU CSF region Member State

The pork or pork products **must not** have been commingled with pork or pork products derived from other swine that were in any of the regions or zones described 9CFR§94.24, unless the other swine were slaughtered after the periods described. Additionally, the pork and pork products **must not** have been derived from swine that were commingled with other swine that were in any of the regions or zones described in 9CFR§94.24, unless the swine from which the pork or pork products were derived were slaughtered after the periods described

The swine from which the pork or pork products were derived **must not** have transited any region or zone described in 9CFR§94.24, unless the swine were moved directly through the region or zone described in a sealed means of conveyance with the seal determined to be intact upon arrival at the point of destination, or unless the swine were slaughtered after the periods described.

No equipment or materials used in transporting the swine from which the pork or pork products were derived from the farm of origin to the slaughtering establishment may have been used previously for transporting swine that do **not** meet the requirements of this section, unless the equipment and materials have first been cleaned and disinfected

Fresh (Chilled or Frozen) Swine Meat from a Country or Region Considered FMD/SR

If the importation is break-bulk cargo, then all seals **must** be checked at the first port of arrival.

TABLE 3-13-35 Fresh (Chilled or Frozen) Swine Meat from a Country or Region Considered FMD/SR

If the importation is:	And the country or region of export is:	And the importation:	And:	And:	Then:
Fresh (chilled and frozen) swine meat	FMD/SR	Is appropriately certified ¹	Transited a country affected with FMD	Has met transit requirements ²	REFER to FSIS
				Has not met transit requirements ²	REFUSE ENTRY
			Did not transit a country affected with FMD	→	REFER to FSIS
		Lacks certification ¹	→	REFUSE ENTRY	

1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in a region listed in §94.1(a) as a region affected with rinderpest or foot-and-mouth disease
- ◆ The slaughtering establishment is **not** permitted to receive meat or other animal products derived from ruminants or swine which originated in such a rinderpest or foot-and-mouth disease-affected region, or meat or other animal products from a rinderpest and foot-and-mouth disease-free region transported through a rinderpest or foot-and-mouth disease-affected region, **except** in containers sealed with serially-numbered seals of the national government of the non-affected region of origin
- ◆ The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed in §94.1(a)(2) as free of rinderpest and foot-and-mouth disease and the meat or other animal product has **never** been in any region in which rinderpest or foot-and-mouth disease existed
- ◆ The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that **do not** comply with the conditions contained in this certificate

2 If during shipment to the United States, the meat enters a port or otherwise transits a region where FMD exists, it may be imported provided that all of these conditions are met:

- ◆ The meat is placed in the transporting carrier in a hold, compartment of, if the meat is containerized, in a container that which was sealed in the region of origin by an official of such region with serially numbered seals approved by APHIS
- ◆ The serial numbers of the seals used to seal the hold, compartment, or container are recorded on the foreign inspection certificate which accompanies the meat
- ◆ Upon arrival of the carrier in the United States port of arrival, the seals are found by an APHIS representative to be intact, and the representative finds that there is no evidence indicating that any seal has been tampered with
- ◆ The meat is found by an authorized inspector to be represented on the foreign meat inspection certificate

Fresh (Chilled or Frozen) Swine Meat From a Country or Region Considered SVD/SR

If the importation is break-bulk cargo, then all seals **must** be checked at the first port of arrival.

TABLE 3-13-36 Fresh (Chilled or Frozen) Swine Meat From a Country or Region Considered SVD/SR

If the importation is:	And the country or region of export is:	And the importation:	And:	And:	Then:
Fresh (chilled and frozen) swine meat	SVD/SR	Is appropriately certified ¹	Transited a country affected with FMD	Has met transit requirements ²	REFER to FSIS
				Has not met transit requirements ²	REFUSE ENTRY
			Did not transit a country affected with FMD	→	REFER to FSIS
		Lacks certification ¹	→	REFUSE ENTRY	

1 A meat inspection certificate prescribed in 9CFR§327.4, and additional certification (placed on the foreign meat inspection certificate or contained in a separate document) that states:

- ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in a region listed in 9CFR§94.12(a) as a region in which swine vesicular disease is considered to exist
- ◆ The slaughtering establishment is **not** permitted to receive pork derived from swine which originated in such a region of pork from swine from a swine vesicular disease free region which has been transported through a region where swine vesicular disease is considered to exist, except pork which was transported in containers sealed with serially-numbered seals of the national government of a region of origin listed in 9CFR§94.12 as a region considered free of the disease
- ◆ The pork has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner that precludes its being commingled or otherwise coming in contact with pork or pork products that have not been handled in accordance with the requirements of this section

2 If during shipment to the United States, the meat enters a port or otherwise transits a region where FMD exists, it may be imported provided that all of these conditions are met:

- ◆ The meat is placed in the transporting carrier in a hold, compartment of, if the meat is containerized, in a container that which was sealed in the region of origin by an official of such region with serially numbered seals approved by APHIS
- ◆ The serial numbers of the seals used to seal the hold, compartment, or container are recorded on the foreign inspection certificate which accompanies the meat
- ◆ Upon arrival of the carrier in the United States port of arrival, the seals are found by an APHIS representative to be intact, and the representative finds that there is no evidence indicating that any seal has been tampered with
- ◆ The meat is found by an authorized inspector to be represented on the foreign meat inspection certificate

Introduction

The *Milk and Milk Products* section covers all products derived from milk, including the following products for which examples are listed:

- ◆ Cultured milk products and their dry derivatives
- ◆ Dry milk products
- ◆ Fresh (chilled or frozen) milk products that are pasteurized and require refrigeration
- ◆ Shelf-stable milk products that are heat processed to an extent that refrigeration is **not** necessary
- ◆ Shelf-stable food products that contain milk or milk products, usually prepackaged for individual use

◆ **Miscellaneous products derived from milk that **do not** logically fit into one of the above divisions**

Disregard all dates stamped on cans or labels of milk or milk products. These dates are **only** for quality control and have **no** application for determining admissibility.

Never apply 9CFR 94.11 to milk or milk products. This CFR restricts importations of meat and meat products from specified countries. The specified countries listed under 9CFR 94.11 are free from FMD; therefore, the live animal population is considered free from FMD.

Milk and milk products are **not** regulated according to the BSE status of a country.

Cultured Milk Products

- ◆ Acidophilus milk
- ◆ Cultured buttermilk
- ◆ Cultured cream
- ◆ Cultured milk-based soft drinks (such as CALPIS®)
- ◆ Crème fraîche¹
- ◆ Lactic acid
- ◆ Ripened cream butter
- ◆ Sour cream
- ◆ Sour cream dip
- ◆ Yogurt, including dry yogurt products (such as jub-jub, kashk, kaskg, kishk, kurut, and kushuk that are concentrated to a dryness and may be infused with herbs, spices, dry fruits, or cereals)

Dry Milk Products

- ◆ Dry buttermilk
- ◆ Dry ice cream mix

¹ Crème Fraîche is prohibited entry by the Food and Drug Administration (FDA). If this product is encountered, refer the importation to U.S. Customs for referral to an FDA inspector.

- ◆ Dry milk fractions, such as:
 - ❖ Casein
 - ❖ Caseinate
 - ❖ Galactose
 - ❖ Glucose (milk sugar)
 - ❖ Lactase
 - ❖ Lactalbumin
 - ❖ Lactoglobulin
 - ❖ Lactose (milk sugar)
 - ❖ Milk protein concentrate
 - ❖ Total milk protein
- ◆ Dry whey
- ◆ Dry whole milk
- ◆ Formula, infant milk
- ◆ Formulations containing dry milk products, such as:
 - ❖ Baking mixes
 - ❖ Hot cocoa mixes
 - ❖ Instant cake mixes
 - ❖ Instant pudding mixes
 - ❖ Potato flakes
- ◆ Lactulose
- ◆ Nonfat dry milk
- ◆ Powdered milk

Fresh Milk Products

The following are fresh (chilled or frozen) milk products that are pasteurized and require refrigeration:

- ◆ Cream, including half-and-half and heavy cream
- ◆ Ice cream
- ◆ Milk and skim milk
- ◆ Sherbet
- ◆ Whey

Canned or Packaged Shelf-Stable Milk Products, Including Mixtures

The following are shelf-stable milk products that are heat processed to an extent that refrigeration is **not** necessary:

- ◆ Canned cream
- ◆ Canned milk
- ◆ Condensed milk (sweetened and unsweetened)
- ◆ Evaporated milk
- ◆ Hot-pack cream cheese
- ◆ Hot-pack sour cream
- ◆ Lactalbumin (including dry powder)
- ◆ Lactulose (powder or syrup)
- ◆ Long-life milk
- ◆ Sterilized milk
- ◆ Sterilized yogurt
- ◆ Sweet cultured cream
- ◆ Sweetened milk

Some processes that make the milk shelf stable are **not** necessarily sufficient to inactivate the FMD virus. Some processes use a combination of sugar and heat to help preserve the product, such as condensed and sweetened milk.

Canned or Packaged Shelf-Stable Products Containing Milk or Milk Products

The following are shelf-stable food products (usually prepackaged for individual use) that contain milk or milk products in addition to other ingredients:

- ◆ Baby or infant formula
- ◆ Candy
- ◆ Confectioneries
- ◆ Cream and cheese soups

Miscellaneous Products Derived from Milk

- ◆ Butter
- ◆ Butter oil (anhydrous milk fat)
- ◆ Cheese, hard

- ◆ Cheese, soft
- ◆ Clotted cream
- ◆ Ghee (clarified butter)
- ◆ Liquid cheese or cheese that pours like heavy cream Clotted cream

Milk or Milk Products Transiting the United States

When milk or milk products are merely transiting the United States, follow the special procedures for [Animal Products or By-Products Transiting for Export](#) on page 2-4-35.

Milk or Milk Products Moving Under a VS Permit

When a VS permit authorizes entry of a milk product, match the following information on the shipping documents with that on the permit:

- ◆ Conditions spelled out on the permit
- ◆ Consignee
- ◆ Current date
- ◆ Description of the material
- ◆ Shipper

Follow [Table 3-14-1](#) as you match the permit with the shipping documents.

TABLE 3-14-1 Validate Importation Authorized Entry by a VS Permit

If the shipping documents:	And the:	Then:
Match the permit		RELEASE or CONTROL as specified on the permit
Do not match the permit	Permit has expired	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. HAVE the consignee contact VS, TTSPS (see Table 2-4-17) 3. SAFEGUARD the importation until you hear from VS, TTSPS
	Discrepancy is other than an expired permit	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. CONTACT PPQ-VRS-AQI, VMO or PPQ-VRS-HQ personnel for further action (see Appendix H)

Locator

When a VS permit **does not** accompany an importation of the milk or milk products, use [Table 3-14-2](#) to determine the appropriate regulatory action to take.

TABLE 3-14-2 Determine Where to Find the Regulatory Action on Milk or Milk Products Not Authorized by a VS Permit

If the milk or milk product is:	And:	And:	Then:
Cheese, with or without meat	Hard or processed	→	GO to Table 3-14-6
	Liquid or soft	→	GO to Table 3-14-7
Condensed milk	Sugar is listed as an ingredient	→	GO to Table 3-14-5
	Sugar is not listed as an ingredient	→	RELEASE
Cultured milk products, including dried forms ¹	→		RELEASE
Dry milk or dry milk product	Is a fixative ² in a mixture of other ingredients	→	RELEASE
	Other than a fixative in a mixture of other ingredients	→	GO to Table 3-14-3
Evaporated milk	Sugar is listed as an ingredient	→	GO to Table 3-14-5
	Sugar is not listed as an ingredient	→	RELEASE
Ice cream or frozen desert	→		GO to Table 3-14-4
Liquid infant formula	Perishable		GO to Table 3-14-4
	Shelf stable	Sugar is listed as an ingredient	GO to Table 3-14-5
		Sugar is not listed as an ingredient	RELEASE
Milk, cream, or eggnog	Perishable	→	GO to Table 3-14-4
	Shelf stable	Sugar is listed as an ingredient	GO to Table 3-14-5
		Sugar is not listed as an ingredient	RELEASE
Miscellaneous dairy product or item contains a dairy product	Butter, butter oil (anhydrous milk fat), buttons made from casein or ghee	→	RELEASE
	Candy or confectioneries having milk as an ingredient, including cajeta and dulce de leche	→	
	Dairy product is an ingredient along with meat or some other animal-derived product ³	→	GO to Table 3-14-9

- 1 Such as acidophilus milk, buttermilk, cultured cream, dahi, doogh, jaja, jub-jub, kashk, kaskg, katyk, kefir, kishk, koumiss, kurut, kushuk, laban, laben, leben, madzoon, mast, cultured milk-based soft drinks (such as CALPIS®), qurut, raib, ripened cream butter, rob, roba, sour cream, sour cream dip, smenta, tiaourti, taho, yaourt, yogurt, zabady, and zabade.
- 2 A fixative is similar to a binding agent.
- 3 Such as milk replacers for livestock, prepared foods, soups, and starters.

Dry Milk Products, Including Mixtures of Dry Milk Products

TABLE 3-14-3 Dry Milk Products, Including Mixtures of Dry Milk Products

If the product is:	And the country or region of export is:	And:	And:	And:	Then:	
<ul style="list-style-type: none"> ◆ Dry buttermilk ◆ Dry milk ◆ Dry milk fraction¹ ◆ Dry whey ◆ Infant formula ◆ Mixture of dry milk products (e.g., dry ice cream mix) ◆ Nonfat dry milk ◆ Powdered milk ◆ Total milk protein (usually packed in bulk bags or drums)	Canada	→		Is appropriately certified ²	RELEASE	
				Lacks the required certification ²	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer the opportunity to obtain the appropriate certification	
	Other than Canada	Free from FMD	Is appropriately certified ³	→	RELEASE	
				Lacks the required certification ³	Is consigned to an approved establishment	RELEASE to the consigned approved establishment
			Affected with FMD	Is accompanied by a VS permit	→	RELEASE or CONTROL as specified on the permit
					Lacks a VS permit	Is consigned to an approved establishment
				Is not consigned to an approved establishment	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the following options: <ul style="list-style-type: none"> a. Obtain the appropriate certification b. Provide the importer with the appropriate options (see Table 2-2-11) 	

TABLE 3-14-3 Dry Milk Products, Including Mixtures of Dry Milk Products (continued)

If the product is:	And the country or region of export is:	And:	And:	And:	Then:
Formulations containing dry milk products				Is commercially labeled and presented in final finished packaging requiring no further manipulation of the product ⁴	RELEASE
				Is appropriately certified ³	RELEASE
				Is not presented as is described in above cells	1. DO NOT RELEASE the HOLD 2. INSTRUCT the importer to CONTACT VS, TTSPS AT 301/734-3277 to obtain further instructions
Lactulose					RELEASE

- 1 Casein, caseinate, galactose, glucose, lactalbumin, lactoglobulin, and lactose.
- 2 Any one of the following is sufficient proof of Canadian origin:
 - ◆ Original certificate signed by a Canadian Food Inspection Agency (CFIA) official, stating that the product originated in Canada or was legally imported into Canada (may be quarterly certificate).
 - ◆ North American Free Trade Agreement (NAFTA) certificate of origin (also known as CBP Form 434, available at <https://forms.customs.gov/customsrf/getformharness.asp?formName=cf-434-form.xft>); this form is also acceptable if produced on company letterhead or Canadian letterhead.
 - ◆ Invoice listing is a Canadian vendor.
 - ◆ Labels, commercially printed, that indicate the material is a product of Canada.
- 3 Certification, endorsed by the Veterinary Service of the exporting country or region, that has the following statement:

The milk/milk product was processed in *[name of country]*, a region listed in 9CFR 94.1(a)(2), from milk produced in *[name of country]*, a region listed in 9CFR 94.1(a)(2) as free of foot-and-mouth disease and rinderpest. The milk/milk product has **never** been in any region where foot-and-mouth disease or rinderpest exists, except when moving under seal as described in 9CFR 94.16(c).
- 4 Includes baking mixes, cocoa mixes, drink mixes, instant cake mixes, instant pudding mixes, liquid drink mixes containing reconstituted dry milk or dry milk products (including those that contain sugar), and potato flakes.

Non Shelf-Stable Milk and Milk Products

TABLE 3-14-4 Non Shelf-Stable Milk and Milk Products

If the fresh (chilled or frozen) milk or milk product is:	And the country or region of export is:	And:	And:	Then:	
<ul style="list-style-type: none"> ◆ Chocolate milk ◆ Clotted cream ◆ Eggnog ◆ Flavored milk ◆ Half-and-half ◆ Heavy cream ◆ Ice cream ◆ Infant formula ◆ Lactose-free milk ◆ Milk ◆ Sherbert ◆ Skim milk ◆ Whey ◆ Whipping cream ◆ Mixtures of the above products 	Canada	→	Is appropriately certified ¹	RELEASE	
			Lacks the required certification	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer the opportunity to obtain the appropriate certification	
	Other than Canada	Affected with FMD		Is accompanied by a VS issued permit	RELEASE or CONTROL as specified on the permit
				Lacks a VS issued permit	REFUSE ENTRY
		Free from FMD		Is appropriately certified ²	RELEASE
				Lacks the required certification ²	REFUSE ENTRY
	Unknown or not identifiable		→	REFUSE ENTRY	
	Other than one listed in the cell above	→			1. DO NOT RELEASE the HOLD 2. CONTACT PPO-VRS-AQI, VMO or VRS-HQ for direction (see Appendix H)

1 Any one of the following is sufficient proof of Canadian origin:

- ◆ Original certificate signed by a Canadian Food Inspection Agency (CFIA) official, stating that the product originated in Canada or was legally imported into Canada (may be quarterly certificate)
- ◆ North American Free Trade Agreement (NAFTA) certificate of origin (also known as Customs Form 434, available at <www.customs.gov/download/forms/pdf/434.pdf>); this form is also acceptable if produced on company letterhead or Canadian letterhead
- ◆ Invoice listing is a Canadian vendor
- ◆ Labels, commercially printed, that indicate the material is a product of Canada

2 A certificate endorsed by the Veterinary Service of the exporting country or region, that has the following statement:

The milk/milk product was processed in [name of country], a region listed in 9CFR 94.1(a)(2), from milk produced in [name of country], a region listed in 9CFR 94.1(a)(2) as free of foot-and-mouth disease and rinderpest. The milk/milk product has **never** been in any region where foot-and-mouth disease or rinderpest exists, except when moving under seal as described in 9CFR 94.16(c).

Milk Products With Sugar as an Ingredient

If the product is a milk product with sugar listed as an ingredient, which includes sweetened milk, sweetened condensed milk, mixtures of sweetened milk or sweetened condensed milk, and sweetened shelf-stable milk, sweetened shelf-stable cream, and sweetened shelf-stable eggnog, then see **Table 3-14-5** below to determine the action to take.

If the product is canned or packaged shelf-stable product that contains dry milk or powdered milk (as opposed to whole milk), then see **Table 3-14-3 on page 3-14-8**.

TABLE 3-14-5 Action for Sweetened Milk, Sweetened Condensed Milk, Sweetened Milk Mixtures, and Sweetened Shelf-Stable Milk, Cream, or Eggnog

If the product is:	And the country or region of export is:	And is:	And the shipment:	Then:
<ul style="list-style-type: none"> ◆ Sweetened milk with sugar listed as an ingredient ◆ Sweetened condensed milk with sugar listed as an ingredient ◆ Sweetened milk mixtures or sweetened condensed milk mixtures with sugar listed as an ingredient ◆ Sweetened, shelf-stable milk, cream, eggnog, or liquid infant formula with sugar listed as an ingredient 	Canada	→	Is appropriately certified ¹	RELEASE
	Other than Canada		Affected with FMD	Lacks the required certification
		Is accompanied by a VS permit		RELEASE or CONTROL as specified on the permit
	Free from FMD	→	Lacks a VS permit	REFUSE ENTRY
	RELEASE			

1 Any one of the following is sufficient proof of Canadian origin:

- ◆ Original certificate signed by a Canadian Food Inspection Agency (CFIA) official, stating that the product originated in Canada or was legally imported into Canada (may be quarterly certificate)
- ◆ North American Free Trade Agreement (NAFTA) certificate of origin (also known as CBP Form 434, available at <http://www.customs.gov/xp/cgov/toolbox/forms/f>); this form is also acceptable if produced on company letterhead or Canadian letterhead
- ◆ Invoice listing is a Canadian vendor
- ◆ Labels, commercially printed, that indicate the material is a product of Canada

Cheese

Hard or Processed Cheese

TABLE 3-14-6 Action to Take on Hard or Processed Cheese

If the cheese is:	And:	Then:
◆ Pasteurized, processed cheese (such as processed cheese, processed cheese food, processed cheese spread, processed cheese products) excludes cold pack cheese	Contains meat	GO to Table 3-14-8
	Contains no meat	RELEASE
◆ Solid cheese (hard or soft or semi-soft) including feta cheese, Brie, Camembert or cheese in brine		
◆ Cold pack cheese		GO to Table 3-14-7

Liquid or Soft Cheese

TABLE 3-14-7 Action to Take on Liquid or Soft Cheese

If the cheese is:	And the country or region of export is:	And the country or region of export is:	And:	Then:
<ul style="list-style-type: none"> ◆ Cheese that pours like heavy cream (such as Cheeseflo from Great Britain, Mascarpone from Italy, requeijao from Brazil, Vacherin Mont d'Or from France) ◆ Cold pack cheese ◆ Cottage cheese ◆ Liquid Cheese ◆ Products containing cheese that pours like heavy cream, cold pack cheese, cottage cheese, liquid cheese, or ricotta cheese ◆ Ricotta cheese 	Canada		Is accompanied by proof of Canadian origin ¹ Lacks the required proof of Canadian origin ¹	RELEASE 1. DO NOT RELEASE the HOLD 2. PROVIDE the importer the opportunity to obtain the appropriate certification
	Other than Canada	Affected with FMD	Is accompanied by a VS-issued permit Lacks a VS-issued permit	RELEASE or CONTROL as specified on the permit REFUSE ENTRY
		Free from FMD	Accompanied by appropriate certification ² Lacks appropriate certification ²	RELEASE REFUSE ENTRY

1 Any one of the following is sufficient proof of Canadian origin:

- Original certificate signed by a Canadian Food Inspection Agency (CFIA) official, stating that the product originated in Canada or was legally imported into Canada (may be quarterly certificate)
- North American Free Trade Agreement (NAFTA) certificate of origin (also known as Customs Form 434, available at <www.customs.gov/download/forms/pdf/434.pdf>); this form is also acceptable if produced on company letterhead or Canadian letterhead
- Invoice listing is a Canadian vendor
- Labels, commercially printed, that indicate the material is a product of Canada

2 A certificate endorsed by the Veterinary Service of the exporting country or region, that has the following statement:

The milk/milk product was processed in *[name of country]*, a region listed in 9CFR 94.1(a)(2), from milk produced in *[name of country]*, a region listed in 9CFR 94.1(a)(2) as free of foot-and-mouth disease and rinderpest. The milk/milk product has **never** been in any region where foot-and-mouth disease or rinderpest exists, except when moving under seal as described in 9CFR 94.16(c)

Solid Cheese and Pasteurized, Processed Cheese Containing Meat

TABLE 3-14-8 Regulatory Action on Solid Cheese and Pasteurized Processed Cheese that Contains Meat

If the meat source is:	And the country or region of export is:	And the percentage of meat in the solid cheese or pasteurized processed is:	And the importation:	Then:
Ruminant	Affected with BSE	—————→		REFUSE ENTRY
	Affected with BSE in combination with FMD	—————→		REFUSE ENTRY
	Minimal risk for BSE ¹	Greater than 2% meat	Is accompanied by CFIA Annex A-1	REFER to FSIS
			Lacks the required CFIA Annex A-1	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)
		2% or less meat	Is accompanied by CFIA A-4	RELEASE
			Lacks the required CFIA Annex A-4	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)
	Free from BSE and FMD	—————→	Is accompanied by the appropriate certification ²	RELEASE

			Lacks the appropriate certification ³	REFUSE ENTRY	
	2% or less meat		Is appropriately certified ³	RELEASE	
			Lacks the appropriate certification ³	REFUSE ENTRY	

1 Currently Canada is the **only** country designated at minimal risk for BSE.

2 A certificate endorsed by the Veterinary Service of the exporting country or region, that has the following statement:

The milk/milk product was processed in [name of country], a region listed in 9CFR 94.1(a)(2), from milk produced in [name of country], a region listed in 9CFR 94.1(a)(2) as free of foot-and-mouth disease and rinderpest. The milk/milk product has never been in any region where foot-and-mouth disease or rinderpest exists, except when moving under seal as described in 9CFR 94.16(c).

- 3 A Department-approved meat inspection certificate prescribed in 9CFR 327.4 and additional certification issued by a full-time salaried veterinary official of the agency in the national government that is responsible for the health of the animals within that region, which gives the name and official establishment number of the establishment where the animals were slaughtered, and states that
- ◆ The slaughtering establishment is **not** permitted to receive animals that originated in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in a region listed in 9 CFR 94.1(a) as a region infected with rinderpest or foot-and-mouth disease.
 - ◆ The slaughtering establishment is **not** permitted to receive meat or other animal products derived from ruminants or swine which originated in such a rinderpest or foot-and mouth disease affected region, or meat or other animal products from a rinderpest and foot-and-mouth disease free region transported through a rinderpest or foot-and-mouth disease affected region except in containers sealed with serially-numbered seals of the national government of the non-affected region of origin.
 - ◆ The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed in 9 CFR 94.1(a)(2) as free or rinderpest and foot-and-mouth disease and the meat or other animal product has **never** been in any region in which rinderpest and foot-and-mouth disease existed.
 - ◆ The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that **do not** comply with the conditions contained in this certificate.
 - ◆ The slaughtering establishment is not permitted to receive animals that originated in, or have ever been

Milk Products or Mixtures that Contain Milk Products

Mixtures that Contain Milk Products with Other Animal-Derived Ingredients

TABLE 3-14-9 Mixtures that Contain Milk Products With Other Animal-Derived Ingredients

If the:	And the mixture is for:	And:	Then:
Mixture contains milk products with other animal-derived ingredients	Human consumption (such as cream of chicken soup, cream of potato soup with bacon)	Canned, shelf stable (non-perishable)	GO to Table 3-14-10
		Other than canned, shelf stable (product is perishable)	<ol style="list-style-type: none"> DO NOT RELEASE the HOLD ADVISE the importer that the importation requires a VS permit to enter PROVIDE the importer with the appropriate options, including how to apply for a permit (see Table 2-4-16)
	Livestock consumption (such as lamb starter, pig starter, veal starter)	One of the ingredients is a rendered product (such as meat meal or blood meal) from poultry, ruminant, or swine	GO to Table 3-14-11
		None of the ingredients is a rendered product	<ol style="list-style-type: none"> DO NOT RELEASE the HOLD CONTACT PPQ-VRS-AQI, VMO or VRS-HQ for direction (see Appendix H)

Introduction

The *Miscellaneous Products* section covers products which **do not** fit appropriately under any other section in the *Reference* chapter. These products are listed as follows:

- ◆ Asian medicinal products
- ◆ Birds' nests
- ◆ Cosmetics
- ◆ Fomites

- ◆ Human pharmaceuticals that contain animal-derived components¹
- ◆ Human vaccines that contain animal-derived components¹
- ◆ Products of biotechnology
 - ❖ DNA
 - ❖ Plasmid
 - ❖ Probe
 - ❖ RNA
- ◆ Salt scrapings

These products are regulated because they are at risk of transmitting animal disease viruses. The products can transmit viruses by association with animals or by being made from animal by-products.

Also, listed in the locator ([Table 3-15-2](#)) are examples of miscellaneous products that are admissible and **do not** require a VS permit.

When a VS permit authorizes entry of the miscellaneous product, match the following information on the shipping documents with that on the permit:

- ◆ Current date
- ◆ Description of the material
- ◆ Shipper
- ◆ Consignee
- ◆ Conditions spelled out on the permit

Follow [Table 3-15-1](#) as you match the permit with the shipping documents.

¹ If there are no animal-derived components, then the product is unrestricted.

TABLE 3-15-1 Action to Take on Miscellaneous Products Imported Under VS Permit

If:	And the shipping documents:	And the:	Then:
Miscellaneous products imported under VS Permit	Match the permit		RELEASE or CONTROL as specified on the permit
	Do not match the permit	Permit has expired	1. DO NOT RELEASE the HOLD 2. HAVE the consignee contact VS, TTSPS for renewal (see Table 2-4-17) 3. SAFEGUARD the importation until you hear from VS, TTSPS
		Discrepancy is other than an expired permit	1. DO NOT RELEASE the HOLD 2. CONTACT PPQ-VRS-AQI or PPQ-VRS-HQ personnel for further action (see Appendix H)

Locator

When a VS permit does **not** authorize entry, use [Table 3-15-2](#) which directs you to the final regulatory action to take.

TABLE 3-15-2 Determine Where to Find the Regulatory Action on Miscellaneous Products Not Authorized by a Permit

If:	And the importation is:	Then:
Miscellaneous products that are not authorized by a permit	Animal products to be incorporated into cosmetics	GO to Table 3-15-13
	Antibiotics	RELEASE
	Asian medicinal products	GO to Table 3-15-14
	Birds' nests	GO to Table 3-15-3
	Cheese and yogurt starters ◆ <i>Lactobacillus</i> sp. ◆ <i>Streptococcus</i> sp. ◆ Fungi, including yeast	RELEASE
	Chemically synthesized, biosynthesized, and natural products	GO to Chemically Synthesized, Biosynthesized, and Natural Products on page 3-15-26
	Fomites (carriers, footwear, garbage, used farm machinery, meat covers, semen and embryo containers, hay or straw, egg cartons, crates, flats, or liners)	GO to Fomites on page 3-15-6
	Fungal cultures (non-pathogenic to livestock or avian)	RELEASE only if not a plant pest
	Human pharmaceuticals, including dietary supplements, and human vaccines	Go to Human Pharmaceuticals and Human Vaccines
	Tallow derivatives	GO to Table 3-15-23
Paraffin or resin embedded materials (non-livestock)	RELEASE	

Birds' Nests

Birds' nests are imported for both edible and inedible purposes. Edible birds' nests are the dried, glutinous secretion from salivary glands of Southern Asiatic swifts. These nests are used in making soup.

Apply plant regulations to all importations of birds' nests. They **must** be free from soil and prohibited plant material such as wheat (or related genera) straw, rice straw, corn (or related genera) straw, noxious weed propagules, or parasitic plants and their seeds.

TABLE 3-15-3 Birds' Nests

If the birds' nests are:	And the country or region of export is:	And the importation:	Then:
<ul style="list-style-type: none"> ◆ Edible ◆ Inedible 	Affected with HPAI (H5N1) only	Is accompanied by a VS permit	RELEASE  The importation may be subject to plant regulations.
		Lacks a VS permit	REFUSE ENTRY
	Affected with both HPAI (H5N1) and END	Is accompanied by a VS permit	RELEASE  The importation may be subject to plant regulations.
		Lacks a VS permit	REFUSE ENTRY
	Affected with END only	Is appropriately certified ¹	RELEASE
		Lacks certification	REFUSE ENTRY
Free from both HPAI (H5N1) and END		RELEASE	

¹ An official government veterinary certificate stating the birds' nests were heated to a minimum internal temperature of 161°F (72°C).

Fomites

Fomites are inanimate objects that may be contaminated with animal disease viruses and could transmit those viruses into the United States. Fomites are those importations which are likely to have come in contact with animals or animal products, such as:

- ◆ Barn dirt
- ◆ Barn sand
- ◆ Barns (brick, adobe, wood)
- ◆ Carriers
- ◆ Clothing
- ◆ Containers
- ◆ Egg cartons, crates, flats, or liners
- ◆ Farm machinery, used
- ◆ Feed
- ◆ Feeders
- ◆ Feed utensils
- ◆ Footwear
- ◆ Garbage
- ◆ Garden soil
- ◆ Hair, livestock
- ◆ Hay
- ◆ Meat covers
- ◆ Pails
- ◆ Road sand
- ◆ Semen and embryo containers
- ◆ Soil
- ◆ Stalls
- ◆ Straw, hay, and grass
- ◆ Vehicles
- ◆ Walls, brick, and plaster
- ◆ Wood

Procedures for taking regulatory action on some of the fomites listed above occur in the *Manual for Agricultural Clearance (MAC)*, and are also regulated under the plant regulations and appear in the *Plant Import—Nonpropagative Volume of Manuals*.

Carriers Including Containers

Aircraft, ship, railroad car, and truck carriers and containers are considered a risk when found contaminated with evidence of blood, hay, straw, manure, or garbage. Procedures for taking action on trucks from Mexico that are found contaminated with animal material are covered under ***Trucks Transporting Livestock from Mexico*** on **page 2-2-12**. Procedures for taking action on other contaminated carriers are in *Manual for Agricultural Clearance (MAC)* and will **not** be repeated here.

Egg Cartons, Crates, Flats, or Liners

Egg cartons, crates, flats, or liners can be contaminated with blood, feathers, manure, shell, or egg. Go to **Table 3-15-4** for action to take.

TABLE 3-15-4 Egg Cartons, Crates, Flats, or Liners

If:	And upon inspection, the packing material is:	Then:
◆ Eggs cartons	Clean and uncontaminated	RELEASE
◆ Egg crates	Contaminated with blood, egg shell, egg breakage, feathers, or manure	REQUIRE the importer to REMOVE and DESTROY the packing material
◆ Egg flats		
◆ Egg liners		

Used Farm Machinery

Used farm machinery includes vehicles, equipment, and other implements used in agricultural and farming operations. Go to [Table 3-15-5](#) to regulate imported farm machinery that is used (**not** new).

TABLE 3-15-5 Imported, Used Farm Machinery

If:	And the country or region of export is:	And the importation:	And visual inspection reveals the machinery:	Then:
Imported, used farm machinery	Affected with FMD	Is appropriately certified ¹	Is clean	RELEASE
			Is dirty ²	1. COMPLETE PPQ Form 523, Emergency Action Notification 2. PROVIDE the importer with the appropriate options ❖ Re-export ❖ Clean and wash ³
		Lacks certification	→	REFUSE ENTRY
	Free from FMD	→	Is clean	RELEASE
Is dirty ²	1. COMPLETE PPQ Form 523, Emergency Action Notification (since dirty farm machinery is unrestricted from FMD-free countries, this is to take care of plant pests) 2. REQUIRE that the equipment be cleaned and washed prior to entry			

1 A government certificate signed by an official representative of the national health service of the region or area of origin [for example, UK Department of Environment, Food and Rural Affairs (DEFRA)]. The certificate **must** carry an official seal and a statement declaring that, "The used farm equipment indicated on this certificate has been steam cleaned and is free of all dirt and particulate matter." In addition, the certificate **must** also supply the following information:

- ◆ Date of issue of the certificate
- ◆ Name and address of the applicant
- ◆ Name and address of the consignor
- ◆ Name and address of the consignee
- ◆ Date the equipment was cleaned
- ◆ Container number or marks
- ◆ Serial number of each piece of equipment
- ◆ Name of vessel or carrier
- ◆ Bill of lading number
- ◆ Description of the piece of equipment

The Vietnamese regulatory agency for issuing and certifying certificates of steam cleaning for used farm equipment is "The Vietnam Pesticide Company/Termite Control & Fumigation Company."

2 If a coating of road film is the **only** visible dirt found, and **no** other organic matter is present, RELEASE the machinery.

- 3 Used farm machinery that is dirty may be allowed entry if the machinery is cleaned at a port which has a cleaning facility. If the port of entry **does not** have a cleaning facility, then the importer or the importer's agent may choose to send the machinery directly to a port with a cleaning facility. However, **never** allow overland transport. If the cleaning option is **not** selected, the importer or the importer's agent **must** re-export the machinery within 48 hours. If workable, take digital photographs of the equipment and the certificate and submit to the local AQI VMO for follow-up with the country or region that supplied the certification (for AQI VMO contact information see [Figure H-1-2](#)).

Footwear

Shoes or boots which have been used on a farm or ranch that has livestock or poultry and is located in a country with diseases of concern, may be contaminated. Procedures for taking action on footwear are under ***Articles That Require Cleaning and Disinfection*** on page 2-4-13.

Garbage

Garbage includes all waste material derived from fruit, vegetables, meat, or other plant or animal (including poultry) parts; any refuse associated with the waste material on board a carrier, including food scraps, table refuse, galley refuse, food wrappers, or packaging material; other waste material from stores, food preparation areas, passengers' or crews' quarters, dining rooms, or any other area on a carrier. Garbage also means food and meals that were available for consumption by passengers and crew on a carrier, but were **not** consumed. Procedures for controlling garbage are in the *Manual for Agricultural Clearance* (MAC) and will **not** be repeated here.

Semen and Embryo Containers

All containers that have been previously used to transport semen or embryos present a risk of introducing animal diseases. These containers may be manifested as nitrogen containers. First, you **must** ensure that the semen or embryo containers are empty. Then you can take the appropriate action based on the country of origin and animal class of the semen or embryo. The procedures for handling empty semen or embryo containers are under the *Procedures* section, ***Clearing Regulated Cargo***.

Straw, Hay, and Grass, and Canadian Origin Soil

Straw, hay, and grass can be contaminated by animal diseases through association with animals. Such plant material may also harbor ticks. Therefore, straw, hay, and grass imported as animal feed, as animal bedding, as packing material, or for manufacturing is regulated under animal regulations.

The following straw, hay, or grass materials are **not** subject to animal regulations:

- ◆ Manufactured items such as mats, hats, souvenirs, jackets, brooms, and naturally dried flowers
- ◆ Straw, hay, or grass obviously selected, processed, and packed for sale or distribution as decorative material
- ◆ Related plant products such as broomcorn, sugarcane, corn, silage soybeans, soybean meal, and flax

Note that these previously bulleted importations may be subject to plant regulations and appear in the *Plant Import: Nonpropagative Volume of Manuals*.

Importations of Canadian origin soil are **unrestricted** due to animal health concerns. Importations of straw, hay and grass from Canada, New Zealand, and Norway are **unrestricted** since these countries are free from fever ticks and FMD; however, importations from all countries may be subject to plant regulations.

TABLE 3-15-6 Straw, Hay and Grass

If:	And the country or region of export is:	And:	And:	Then:
◆ Grass ◆ Hay ◆ Straw	Canada, New Zealand or Norway	—————→		1. RELEASE for animal health concerns 2. APPLY plant quarantines as appropriate
	Mexico	The State of Chihuahua, or Sonora, or the Mexicale region of Baja California Norte	Certified ¹	REFUSE ENTRY
		State other than Chihuahua or Sonora or the Mexicale region of Baja California Norte	—————→	
	Other than Canada, New Zealand or Norway	—————→		GO to Table 3-15-7

¹ Certified by a salaried, federal veterinarian of the Mexican government as originating from the State of Chihuahua or Sonora or the Mexicale region of Baja California Norte.

TABLE 3-15-7 Straw, Hay and Grass from Countries Other Than Canada, Mexico, New Zealand, or Norway

If:	And the country or region of export is:	And is the importation is to be used for:	And the importation is:	Then:	
<ul style="list-style-type: none"> ◆ Grass ◆ Hay ◆ Straw 	<p>Other than Canada, Mexico, New Zealand, or Norway</p>	Animal feed or bedding	→	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. CONTACT PPQ-VRS-AQI or PPQ-VRS-HQ personnel for further action (see Figure H-1-2) 3. If released for animal health concerns, apply plant quarantines as appropriate 	
		Manufacturing	Consigned to an approved establishment		AUTHORIZE shipment under seal with a VS Form 16-78 (see Appendix K to complete the form)
			Not consigned to an approved establishment		<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)
		Packing material		→	<ol style="list-style-type: none"> 1. ALLOW importer to remove if practicable; otherwise REFUSE ENTRY 2. REQUIRE that the packing material be destroyed 3. GO to Disinfection on page 2-4-13¹
		Samples for research	Accompanied by a VS permit		RELEASE
			Lacks a VS permit		REFUSE ENTRY
Not listed above		→	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. CONTACT PPQ-VRS-AQI or PPQ-VRS-HQ personnel for further action (see Figure H-1-2) 3. If released for animal health concerns, apply plant quarantines as appropriate 		

1 To disinfect whatever the packing material was in contact with.

Used Meat Covers and Scrap Bagging

Meat covers are burlap or cloth covers that were previously used to wrap fresh or frozen meat. Also regulated are mixed importations of scrap bagging with one or more pieces of material identified as being used to cover meat.

Important

Used burlap bags and covers which have been used for plant products are regulated under the plant regulations. Refer to the *Plant Import: Nonpropagative Volume of Manuals*.

TABLE 3-15-8 Used Meat Covers and Scrap Bagging

If the importation is:	And the country or region of export is:	Then:
◆ Used meat covers	Free from ASF, CSF, SVD, and FMD	RELEASE
◆ Scrap bagging	Affected with ASF, CSF, SVD, or FMD	REFUSE ENTRY

Human Pharmaceuticals and Human Vaccines

To regulate imported pharmaceuticals, first read the label or accompanying data sheet, fact sheet, or information sheet. The label and sheets are your main source for information about the product's ingredients. The label should identify any animal-derived components that are present in the product. Continue to [Table 3-15-9](#).

Important

Read the label first (and any accompanying data, fact, or information sheets) to ascertain if the product contains any animal-derived components.

TABLE 3-15-9 Human Pharmaceuticals and Human Vaccines

If:	And after reading the label, you verify that there are:	Then:
◆ Human pharmaceuticals	No animal-derived components in the product	RELEASE
◆ Human vaccines	Animal-derived components in the product	GO to Table 3-15-10

Human Pharmaceuticals, Human Vaccines, Antivenom, Dietary Supplements, Organs and Their Derivatives, and Nutraceuticals Containing Animal-derived Components

TABLE 3-15-10 Human Pharmaceuticals, Human Vaccines, Antivenom, Dietary Supplements, Organs and Their Derivatives, and Nutraceuticals Containing Animal-derived Components

		Lacks a VS Permit	REFUSE ENTRY		

1 Applies to both commercial shipments and personal use shipments in passenger baggage/mail shipments

- 2 Any one of the following is sufficient proof of Canadian origin:
 - ◆ Original certificate signed by a Canadian Food Inspection Agency (CFIA) official, and stating the product originated in Canada or was legally imported into Canada (may be quarterly certificate)
 - ◆ North American Free Trade Agreement (NAFTA) certificate of origin (CBP Form 434, available at <https://forms.customs.gov/customsrf/getformharness.asp?formName=cf-434-form.xft>); this form is also acceptable if produced on company letterhead or Canadian letterhead
 - ◆ Invoice listing a Canadian vendor
 - ◆ Labels, commercially printed, that indicate the material is a product of Canada
- 3 Certification, endorsed by the Veterinary Service of the originating country or region, that has the following statement: The milk/milk product was processed in *[name of country]*, a region listed in 9CFR§94.1(a)(2) as free of foot-and-mouth disease and rinderpest, from milk produced in *[name of country]*, a region listed in 9CFR§94.1(a)(2) as free of foot-and-mouth disease and rinderpest. The milk/milk product has never been in any region where foot-and-mouth disease and rinderpest exists, except when moving under seal as described in 9CFR§94.16(c).

Dietary Supplements Containing Milk/Milk Products as the Only Animal-Origin Ingredient

TABLE 3-15-12 Dietary Supplements Containing Milk/Milk Products as the Only Animal-Origin Ingredient

If the product is:	And the country or region of export is:	And:	And:	And:	Then:
Dietary supplement containing milk/milk products as the only animal-origin ingredient ¹	Canada			Is appropriately certified ²	RELEASE
				Lacks the required certification ²	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer the opportunity to obtain the certification

		Milk/milk Products originated in an FMD-affected region			Is accompanied by a VS Permit
Lacks a VS Permit	REFUSE ENTRY				

1 Applies to both commercial shipments and personal use passenger baggage and mail shipments.

2 Any one of the following is sufficient proof of Canadian origin:

- ◆ Original certificate signed by a Canadian Food Inspection Agency (CFIA) official, and stating the product originated in Canada or was legally imported into Canada (may be a quarterly certificate)
- ◆ North American Free Trade Agreement (NAFTA) certificate of origin (CBP Form 434, available at <https://forms.customs.gov/customsrf/getformharness.asp?formName=cf-434-form.xft>); this form is also acceptable if produced on company letterhead or Canadian letterhead
- ◆ Invoice listing a Canadian vendor
- ◆ Labels, commercially-printed, that indicate the material is a product of Canada

3 Certification, endorsed by the Veterinary Service of the originating country or region, that has the following statement:

The milk/milk product was processed in [name of country], a region listed in 9CFR§94.1(a)(2) as free of foot-and-mouth disease and rinderpest, from milk produced in [name of country], a region listed in 9CFR§94.1(a)(2) as free of foot-and-mouth disease and rinderpest. The milk/milk product has never been in any region where foot-and-mouth disease or rinderpest exists, except when moving under seal as described in 9CFR§94.16(c).

Cosmetics

Cosmetics may have several ingredients of animal origin; however, if those cosmetics are packaged and ready for sale, then they are unrestricted. **Only** bulk components of animal products **other than** tallow derivatives or animal origin components covered by a veterinary services guideline, to be incorporated into cosmetics, may be regulated.

TABLE 3-15-13 Cosmetics Containing Animal Products

If:	And the cosmetics are:	And are:	And the importation:	Then:
Cosmetics containing animal products	Shipped In final, finished packaging and ready for sale	—————→		RELEASE
	Animal origin components not listed below and are regulatd in other sections of the Animal Product Manual	—————→		Go to the applicable section in the Animal Product Manual and regulate accordingly.
	Animal origin components not regulated in other sections of the Animal Product Manual	Shipped as bulk components of animal origin ¹ , other than tallow derivatives or animal origin components covered by a Veterinary Services guideline ² , to be incorporated into cosmetics	Is accompanied by a VS permit	RELEASE or CONTROL as specified on the permit
			Lacks a VS permit	REFUSE ENTRY
		Shipped as bulk components of animal origin ¹ , other than tallow derivatives or animal origin components covered by a Veterinary Services guideline ² , to be repackaged into final, finished form and ready for sale	Accompanied by a VS permit	RELEASE or CONTROL as specified on the permit
			Lacks a VS permit	REFUSE ENTRY
	Tallow derivatives (e.g., tallow derived: linoleic acid, stearic acid, glycein, etc.)	—————→		RELEASE
	Animal origin components covered by a Veterinary Services guideline ²	Is accompanied by applicable Veterinary Services guideline documentation ²	RELEASE	
Lacks applicable Veterinary Services guideline documentation ²		REFUSE ENTRY		

1 Components of animal origin except for tallow derivatives or animal origin components covered by a Veterinary Services guideline. For example, amniotic fluid extract, amniotic liquid, collagen, extracts of connective tissue, or placental extract.

- 2 Guideines are available for the following products: human pharmaceuticals and human vaccines containing animal components; human and non-human primate material (excluding cell cultures); feline and canine material; live laboratory mammals and their material (for research purposes); amphibians, fish, reptiles, shellfish and aquatic species (includes venom); chemically synthesized materials; microbially produced materials; recombinant microbes and their products; non-pathogenic microorganisms; pet chews; cell cultures/lines, recombinant cell cultures/lines, and their products (for in vitro use); test kits; and animal feeds, feed supplements, and pre-mixes. For Veterinary Services guidelines go to: http://www.aphis.usda.gov/vs/ncie/fac_imp.html. If you do not have internet access then contact your local PPQ-AQI-VMO list in [Figure H-1-2](#) or PPQ-VRS-Headquarters Personnel listed in [Figure H-1-1](#).

Asian Medicinal Products

Asian medicinal products are regulated to exclude animal diseases. Importations may include, but are **not** limited to the following animal by-products:

- ◆ Antlers
- ◆ Bones
- ◆ Extracts
- ◆ Glands
- ◆ Hoofs
- ◆ Organs
- ◆ Secretions
- ◆ Skin
- ◆ Tendons
- ◆ Tissue

Examine the by-products to determine their origin. If you **cannot** determine the origin, then look at an invoice or label, and ask the importer.

To locate the regulatory action to take on Asian medicinal products, continue to [Table 3-15-14](#).

TABLE 3-15-14 Asian Medicinal Products

Chemically Synthesized, Biosynthesized, and Natural Products

The chemically synthesized, biosynthesized, and natural products section covers chemically synthesized products and products having to do with or formed from biotechnology. These recombinant products result from foreign genes being inserted into microorganisms (for example, yeast and bacteria) or cells (i.e., cell culture). Genetic materials (DNA or RNA for example) can be produced either through biotechnology or chemical synthesis.

A list of some chemically synthesized and biosynthesized (recombinant), and natural products and their categories follows in [Figure 3-15-1](#).

Biosynthesized Proteins	Chemically Synthesized Products	Genetic Materials
◆ Amino acids	◆ Chemicals	◆ cDNA probes
◆ Enzymes	◆ Lipopeptides	◆ DNA vector
◆ Growth factors	◆ Oligopeptides	◆ Nucleic acids (DNA, RNA)
◆ Hormones	◆ Polypeptides	◆ Plasmids (DNA, cDNA)
◆ Interleukins	◆ Steroids	◆ Primers (nucleotides)

FIGURE 3-15-1 List of Chemically Synthesized, Biosynthesized, and Natural Products and Their Categories

In regulating these products, you need to determine whether the product was chemically synthesized (i.e., synthetic) or biosynthesized (recombinant). If the product was biosynthesized, you need to further determine whether the product was produced in cell culture or microbially.

Use the [Glossary](#) and [Index](#) to determine if a product fits under this section of synthetic or biosynthesized products. Determine whether a product is synthetic by using accompanying statements from producers and shippers.

When a VS permit does **not** authorize entry to the material, use [Table 3-15-17](#) which directs you to the final regulatory action to take.

TABLE 3-15-17 Locator for Chemically Synthesized, Biosynthesized, and Natural Products

			Lacks the shipper/producer's declaration ⁴	REFUSE ENTRY

1 A declaration which provides, in a clear and concise manner, the following information:

- ◆ A detailed and accurate description of the material
- ◆ Confirmation, if applicable, that the material is produced by microbial fermentation
- ◆ Identification of the animal derived additive or stabilizer
- ◆ Confirmation that the material will be used only in vitro

2 A declaration which provides, in a clear and concise manner, the following information:

- ◆ A detailed and accurate description of the material
- ◆ Confirmation if applicable, that the material is produced by microbial fermentation
- ◆ Confirmation that the preparation **does not** contain any animal-derived additives, such as albumin

3 A declaration which provides, in a clear and concise manner, the following information:

- ◆ A detailed name or description of the microbe/recombinant product, including genetic insert
- ◆ Identification of the additive or stabilizer
- ◆ Confirmation that the material is produced by recombinant microbial expression (vector **must not** be considered pathogenic for livestock or avian species)
- ◆ Confirmation that the organism **does not** contain genes or express antigens of livestock or poultry disease agents
- ◆ Confirmation that the product will be used only in vitro

4 A declaration which provides, in a clear and concise manner, the following information:

- ◆ A detailed name or description of the microbe/recombinant product, including genetic insert
- ◆ Confirmation that the preparation **does not** contain any animal-derived additives, such as albumin
- ◆ Confirmation that the material is produced by recombinant microbial expression (vector **must not** be considered pathogenic for livestock or avian species)
- ◆ Confirmation that the organism **does not** contain genes or express antigens of livestock or poultry disease agents

Chemically Synthesized Proteins, Peptides, Enzymes, Hormones

TABLE 3-15-20 Chemically Synthesized Proteins/Peptides/Enzymes/Hormones

If:	And the importation:	Then:
◆ Chemically synthesized enzymes	Is accompanied by VS-recommended documentation ¹	A USDA permit is not required. RELEASE
◆ Chemically synthesized hormones	Lacks the VS-recommended documentation ¹	CONTACT USDA-APHIS-VS-National Center for Import and Export at 301/734-3277 to determine if a USDA permit is required
◆ Chemically synthesized peptides		
◆ Chemically synthesized proteins		
◆ Chemically synthesized materials other than listed above		

1 VS recommends the following documentation accompany each shipment: a written statement
 Identifying the material (name)
 Confirming the material is chemically synthesized
 Confirming that the material does not contain any animal or cell culture derived products
 Confirming that the material was not derived from any animal or cell culture derived products

Plasmids, Nucleic Acids (RNA, DNA), Primers, Probes

- Identification of the animal derived additive or stabilizer
- Confirmation that the material will be used only in vitro

2 A declaration which provides, in a clear and concise manner, the following information:

- A detailed and accurate description of the material
- Confirmation if applicable, that the material is produced by microbial fermentation
- Confirmation that the preparation **does not** contain any animal-derived additives, such as albumin

3 A declaration which provides, in a clear and concise manner, the following information:

- A detailed name or description of the microbe/recombinant product, including genetic insert
- Identification of the additive or stabilizer
- Confirmation that the material is produced by recombinant microbial expression (vector **must not** be considered pathogenic for livestock or avian species)
- Confirmation that the organism **does not** contain genes or express antigens of livestock or poultry disease agents
- Confirmation that the product will be used only in vitro

- 4 A declaration which provides, in a clear and concise manner, the following information:

A detailed name or description of the microbe/recombinant product, including genetic insert

Confirmation that the preparation **does not** contain any animal-derived additives, such as albumin

Confirmation that the material is produced by recombinant microbial expression (vector **must not** be considered pathogenic for livestock or avian species)

Confirmation that the organism **does not** contain genes or express antigens of livestock or poultry disease agents

Salt Scrapings

Salt scrapings is salt that has been reclaimed from salted casings. The product is usually imported as a brine solution discolored with a red dye. The discoloration is used so the scrapings **do not** enter the human food chain.

TABLE 3-15-22 Salt Scrapings from Animal Casings

If:	And the salt scrapings are from a country of origin that is:	And the importation:	Then:
Salt scrapings from animal casings	Affected with ASF or BSE	→	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)
	Free from ASF and BSE	Is accompanied by a veterinary certificate ¹	RELEASE
		Lacks the certification ¹	DO NOT RELEASE the HOLD until the importer provides the required certification

1 A veterinary certificate endorsed by the veterinary service of the country from which the salt (brine) from animal casings was reclaimed. The certificate **must** identify the following:

- ◆ The species of animal the casings were from
- ◆ The country or region where the animal casings were processed

Introduction

The *Organs* section covers the internal structure of animals which are imported for purpose **other than** human consumption. This includes the secretions of organs and glands. Organs and related by-products cover whole or partial animal organs and glands, and the excretions, secretions, extracts, and derivatives of organs and glands including the following:

- ◆ Bile (ox gall)
- ◆ Bone marrow
- ◆ Fat
- ◆ Gall stone
- ◆ Gullet (goat)
- ◆ Heart
- ◆ Intestine
- ◆ Kidneys
- ◆ Lips
- ◆ Liver
- ◆ Lungs
- ◆ Musk (including grains and pods)
- ◆ Pancreas
- ◆ Parathyroid gland
- ◆ Pituitary gland
- ◆ Pyloric valve
- ◆ Rennet extract
- ◆ Spleen
- ◆ Stomach (maw)
- ◆ Thyroid gland
- ◆ Tripe
- ◆ Vell (calf)

Not covered in this section are internal animal parts such as:

- ◆ Blood imported for biological use and internal animal parts including organs and glands imported as rendered products; regulate under ***Animal Waste and Related By-Products***
- ◆ Internal animal parts imported as pet food; regulate under ***Pet Food, and Livestock, Poultry, and Aquaculture Feed***
- ◆ Internal animal parts imported for human consumption. May be manifested or invoiced as meat by-products¹ (beef feet, brain, cheeks, heart, hog stomach, kidney, lips, liver, lung, spleen, tail, thymus (sweetbread), tongue, and tripe); regulate under ***Meat and Meat Products***
- ◆ Intestines or bung caps for production of strings or glue; regulate under ***Animal Waste and Related By-Products***
- ◆ Intestines or bung caps for production of casings; regulate under ***Casings***

Organs, glands, and all derivatives of organs and glands of ruminant origin from countries affected with BSE are prohibited, regardless of the purpose for which they are imported.

Organs and Glands Labeled for Pharmaceutical or Technical Use Only

Organs and glands labeled "For pharmaceutical use **only**" or "For technical use **only**" are **not** to be referred to FSIS.

Organs and Their Derivatives Moving Under Permit

When a VS permit authorizes entry of the organ or related by-product, match the information on the shipping documents with the information on the permit as follows:

- ◆ Current date
- ◆ Description of the material
- ◆ Shipper
- ◆ Consignee

¹ Formerly called edible offal.

◆ Conditions spelled out on the permit

Follow [Table 3-16-1](#) as you match the permit with the shipping documents.

TABLE 3-16-1 Action to Take When an Importation Is Authorized Entry with a VS Permit

If the shipping documents:	And the:	Then:
Match the permit	→	RELEASE or CONTROL as specified on the permit
Do not match the permit	Permit has expired	<ol style="list-style-type: none"> DO NOT RELEASE the HOLD HAVE the consignee contact VS, TTSPS (see page 2-4-26) SAFEGUARD the importation until you hear from VS, TTSPS
	Discrepancy is other than an expired permit	<ol style="list-style-type: none"> DO NOT RELEASE the HOLD CONTACT PPQ-VRS-AQI or PPQ-VRS-HQ personnel for further action (see Appendix H)

Locator

When a VS permit does **not** authorize entry to organs and related by-products harvested from slaughtered animals, use [Table 3-16-2](#) which directs you to the final regulatory action.

TABLE 3-16-2 Determine Where to Find the Regulatory Action on Organs and Derivatives Not Authorized Entry by a VS Permit

If the organ or derivative is from:	And the country or region of export is:	Then:
Any animal	Free from BSE	GO to Table 3-16-3
	BSE Minimal Risk	GO to Table 3-16-3
	Affected with BSE	GO to Table 3-16-3

TABLE 3-16-3 Organs and Derivatives

If the intended use is for:	And the product is:	Then:
Animal feed or fertilizer	Rendered	1. REGULATE as rendered products 2. GO to Animal Waste and Related By-Products
	Not rendered	1. REGULATE as fresh organs and glands 2. GO to Table 3-16-4
Pharmaceutical or for research	—————→	GO to Table 3-16-4
Coagulating or curdling milk to make cheese	Rennet (includes calf vells, goat gullets, and lamb stomachs)	GO to Table 3-16-10
	Other than rennet	1. DO NOT RELEASE the HOLD 2. CONTACT PPQ-VRS-AQI or PPQ-VRS-HQ personnel for further action (see Appendix H)
Manufacturing	Intestines or bung caps for other than casings	GO to Table 3-16-9
	Other than intestines or bung caps	
Not disclosed	—————→	1. REGULATE as fresh organs and glands 2. GO to Table 3-16-4

Organs and Their Derivatives for Research or Pharmaceutical Use

Excretions, secretions, extracts, and derivatives of organs and glands may be imported for research and pharmaceutical uses. They are usually in the form of liquids or powders. Some examples of these products follow:

- ◆ Bile
- ◆ Cholesterol
- ◆ Desiccated (dried) liver
- ◆ Enzymes
- ◆ Gall stone
- ◆ Heparin
- ◆ Hormones
- ◆ Insulin (for research purposes only; for pharmaceutical use, see [Table 3-15-10 on page-3-15-13](#))

- ◆ Liver extract (usually in powder form)
- ◆ Oxytocin
- ◆ Pancreas powder
- ◆ Pancreatin
- ◆ Pepsin
- ◆ Thymosin
- ◆ Thyroid powder
- ◆ Trypsin

Unless consigned to an approved establishment, these products or comparable products of avian or livestock origin require a permit. Avian gall stones from HPAI (H5N1)-affected countries/regions and ruminant gall stones require a permit. Return to ***Organs and Their Derivatives Moving Under Permit*** on page 3-16-2.

Some biological products are highly perishable. Therefore, expedite an importation when you are authorized to release the importation. If you **cannot** release the hold, allow the importer to apply dry ice or refrigerate the by-product.

Fresh, Frozen Organs and Glands

TABLE 3-16-4 Fresh, Frozen Organs and Glands from Countries Free from BSE

If the class of animal the organs, glands or derivatives are from is:	Then:
Avian (bird) or poultry	GO to Table 3-16-5
Ruminant	GO to Table 3-16-6
Swine	GO to Table 3-16-7
Neither avian, ruminant, nor swine	GO to Table 3-16-13

- ◆ The material **did not** originate in and was **never** stored, rendered, or otherwise processed in or otherwise associated with a facility a region listed in 9CFR 94.18(a)
- ◆ The material was **not** otherwise associated with any of the materials listed in 9CFR 95.29(a) which have been in a region listed in 9CFR 94.18(a)

2 Policy has been established for swine glands from any country affected with CSF. Contact PPQ, VRS for further action.

Shipping Requirements for Fresh, Frozen Organs and Glands from Countries with Diseases of Concern

All importations of fresh, frozen organs and glands from countries with diseases of concern **must** be shipped in tight, leakproof containers. A sealed, leakproof layer is placed around the absorbent material.

TABLE 3-16-8 Determine Action to Take on Fresh, Frozen Organs and Glands from Countries with Diseases of Concern

If:	And the country or region of export is:	And the containers are:	And the importation is:	Then:
Fresh, frozen organs and glands	Affected with diseases of concern	Not tight and leakproof	→	REFUSE ENTRY
		Tight and leakproof	Consigned to an approved establishment	AUTHORIZE shipment under seal with VS 16-78 (see Appendix K to complete form)
			Not consigned to an approved establishment	<ol style="list-style-type: none"> DO NOT RELEASE the HOLD PROVIDE the importer with the appropriate options (see Table 2-2-11)

Intestines, Bung Caps, and Other Animal Parts for Manufacturing

Moist intestines and bung caps, primarily of ruminants (sheep), are imported for manufacturing into articles such as prophylactics.

TABLE 3-16-9 Intestines, Bung Caps, and Other Animal Parts for Manufacturing from Countries Free from BSE

If:	And the country or region of export is:	And the importation is:	And the importation is:	Then:
Intestines, bung caps, and other animal parts for manufacturing	Free from both BSE and FMD	Accompanied by an official certificate of origin	→	RELEASE
		Not accompanied by the required certification	Consigned to an approved establishment	AUTHORIZE shipment under seal with VS 16-78 (see Appendix K to complete form)
	Not consigned to an approved establishment		1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)	
	Free from BSE, but affected with FMD		→	Consigned to an approved establishment
Not consigned to an approved establishment				1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)

Rennets

A rennet is the membranous lining of the fourth stomach of calves, lambs, or kids. Rennet is also a dried extract made from the stomach lining of a ruminant. To further complicate matters, there are also vegetable rennets (coagulating enzymes from plants), like thistle rennet.

Rennin (or chymosin) is the enzyme in rennet that catalyzes the coagulation of milk in making cheese. Rennin is more commonly produced by recombinant microorganisms than from calf vells. Today, about 90% of hard cheese is made from rennin obtained from genetically modified microbes.

Therefore, to regulate rennets or rennin, you **must** determine the source, as follows:

- ◆ Derived from a ruminant
- ◆ Derived from microbes (recombinant chymosin or rennin)
- ◆ Derived from a plant

Ruminant Derived Rennets or Rennin

The following by-products from ruminants are regulated as ruminant derived rennets:

- ◆ Calf vell
- ◆ Gullet (goat)
- ◆ Rennet extract
- ◆ Stomach

Continue to [Table 3-16-10](#) once you have established the source of the rennet or rennin.

Action to Take on Rennet or Rennin after Determining the Source

TABLE 3-16-10 Action to Take on Rennet or Rennin (chymosin)

If the rennet or rennin (chymosin) is:	And the country or region of export is:	And is derived from:	And:	Then:
Derived from a ruminant	Affected with BSE	—————→		REFUSE ENTRY

Introduction

The *Trophies* section covers ruminant and swine trophies that include hides and skins; and bones and other bony tissue (including antlers horns, hoofs, skulls, tusks, and teeth); and bird trophies of the entire carcass, the eviscerated carcass, or **only** the skin and feathers with head and feet attached.

Trophies are usually obtained during hunting expeditions, and are imported either fully taxidermy finished or not fully taxidermy finished (unfinished). USDA, APHIS regulations allow for the **unrestricted entry** of fully taxidermy finished trophies. Fully taxidermy finished

trophies are those trophies that have been professionally cleaned (free of dirt, blood, insects, putrid odors, etc.) and processed. Fully taxidermy finished trophies have been professionally prepared (may be stuffed and/or mounted) for the purpose of personal exhibition. Look for evidence of professional cleaning and processing. If unable to determine that the trophy has been fully taxidermy finished, then regulate the trophy as not fully taxidermy finished. If fully taxidermy finished trophies are shipped with not fully taxidermy finished trophies (unfinished), then regulate the entire shipment as not fully taxidermy finished trophies.

If swine hides from regions affected with ASF are fully mounted and ready for display or exhibition **only**, then the hides are allowed **unrestricted** entry.

Regulate the following as trophies:

- ◆ One to two skulls or horns
- ◆ Skulls or horns that have been lacquered or painted (finished)
- ◆ Cattle skulls that are clean and dry and free from undried pieces of hide, flesh, and sinew, that are imported for display
- ◆ One or two sets of antlers
- ◆ More than two (2) skulls, horns or sets of antlers etc., if the hunter provides a copy of the hunting license/permit, or other documentation that clearly demonstrates lawful possession of the trophy from the country of origin. The license/permit or other documentation must be issued by the foreign government (at the Federal, Regional, or Departmental level), and not by the outfitter. This documentation must be in English or must be accompanied by a government endorsed English translation. This document should identify the animal species and, if applicable, indicate the quantity of animals allowed to be hunted. USDA limits the quantity of bone trophies allowed to be imported to those taken from two (2) animals unless a greater quantity is authorized by the hunting license/permit or other documentation.

Bones and antlers are regulated from all countries because of anthrax.

What Is Not Covered

This section **does not** cover the following:

- ◆ Antlers or bones entering as commercial importations
 - ❖ Consider a large quantity of unfinished antlers or bones as a commercial importation, and regulate as bones rather than trophies
 - ❖ Go to the *Reference* section ***Bones and Related By-Products***

Keep in mind that the Fish and Wildlife Service of the Department of the Interior (FWS) may also regulate the trophies under wildlife laws: The Endangered Species Act (ESA), and The Convention on International Trade in Endangered Species of Wild Flora and Fauna (CITES).

Procedures

Be sure to check for ticks on trophies. If ticks are found on trophies from Mexico, see [Trophy Hides or Skins of Ruminants from Mexico that Are Not Fully Taxidermy Finished](#) on page 3-17-13.

Determining if the Trophies Were Treated

Before inspecting trophies, try to learn whether the shipment was treated. Use the steps that follow to guide your inspection and protect your health.

To determine if trophies have been treated, do as follows:

1. Check container markings, labels, and accompanying documents to learn if the container or its contents were treated.
 - A. If the accompanying documents indicate that the trophies were treated, then skip to 3., below.
 - B. If the documents tell you nothing, then go to 2., below.
2. If you **did not** learn anything from the labels or accompanying documents, then carefully examine the container and its contents for pesticide residue.
 - A. If you detect a chemical odor, suspect that the trophies were treated.
 - B. If you suspect pesticide use, then recheck the documentation and labeling to determine the exact pesticide used. If pesticide poisoning occurs, then knowing the name of the pesticide will help with being able to take the most appropriate action.
 - C. If you are unable to identify the suspect pesticide, then hold the material and **refuse** to inspect until the broker or the owner's or consignee's representative provides you with this information.
3. Before examining treated shipments, have the broker or the owner's or consignee's representative open and aerate the contents.
4. Before inspection, put on disposable plastic gloves and a dust mask (should be a minimum N95 or as specified by Customs and Border Protection/Centers for Disease Control and Prevention safety requirements) to prevent exposure to potentially harmful substances and agents.

5. Once opened, **do not** breathe the air around the container. Work in a well-ventilated area.
6. Have the broker or the owner's or consignee's representative remove the contents from the shipping container for inspection.
7. As you inspect, be careful not to tear or puncture the gloves.
8. Upon completion of your inspection, put the mask and gloves in a double plastic bag.
9. Incinerate or autoclave the double plastic bag with the gloves and mask inside.
10. Wash your hands thoroughly with a disinfectant soap.
11. If the shipment showed evidence of having been treated or the broker or the owner's or consignee's representative volunteered this information, but the document and the container were **not** so marked, then mark the documents and the container to alert other people who may have to handle this shipment.

Handling Nonhuman Primate Trophies

Follow these guidelines when handling and inspecting shipments of restricted animal trophies containing nonhuman primate parts or specimens, as declared in the manifest. **Never** allow shipments of wholly nonhuman primate material to go forward to an approved establishment for processing. On such shipments, **immediately** have Customs and Border Protection notify the local Centers for Disease Control and Prevention representative.

Follow these guidelines for handling nonhuman primate trophies:

Under **no** circumstances are CBP officers/Agricultural Specialists to open this type of cargo at the port on their own.

1. If there is evidence that the shipment contains a mix of trophies (both nonhuman primate trophies and non-primate trophies), then CBP is to inform the local Centers for Disease Control and Prevention representative, that a shipment has arrived containing a mix of both nonhuman primate trophies and non-primate trophies. CBP should safeguard the shipment and await further instruction from CDC. Under **no** circumstances are CBP/Agricultural Specialists to open this type of cargo at the port on their own.

CDC must decide how to handle the shipment. If CDC decides to separate the shipment, CDC is responsible for handling the non-human primate trophies. For the non-primate trophies, CBP should follow these procedures:

- A. Before inspection, put on disposable plastic gloves and a dust mask (should be a minimum N95 or as specified by Customs and Border Protection/Centers for Disease Control and Prevention safety requirements) to prevent exposure to potentially harmful substances and agents.
 - B. As you inspect, be careful **not** to tear or puncture the gloves.
 - C. Upon completion of your inspection, put the mask and gloves in a double plastic bag.
 - D. Incinerate or autoclave the double plastic bag with the gloves and mask inside.
 - E. Wash your hands thoroughly with a disinfectant soap.
2. If there is evidence that the shipment contains wholly non-human primate material, then CBP is to inform the local Centers for Disease Control and Prevention representative, that a shipment has arrived containing wholly nonhuman primate materials. CBP should safeguard the shipment and await further

instruction from CDC. Under **no** circumstances are CBP officers/Agricultural Specialists to open this type of cargo at the port on their own.

3. If there is evidence that the shipment contains wholly non-primate trophies, then the shipment should be inspected by CBP. CBP officers/Agricultural Specialists should follow these procedures:
 - A. Have the broker or the owner's or consignee's representative open and remove the contents for inspection.
 - B. Before inspection, put on disposable plastic gloves and a dust mask (should be a minimum N95 or as specified by Customs and Border Protection/Centers for Disease Control and Prevention safety requirements) to prevent exposure to potentially harmful substances and agents.
 - C. As you inspect, be careful **not** to tear or puncture the gloves.
 - D. Upon completion of your inspection, put the mask and gloves in a double plastic bag.
 - E. Incinerate or autoclave the double plastic bag with the gloves and mask inside.
 - F. Wash your hands thoroughly with a disinfectant soap.

VS permits are **never** issued to authorize the entry of non-human primate trophies.

Locator

To find the regulatory action to take on trophies, see [Table 3-17-1](#)

TABLE 3-17-1 Where to Find Regulatory Action on Trophies

If the importation is:	And the trophies are:	Then:
Fully taxidermy finished trophies (see Introduction on page 3-17-1)	→	RELEASE

TABLE 3-17-1 Where to Find Regulatory Action on Trophies

If the importation is:	And the trophies are:	Then:
Not fully taxidermy finished trophies	◆ Antlers, carcasses, hoofs, horns, skulls, teeth and tusks	GO to Table 3-17-8
	◆ Bones	GO to Table 3-17-8
	◆ Capes or skins	GO to Table 3-17-3
	◆ Feathers only	GO to Table 3-17-2
	◆ Hides	GO to Table 3-17-4
	◆ Any other bony tissue not listed above (with or without flesh, hide and/or sinew attached)	GO to Table 3-17-8

Feathers Only that Are Not Fully Taxidermy Finished

To determine the action to take on importations of feather trophies **only**, that are **not** fully taxidermy finished, see [Table 3-17-2](#).

TABLE 3-17-2 Feathers Only that Are Not Fully Taxidermy Finished

If the trophies are:	And the country or region of export is:	And the importation:	And:	Then:
Feathers only that are not fully taxidermy finished	Affected with HPAI (H5N1) only	Is accompanied by a VS permit	→	RELEASE
		Lacks a VS permit	→	REFUSE ENTRY
	Affected with HPAI (H5N1) in combination with END	Is accompanied by a VS permit	→	RELEASE
		Lacks a VS permit	→	REFUSE ENTRY
	Affected with END only	Is accompanied by a VS permit	→	RELEASE
		Lacks a VS permit	Is consigned to an approved establishment	AUTHORIZE shipment under seal with VS 16-78 (see Appendix K to complete the form)
			Is not consigned to an approved establishment	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)
	Free from both HPAI (H5N1) and END	→		RELEASE

Trophy Capes and Skins that Are Not Fully Taxidermy Finished

To determine that action to take on capes with or without feathers and skin of game birds (ostrich skin) and poultry that are **not** fully taxidermy finished, see [Table 3-17-3](#).

TABLE 3-17-3 Trophy Capes and Skins that Are Not Fully Taxidermy Finished

If the trophy cape or skin animal source is:	And the country or region of export is:	And the article is:	And is:	Then:
<ul style="list-style-type: none"> ◆ Poultry ◆ Game birds ◆ Other birds¹ 	Affected with HPAI (H5N1) only	→	Accompanied by a VS permit	RELEASE
			Lacks a VS permit	REFUSE ENTRY

Trophy Bones and Other Bony Trophy Tissue, Including Antlers, Carcasses, Hoofs, Horns, Skulls, Teeth, and Tusks

1 USDA defines trophies as, the bones (including skulls, antlers, teeth, horns, and hoofs) of an animal carcass that can be used as a remembrance or souvenir of "the hunt" that are for personal use only. A copy of the importer's hunting license/permit, or other documentation that clearly demonstrates lawful possession of the trophy from the country of origin must be issued by the foreign government (at the Federal, Regional, or Department level), not by the outfitter. This documentation must be in English or must be accompanied by a government endorsed English translation. This documentation should identify the animal species and, if applicable, indicate the quantity of animals allowed to be hunted. USDA limits the quantity of bone trophies allowed to be imported to those taken from 2 animals unless a greater quantity is authorized by the hunting license/permit or other documentation as indicated above. Bone trophies that do not meet the above conditions will be regulated in the [Bones and Related By-Products](#) Section as a shipment of commercial bones.

Bone trophies that do not meet the above conditions will be regulated in the [Bones and Related By-Products](#) Section as a shipment of commercial bones.

2 A certificate issued and signed by an official veterinary inspector of the national government of the region of export stating that the hoofs have been disinfected using one of the following methods:

- ◆ dry heat at 180° F (82.2° C) for 30 minutes
- ◆ soaking in boiling water for 20 minutes
- ◆ soaking in a 0.1 percent chlorine bleach solution for 2 hours
- ◆ soaking in a 5 percent acetic acid solution for 2 hours OR
- ◆ soaking in a 5 percent hydrogen peroxide solution for 2 hours

3 The approved establishments will treat materials for other diseases, including anthrax.

4 Currently Canada is the only country designated as Minimal Risk for BSE. USDA has not imposed any restrictions on cervid trophies from Canada because of BSE. Hunters may import cervid trophies that were hunted in Canada without restriction. Hunters should have documentation that demonstrates proof of Canadian origin for their cervid trophies (i.e. Canadian hunting license/permit [Provincial, Tribal, or CFIA issued], Game Farm receipt, Outfitter receipt, or other documentation provided by the Game farm or Outfitter, etc.).

[Feed Containing Swine as an Ingredient from a Country Free from BSE, Except for Australia or New Zealand](#) [page 3-18-37](#)
[Feed Additives and Feed Supplements](#) [page 3-18-38](#)

Introduction

The *Pet Food, and Livestock, Poultry, and Aquaculture Feed* section covers pet food (generally for cats and dogs), feed (food for livestock or poultry), and pet chews and toys.

Animal products might be offered for entry under descriptions that may be misleading or appear to **not** be subject to prohibition, such as additive, adhesive, feed/food additive, fertilizer, nutritional supplement, or supplement. Carefully scrutinize descriptions for prohibited products.

Feed Ingredients

Feed may contain a diverse cross section of animal products in their ingredients, as follows:

- ◆ Animal product ingredients
 - ❖ Animal fat
 - ❖ Blood meal
 - ❖ Bone meal
 - ❖ Feather meal
 - ❖ Meat meal
 - ❖ Poultry meal
 - ❖ Tankage
- ◆ Animal waste ingredients
 - ❖ Hydrolyzed hair
 - ❖ Poultry feathers
 - ❖ Poultry waste and litter
 - ❖ Urea
- ◆ Milk product ingredients
 - ❖ Buttermilk (dried, feed grade)
 - ❖ Casein
 - ❖ Caseinate
 - ❖ Whey and its by-products

Likewise, pet chews and toys may be made from a diverse variety of animal products and by-products:

- ◆ Bones
- ◆ Ears
- ◆ Horns
- ◆ Hooves
- ◆ Ligaments
- ◆ Pizzles
- ◆ Snouts
- ◆ Rawhide

Pet food may contain the same ingredients as feed. Pet food may be dry, semi-moist, or moist. Pet food can be made from meat, organs, or other by-products from cattle, chicken, pork, or lamb.

Pet food and feed usually contain rendered products. Most of the ingredients previously listed are rendered products.

Rendered products and processed protein products including ruminant blood meal from countries affected with BSE are **prohibited** entry unless accompanied by a VS-issued permit.

Ingredients That May Be in Canned, Shelf-Stable Pet Food

Canned, shelf-stable pet food can **no longer** be released **without** restriction since the pet food may contain processed animal fat, bone meal, meat meal, and by-products that are regulated because of BSE. Moreover, canned, shelf-stable seafood varieties of pet food most often contain beef by-products or poultry by-products or both as ingredients. **Never** assume that seafood varieties contain **only** seafood. Similarly, poultry varieties of pet food may contain ruminant derivatives and meat by-products.

Before you regulate pet food, know all the ingredients.

Feed Supplements

Feed supplements (nutritive products that are added to feed to produce a more complete feed), and feed additives (non-nutritive products that are added to feed to affect production) may be categorized as follows:

- ◆ Anthelmintics (compounds that are used to control worms and other parasites)

- ◆ Antimicrobial agents (antibiotics and other compounds that inhibit the growth of microorganisms)
- ◆ Antioxidant products that inhibit the oxidation of fats or vitamins
- ◆ Binders (products that promote cohesiveness of pellets)
- ◆ Buffers (compounds that maintain the pH of the digestive tract)
- ◆ Carcass modifiers (products added to increase carcass leanness)
- ◆ Colostrum bolus or powder (compound containing a high level of immunoglobulins)
- ◆ Enzymes (products added to improve digestibility)
- ◆ Flow agents (products that prevent caking and improve flow of feed)
- ◆ Flavorings (products added to improve palatability or mask off-flavors)
- ◆ Hormones
- ◆ Liquid protein (protein product usually containing molasses, vitamins, urea, and trace minerals)
- ◆ Microbes or probiotics (microorganisms themselves)
- ◆ Milk replacer (milk substitute)
- ◆ Mineral and salt licks
- ◆ Vitamins
- ◆ Yeast (organism that improves feed digestion and stabilizes the pH of the digestive tract)

Articles Not Regulated in This Section

The following articles are **not** covered in this section:

- ◆ Animal waste; regulate these ingredients under *[Animal Waste and Related By-Products](#)*
- ◆ Bird feed, **except for** that containing suet; regulate suet under *[Foreign Origin Meat and Meat Products, Ruminants](#)*
- ◆ Blood meal, bone meal, feather meal, hoof or horn meal, or meat meal; regulate these ingredients as rendered products under *[Animal Waste and Related By-Products](#)*
- ◆ Canned, shelf-stable pet food consisting **only** of chopped, dried, ground, or minced fish or shellfish, and other non-animal ingredients such as aspic or gum; such products are unrestricted
- ◆ Feed made wholly from plant material

- ◆ Preserved aquatic worms (e.g., flash-frozen polychaetes or freeze-dried tubifex) have unrestricted entry

Articles Accompanied by a VS-Issued Permit

When a VS permit authorizes entry of the additive, animal food, feed, chew, supplement, or toy, then match the following information on the shipping documents with that on the permit:

- ◆ Current date
- ◆ Description of the material
- ◆ Shipper
- ◆ Consignee
- ◆ Conditions spelled out on the permit

Make sure that the permittee has signed the permit. If he or she has **not** signed the permit, then return the permit for signature.

Follow [Table 3-18-1](#) as you match the permit with the shipping documents.

TABLE 3-18-1 Validate Importation Authorized Entry by a VS Permit

If the shipping documents:	And the:	Then:
Match the VS permit	→	RELEASE or CONTROL as specified on the permit
Do not match the VS permit	VS permit has expired	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. HAVE the consignee contact VS, TTSPS (see Table 2-2-11 and Table 2-4-17) 3. SAFEGUARD the importation until you hear from VS, TTSPS
	Discrepancy is other than an expired VS permit	<ol style="list-style-type: none"> 1. DO NOT RELEASE the HOLD 2. CONTACT PPQ-VRS-AQI or PPQ-VRS-HQ personnel for further action (see Appendix H)

Locator

When a VS permit does **not** accompany an importation of animal food or feed, use [Table 3-18-2](#) to determine the appropriate regulatory action to take.

Important

In order to regulate pet food, you **must** have a list of ingredients. Ask the importer or the importer's agent to provide you with a list of ingredients. Once you have list of ingredients, use the decision tables that follow.

TABLE 3-18-2 Pet Food, and Livestock, Poultry, and Aquaculture Feed (Including Chews and Toys)

If:	And the country or region of export is:	And the importation is:	And:	Then:
Pet food (for dogs and cats) ¹ ◆ Canned, shelf-stable ◆ Dry ² ◆ Semi-moist ²	Affected with BSE	From products that contain processed animal proteins	Is accompanied by a VS permit	RELEASE or CONTROL as specified on the permit
			Lacks a VS permit	REFUSE ENTRY

Swine	GO to Table 3-18-13			

TABLE 3-18-2 Pet Food, and Livestock, Poultry, and Aquaculture Feed (Including Chews and Toys) (continued)

If:	And the country or region of export is:	And the importation is:	And:	Then:
Feed (for livestock, poultry, and aquaculture)		Blood meal, bone meal, hoof meal, or feather meal		1. REGULATE as a rendered product 2. GO to Animal Waste and Related By-Products on page 3-2-1
		Other than meal listed in the cell above		GO to Table 3-18-19
Feed additive or supplement				GO to Table 3-18-24
Altogether without animal-derived ingredients (such as grain, oilseed, or roughage)				1. If appropriate, APPLY the plant quarantine 2. RELEASE
Other than described above				1. DO NOT RELEASE the HOLD 2. CONTACT PPQ-VRS-AQI or PPQ-VRS-HQ personnel for further action (see Appendix H)

- 1 If a small amount of food is in a cage with dogs, cats, or laboratory animals, then removing the pet food from the cage is **not** necessary.
- 2 Dry or semi-moist pet food refers to that manufactured using an expander. Raw materials are blended. The blend is fed into an expander, and steam or hot water is added. The blended material is subjected to steam heat to around 305° F and pressure. The mixture is then extruded through dies that determine the final shape of the product, and is finally cooked at high temperature and pressure. The extruded food is allowed to dry. Once the food is dried, then the food is usually sprayed with fat or blood to make more palatable.
- 3 A declaration which provides, in a clear and concise manner, the following information:
 - Identification of the material and species of origin
 - Material **does not** include any avian, equine, ruminant, or swine species or their materials (such as transport media or stabilizers)

Canned, Shelf-Stable or Dry or Semi-Moist Pet Food from Countries Free from BSE

TABLE 3-18-3 Canned, Shelf-Stable or Dry or Semi-Moist Pet Food from Countries Free from BSE

If:	And the country or region of export is:	And is from:	And the product contains:	And:	Then:	
<ul style="list-style-type: none"> ◆ Canned, shelf stable pet food ◆ Dry pet food ◆ Semi-moist pet food 	Free from BSE	Australia	Only amphibian, fish, reptile, shellfish, or aquatic species material (does not include oils and meals)	Is accompanied by a producer's or shipper's declaration ¹	RELEASE	
				Lacks the producer's or shipper's declaration ¹	REFUSE ENTRY	
			Products other than the cell above	Is accompanied by the appropriate certificate ² or VS permit	RELEASE	
				Lacks both the certification ² and VS permit	REFUSE ENTRY	
			New Zealand	Only amphibian, fish, reptile, shellfish, or aquatic species material (does not include oils and meals)	Is accompanied by a producer's or shipper's declaration ¹	RELEASE
					Lacks the producer's or shipper's declaration ¹	REFUSE ENTRY
		Products other than the cell above		Is accompanied by the appropriate certification ³ or a VS permit	RELEASE	
				Lacks both the certification ³ and VS permit	REFUSE ENTRY	

TABLE 3-18-3 Canned, Shelf-Stable or Dry or Semi-Moist Pet Food from Countries Free from BSE (continued)

If:	And the country or region of export is:	And is from:	And the product contains:	And:	Then:
<ul style="list-style-type: none"> ◆ Canned, shelf stable pet food ◆ Dry pet food ◆ Semi-moist pet food 	Free from BSE	Other than Australia or New Zealand		Amphibian, fish, reptile, shellfish, or aquatic species	GO to Table 3-18-4
				Poultry	GO to Table 3-18-6
				Ruminant	GO to Table 3-18-8
				Swine	GO to Table 3-18-10
				Animal source cannot be determined	Contact PPQ-VRS-AQI or PPQ-VRS-HQ personnel (see Appendix H)

- 1 A declaration which provides, in a clear and concise manner, the following information:
 - ◆ Identification of the material and species of origin
 - ◆ Material **does not** include any avian, equine, ruminant, or swine species or their materials (such as transport media or stabilizers)
- 2 Original certificate signed by a full-time veterinarian of the agency responsible for the animal health in the exporting region and declaring the following:
 - ◆ Animal species from which the material was derived
 - ◆ Region where any facility in which the material was processed is located
 - ◆ Material was derived **only** from animals that have **never** been in any region listed in 9CFR 94.18(a)
 - ◆ Material **did not** originate in and was **never** stored, rendered, or otherwise processed in a region listed in 9CFR94.18(a)
 - ◆ Material was **not** otherwise associated with a facility located in a region listed in 9CFR 94.18(a)
- 3 Either one of the following:
 - ◆ Export certificate that states the following:
 - ◆ The product is of New Zealand origin
 - ◆ Original certificate signed by a full-time veterinarian of the agency responsible for the animal health in the exporting region and declaring the following:
 - ◆ Animal species from which the material was derived
 - ◆ Region where any facility in which the material was processed is located
 - ◆ Material was derived **only** from animals that have **never** been in any region listed in 9CFR 94.18(a)
 - ◆ Material **did not** originate in and was **never** stored, rendered, or other wise processed in a region listed in 9 CFR 94.18(a)
 - ◆ Material was **not** otherwise associated with a facility located in a region listed in 9CFR 94.18(a)

Canned, shelf-stable pet food containing fish or shellfish that is chopped, dried, ground, or minced with other non-animal ingredients such as aspic or gum is **unrestricted**.

Canned, Shelf-Stable or Dry or Semi-Moist Pet Food Derived from Amphibian, Fish, Reptile, Shellfish, or Aquatic Species from a Country Free from BSE

TABLE 3-18-4 Canned, Shelf-Stable or Dry or Semi-Moist Pet Food Derived from Amphibian, Fish, Reptile, Shellfish, or Aquatic Species from a Country Free from BSE

If:	And the country or region of export is:	And the product contains:	And:	Then:
Canned, shelf-stable pet food derived from amphibian, fish, reptile, shellfish, or aquatic species	Free from BSE	Processed animal proteins	Is accompanied by a VS permit	RELEASE or CONTROL as specified on the permit
			Lacks a VS permit	REFUSE ENTRY
		Only amphibian, fish, reptile, shellfish, or aquatic species material not listed in the cell above (does not include oils and meals)	Is accompanied by a producer's or shipper's declaration ¹	RELEASE
			Lacks the producer's/shipper's declaration ¹	REFUSE ENTRY
Dry or semi-moist pet food derived from fish or shellfish	Free from BSE	—————→		GO to Table 3-18-5

1 A declaration which provides, in a clear and concise manner, the following information:

- ◆ Identification of the material and species of origin
- ◆ Material **does not** include any avian, equine, ruminant, or swine species or their materials (such as in transport media or stabilizers)

Dry or Semi-Moist Pet Food Derived from Fish or Shellfish from a Country Free from BSE

TABLE 3-18-5 Dry or Semi-Moist Pet Food Derived from Fish or Shellfish from a Country Free from BSE

Dry or semi-moist pet food derived from swine	Free from BSE	Swine (pork) material only	Is accompanied by a VS permit	RELEASE or CONTROL as specified on the permit
			Lacks a VS permit	REFUSE ENTRY
		Combination of swine, poultry, or ruminant by-products, meat by-products, or animal fat	Is accompanied by a VS permit	RELEASE or CONTROL as specified on the permit
			Lacks a VS permit	REFUSE ENTRY

Pet Chews and Toys Crafted or Manufactured from Animal By-Products

Wash your hands after handling pet chews and toys. Certain dog chews, particularly hooves and those made of pig ears, may be contaminated with salmonella.

Pet chews and toys may be made from equine, poultry, ruminant, or swine parts. Parts include bones, ears, hooves, horns, ligaments, organs, pizzles, rawhide, or skins.

Ruminant Derived Pet Chews or Toys Made from Other Than Bones, Hoofs, Horns, or Rawhide

TABLE 3-18-12 Ruminant Derived Pet Chews or Toys Made from Other Than Bones, Hoofs, Horns, or Rawhide

If:	And the country or region of export is:	And the country of origin is:	And the importation is:	And:	Then:
Ruminant-derived pet chews or toys made from other than bones, hoofs, horns, or rawhide	Affected with BSE only	—————→	—————→	Is accompanied by a VS permit	RELEASE or CONTROL as specified on the permit

 - ◆ Original certificate signed by a full-time veterinarian of the agency responsible for the animal health in the exporting region and declaring the following:
 - ◆ Animal species from which the material was derived
 - ◆ Region where any facility in which the material was processed is located
 - ◆ Material was derived **only** from animals that have **never** been in any region listed in 9CFR 94.18(a)
 - ◆ Material **did not** originate in and was **never** stored, rendered, or otherwise processed in a region listed in 9CFR 94.18(a)
 - ◆ Material was **not** otherwise associated with a facility located in a region listed in 9CFR 94.18(a)
- 2 An original certificate signed by a full-time veterinarian of the agency responsible for the animal health in the exporting region and declaring the following:
 - ◆ Animal species from which the material was derived
 - ◆ Region where any facility in which the material was processed is located
 - ◆ Material was derived **only** from animals that have **never** been in any region listed in 9CFR 94.18(a)
 - ◆ Material **did not** originate in and was **never** stored, rendered, or otherwise processed in a region listed in 9CFR 94.18(a)
 - ◆ Material was **not** otherwise associated with a facility located in a region listed in 9CFR 94.18(a)

Pet Chews or Toys Made from Rawhide

Rawhide is the untanned, leathery skin of cattle. Rawhide is de-haired, dried, and leathery. If rawhide has been coated or ground up, then the rawhide may be of concern because there is **no** way of knowing what additional ingredients may have been added.

Inspect rawhide chews and toys for meat fibers. Smell the product to determine if there is a strong odor. If you detect meat fibers or smell a strong odor, the product is **not** admissible.

TABLE 3-18-15 Pet Chews or Toys Made from Rawhide

If:	And the rawhide is:	And:	Then:
Pet chews or toys made from rawhide	Plain rawhide	Upon inspection is found to be plain rawhide without added flavoring or coloring	RELEASE
		Upon inspection is found to be other than plain rawhide	1. DO NOT RELEASE the HOLD 2. CONTACT PPQ-VRS-AQI or PPQ-VRS-HQ personnel for advice (see Appendix H)
	Ground, molded, flavored, colored, or otherwise processed	Is accompanied by a certificate of origin ¹ and appropriate certification ²	RELEASE
		Lacks certification	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)
Other than described in the two cells above	→		1. DO NOT RELEASE the HOLD 2. CONTACT PPQ-VRS-AQI or PPQ-VRS-HQ personnel for advice (see Appendix H)

- 1 Certificate of origin is an official government document endorsed by a full-time salaried veterinarian of the agency of the exporting country.
- 2 Certification that confirms (a) the articles were made from rawhide, and (b) they contain **no** other ingredients of animal origin except those of U.S. origin.

Pet Chews or Toys Made from Bones, Hoofs, and Horns

This section contains articles imported primarily for dogs to chew on.
Some of the articles may include the following:

- ◆ Bones
- ◆ Hoofs (plain, smoked, or stuffed with rawhide or cheese)
- ◆ Horns
- ◆ Smoked beef knuckles

Pet Chews or Toys Made from Bones

TABLE 3-18-16 Pet Chews or Toys Made from Bones

If:	And derived from:	And the country or region export is:	And:	Then:
Pet chews or pet toys made from bones	Ruminant bones	Affected with BSE	—————▶	REFUSE ENTRY
		Affected with BSE and FMD	—————▶	REFUSE ENTRY
		Minimal risk for BSE ¹ , but free from FMD	Is accompanied by a VS permit	RELEASE or CONTROL as specified on the permit
			Lacks a VS permit	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options listed in Table 2-2-11
		Free from BSE, but affected with FMD	Is accompanied by a VS permit	RELEASE or CONTROL as specified on the permit
			Lacks a VS permit	REFUSE ENTRY
	Free from both BSE and FMD	Is accompanied by the appropriate certification ²	RELEASE

				Not consigned to an approved establishment	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)
	Other than ruminant hoofs or horns	—————→	GO to Table 3-18-18		

1 Currently Canada is the **only** country designated at minimal risk for BSE

2 The certificate and certification **must** meet the following criteria:

- ◆ The certificate **must** be endorsed by a full-time, salaried veterinarian of the agency of the government of the exporting country that is responsible for animal health
- ◆ The information on the certificate **must** be in agreement with the shipment as shown by the other number, shipping marks, lot number, or other method of identification
- ◆ One of the following approved methods of processing **must** appear on the certificate:
 - ◆ Dry heat at 180° F (82.2° C) for 30 minutes
 - ◆ Cooking in boiling water for 20 minutes
 - ◆ Soaking for 2 hours in a 0.1 percent solution of chlorine bleach
 - ◆ Soaking for 2 hours in a 5 percent solution of acetic acid
 - ◆ Soaking for 2 hours in a 5 percent solution of hydrogen peroxide

Pet Chews or Toys Made from Hoofs or Horns from Other than Ruminants

TABLE 3-18-18 Pet Chews or Toys Made from Hoofs or Horns from Other than Ruminants

If:	And the hoofs or horns are from:	And:	And:	Then:
Pet chews or toys made from hoofs or horns from other than ruminants	Swine	Is accompanied by a certificate of processing stating that the hoofs or horns were treated by an approved method ¹	→	RELEASE
		Lacks the certificate of processing ²	Is consigned to an approved establishment	AUTHORIZE shipment under seal with VS 16-78 (see Appendix K to complete the form)
			Is not consigned to an approved establishment	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options listed in Table 2-2-11 or apply for a VS permit (see Table 2-4-16)
	Other than swine		→	RELEASE

1 Certificate and certification **must** meet the following criteria:

- ◆ Certificate **must** be endorsed by a full-time, salaried veterinarian of the agency of the government of the exporting country that is responsible for animal health
- ◆ Information on the certificate **must** be in agreement with the shipment as shown by the other number, shipping marks, lot number, or other method of identification
- ◆ One of the following approved methods of processing **must** appear on the certificate:
 - ◆ Dry heat at 180° F (82.2° C) for 30 minutes
 - ◆ Cooking in boiling water for 20 minutes
 - ◆ Soaking for 2 hours in a 0.1 percent solution of chlorine bleach
 - ◆ Soaking for 2 hours in a 5 percent solution of acetic acid
 - ◆ Soaking for 2 hours in a 5 percent solution of hydrogen peroxide

Feed for Livestock, Poultry, and Aquaculture

Feed is defined as materials which are distributed as food or for mixing in a ration for domestic farm and ranch animals such as cattle, sheep, swine, goats, llamas, rabbits, horses, and poultry. Feed also includes those materials distributed for food for aquaculture (to feed fish, alligators, crocodiles, crustaceans, turtles, and shellfish).

Some rations may contain only grains and plant products. If the ingredients list **only** plant-derived material, then these are free from animal product regulations. However, these feeds are subject to plant quarantines. Many rations contain animal products or by-products to supply protein in a ration or to increase palatability.

Feed may contain protein that originated from a mammal, including other livestock, whether rendered or **not**.

EXAMPLE

Blood meal, fish meal, meat scraps, or meat meal are examples of protein that may or may **not** have been rendered.

Feed may also have milk, gelatin, waste materials, or animal fat or its derivatives as ingredients.

Since feeds are fed directly to livestock and may come from animal protein and thus contain infective agents of animal diseases (virus, bacteria, prions), feed may require a VS permit.

Continue to [Table 3-18-19](#) on page 3-18-31.

			Lacks a VS permit	REFUSE ENTRY

TABLE 3-18-20 Feed Containing Fish Meal or Shellfish Meal as an Ingredient from a Country Free from BSE, Except for Australia or New Zealand (continued)

If:	And the country or region of export is:	And the feed contains:	And:	Then:
Feed containing amphibian, fish, reptile, shellfish, or aquatic species as an ingredient	Free from BSE, except for Australia or New Zealand	Products that contain only amphibian, fish, reptile, shellfish, or aquatic species not listed in one of the cells above (not including oils and meals)	Is accompanied by a producer's or shipper's declaration ²	RELEASE
			Lacks the producer's or shipper's declaration ²	REFUSE ENTRY

1 A declaration which provides, in a clear and concise manner, the following information:

- ◆ The animal species from which the material was derived
- ◆ The region where any facility in which the material was processed is located
- ◆ The material was derived **only** from animals that have never been in any region listed in 9CFR94.18(a)
- ◆ The material **did not** originate in and was never stored, rendered, or otherwise processed in or otherwise associated with a facility in a region listed in 9CFR94.18(a)
- ◆ The material was **not** otherwise associated with any of the materials listed in 9CFR95.29(a) which have been in a region listed in 9CFR94.18(a)

2 An **original**, written declaration and signed statements on the producer's or shipper's letterhead which states and affirms in a clear and concise manner, the following information:

- ◆ Identification of the material and species of origin
- ◆ Material **does not** include any avian, equine, ruminant, or swine species or their materials (such as in transport media or stabilizers)

Feed Containing Fowl or Poultry as an Ingredient from a Country Free from BSE, Except for Australia or New Zealand

TABLE 3-18-21 Feed Containing Fowl or Poultry as an Ingredient from a Country Free from BSE, Except for Australia or New Zealand

If:	And the country or region of export is:	And the feed contains:	And:	Then:
Feed containing fowl or poultry as an ingredient	Free from BSE, except for Australia or New Zealand	Poultry material only	Is accompanied by a VS permit	RELEASE or CONTROL as specified on the permit
			Lacks a VS permit	REFUSE ENTRY
		Poultry material mixed with plant material	Is accompanied by a VS permit	RELEASE or CONTROL as specified on the permit
			Lacks a VS permit	REFUSE ENTRY
		Combination of poultry with ruminant by-products, ruminant meat by-products, or ruminant animal fat	Is accompanied by a VS permit	RELEASE or CONTROL as specified on the permit
			Lacks the VS permit	REFUSE ENTRY
		Combination of poultry material with swine by-products, swine meat by-products, or swine animal fat	Is accompanied by a VS permit	RELEASE or CONTROL as specified on the permit
			Lacks the VS permit	REFUSE ENTRY

Feed Containing Ruminant Material as an Ingredient from a Country Free from BSE, Except for Australia or New Zealand

TABLE 3-18-22 Feed Containing Ruminant Material as an Ingredient from a Country Free from BSE, Except for Australia or New Zealand

If:	And the country or region of export is:	And the feed contains:	And:	Then:
Feed containing ruminant material as an ingredient	Free from BSE, except Australia or New Zealand	Ruminant material only (beef, lamb, or animal fat, bone or meat meal)	Is accompanied by a VS permit	RELEASE or CONTROL as specified on the permit
			Lacks a VS permit	REFUSE ENTRY
		Ruminant material mixed with plant material	Is accompanied by a VS permit	RELEASE or CONTROL as specified on the permit
			Lacks a VS permit	REFUSE ENTRY
		Combination of poultry material with ruminant by-products, ruminant meat by-products, or ruminant animal fat	Is accompanied by a VS permit	RELEASE or CONTROL as specified on the permit
			Lacks a VS permit	REFUSE ENTRY
		Combination of swine material with ruminant by-products, ruminant meat by-products, or ruminant animal fat	Is accompanied by a VS permit	RELEASE or CONTROL as specified on the permit
			Lacks a VS permit	REFUSE ENTRY

Feed Containing Swine as an Ingredient from a Country Free from BSE, Except for Australia or New Zealand

TABLE 3-18-23 Feed Containing Swine as an Ingredient from a Country Free from BSE, Except for Australia or New Zealand

If:	And the country or region of export is:	And the feed contains:	And:	Then:
Feed containing swine material as an ingredient	Free from BSE, except for Australia or New Zealand	Swine (pork) material	Is accompanied by a VS permit	RELEASE or CONTROL as specified on the permit
			Lacks a VS permit	REFUSE ENTRY
		Swine material mixed with plant material	Is accompanied by a VS permit	RELEASE or CONTROL as specified on the permit
			Lacks a VS permit	REFUSE ENTRY
		Combination of swine, poultry or ruminant by-products, ruminant meat by-products, or ruminant animal fat	Is accompanied by a VS permit	RELEASE or CONTROL as specified on the permit
			Lacks a VS permit	REFUSE ENTRY

Feed Additives and Feed Supplements

A feed additive is a non-nutritive product that is added to feed to affect production. Additives include antibiotics, hormones, microorganisms (including yeast), and products used to improve the palatability and consistency of the feed to which they are added.

A feed supplement is a nutritive product that is added to feed to produce a more complete feed. Supplements include minerals, proteins, and vitamins.

Important

Minerals and vitamins may be either synthetic (inorganic) or natural (derived from animal products).

TABLE 3-18-24 Feed Additives and Feed Supplements

If:	And the product is:	And:	Then:	
◆ Feed additives	Antibiotic	→	RELEASE	
◆ Feed supplements	Based on dairy products (such as colostrum or milk replacer ¹)	→	REGULATE under <i>Milk and Milk Products</i> on page 3-14-1	
	Hormone	→	REGULATE under <i>Organs</i> on page 3-16-1	
	Microorganism itself ²	→	RELEASE	
	Natural vitamin ³ (A,B,C, D3, etc.) or mineral ³ (calcium, phosphorous, etc.) as the only animal-origin ingredient	Is appropriately certified ⁴	→	RELEASE
		Lacks certification ⁴	→	REFUSE ENTRY
	Tallow derivative (e.g., tallow derived: linoleic acid, stearic acid, glycerin, etc.)	→	RELEASE	
	Wholly inorganic ⁵ (anthelmintic, antioxidant, binder, buffer, flow agent, mineral, synthetic flavoring, salt lick, synthetic vitamin, etc.)	→		
Wholly plant based ⁶	→			

1 Some milk replacers contain animal fat which is a rendered product.

2 Also called probiotics; for example *Bacillus* spp., *Lactobacillus* spp., *Proteus* spp., *Pseudomonas* spp., *Saccharomyces* spp., and *Streptococcus* spp.

3 Derived from animal products.

4 An original certificate issued by a veterinarian employed by the national government or region of origin that states the feed contains **no** animal-origin ingredients except for vitamins and/or minerals. If the shipment originated in Canada, then require an official certificate issued by a Canadian Food Inspection Agency (CFIA) official.

5 Wholly inorganic means synthetic; defined as **not** derived from animal products.

6 Derived from plants; may include some enzymes and flavorings (such as molasses). Documentation from the manufacturer that states that the product is entirely plant based is acceptable.

Introduction

This appendix is a quick guide to regulating animal product importations in passenger baggage or in mail. If a country is **not** listed, consider the country affected with all diseases. Directions for regulating animal product importations are detailed in the *Procedures* section of this manual. The *Reference* section describes entry requirements in detail. Use the *Reference* section for commercial importations and for **all** dairy products. **Never** use *Appendix A* for commercial importations.

Warning About Hand Carrying Biological Agents

Veterinary Services **prohibits** the hand carrying of certain biological agents such as those moving in contradiction¹ of the permit. Therefore, follow these directions in handling such hand-carried biological agents:

1. REVIEW the accompanying VS Form 16-6A, Import Permit.
2. CHECK if the agent is moving in contradiction¹ of the permit.
3. If the biological agent is moving in contradiction of the permit, then CONFISCATE the biological agent, and contact the National Center for Import and Export at 301/734-3277, for directions on proper storage, transport, and destruction of the materials.

¹ For example, the VS Form 16-6A, Import Permit, specifies that "imported materials **must** be shipped by a commercial carrier," yet the biological agent is being hand carried. The biological agent would be moving in contradiction of the permit.

Handling Passengers That Are In Transit

In-transit passengers are travelers who are immediately passing through the United States on their way to another country. In general, such passengers are low risk for introducing animal diseases; however, if there is a risk of introducing disease, then **do not** allow articles to transit. Use [Table A-1-1](#) to determine your action.

TABLE A-1-1 Determine Action to Take with Transiting Passengers' Meat, Meat Products, Animal Products, and Animal By-Products

If the passenger in transit has:	And the meat, meat product, or by-product is:	And is in the passenger's:	Then:
<ul style="list-style-type: none"> ◆ Animal product ◆ Animal by-product ◆ Meat ◆ Meat product 	Ineligible for entry	Baggage checked through to destination	ALLOW transit
		Carry-on baggage	REFUSE to allow transit
	Eligible for entry	→	ALLOW transit

Importations of Shelf-Stable Meat Cooked in the Container

Cooked, shelf-stable meat¹ is a condition that applies a high temperature which renders the meat or meat product shelf stable.

The following process **must** take place to render meat cooked, shelf stable:

1. Pack the meat or meat product in a rigid or semi-rigid container (glass, metal, or plastic), or a flexible pouch (foil or plastic).
2. Completely seal the container against the escape or entry of air (hermetically seal).
3. Cook the meat.

If you doubt the shelf stability of the product, then require appropriate certification for the product, based on the requirements published in this manual. Otherwise, refuse entry. If the discrimination of shelf stability is questionable and the product is frequently encountered, then contact PPQ, VRS for direction.

Use [Table A-1-2](#) below to determine the action to take for importations of cooked, shelf-stable meat.

¹ If you **cannot** determine the animal class, then REFUSE ENTRY. If **other than** canned, shelf-stable meat, then see the [Matrix on page A-1-20](#).

TABLE A-1-2 Determine Entry Status for Importation of Canned, Shelf-Stable Meat in Passenger Baggage or Mail

If the canned, shelf-stable meat was derived from:	And is:	And the country/region of origin is:	And the importation is:	And:	Then:	
Poultry		Affected with HPAI (H5N1), and the country is regionalized ¹ for HPAI (H5N1)	Labeled as being from regionalized zones affected with HPAI (H5N1)	Is accompanied by a VS permit	RELEASE	
				Lacks a VS permit	REFUSE ENTRY	
				Not labeled as being from HPAI (H5N1) affected areas of regionalized countries		RELEASE
		Affected with HPAI (H5N1) and the country is not regionalized ¹ for HPAI (H5N1)			Is accompanied by a VS permit	RELEASE
					Lacks a VS permit	REFUSE ENTRY
		Free from HPAI (H5N1)		Commercially packaged and labeled and contained in unopened containers or packages	You can confirm the origin ²	RELEASE
					You cannot confirm the origin ²	REFUSE ENTRY
				Not as listed above		REFUSE ENTRY

TABLE A-1-2 Determine Entry Status for Importation of Canned, Shelf-Stable Meat in Passenger Baggage or Mail (continued)

If the canned, shelf-stable meat was derived from:	And is:	And the country/region of origin is:	And the importation is:	And:	Then:
Ruminant	◆ Bovine (bison, buffalo, cattle, or yak)	Affected with BSE	—————→		REFUSE ENTRY
		Minimal risk for BSE ³	—————→		RELEASE
		Free from BSE	Commercially packaged and labeled and contained in unopened containers or packages	You can confirm the origin ²	RELEASE
				You cannot confirm the origin ²	REFUSE ENTRY
			Not as listed above	—————→	REFUSE ENTRY
	◆ Caprine (goats) ◆ Ovine (sheep)	Affected with BSE	—————→		REFUSE ENTRY
		Minimal risk for BSE ³	—————→		REFUSE ENTRY
		Free from BSE	Commercially packaged and labeled and contained in unopened containers or packages	You can confirm the origin ²	RELEASE
				You cannot confirm the origin ²	REFUSE ENTRY
			Not as listed above	—————→	REFUSE ENTRY
	◆ Camelid (alpaca, camels) ◆ Cervid (caribou, deer, elk, moose, reindeer)	Affected with BSE	—————→		REFUSE ENTRY
		Minimal risk for BSE ³	—————→		RELEASE
		Free from BSE	Commercially packaged and labeled and contained in unopened containers or packages	You can confirm the origin ²	RELEASE
				You cannot confirm the origin ²	REFUSE ENTRY
			Not as listed above	—————→	REFUSE ENTRY

TABLE A-1-2 Determine Entry Status for Importation of Canned, Shelf-Stable Meat in Passenger Baggage or Mail (continued)

If the canned, shelf-stable meat was derived from:	And is:	And the country/region of origin is:	And the importation is:	And:	Then:
Swine			Commercially packaged and labeled and contained in unopened containers or packages	You can confirm the origin ²	RELEASE
			Not as listed above	You cannot confirm the origin ²	REFUSE ENTRY
					REFUSE ENTRY

- 1 In Regionalized countries, only VS-defined areas are considered to be affected with HPAI (H5N1). See page A-1-17 for a list of regionalized countries with HPAI (H5N1)-affected regions identified.
- 2 The strongest confirmation is documentation (labeling, commercial name, receipts, and your own expertise). **Do not** necessarily take an individual's word for the origin of the product.
- 3 Currently Canada is the **only** country designated at minimal risk for BSE.

Interception of Parma Ham in Passenger Baggage

If a Parma ham is offered for importation in passenger's baggage with the required certification, you **must** inspect the ham. Ensure that the ham has **both** a hot brand or an ink seal showing the identifying plant number of the slaughtering establishment, and a button seal on the hock that shows the date and year the ham entered the processing establishment.

Importations of Bouillon Cubes or Granules and Dry Soup Mixes

Use [Table A-1-3 on page A-1-8](#) for importations of bouillon cubes or granules and dry soup mixes arriving in passenger baggage or the mail. Dry soup mixes are dehydrated soup mixes containing meat. Some mixes contain rice or pasta; some are just a powder mixture. All mixes **must** be commercially prepared. Directions for preparing the soup **must only** be the adding of hot water or adding water followed by a microwave treatment.

EXAMPLE The directions may say to empty the contents of one envelope into a mug or large cup, add boiling water, etc.

The directions **must not** include cooking. The meat may be in a powder form or in dried pieces the size of bouillon cubes or silver dollars. Ingredients may all be in one package or envelope, or may be in a bowl or cup with some of the ingredients in separate envelopes within the bowl or cup.

The purpose for allowing a reasonable amount of soup mixes for personal consumption while traveling is to deter individuals from importing commercial quantities for resale. Be aware that for a family of two coming into the United States for several weeks to have a case of 50 soup mixes for their daily consumption would be reasonable.

TABLE A-1-3 Bouillon Cubes or Granules and Dry Soup Mixes in Passenger Baggage

If the importation is a:	And Contains:	And is:	And the country/region of origin is:	And the importation is:	And:	Then:		
Small quantity - a reasonable amount for personal consumption while traveling	Poultry		Affected with HPAI (H5N1), and the country is regionalized ¹ for HPAI (H5N1)	Labeled as being from regionalized zones affected with HPAI (H5N1)	Is accompanied by a VS permit	RELEASE		
					Lacks a VS permit	REFUSE ENTRY		
				Not labeled as being from HPAI (H5N1) affected areas of regionalized countries		RELEASE		
					Affected with HPAI (H5N1), and the country is not regionalized ¹ for HPAI (H5N1)		Is accompanied by a VS permit	RELEASE
						Lacks a VS permit	REFUSE ENTRY	
			Commercially packaged and labeled and contained in unopened containers or packages			You can confirm the origin ²	RELEASE	
				You cannot confirm the origin ²	REFUSE ENTRY			
			Not listed as above		REFUSE ENTRY			
			Ruminant	Bovine (bison, buffalo, cattle, yak)	Affected with BSE		REFUSE ENTRY	
	Minimal risk for BSE ³				RELEASE			
	Free from BSE				RELEASE			
	Caprine (goats) Ovine (sheep)	Affected with BSE			REFUSE ENTRY			
		Minimal risk for BSE ³			REFUSE ENTRY			
		Free from BSE			RELEASE			
	Camelid (alpacas, camels)	Affected with BSE			REFUSE ENTRY			
Minimal risk for BSE ³				RELEASE				
Free from BSE				RELEASE				
Swine		RELEASE						

TABLE A-1-3 Bouillon Cubes or Granules and Dry Soup Mixes in Passenger Baggage (continued)

If the importation is a:	And Contains:	And is:	And the country/ region of origin is:	And the importation is:	And:	Then:
Large quantity						1. CONSIDER the importation a commercial shipment. 2. USE the <i>Reference</i> section to determine the appropriate regulatory action to take.

- 1 In Regionalized countries, only VS-defined areas are considered to be affected with HPAI (H5N1). See page A-1-17 for a list of regionalized countries with HPAI (H5N1)-affected regions identified.
- 2 The strongest confirmation is documentation (labeling, commercial name, receipts, and your own expertise). **Do not** necessarily take an individual's word for the origin of the product.
- 3 Currently Canada is the **only** country designated at minimal risk for BSE.

Importations of Milk and Other Dairy Products in Passenger Baggage

The majority of milk and dairy products from FMD-free countries are restricted, and therefore **must** be accompanied by proof of origin (package label, written documentation, proof of travel (passport or travel itinerary), origin of flight, receipt of sale, CBP document (based on the officer’s interview of the traveler), or a certificate.

Milk and dairy products from FMD-S/R regions are regulated the same as milk and dairy products from FMD-free countries, as FMD S/R applies only to meat and meat products.

The majority of milk products from FMD-affected countries are prohibited; however, there are some exceptions, as follows:

- ◆ Liquid milk and milk products intended for use by infants or very young children are admissible if in a reasonable or small quantity for several days’ use
- ◆ Products containing powdered or dry milk that are obviously for human use (soup mixes, drink mixes, baking mixes, baby/infant formula, and similar products) that are in small quantity and prepackaged, labeled in individual serving packages, normal retail-size packages, or packed for distribution in institutional sizes

For all other milk and dairy products, regulate the shipment as a commercial entry. See [Milk and Milk Products on page 3-14-1](#).

Irish Pork Purchased at Dublin and Shannon Airport

TABLE A-1-4 Irish Pork Purchased at Dublin and Shannon Airports

If the pork:	And is:	Then:
Is accompanied by a copy of the Republic of Ireland’s Meat and Meat Products for Export to the USA Certificate and an original cash register receipt	From an approved plant ¹	RELEASE
	Not from an approved plant	REFUSE ENTRY
Lacks either the certificate or the original receipt	—————→	

1 These are the only plants approved to sell pork products to the duty-free shops for export to the United States:

- ◆ 0332/P 0332: Queally Pig Slaughtering Ltd., trading as Dawn Pork and Bacon
- ◆ 0355/P 0355: Avonmore Foods Plc., trading as Irish County Meats Roscrea

Pork Skins or Rinds (Chicharrones)

Cooked pork skins or rinds (called chicharrones in Spanish) are admissible if, upon inspection, you determine that they have been thoroughly cooked. The pork skins or rinds **must** be crisp. They should crumble or break easily when bent.

TABLE A-1-5 Pork Skins or Rinds (Chicharrones)

If:	And:	Then:
Pork rinds or skins	Are thoroughly cooked to a crispness and break easily when bent	RELEASE
	Do not appear to have been thoroughly cooked as evidenced by not breaking easily when bent	REFUSE ENTRY

Pork in Cooked, Prepared Food from Mexico

TABLE A-1-6 Cooked, Prepared Food Containing Pork from Mexico in Passenger Baggage

If entering at a:	And the pork is:	And in:	Then:
Land border port	Thoroughly cooked throughout (like carnitas, cooked meat in sandwiches, empanadas, tamales, and tacos)	Small quantities ¹ (like a day's lunch) for personal use when accompanying the person	RELEASE
		Larger quantities (in passenger's baggage, more than a day's lunch, or a commercial shipment)	1. SEIZE the product 2. If appropriate, ISSUE a civil penalty (spot settlement)
	Not thoroughly cooked, uncooked, or cured and dried	→	
Other than at a land border port		→	

- 1 As a guideline for small quantities for a day's lunch, use quantities of up to 6 tacos or 6 empanadas per person, or up to 1 dozen tamales per person, or an equivalent combination of tacos, empanadas, tamales, carnitas, etc., per person. These are guidelines **only** and specific amounts are to be determined by the CBP Agriculture Specialist/CBP Officer clearing the passenger.

Carcasses of Game Birds

Never handle unpackaged carcasses of game birds in passenger baggage when the carcasses are from Afghanistan, Albania, Azerbaijan, Bangladesh, Benin, Burkina Faso, Cambodia, Cameroon, China, Côte d'Ivoire, Czech Republic¹, Djibouti, England¹, Egypt, Germany¹, Ghana, Hungary¹, India, Indonesia, Iran, Israel, Japan, Jordan, Kazakhstan, Kuwait, Laos, Malaysia, Myanmar, Niger, Nigeria, Pakistan, Palestinian Autonomous Territories, Poland¹, Romania, Russia, Saudi Arabia, South Korea, Sudan, Sweden¹, Thailand, Togo, Turkey, Ukraine, or Vietnam. You risk contracting exotic strains of avian influenza. (Country listing will be updated as country status changes.)

- 1 Regionalized country. **Only** VS-defined areas are considered to be affected with HP AI (H5N1). The VS defined areas follow: Czech Republic (Kraj of Kralovehradecky and Pardubicky, District Usti nad Orliem), England (Suffolk and Norfolk Counties), Germany (Kreis of Bamberg, Kreis of Dobeln, Kreis of Havelland, Kreis of Erlangen-Hochstadt, Kreis of Jerichowerland, Kreis of Kitzingen, Kreis of Mecklenburg-Strelitz, Kreis of Muldentale, Kreis of Neustadt A.D. Aisch, Kreis of Oberhavel, Kreis of Ostprignitz-Ruppin, Kreis of Potsdam-Mittelmark, Kreis of Saalfeld-Rudolstadt, Kreis of Schwandorf, Kreis of Torgue-Oschatz, Kreis of Uckermark), Great Britain (Suffolk and Norfolk Counties), Hungary (Bacs-Kiskun, Csongrad Counties), Poland (voivodships of Warminsko-Mazurskie, Mazowiekie, and Kujawsko-Pomorskie only) and Sweden (Kalmar County). Contact your local PPQ-VRS-AQI Veterinarian or a PPQ-VRS-HQ Staff Veterinarian for current information on VS-defined areas for regionalized countries.

TABLE A-1-7 Carcasses of Game Birds in Passenger Baggage

If the passenger is arriving from a country known to be:	And the bird:	And the importation is:	Then:
Affected with HPAI (H5N1) only		Accompanied by a VS permit	RELEASE
		Lacks a VS permit	REFUSE ENTRY
Affected with HPAI (H5N1) in combination with END		Accompanied by a VS permit	RELEASE
		Lacks a VS permit	REFUSE ENTRY
Affected with END only	Has been eviscerated (gutted) and the feet and head have been removed and has intact feathers on one wing		RELEASE
		Consigned to an approved establishment	AUTHORIZE shipment under seal with VS 16-78 (see Appendix K to complete the form)
		Not consigned to an approved establishment	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)
Free from HPAI (H5N1) and END			RELEASE

Birds' Nests

TABLE A-1-8 Birds' Nests in Passenger Baggage

If the birds' nests are:	And the country of origin is known to be:	And the birds' nests:	Then:	
<ul style="list-style-type: none"> ◆ Edible ◆ Inedible 	Affected with HPAI (H5N1) only	→	REFUSE ENTRY	
	Affected with HPAI (H5N1) in combination with END	→	REFUSE ENTRY	
	Affected with END only	Are accompanied by a manufacturer's statement ¹	 Important	The importation may be subject to plant regulations.
		Lack the appropriate statement ¹		REFUSE ENTRY
	Free of both HPAI (H5N1) and END	→	RELEASE	

¹ A manufacturer's statement indicating that the birds' nests were heated to a minimum internal temperature of 161°F (72°C).

Moon Cakes

Moon cakes containing meat are **prohibited** in passenger baggage.

Never open packages of egg products when those eggs are from Afghanistan, Albania, Azerbaijan, Bangladesh, Benin, Burkina Faso, Cambodia, Cameroon, China, Côte d'Ivoire, Czech Republic¹, Djibouti, England¹, Egypt, Germany¹, Ghana Hungary¹, India, Indonesia, Iran, Israel, Japan, Jordan, Kazakhstan, Kuwait, Laos, Malaysia, Myanmar, Niger, Nigeria, Pakistan, Palestinian Autonomous Territories, Poland¹, Romania, Russia, Saudi Arabia, South Korea, Sudan, Sweden¹, Thailand, Togo, Turkey, Ukraine, or Vietnam. You risk contracting exotic strains of avian influenza. (Country listing will be updated as a country status changes.)

- ¹ Regionalized country. **Only** VS-defined areas are considered to be affected with HPAI (H5N1). The VS defined areas follow: Czech Republic (Kraj of Kralovehradecky and Pardubicky, District Usti nad Orliet), England (Suffolk and Norfolk Counties), Germany (Kreis of Bamberg, Kreis of Dobeln, Kreis of Havelland, Kreis of Erlangen-Hochstadt, Kreis of Jerichowerland, Kreis of Kitzingen, Kreis of Mecklenburg-Strelitz, Kreis of Muldentel, Kreis of Neustadt A.D. Aisch, Kreis of Oberhavel, Kreis of Ostprignitz-Ruppin, Kreis of Potsdam-Mittelmark, Kreis of Saalfeld-Rudolstad, Kreis of Schwandorf, Kreis of Torgue-Oschatz, Kreis of Uckermark), Great Britain (Suffolk and Norfolk Counties), Hungary (Bacs-Kiskun, Csongrad Counties), Poland (voivodships of Warminsko-Mazurskie, Mazowiekie, and Kujawsko-Pomorskie only) and Sweden (Kalmar County). Contact your local PPQ-VRS-AQI Veterinarian or a PPQ-VRS-HQ Staff Veterinarian for current information on VS-defined areas for regionalized countries

TABLE A-1-9 Moon Cakes in Passenger Baggage or Mail

If the product is:	And the product:	And from a country known to be:	Then:
Moon cake	Contains raw or partially cooked egg/egg yolk	Affected with HPAI (H5N1) only	REFUSE ENTRY
		Affected with HPAI (H5N1) in combination with END	REFUSE ENTRY
		Affected with END only	REFUSE ENTRY
		Free from HPAI (H5N1) and END	RELEASE
	Contains solid egg/egg yolk	Affected with HPAI (H5N1) only	REFUSE ENTRY
		Affected with HPAI (H5N1) and END	REFUSE ENTRY
		Affected with END only	RELEASE
		Free from HPAI (H5N1) and END	RELEASE
	<ul style="list-style-type: none"> ◆ Has a picture of egg on the outer packaging ◆ Does not have a picture of an egg on the outer packaging and you cannot determine the absence of egg 	Affected with HPAI (H5N1) only	REFUSE ENTRY
		Affected with HPAI (H5N1) and END	REFUSE ENTRY
		Affected with END only	Inspect product to determine if moon cake contains raw, pasty or partially cooked egg/egg yolk or if moon cake contains solid egg/egg yolk
		Affected with END only	RELEASE
Contains egg that was mixed into the cake batter and thoroughly baked and is listed as an ingredient on the packaging	→	RELEASE	
Contains meat	→	REFUSE ENTRY	
Does not contain egg or meat	→	RELEASE	

Matrix Definitions of Abbreviations, Regions, and Headings

Africa—Includes Algeria, Angola, Botswana, Burundi, Cape Verde, Central African Republic, Chad, Comoros, Congo (Democratic Republic of), Congo (Republic of), Equatorial Guinea, Eritrea, Ethiopia, Gabon, Gambia, Guinea, Guinea-Bissau, Kenya, Lesotho, Liberia, Libyan Arab Jamahiriya, Madagascar, Malawi, Mali, Mauritania, Mauritius, Morocco, Mozambique, Republic of South Africa, Rwanda, Sao Tome and Principe, Senegal, Seychelles, Sierra Leone, Somalia, Swaziland, Tanzania, Tunisia, Uganda, Western Sahara, Zambia, and Zimbabwe.

Benin, Burkina Faso, Cameroon, Côte d'Ivoire, Djibouti, Egypt, Ghana, Namibia, Niger, Nigeria, Sudan, and Togo are listed separately.

APHIS-defined EU CSF region—The European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland). The APHIS-defined EU CSF region is a single region of low risk for CSF.

ASF—African swine fever.

BSE—Bovine spongiform encephalopathy.

Central America—Includes El Salvador, Guatemala, Honduras, and Nicaragua.

Belize, Costa Rica, and Panama are listed separately.

CSF—Classical swine fever (also known as hog cholera).

CSF/SR—Classical swine fever free with special requirements to apply. Applies **only** to meat, meat products and edible meat by-products.

Cured and dried—If the cured and dried meat is coming from a country affected with diseases of concern, then the meat requires official certification; however, noncommercial shipments being given a certificate from the exporting country is unlikely. If you do encounter meat accompanied by a valid certificate, then handle the meat as if the meat were a commercial shipment. Use the *Reference* section for meat in this manual.

END—Exotic Newcastle disease.

END/SR—Exotic Newcastle disease free with special requirements to apply. Applies **only** to meat, meat products and edible meat by-products.

Eggs—Never crack, break open, or puncture eggs from countries affected with HPAI (H5N1); however, if the importation is cooked or boiled eggs from a country that is **not** affected with HPAI (H5N1), then crack a random sample or puncture the contents of a random sample to verify that there are **no** viable embryos.

FMD—Foot-and-mouth disease.

FMD/SR—Foot-and-mouth disease free with special requirements to apply. Applies **only** to meat, meat products and edible meat by-products.

HPAI (H5N1)—Highly pathogenic avian influenza subtype H5N1. The following countries are affected with HPAI (H5N1): Afghanistan, Albania, Azerbaijan, Bangladesh, Benin, Burkina Faso, Cambodia, Cameroon, China, Côte d'Ivoire (Ivory Coast), Czech Republic², Djibouti, England², Egypt, Germany², Ghana, Hungary², India, Indonesia, Iran, Israel, Japan, Jordan, Kazakhstan, Kuwait, Laos, Malaysia, Myanmar (Burma), Niger, Nigeria, Pakistan, Palestinian Autonomous Territories, Poland², Romania, Russia, Saudi Arabia, South Korea, Sudan, Sweden², Thailand, Turkey, Ukraine, and Vietnam. (Country listing will be updated as country status changes.)

South America—Includes Bolivia, Columbia, Ecuador, Falkland Islands, Paraguay, Peru, Uruguay, and Venezuela.

Argentina, Brazil, Chile, French Guiana, Guyana, and Suriname are listed separately.

SVD—Swine vesicular disease.

SVD/SR—Swine vesicular disease free with special requirements to apply. Applies **only** to meat, meat products and edible meat by-products.

United Kingdom—England, Scotland, Wales, and Northern Ireland are listed separately.

2 Regionalized country. **Only** VS-defined areas are considered to be affected with HPAI (H5N1). The VS defined areas follow: Czech Republic (Kraj of Kralovehradecky and Pardubicky, District Usti nad Orliem), England (Suffolk and Norfolk Counties), Germany (Kreis of Bamberg, Kreis of Dobeln, Kreis of Havelland, Kreis of Erlangen-Hochstadt, Kreis of Jerichowerland, Kreis of Kitzingen, Kreis of Mecklenburg-Strelitz, Kreis of Muldentale, Kreis of Neustadt A.D. Aisch, Kreis of Oberhavel, Kreis of Ostprignitz-Ruppin, Kreis of Potsdam-Mittelmark, Kreis of Saalfeld-Rudolstadt, Kreis of Schwandorf, Kreis of Torgue-Oschatz, Kreis of Uckermark), Great Britain (Suffolk and Norfolk Counties), Hungary (Bacs-Kiskun, Csongrad Counties), Poland (voivodships of Warminsko-Mazurskie, Mazowiekie, and Kujawsko-Pomorskie only) and Sweden (Kalmar County). Contact your local PPQ-VRS-AQI Veterinarian or a PPQ-VRS-HQ Staff Veterinarian for current information on VS-defined areas for regionalized countries.

Matrix Legend

E

The importation is admissible with adequate proof of origin. Adequate proof of origin (APO) is documentary evidence of where an animal product comes from. Examples include meat inspection certificate, certificate of origin, bill of lading, invoice, label, or document on official letterhead prepared by the manufacturer, shipper, or seller.

P

Prohibit the entry of the importation.

O

Abbreviations within parentheses indicate Dependent States and the country of their dependence.

EXAMPLE

The entry for Bonaire a Dependent State of The Netherlands is Bonaire (Netherlands).

X

Disease status is known to be present in the region or country.

FIGURE A-1-1 Guide to Entry Status of Animal Products in Passenger Baggage or Mail (continued)

- One of the European Union- Member States of the "APHIS-defined EU CSF region". The "APHIS-defined EU CSF region" is a single region of low risk for CSF. The APHIS-defined EU CSF region is comprised of the European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland)
- Bermuda, a Dependent State of the United Kingdom, is FMD-free.

- 3 Ruminant material **other than** ovine and caprine is enterable in passenger baggage and mail (i.e., bovine, camelid and cervid are enterable).
- 4 Highly pathogenic avian influenza subtype H5N1 is considered to exist in VS-defined areas **only**. The VS defined areas follow: Czech Republic (Kraj of Kralovehradecky and Pardubicky, District Usti nad Orliem), England (Suffolk and Norfolk Counties), Germany (Kreis of Bamberg, Kreis of Döbeln, Kreis of Havelland, Kreis of Erlangen-Hochstadt, Kreis of Jerichowerland, Kreis of Kitzingen, Kreis of Mecklenburg-Strelitz, Kreis of Muldentale, Kreis of Neustadt A.D. Aisch, Kreis of Oberhavel, Kreis of Ostprignitz-Ruppin, Kreis of Potsdam-Mittelmark, Kreis of Saalfeld-Rudolstadt, Kreis of Schwandorf, Kreis of Torgue-Oschatz, Kreis of Uckermark), Great Britain (Suffolk and Norfolk Counties), Hungary (Bacs-Kiskun, Csongrad Counties), Poland (voivodships of Warminsko-Mazurskie, Mazowiekie, and Kujawsko-Pomorskie only) and Sweden (Kalmar County). Contact your local PPO-VRS-AQI Veterinarian or a PPO-VRS-HQ Staff Veterinarian for current information on VS-defined areas for regionalized countries. Unprocessed avian products from HPAI-regionalized countries will **not** be permitted to enter. Processed avian products (such as pate or soup mix) not labeled as being from HPAI (H5N1) affected areas of regionalized countries may enter. Processed avian products from regionalized countries labeled as being from zones affected with HPAI (H5N1) will be allowed to enter if accompanied by a VS import permit and appropriate certification. Processed and/or unprocessed avian products from other HPAI (H5N1)-affected countries (i.e., affected with HPAI (H5N1), but **not** regionalized), will **not** be permitted to enter.
- 5 Only Surrey County (England) is affected with FMD. The rest of England is free of FMD.
- 6 The Island of Sardinia is still ASF-affected.
- 7 Most of Italy is SVD-affected, **except** the Regions of Friuli, Liguria, Marche, and Valle d'Aosta which are SVD/SR.
- 8 If a Parma ham, go to [Table 3-13-20](#).
- 9 Most of Mexico is CSF-affected, **except** the States of Baja California, Baja California Sur, Campeche, Chihuahua, Nayarit, Quintana Roo, Sinaloa, Sonora, and Yucatan which are CSF/SR.
- 10 Most of Mexico is END-affected, except the States of Campeche, Quintana Roo, and Yucatan which are END/SR.
- 11 If small quantities for personal use when accompanying the person, go to [Table A-1-6, "Cooked, Prepared Food Containing Pork from Mexico in Passenger Baggage,"](#) on [page A-1-11](#).
- 12 Most of Namibia is FMD/SR, **except** the area north of the Veterinary Cordon Fence which is FMD-affected.
- 13 If a Serrano ham, Iberian ham, Iberian pork shoulder, or an Iberian pork loin, go to [Table 3-13-21](#).

Medications in Passenger Baggage

When medications are declared or found in passenger baggage, follow the guidelines on the CBP Web site at http://www.cbp.gov/xp/cgov/travel/vacation/kbyg/prohibited_restricted.xml#Medication.

Shell Eggs, Empty in Passenger Baggage or Mail

Empty egg shells in passenger baggage or mail may be decorated, etched, natural, or painted. To regulate empty egg shells arriving in passenger baggage or mail, see [Table 3-6-3 on page 3-6-4](#).

Special Guidelines for Wild Game Meat and Hunting Trophies from Canada

Hunted, Wild Game Meat from Canada

These guidelines are solely for game meat of wild bovine (cattle, buffalo, bison, and yak), ovine (sheep) and caprine (goats), including mountain goats, mountain sheep, and musk ox hunted in Canada for the hunter's own personal use.

If accompanied by a valid hunting license, then wild cervids (caribou, deer, elk, moose) are unrestricted. Continue to [Table A-1-10](#).

If the meat is shipped by mail, then the required documentation **must** be included with the other shipping documents (U.S. Customs Declaration or invoice).

TABLE A-1-10 Hunted, Wild Game Meat from Canada

If the wild ruminant is:	If the meat imported is:	And is:	And:	Then:		
◆ Bovine (bison, buffalo, cattle, yak)	◆ Fresh or fresh frozen dressed carcass ¹ ◆ Fresh or fresh-frozen meat, with or without bone ◆ Fresh ground or fresh-ground frozen sausage ◆ Cooked or cured and dried (includes jerked meat and cured or dried sausages)	Hunter harvested	Is appropriately documented ² Lacks appropriate documentation ²	RELEASE REFUSE ENTRY		
		Farmed, hunter-harvested	Is appropriately documented ³ Lacks appropriate documentation ³	RELEASE REFUSE ENTRY		
			Is accompanied by CFIA Annex A-1 Lacks the required CFIA Annex A-1	RELEASE REFUSE ENTRY		
		◆ Caprine (goat, Musk ox) ◆ Ovine (sheep)	◆ Fresh or fresh frozen whole, dressed carcass ¹ ◆ Fresh or fresh-frozen meat, with or without bone ◆ Fresh ground or fresh-ground frozen sausage ◆ Cooked or cured and dried (includes jerked meat and cured or dried sausages)	Hunter harvested	Is appropriately documented ² Lacks appropriate documentation ²	RELEASE REFUSE ENTRY
				Farmed, hunter-harvested	Is appropriately documented ³ Lacks appropriate documentation ³	RELEASE REFUSE ENTRY
					Is accompanied by CFIA Annex A-2 Lacks the required CFIA Annex A-2	RELEASE REFUSE ENTRY
Cervid (caribou, deer, elk, moose)	—————→			Is accompanied by proof of species ⁴ Lacks proof of species ⁴	RELEASE REFUSE ENTRY	

- Must** be free of the intact head or head parts (brain, eyes, tongue, etc.) and viscera (for example: heart, intestines, kidney, liver, lymph nodes, pancreas, thymus).
- Appropriate documentation means a Canadian-issued, valid hunting license or tag, a photocopy of the license or tag, that the hunter presents to the U.S. CBP official. A VS special permit is **no** longer needed.
- Appropriate documentation means a Canadian-issued, valid hunting license or tag, a photocopy of the license or tag, or the equivalent, that the hunter presents to the US CBP official. VS defines equivalent as being a letter from the game farm.
- The strongest confirmation for proof of species is documentation (labeling, receipt from processing facility) and your own expertise. **Do not** necessarily take the individual's word for the origin of the product.

Hunting Trophies from Canada

These guidelines are solely for trophies of free-ranging and farmed wild ovine and caprine, including mountain goats, mountain sheep, and musk ox hunted in Canada.

Trophies from cervids (caribou, deer, elk, and moose) and non-ruminant animals (bears, boas, mountain lions, and wolves) hunted in Canada are unrestricted. Continue to [Table A-1-11](#).

TABLE A-1-11 Free-Ranging and Farmed Wild Hunting Trophies from Canada

If the trophy is:	And is:	And is:	And:	And:	And the quantity imported:	Then:
<ul style="list-style-type: none"> ◆ Bovine ◆ Ovine ◆ Caprine 	Fully taxidermy finished ¹	—————→				RELEASE
	Not fully taxidermy finished ¹	Horns , with or without skull caps	<ul style="list-style-type: none"> ◆ Are free of skull cap ◆ Skull cap is present and free of brain tissue 	A maximum of two sets of horns	—————→	RELEASE
				More than two sets of horns	Corresponds to the number authorized by the hunting license ²	RELEASE
					Exceeds the number authorized by the hunting license ²	REFUSE ENTRY to excess ³
			Are attached to an intact head and brain tissue present	—————→	REFUSE ENTRY	
			Are attached to a skull cap and brain tissue is present	—————→	REFUSE ENTRY	

TABLE A-1-11 Free-Ranging and Farmed Wild Hunting Trophies from Canada (continued)

If the trophy is:	And is:	And is:	And:	And:	And the quantity imported:	Then:
<ul style="list-style-type: none"> ◆ Bovine ◆ Ovine ◆ Caprine 	Not fully taxidermy finished ¹	Bones, including skulls with or without horns	Are clean, dry and free from undried pieces of flesh, hide, and sinew, and offered for entry as trophies ⁴ or are offered for consignment to a museum	A maximum of two skulls or bones	→	RELEASE
				More than two skulls or bones	Corresponds to the number authorized by the hunting license ²	RELEASE
					Exceeds the number authorized by the hunting license ²	REFUSE ENTRY to excess ³
			Are not clean, not dry and not free from undried pieces of flesh, hide, and sinew, not offered for entry as trophies ⁴ and not offered for consignment to a museum		Consigned to an approved establishment ⁵	AUTHORIZE shipment under seal with VS 16-78 (see Appendix K to complete the form)
					Not consigned to an approved establishment ⁵	1. DO NOT RELEASE the HOLD 2. PROVIDE the importer with the appropriate options (see Table 2-2-11)
		Hides, skins or capes ⁶	Head is attached	Skull and contents have been removed	→	RELEASE
				Skull and contents are present	→	REFUSE ENTRY
			Head is not attached		→	RELEASE

TABLE A-1-11 Free-Ranging and Farmed Wild Hunting Trophies from Canada (continued)

If the trophy is:	And is:	And is:	And:	And:	And the quantity imported:	Then:
◆ Camelid	→					RELEASE
◆ Cervid (caribou, deer, elk, moose, and reindeer)	→			A maximum of two sets		RELEASE
				More than two sets	Corresponds to the number authorized by the hunting license ⁷	RELEASE
					Exceeds the number authorized by the hunting license ⁷	REFUSE ENTRY to excess ⁸

- 1 USDA, APHIS regulations allow for the **unrestricted entry** of fully taxidermy finished trophies. Fully taxidermy finished trophies are those trophies that have been professionally cleaned (free of dirt, blood, insects, putrid odors, etc.) and processed. Fully taxidermy finished trophies have been professionally prepared (may be stuffed and/or mounted) for the purpose of personal exhibition.
- 2 A copy of the importer's hunting license/permit or other documentation that clearly demonstrates lawful possession of the trophy from Canada. The license/permit or other documentation must be issued by the Canadian government (at the Provincial, Tribal or CFIA level), and not by the outfitter. This document should identify the animal species and, if applicable, indicate the quantity of animals allowed to be hunted. USDA limits the quantity of Canadian origin, non-cervid ruminant bone trophies allowed to be imported to those taken from 2 animals unless a greater quantity is authorized by the hunting license/permit or other documentation as indicated above. Bone trophies that do not meet the above conditions will be regulated in the **Bones and Related By-Products** Section as a shipment of commercial bones.
- 3 If a party of three hunters has a total of horns or skulls that matches the number allowed on the hunter's combined licenses, then these horns or skulls are authorized entry. (For example, if the number allowed on each license is two, then a combined total of six horns or skulls may be authorized entry for the three hunters.) However, if the total number of horns and skulls exceeds the number allowed on the hunter's combined licenses, then **prohibit** entry to the excess amount. If the hunters will **not** volunteer which hunter has the extra skull(s), then **prohibit** entry on the entire shipment. A VS special permit is **no** longer required.
- 4 USDA defines trophies as, the bones (including skulls, antlers, teeth, horns, and hoofs) of an animal carcass that can be used as a remembrance or souvenir of "the hunt" that are for personal use only. A copy of the importer's hunting license/permit, or other documentation that clearly demonstrates lawful possession of the trophy from the country of origin must be issued by the foreign government (at the Federal, Regional, or Department level), not by the outfitter. This documentation must be in English or must be accompanied by a government endorsed English translation. This documentation should identify the animal species and, if applicable, indicate the quantity of animals allowed to be hunted. USDA limits the quantity of bone trophies allowed to be imported to those taken from 2 animals unless a greater quantity is authorized by the hunting license/permit or other documentation as indicated above. Bone trophies that do not meet the above conditions will be regulated in the **Bones and Related By-Products** Section as a shipment of commercial bones.
- 5 USDA regulates antlers and other bony trophies for other diseases, such as anthrax.
- 6 The cape is the pelt from the head, neck, and forepart of the shoulders of the animal used for mounting as a trophy.
- 7 USDA has not imposed any restrictions on cervid trophies from Canada because of BSE. Hunters may import cervid trophies that were hunted in Canada without restriction. Hunters should have documentation that demonstrates proof of Canadian origin for their cervid trophies (i.e. Canadian hunting license/permit [Provincial, Tribal, or CFIA issued]. Game Farm receipt, Outfitter receipt, or other documentation provided by the Game farm or Outfitter, etc.).

- 8 If a party of three hunters has a total of racks (1 pair of antlers = 1 rack) that matches the number allowed on the hunter's combined licenses, then these racks are authorized entry. (For example, if the number allowed on each license is two, then a combined total of six racks may be authorized entry for the three hunters.) However, if the total number of racks exceeds the number allowed on the hunter's combined licenses, then **prohibit** entry to the excess amount. If the hunters will **not** volunteer which hunter has the extra rack(s), then **prohibit** entry on the entire shipment. A VS special permit is **no** longer required.

B

Animal Product
Manual

Appendix B

List of Animal Names and Their Classes

Introduction

Use this appendix to determine the class of an animal when all you know is the animal's name. This appendix lists common, foreign, and scientific names of animals. Scientific names are listed by genus and set in italics.

For each animal name, its class is identified by one of the following letters:

(H)

Horse

(P)

Poultry/Birds—When appropriate, the animal name will be distinguished as a game bird

(R)

Ruminant

(nr)

Regulate as ruminant—although **not** a ruminant, can transmit diseases of ruminants (for example, FMD and bovine tuberculosis)

(S)

Swine

(O)

Other—represents a class of animal **other than** horse, poultry, ruminant, or swine. Animal products and by-products of other classes (either listed with an (O) or **not** listed) are **not** restricted by the agricultural requirements of Animal and Plant Health Inspection Service

List of Animal Names and Their Classes

The list of animal names and their classes follow.

List of Animal Names and Their Classes

Appendix C

List of Foreign Countries and Their Disease Status

Contents

Introduction [page C-1-1](#)

Matrix [page C-1-1](#)

Foreign Countries and Disease Status [page C-1-4](#)

Introduction

This appendix lists the distribution of the animal diseases as identified in 9CFR 94. Use the *List of Foreign Countries and Their Disease Status*¹ to identify the animal diseases which occur and **do not** occur in each foreign country.

Matrix

Figure C-1-1 is divided into columns. The left column alphabetically lists foreign countries. The right columns identify which animal diseases occur in each country; which animal diseases **do not** occur; and which countries have special requirements.

Listed below are the abbreviations used to describe the disease status categories:

ASF. African swine fever.

APHIS-defined EU CSF Region. The European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland). The APHIS-defined EU CSF region is a single region of low risk for CSF.

BSE. Bovine spongiform encephalopathy.

CSF. Classical swine fever (formerly HC, hog cholera).

END. Exotic Newcastle disease.

¹ Or other areas of special epidemiological interest to APHIS.

FMD. Foot-and-mouth disease.

HPAI (H5N1). Highly pathogenic avian influenza subtype H5N1. The following countries are affected with HPAI (H5N1): Afghanistan, Albania, Azerbaijan, Bangladesh, Benin, Burkina Faso, Cambodia, Cameroon, China, Côte d'Ivoire (Ivory Coast), Czech Republic², Djibouti, Egypt, England², Germany², Ghana, Hungary², India, Indonesia, Iran, Israel, Japan, Jordan, Kazakhstan, Kuwait, Laos, Malaysia, Myanmar, Niger, Nigeria, Pakistan, Palestinian Autonomous Territories, Poland², Romania, Russia, Saudi Arabia, South Korea, Sudan, Sweden², Thailand, Togo, Turkey, Ukraine, and Vietnam. (Country listing will be updated as country status changes.)

SVD. Swine vesicular disease.

In addition to the above, the following four disease status categories are included for regulating the importation of meat:

CSF/SR. Classical swine fever free with special requirements. Applies **only** to meat, meat products and edible meat by-products.

END/SR. Exotic Newcastle disease free with special requirements. Applies **only** to meat, meat products and edible meat by-products.

FMD/SR. Foot-and-mouth disease free with special requirements. Applies **only** to meat, meat products and edible meat by-products.

SVD/SR. Swine vesicular disease free with special requirements. Applies **only** to meat, meat products and edible meat by-products.

A country with special requirements (SR) is known to be free from CSF, END, FMD, or SVD. However, one or more of the following conditions apply to the country:

- ◆ Supplements its national meat supply by importing meat from affected countries
- ◆ Imports live poultry, ruminants or swine from affected countries under conditions less restrictive than would be acceptable for importation into the United States

² Regionalized country. **Only** VS-defined areas are considered to be affected with HPAI (H5N1). The VS defined areas follow: Czech Republic (Kraj of Kralovehradecky and Pardubicky, District Usti nad Orliem), England (Suffolk and Norfolk Counties), Germany (Kreis of Bamberg, Kreis of Dobeln, Kreis of Havelland, Kreis of Erlangen-Hochstadt, Kreis of Jerichowerland, Kreis of Kitzingen, Kreis of Mecklenburg-Strelitz, Kreis of Muldentale, Kreis of Neustadt A.D. Aisch, Kreis of Oberhavel, Kreis of Ostprignitz-Ruppin, Kreis of Potsdam-Mittelmark, Kreis of Saalfeld-Rudolstadt, Kreis of Schwandorf, Kreis of Torgue-Oschatz, Kreis of Uckermark), Great Britain (Suffolk and Norfolk Counties), Hungary (Bacs-Kiskun, Csongrad Counties), Poland (voivodships of Warminsko-Mazurskie, Mazowiekie, and Kujawsko-Pomorskie only) and Sweden (Kalmar County). Contact your local PPQ-VRS-AQI Veterinarian or a PPQ-VRS-HQ Staff Veterinarian for current information on VS-defined areas for regionalized countries.

- ◆ Shares a common land border with an affected country or region

The disease status categories CSF/SR, END/SR, FMD/SR, and SVD/SR applies **only** to meat, meat products and edible meat by-products.

Foreign Countries and Disease Status

Country	Disease Status		Free of:

FIGURE C-1-1 List of Foreign Countries and Disease Status (continued)

Appendix C: List of Foreign Countries and Their Disease Status

Foreign Countries and Disease Status

- 1 Highly pathogenic avian influenza subtype H5N1 is considered to exist.
- 2 One of the European Union- Member States of the "APHIS-defined EU CSF region". The "APHIS-defined EU CSF region" is a single region of low risk for CSF. The APHIS-defined EU CSF region is comprised of the European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland)
- 3 Bermuda, a Dependent State of the United Kingdom, is FMD-free.
- 4 Currently Canada is the **only** country designated at minimal risk for BSE. Bovine, ovine, and caprine ruminant meat are treated differently from cervid and camelid ruminant meat. Where there is **not** a minimal risk for BSE designation, then regulate Canada as BSE-affected.
- 5 Highly pathogenic avian influenza subtype H5N1 is considered to exist throughout China, **except** Hong Kong (Special Administrative Region to the People's Republic of China), Macau (Dependency of People's Republic of China), and Taiwan (Province of China) which are **not** affected with highly pathogenic avian influenza (HPAI) subtype H5N1.
- 6 Highly pathogenic avian influenza subtype H5N1 is considered to exist in VS-defined territories **only**. The VS defined areas follow: Czech Republic (Kraj of Kralovehradecky and Pardubicky, District Usti nad Orliem), England (Suffolk and Norfolk Counties), Germany (Kreis of Bamberg, Kreis of Dobeln, Kreis of Havelland, Kreis of Erlangen-Hochstadt, Kreis of Jerichowerland, Kreis of Kitzingen, Kreis of Mecklenburg-Strelitz, Kreis of Muldentale, Kreis of Neustadt A.D. Aisch, Kreis of Oberhavel, Kreis of Ostprignitz-Ruppin, Kreis of Potsdam-Mittelmark, Kreis of Saalfeld-Rudolstadt, Kreis of Schwandorf, Kreis of Torgue-Oschatz, Kreis of Uckermark), Great Britain (Suffolk and Norfolk Counties), Hungary (Bacs-Kiskun, Csongrad Counties), Poland (voivodships of Warminsko-Mazurskie, Mazowiekie, and Kujawsko-Pomorskie only) and Sweden (Kalmar County). Contact your local PPQ-VRS-AQI Veterinarian or a PPQ-VRS-VS Staff Veterinarian for current information on VS-defined areas.
- 7 Only Surrey County (England) is affected with FMD. The rest of England is free of FMD
- 8 Greenland, a Dependent State of Denmark, is FMD-free.
- 9 Greenland, a Dependent State of Denmark, is SVD-free.
- 10 Most of Italy is SVD-affected, **except** Friuli, Liguria, Marche, and Valle d'Aosta which are SVD/SR.
- 11 The Island of Sardinia is affected with ASF.
- 12 Most of Mexico is CSF-affected, **except** the States of Baja California, Baja California Sur, Campeche, Chihuahua, Nayarit, Quintana Roo, Sinaloa, Sonora, and Yucatan which are CSF/SR.
- 13 Most of Mexico is END-affected, **except** the States of Campeche, Quintana Roo, and Yucatan, which are END/SR.
- 14 Most of Namibia is FMD/SR, **except** for the portion of the country north of the Veterinary Cordon Fence (VSF) which is FMD-affected.
- 15 Uruguay is FMD affected, but Uruguay is allowed to export fresh (chilled or frozen) beef under specific conditions.

Guide to Animal Product and By-Product Labels

Contents

Introduction [page D-1-1](#)

Guide to Animal Product and By-Product Labels [page D-1-2](#)

Introduction

This appendix is a guide to animal product and by-product labels. When looking at labels on containers and cans, use this appendix to help determine the contents, degree of processing, and country of origin.

Many of the animal products and by-products offered for importation in passenger baggage, in mail, and sometimes in cargo have **no** accompanying documentation to verify content, degree of processing, or country of origin. Therefore, the labels on containers and cans are the **only** source of information. Many of these labels use foreign words and characters to describe the contents.

Important

Your investigative techniques will prove valuable in determining the contents of containers and cans. Be particularly suspicious of canned products from Taiwan. The labels on products regularly sold by some supermarkets and food companies state the product's name in English, but **do not** mention meat. However, on the label in a block about one inch square appears the Chinese character for meat (see [Figure D-1-1](#)). Also, containers and cans labeled as preserved fruit and tea often contain meat.

FIGURE D-1-1 Chinese Character for Meat

Chinese characters along with other foreign words that may be found on containers or cans of meat and animal by-products are listed alphabetically in this appendix.

The letters in parentheses denote the country of origin: (CN) = China, (DK) = Denmark, (FR) = France, (DE) = Germany, (IT) = Italy, (JP) = Japan, (PO) = Portugal, (ES) = Spain, (SE)=Sweden.

If a foreign word is **not** listed in this appendix, check the [Glossary](#) and the Spanish dictionary ([Appendix F](#)).

Guide to Animal Product and By-Product Labels

Key Word on Label	English Translation	Chinese Character	Japanese Character
Abati (FR)	giblet of poultry

Appendix E

List of Establishments Approved to Receive and/or Process Restricted Imported Animal By-Products

Contents

Introduction [page E-1-1](#)
Establishments Approved to Receive and/or Process Restricted Imported Animal By-Products [page E-1-2](#)

Introduction

Use this appendix to identify establishments in the United States which are approved to receive and/or process restricted importations of animal by-products. The approval given to each establishment is for a specific animal by-product or a specific purpose.

If the restricted material will be forwarded to an alternate approved establishment for processing, that movement must be accompanied with a completed VS Form 16-78 (Report of Entry, Shipment of Restricted Imported Animal Products and Animal By-Products, and Other Material).

The States are listed in the left-hand column of the *List of Establishments Approved to Import Restricted Animal By-Products*. The establishments are listed alphabetically in the middle column. The animal by-product or purpose the establishment was specifically approved to handle is listed in the right-hand column across from each middle column establishment.

The Veterinary Services National Center for Import and Export maintains a current list of approved establishments available on the Internet at the following address:

http://www.aphis.usda.gov/import_export/animals/animal_import/downloads/query-app-estab.html

If you **cannot** find an establishment in this appendix, check the VS list on the Internet at the above address. If an establishment is **not** on any list or message, then the establishment is either inactive or waiting for approval by VS.

Dictionary of Spanish Words Relating to Animal Product/By-Product Importations

Introduction

Use this appendix to translate Spanish words into English words. All the words listed in the *Dictionary of Spanish Words Relating to Animal Product/By-Product Importations* relate to animal product and by-product importations. The translation could be an exact word translation, an interpretation of the word, or a definition of the word.

When the word is a name of an animal, its class is identified by one of the following letters:

(H)

Horse

(P)

Poultry

When appropriate, the animal name will be distinguished as a game bird.

(R)

Ruminant

(S)

Swine

(O)

Other

Represents a class of animal **other than** horse, poultry, ruminant, or swine. Animal products and by-products of other classes are **not** restricted by the agricultural requirements of Animal and Plant Health Inspection Service.

Dictionary of Spanish Words

A

Abeja—bee

Abomaso—abomasum, estomago de rumiante

Eritromicina —erythromycin	Fiemo —dung; manure
Esbelta —thin; lean	Filaria —filaria; a parasitic worm
Escalado, da —(of fish or meat) cup open; to be salted or cured	

Filetear—to be salted or cured (of fish or meat)

Fimo—dung; manure

Formaje—cheese vat; cheese

Forraje—forage; fodder; foraging

Frangollo—porridge of wheat and milk; poorly made stew

Fresco, ca—(of food) fresh

Frez, freza—dung; excrement

Fricasse—pork stew

Frio—cold

Fritada, fritanga—fry; dish of anything fried

Frito—fried eggs

Fundido—melt

G

Gacel, gacela—gazelle

Gallina—hen (P)

Gallina de guinea—guinea hen (P)

Gallinaza—hen dung

Gallipavo—turkey (P)

Gallipava—a large variety of hen (P)

Gallístico, ca—game cocks or cockfights

Gallo—cock; rooster (P)

Gallo de pelea—game cocks or cockfights

Gama—doe (R)

Gamusa—parchment like

Ganadero, ra—pertaining to cattle; grazier; owner of cattle; stock farmer; dealer in cattle; drover

Ganado—livestock; cattle; herd; flock; drove

Ganado caballar—horses (H)

Ganado de pata hendida—oxen; cows; sheep; goats (R)

Ganado mayor—cattle (including horses, asses, mules)

Ganado menor—sheep (R)

Ganado moreno—swine; hogs (S)

Ganado ovejuno—sheep (R)

Ganado porcino—swine; hogs (S)

Ganado vacuna—bovine; cattle (R)

Gandalla—refuse; waste meat

Ganga—little pin-tailed grouse (P)

Ganso bravo—wild goose (game bird) (P)

Ganso sa—gander; goose (P)

Garanon—stallion; stud

Garapito—small insect, like a tick

Garbon—male partridge (P)

Garganta—throat; gullet

Garguero—gullet; windpipe

Garrapata—sheep and cattle tick; disabled horse tick

Gasnate—gullet; windpipe

Gasofia—offal; refuse

Gato—cat (O)

Gelatina—gelatin

Germen—germ

Glandulas—glands

Glóbulo rojo—red blood cell

Gocha—sow (S)

Gocho—hog (S)

Gorrin—small pig, sucking pig (S)

Gramoso, sa—covered with couch grass

Grasa—grease; fat; suet; oil

Grasura—fat; suet

Gratonada—chicken ragout or fricassee

Grosura—fat; suet; tallow

Gruyere—grauyere (cheese)

Guacamayo—macaw (P)

Guajolote—turkey (P)

Guano—seabirds' droppings used as fertilizer

Guarin—suckling pig (S)

Guarnigon—young quail (P)

Guaro—very talkative, small parrot (P)

Guarra—sow (S)

Guarro—hog (S)

Guazubira—Argentine deer (R)

Guemul—guemul, an Andean variety of deer (R)

Guesado—hash of livers and lights

Guimo—guinea pig (O)

Guisado—stew eaten by Spanish Jews

Guisado de cerdo—pork fricassee; pork stew

Gura—crested wild pigeon (game bird) (P)

Gusanera—parasitic insect

Gusano—worm

Gusano vuidos—ecto-parasite

H

Hatero, ra—(animals) that carry a shepherd's baggage

Hato—herd

Helado—ice cream; sherbert

Hematie—erythrocyte, red (blood) cell

Hematina—hematin

Heno—hay with bran for horses

Heparina—heparin

Herbero—esophagus of a ruminant

Herren—mixed grain for horses

Hidrogala—mixture of milk and water

Hiel—gall; bile

Hielo—ice

Hienda—dung

Hierba—weed; grass; herb

Higadilla, llo—small liver; liver of birds, fishes, and other small animals

Hígado—liver

Higate—pottage of figs, pork, etc.

Hípico, ca—equine, pertaining to horses (H)

Hipofisis—pituitary gland; hypophysis

Hipómanes—vaginal discharge from the mare when in heat

Hirco—wild goat (R)

Hisca—bird-lime

Hocico—snout; muzzle; nose (of animal)

Horneado—pickled pork (S)

Hueso—bone

Huevo—egg

Huevo duro—hard (boiled, fried) egg

Huevo tibios—poached egg

I

Ibice—ibex, a kind of goat (R)

Iguedo—buck (goat) (R)

Ijada—flank (of an animal)

Ijar—flank (of an animal)

Incinerador—incinerator

Incinerar—to incinerate; cremate

Incubador—incubator

Infección—infection

Infecioso, sa—infectious; infective

Inmunización—immunization

Insecto—insect

Insulina—insulin

Interdecir—prohibit

Intestino, na—intestine

J

Jabalí—wild boar (S)

Jabalina, o—son of a wild boar; peccary pig (S)

Jabalina—javelin

Jabato—young wild boar (S)

Jamón—ham; salted haunch of a hog (S)

Jeta—hog's snout (S)

Jifa—refuse from slaughtered animals

Jifería—slaughtering

Jifero, ra—pertaining to slaughterhouse; butcher's knife; butcher

Jigote—hash; minced meat

Jirafa—giraffe (O)

Jolote—turkey (P)

Jugo—juice; fluid

Jugo gástrico—gastric juice

Jugo pancreático—pancreatic juice

Jumenta—female donkey (H)

Jumento—donkey; ass (H)

Jusello—pottage of broth, cheese, and eggs

Juta—kind of goose (P)

L

Labanco—South American duck (P)
Labio—lip
Lacon—shoulder ham (S)
Lacticinio—any kind of milk food
Láctico, ca—lactic
Lactina—lactose; lactin; milk sugar
Lactasa—lactase
Lagrimal—lachrymal
Lana—lamb's wool
Lardo—lard, fat of animal; variety of a domesticated pig
Lata—canned; tinned
Lavanco—kind of wild duck (game bird) (P)
Lazareto—quarantine
Leche—milk
Leche crema—custard; coffee cream or creamer
Leche cuajado—to curdle
Leche quemada—sweetmeat made from simmered milk
Lechecillas—sweetbreads; livers and lights
Lechón, na—suckling pig; pig (S)
Lechoncico, illo, ito—very young pig (S)
Lengua—tongue
Levadura—yeast
Librillo—abomasum
Libro—omasum or third stomach (of a ruminant)
Liebre—hare; jack rabbit (O)
Liria—bird-lime
Locro—a kind of stew
Lombriz vioidos—ectoparasite
Lomo—loin; back of an animal
Loncha—thin slice of meat
Longaniza—dried pork sausage; cured without vinegar (S)
Lonja—slice (of meat); leather strap
Lonja de jamón—slice of ham (S)
Loro, a—parrot (P)

M

Macagua, macao—macaw (P)
Macelo—slaughterhouse; abattoir
Machaca—shredded dried meat
Macho—male; donkey; ass (H)
Macho de la perdiz—male partridge (P)
Macho grande—buck (goat) (R)
Machocado—to salt and dry (meat)
Magra—slice of ham (S)
Magro, gra—lean slice of pork (S)
Magueto, ta—young steer or heifer (R)
Maladar—wild hog (S)
Malcocinado—tripe, liver, and lights of mutton of lamb (R)
Malofago—parasitic insect in sheep's wool
Mama—mammary gland; breast
Mamifero—mammal
Manada—herd
Manadero—herdsman; shepherd
Manifiesto—manifest
Mano—foot of cattle after cut off
Manteca—butter, lard, fat of an animal
Mantecado variado—mixed ice cream, neopolitan
Mantecoso—fat; suet; tallow
Mantequilla—butter
Ma-rancho, cha—pig; hog (S)
Marga—ticking; burlap
Margarina—margarine
Marrana—sow, female pig (S)
Marranchon, na—hog (sow) (S)
Marranito—small pig; suckling pig (S)
Marrano—male pig; fresh bacon (S)
Marrano de monte—wild boar (S)
Matacia—slaughter
Matadero—slaughterhouse
Matanza—hog slaughtering and the season when done; swine kept for slaughter; slaughter; butcher
Meados—urine

Mechar—to lard (meat, etc.)
Medianoche—small meat pie or sandwich
Médula—bone marrow
Melliza—kind of sausage made with honey
Mellón—torch made of straw
Menudencia—pork sausages
Menudillo—extremities of animals; giblets of fowl
Menudo—entrails; tripe
Mocosidad—vaginal discharge from a mare in heat
Mollar—lean (meat)
Molleja—gizzard; sweetbread
Mondejo—belly of pig or sheep stuffed with minced meat
Mondongo—tripe; intestines
Mondonguil—pertaining to tripe
Monje—brown peacock (P)
Monterrey—meat pie
Morcilla—blood pudding
Morcón—large blood pudding or sausage
Morrilo—fat of the nape of a sheep (R)
Mortadela—bologna sausage
Mortecino, na—dying a natural death (of an animal)
Moruco—ram; male shee; (R)
Mosca—fly
Mucosidad—mucous
Muestra, muestreo—specimen; sample
Mugre—filth; dirt
Mula—female mule (R)
Mulada—dung heap; garbage dump
Mulo—mule (H)
Muruco—ram; male sheep (R)
Músculo que cierra—sphincter
Muslo—drumbstick of chicken (P)
Musmon—wild sheep; moufflon (R)

N

Nalgada—ham

Nandú—American ostrich (P)
Narvasco—cornstalks (as fodder)
Nata—cream; skim
Nateron—second curd
Nazula—second curd
Neonato—unborn calf (F)
Nervios—nerves
Nieve—neopolitan ice cream
Novilla—young cow; heifer (R)
Novillejo, eja—bullock (heifer) (R)
Novillo—young bull; steer (R)

O

Oca—goose (P)
Olla—dish of boiled meat and vegetables
Omaso—omasum
Onagro—wild ass; onager (H)
Organico—organic
Organo—organ
Orina—urine
Orix—oryx; gemsbok (R)
Ortga—hazel grouse (P)
Osambre, osamenta—skeleton; bones
Oseina—ossein
Oto—bustard (P)
Oveja—sheep (R)
Ovejuela—young ewe (R)
Ovejuno, na—pertaining to sheep (R)
Ovezuelo—small egg
Ovino—ovine

P

Pacas de tela—sackcloth; burlap
Pachamanca—barbecue
Padrote—stud; stallion
Paja—straw
Pájara—female or hen bird (P)
Pájarico, ca, ito, ta—little bird (P)
Pájaro—bird (P)
Pajarraco—large bird (P)

Pajaza —refuse of fodder	Pato, a —duck (P)
Pajón —coarse straw	Pato/ave acuifero —duck; goose (P)
Pajoso —made or full of straw	Pato de Flojel —eider duck (P)
Paleta —shoulder ham (S)	Pato negro —mallard
Paleto —fallow deer (R)	Pato salvaje —a kind of wild duck (P)
Paloma —pigeon; dove (P)	Pato silvestre —mallard (P)
Paloma torcaz —dove (P)	Pava —turkey hen (P)
Palomera —small dovecot (P)	Pavezno —young turkey (P)
Palomilla —young pigeon; backbone of a horse	Pavipollo —young turkey (P)
Palomina —pigeon dung	Pavo —turkey (P)
Palomo, a —cock pigeon (P)	Pavo real —peacock (P)
Pancreas —pancreas	Pecari —peccary, either of two piglike American quadrupeds (S)
Pancreatina —pancreatin	Peces —fish
Panoso —mealy	Pechuga —beast of a fowl (P)
Panucho —bean-and-meat pie with cornmeal crust	Pecuario, ria —cattle (R)
Panza —rumen or paunch of ruminants (R)	Pega —maggie (P)
Papagayo —macaw (P)	Pegujón —pellet or bunch of wool or hair
Papo —fowl's gizzard (P)	Pelada —(tanning) pelt
Parásito —parasitic; parasite	Pelambrar —(tanning) to flesh (as hides)
Párasito voidos —ectoparasite	Pelambre —(tanning) batch of hides put into lime pits
Paratifoidea —paratyphoid	Pellejina —small skin
Paratiroideo, dea —parathyroid	Pellejo —skin; rawhide, pelt
Paratiroides —parathyroid	Pellejuela —small skin or rawhide
Pares —placenta, after birth	Pellejuelo —small skin
Parro —duck (P)	Pelo —hair; down (of birds and fruit)
Pastelillo —turnover; three-cornered little meat pie	Pelo de cabra —yearling ewe; thick wool; goat's hair
Pastelillo de carne —sweetmeat or cake	Peloteria —heat of goat's hair
Pastelon —meat or pigeon pie	Pendola —feather
Pastor —shepherd	Penicilina —penicillin
Pastura —forage; fodder	Penigero —winged; feathered
Pastura fermentada —ensilage	Pepsina —pepsin
Pata —paw, foot; foot and leg (of beasts)	Perdigana —young partridge (P)
Patagorrillo, Ila —hash of livers and lights	Perdíz —partridge (P)
Patico —young duck; duckling (P)	Perico —parakeet (P)
Patihendido, da —cloven-footed	Periquito —parakeet (P)
Patín —goosander, a kind of duck (P)	Permiso —permit
Patito —young duck; duckling (P)	Pernil —thigh of an animal

Pernil delantero —shoulder and ribs of butcher's meat	Polluelo, la —little chicken; check (P)
Perro —dog (O)	Poloma —quail (P)
Pertenece ganadería —cattle (R)	Polvo oloroso —musk
Pescado —fish (O)	Ponedor, ra —egg-laying (as a hen)
Pescuezo —neck	Popote —Indian straw for brooms
Pesebre —ox stall; manger	Porcaso —hog tapir; tapir (S)
Peste —hog cholera (classical swine fever)	Porcino, na —hoggish, porcine; young pig (S)
Pesuña —foot of cloven-hoofed animals	Porcipelo —bristle
Pez —fish (O)	Porcuno, na —hoggish, porcine (S)
Pezúna —foot of cloven-hoofed animals; hoof	Poro —pore
Picacureba —Brazilian pigeon (P)	Porquecilla —small sow (S)
Picadillo —minced meat; hash	Porquezuelo, la —small hog or sow (S)
Picado, da —minced meat; hash	Portanario —pylorus
Pichón —young pigeon; squab (P)	Posierna —thigh of an animal
Piel —skin; hide, pelt; leather; fur	Potaje dulce —sweetmeat or cake
Piel de cabra —goatskin (R)	Presor, ra —psittacine (of the parrot family) (P)
Pieldura —parchment like	Preparación químico —excretion
Pielecita —small hide or skin	Preservativo, va —preservative
Pienso —daily feed given to horses	Primal, la —yearling (ewe or a goat) (R)
Piezgo —foot of a hide or skin	Pringue —grease; fat; lard
Pigmento rojo —hematin	Prohibir —to prohibit; forbid
Pilórico, ca —pyloric	Protéina —protein
Piltraca, piltrafa —hide parings	Protoalbeitar —chief veterinary surgeon
Pintada —guinea fowl (P)	Puchero —cooking pot; olla, stew
Piojo —louse	Puerca —sow (S)
Pipa —cask	Puerco, ca —hog (S)
Pitones —horns	Puerco montes —wild boar (S)
Pituitaria —pituitary	Puerquezuelo —little pig (S)
Pituitaria glándula —pituitary gland	Pulga —flea
Placenta —afterbirth	Pulpeta —slice of stuffed meat
Plaga —plague	Q
Pluma —feather	Quemar —cremate
Pluma viva —eider down	Quesera —dairy, dairymaid; cheese board, cheese mold, cheese vat; cheese dish
Plumaje —plumage; plume; crest	Quesillo, ito —small cheese
Pocilga —pigsty; pigpen	Queso —cheese
Pollastre, pollastro —large chicken (P)	Queso de bola —Edam cheese
Pollito, ta —chicken (P)	Queso de cerdo —headcheese (S)
Pollo —nesting chick (P)	

Queso de leche descremada—cheese made of skim milk

Queso de puerco—headcheese (S)

Queso helado—ice-cream brick, molded ice cream

Quetro—Chilean duck with featherless wings (P)

Quita nata—separator

Quitar el fango—to clear of mud

Quitar el tuétano—taking out the marrow

Quitar grass—to make butter or lard out of

R

Rabada—hind quarter; rump

Rabia—rabies

Rabo—tail

Rapar—shearing

Rapingacho—cheese omelet

Rastro—slaughter

Rastrojo—straw; cornstalks; fodder

Rata—rat (O)

Rayadillo—striped cotton duck (P)

Razago—burlap

Rebanada—slice

Recental—suckling (lamb or calf) (R)

Registro—inspection; search; examination; registration

Rehogar—to dress (meat) with a slow fire, basting with butter or oil

Rejón—short spear thrust into a bull and broken at the end, leaving the point in the flesh; dagger; broad knife

Relleno para morcilla—mixture of hog's blood and onions for sausage

Remellar—(tanning) to unhair (hides)

Remera—flight feather (of birds)

Remojar en agua de cal—to steep (hides) in limewater

Remolón—upper tusk of a wild boar; sharp tooth in horses

Rengifero—reindeer (R)

Reno—reindeer (R)

Reptil—reptile (O)

Requeson—curd, cottage cheese

Retobar—(arg.) to line or cover with hides

Retobo—packing or wrapping in hides

Rezno—tick, dog tick, sheep tick

Riñon—kidney

Riñonada—layer of fat about the kidneys; dish of kidneys

Robezo—wild goat (R)

Rocío, cía—donkey (R)

Rosbif—roast beef (R)

Rosones—worms in animals

Rozno—little donkey (H)

Rucho—donkey (H)

Rumen—rumen

Rumia—rumination, chewing the cud

Rumiador, ra—ruminator; ruminant (R)

Rumiante—ruminant (R)

S

Sabuco—horny part of horse's hoof (H)

Sacate—grass, herb; hay

Saguaiepe—parasitic worm that attacks the liver of cattle

Saino—a kind of boar

Sal—salt

Salado—salty

Saladillo—fresh bacon half-salted (S)

Salamandra—salamander (O)

Salbadillo—mixed grain

Salar—to salt, to season or preserve with salt; to cure or corn (meat); to brine

Salazón—salting; salted meat or fish

Salchicha de cerdo—pork sausage (S)

Salchichon—sausage

Saliva—saliva; spittle

Salmuera—brine; pickle

Salón—salted and cured meat or fish

Salpresar—to salt; preserve with salt

Salud—health

Salvaguardia —safeguard	Sorda —woodcock (P)
Salvaje —wild boar (S)	Substancia química —epinephrine; adrenalin
Salvajina —collection of skins of wild animals	Sucio —dirty; filthy; dung
Sanco —stew made with beef blood, flour, and onions	Sudar —to sweat; perspire
Sancochar —to parboil; roast slightly	Sudor —sweat; perspiration
Sancocho —a kind of thin stew of boiled yucca, meat, plantains, etc.	Suero —whey; serum (of blood)
Sangrar —to bleed	Suero para curar —antiserum
Sangre —blood	T
Saquillo, ito —small sack or bag	Tábano —horsefly
Sardesco, ca —small (donkey or horse) (H)	Talon —heel
Sarrio —kind of wild goat (R)	Tamal —tamale; (Peru) pork (sold in the street)
Sebo —tallow; fat; candle grease	Tanate —bale made of hide
Seca —dry season	Tángara —tanager (H)
Seco, seca —dry; dried up	Tapa —jerked beef; hung beef (R)
Secreción —secretion	Tapón —bung
Sedera —brush made of bristles	Tarangana —coarse sausage
Semen —semen	Tasajear —to cut (meat) for making jerked beef
Semental —stud	Tasajo —jerked beef; hung beef (R)
Semilla —seed	Tatabra, tatabro —a species of peccary (S)
Señal —tick	Taurino, na —bovine (R)
Sera —large basket	Teg —fleshy part of hides
Serado —baskets	Tela de sacco —sackcloth; burlap
Seso —brain	Tendón —tendon
Silvestre —wild	Tenia —tapeworm, also known as solitaria
Simiente —seed; germ; semen; sperm	Tenera —female calf; veal (R)
Sinhueso —tongue	Ternero —male calf (R)
Sirle —sheep dung; goat dung	Terneruela —suckling calf (R)
Sobordo —freight list; manifest	Ternilla —gristle, cartilage; nose or nostrils of ox or other similar animal
Sobras de algodón —yearling ewe; wool; goat's hair	Terzón —three-year old (heifer) (R)
Sobreada —half-roasted sausage from the island of Majorca	Teste —testis, testicle
Sódico, ca —sodium	Testículo —testicle
Solitaria —tapeworm	Tetrao —wood grouse (P)
Solomillo, solomo —sirloin; loin of pork	Tialina, ptialina —pytalin
Sopa —sop (soaked bread); soup	Timo —thymus; thymus gland
Sopa española —pork and beans	Tipo de nuez —bird lime
Sorbete —sherbert; water ice	Tiroideo —thyroid

Tiroxina—thyroxine, thyroxin
Tiza—calcined stage horn (R)
Tocino—salt pork; bacon (S)
Tocino gordo—fat pork (S)
Tojosa—variety of pigeon (P)
Torcaz, torcaza—wild pigeon (game bird) (P)
Tórdiga—strip of leather
Toreo—bullfight
Toro—bull (R)
Torreznada—plentiful dish of bacon (S)
Torrezno—rasher of bacon (S)
Tortada—meat or chicken pie
Tortilla—pottage of broth, cheese, and eggs
Tórtola—turtledove (P)
Tortuga—tortoise (O)
Tostón—roast pig (S)
Tóxico—toxic
Tozuelo—fat part of the neck of an animal
Tragacete—javelin; dart
Tragadero—esophagus
Tráquea—trachea; gullet
Traquearteria—trachea; windpipe
Tricahue—kind of Chilean parrot (P)
Trigaza—short straw of wheat
Tripa—gut, intestine, bowel; inner lining of some feathers
Tripa gruesa—blood pudding or sausage
Tripas para embutidos—casings
Tripas vacunas saladas—salted beef casings (R)
Tripicallos—tripe
Tripsina—trypsin
Triquina—trichina, intestinal worm
Trofeo—trophy
Trullo—teal (P)
Turdiga—strip of hide
Turma—testicle

U

Ubre—mammary gland; breast

Una—hoof, claw, talon of beasts, or nail
Ungulado, da—ungulate
Untar—to smear; to spread; to grease
Untaza—fat (of animal); grease
Unto—fat of animals; grease
Urea—guano
Urraca—magpie (P)

V

Vaca—cow, beef (R)
Vacuna—vaccine; immunization
Vacunacion—vaccination
Vacuna, va—pertaining to cattle; bovine
Valvar—valval
Valvula—valve
Vaquería—ox stall; cow house
Vaquero—cowboy
Vaquilla, vaquita—small cow; heifer (R)
Vaquillona—heifer; calf (R)
Vaquira—peccary (S)
Vedija—entangled lock of wool or hair; matted hair
Vell del becerro—calf vell
Vejiga—bladder
Vejiga hiel—gall bladder
Vellón—fleece, wool of one sheep; unshorn sheepskin; lock of wool
Vena—vein, blood vessel
Venada—doe (R)
Venadito—fawn, young deer (R)
Venado—deer, stag; deer meat, venison (R)
Venono—poison
Ventron—tripe (food)
Vermes—intestinal worms
Verraco—male hog or boar (S)
Vesícula biliar—gall bladder
Vestfaliana, no—Westphalian ham (a ham of distinctive flavor produced by smoking with juniper brush) (S)
Veterinario, ria—veterinary; veterinarian

Vibora—viper

Vicúna—a South American ruminant (R)

Vientre—abdomen; belly; bowels; stomach

Vil—gall, bile

Visco—bird lime

Vitamina—vitamin

Viveres—foodstuffs

Y

Yack—yak (R)

Yaguasa—a tree duck (P)

Yegua—female horse; mare (H)

Yema—egg yolk

Yerba—grass; weed; herb

Yogurt, yoghurt—yogurt

Yure—a Central American pigeon (P)

Z

Zacate—grass; hay; fodder

Zalea—undressed sheepskin

Zarandali—black-spotted (dove) (P)

Zarceta—widgeon (duck of North America having brown plumage) (P)

Zoológico—zoo

Zopilote—turkey buzzard (P)

Zumbón, na—a variety of pigeon (P)

Zuma—juice; fluid

Zurano, na—stockdove (game bird) (P)

Zurito, ta—wild pigeon (game bird) (P)

Zuro, ra—stockdove, wild pigeon (game bird) (P)

Zurriagar—cowhide (R)

Introduction

This appendix identifies and provides samples of permits, forms, and certificates that you will find accompanying importations of animal products and by-products. You **do not** initiate these documents. You will use them to learn more about an importation which helps you take the correct regulatory action. Refer to the contents of this appendix for a list of the permits, certificates, and forms found here.

Certificates

Certificates are official foreign documents required under 9CFR Parts 93, 94, 95, 96, and 156. These documents **must** be issued by the national government of the country of origin, and they **must** be signed by an official of that government.

Foreign Meat Inspection Certificates

We accept two types of meat certificates which are authorized by 9CFR §327.4. One is for meat and meat by-products and one is for meat food products. Either is acceptable with the proper statements attesting to the entry requirements. FSIS requires (9CFR§327.4) the certificates be written in English and the language of the country of origin.

Additional statements may appear on the front or back of certificates. Check both sides.

See [Foreign Official Meat Inspection Certificate for Fresh Meat and Meat By-Products](#) on page G-1-50 and [Foreign Official Meat Inspection Certificate for Meat Food Products](#) on page G-1-51.

Permits

A permit takes precedence over the entry requirements listed in this manual.

VS has the authority to write a permit for any animal product **except** fresh (chilled or frozen) meat of ruminant or swine from countries known to be affected with FMD.

AMS Form PY 222, Import Request (Shell Eggs)

U.S. DEPARTMENT OF AGRICULTURE AGRICULTURAL MARKETING SERVICE POULTRY DIVISION IMPORT REQUEST (SHELL EGGS)		PLACE ISSUED		FORM APPROVED - OMB NO. 0681-0113	
INSTRUCTIONS: See reverse of Part 5 of this set on how to complete form.					
SECTION A - APPLICATION FOR IMPORT INSPECTION OF SHELL EGGS			SECTION D - AGREEMENT FOR TEMPORARY TRANSFER OF FOREIGN EGGS		
1. NAME AND ADDRESS OF CUSTOMS BROKER OR APPLICANT			IN CONSIDERATION of the U.S. Collector of Customs granting me (us) permission to transfer temporarily the products described in Section "C" which are offered for entry into the United States, I (WE) AGREE, under bond filed with said Collector of Customs and subject to the penalties prescribed in laws enacted by Congress and regulations issued thereunder by the Secretary of the Treasury, to hold the said products intact at the location indicated below until they have been inspected and passed by a Poultry Division Representative or have been otherwise disposed of under the supervision of a U.S. Customs Officer or a Poultry Division Representative.

The following statements are made in accordance with the Privacy Act of 1974 (5 USC 552a) and the Paperwork Reduction Act of 1995. The authority for requesting the information to be supplied on this form is the Egg Product Inspection Act (21 USC 1031-1066). A request must be made by anyone wishing to import shell eggs. The information is essential to control the movement and disposition of the imported products (7 CFR 69.920). Public reporting burden for this collection of information is estimated to average 0.33 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the form. Send comments regarding this burden estimate or any other aspects of this collection of information, including suggestions for reducing the burden, to USDA, OIRM, Clearance Officer, STOP 7602, 1400 Independence Avenue, SW, Washington, DC 20259-7602. When replying, refer to the OMB No. 0681-0113 and form number in your letter. Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.					
PY-222 (10-96) Destroy previous edition dated (01-96).					

FIGURE G-1-1 Example of AMS Form PY 222, Import Request (Shell Eggs) (blank)

Purpose

AMS Form PY-222, *Import Request, Shell Eggs*, **must** accompany importations of eggs for breaking and pasteurization when they are consigned to an approved establishment. See [Eggs and Egg Products from Poultry, Game Birds, or Other Birds](#) on page 3-6-1. Regional Agricultural Marketing Service (AMS) offices keep a supply of AMS Form PY 222. See [Appendix I, List of Agricultural Marketing Service \(AMS\) Regional Offices](#) on page I-1-1.

APHIS Form 2006, U. S. Veterinary Biological Product Permit

**United States
Department of Agriculture**

UNITED STATES VETERINARY BIOLOGICAL PRODUCT PERMIT

NO.
Issued at Washington, D.C. on
Expires:

This permit is issued pursuant to the terms of the Act of Congress approved March 4, 1913 (37 Stat. 832), governing the preparation, sale, barter, exchange, shipment, and importation of veterinary biological products. So far as the jurisdiction of the U.S. Department of Agriculture is concerned,

is authorized to import

prepared by

into the United States through the port of

Importation shall be made subject to the following special conditions:

This permit may be revoked if the permittee violates or fails to comply with said Act, the regulations made thereunder, or the conditions specified herein.

FSIS FORM 9540-1 (05/07/2002) REPLACES FSIS FORM 9540-1 (9/96) AND FSIS 9510-1 (9/96) WHICH ARE OBSOLETE. *Designed on FormFlow software*

FIGURE G-1-5 Example of FSIS Form 9540-1, Import Inspection Application and Report (Meat, Poultry and Meat or Poultry Products) (blank)

Purpose

FSIS Form 9540-1, Import Inspection Application and Report (Meat, Poultry, and Meat or Poultry Products), is used during the process of importing meat. The importer presents FSIS Form 9540-1 to all the agencies responsible for clearing the meat. Ultimately, the form notifies FSIS of the agencies who cleared the meat.

Instructions

Not all ports use FSIS Form 9540-1 the same way. If port policy is to verify and stamp FSIS Form 9540-1, then follow these instructions:

1. Review the form and verify that the proper meat certificates and required statements are present.
2. Stamp “Shipment Authorized” on the reverse side of the white, salmon, and yellow copies. Record the date and your badge number on the stamped impression, and sign.

File the yellow copy with a copy of the meat certificate and other appropriate documents.

- Pens, cages, bedding, waste, and dead animals in contact with these materials shall be sterilized or considered a biohazard and be disposed of accordingly.
- This permit does not exempt the permittee from responsibility to comply with any other applicable federal, state, or local laws and regulations.
- The restrictions on this permit remain in force as long as the material is in the United States.
- A copy of this permit should be included with the shipping documents.

=====

. Page 2 of 2

FIGURE G-1-7 Example of VS Form 16-6A, U.S. Veterinary Permit for Importation and Transportation of Controlled Materials and Organisms and Vectors (page 2 of 2)

Purpose

VS Form 16-6A, U.S. Veterinary Permit for Importation and Transportation of Controlled Materials and Organisms and Vectors, is required to authorize entry of animal products and by-products such as manure, eggs for food and hatching, egg by-products for research or other inedible purposes, dry milk products, blood, organs, organisms, and vectors imported for biological use and research.

When a permit authorizes the entry of an animal product or by-product, review the permit to verify the identifying number, expiration date, and destination address. Three asterisks will precede restrictions and precautions that need to be verified by you.

Annex A, Health Warranties for Dry Cured Hams from Italy

ANNEX A
ALLEGATO A

HEALTH WARRANTIES / GARANZIE SANITARIE

DRY HAMS CURED FOR AT LEAST 400 DAYS OBTAINED FROM HAMS OF SWINE BORN AND RAISED IN ITALY
PROSCIUTTI CRUDI STAGIONATI PER ALMENO 400 GIORNI PRODOTTI CON COSCE PROVENIENTI DA SUINI NATI E ALLEVATI IN ITALIA.

The undersigned certifies that the hams in this consignment comply with the following requirements:
Il sottoscritto certifica che la partita di prosciutto stagionato risponde alle seguenti condizioni:

- The fresh hams come from swine born and raised in Italy.*
Le cosce fresche provengono da suini nati e allevati in Italia;
- The farm of origin of the animals from which the fresh hams were obtained and the processing plant in which they were processed are situated in Italy*
L'allevamento di provenienza degli animali da cui sono state ottenute le cosce fresche e lo stabilimento di lavorazione delle stesse sono situati sul territorio italiano;
- Italian existing laws require the immediate reporting to the National Veterinary Services of any case of foot-and-mouth disease, rinderpest, African swine fever, hog cholera or swine vesicular disease. Italy has been declared free of rinderpest, foot-and-mouth disease and Mainland Italy free of African swine fever by the U.S. Department of Agriculture.*
In Italia sono in vigore disposizioni legislative che prevedono la denuncia obbligatoria ed immediata al Servizio Veterinario Nazionale di focolai di afta epizootica, peste bovina, peste suina africana, peste suina classica e malattia vesicolare. L'Italia è stata riconosciuta indenne da peste bovina, afta epizootica e l'Italia continentale da peste suina africana dalle competenti Autorità U.S.A.;
- The fresh hams come from swine that were never on any premises where cases of foot-and-mouth disease, rinderpest, African swine fever, hog cholera or swine vesicular disease existed within 30 days prior to slaughter;*
Le cosce fresche provengono da suini che non hanno soggiornato in ambienti nei quali si sono registrati focolai di afta epizootica, peste bovina, peste suina africana, peste suina classica e malattia vesicolare nei 30 giorni precedenti la macellazione;
- The fresh hams were accompanied from the slaughtering facility to the processing establishment by a numbered certificate issued by an official veterinarian, stating, among other things, that the health provisions set forth in paragraphs 1 and 4, have been met*
Le cosce fresche sono state trasportate dal macello allo stabilimento di lavorazione scortate da certificato numerato e rilasciato dal veterinario ufficiale, riportante, tra l'altro, le garanzie sanitarie di cui ai punti 1. e 4.;
- On each fresh ham, the prescribed iron brand or initials was placed under the direct supervision of the official veterinarian, indicating the identification number of the slaughtering facility. A metal seal was applied under the official veterinarian's supervision, indicating the month and the year the ham entered the processing establishment. Moreover, a hot iron brand was placed under the supervision of the veterinarian on each ham, before salting began, identifying the processing establishment and bearing the date when salting began.*
Ogni coscia fresca è stata regolarmente marchiata ad ischio o a fuoco sotto la diretta supervisione del veterinario ufficiale con un timbro in cui risulta il numero di riconoscimento del macello da cui proviene. Sul gambetto di ogni coscia è stato apposto sotto la supervisione veterinaria un sigillo metallico recante il mese e l'anno di ingresso della stessa nello stabilimento di lavorazione. Sempre sotto la supervisione veterinaria ogni coscia è stata contrassegnata, prima della salatura, con il timbro a fuoco che identifica lo stabilimento e indica la data di inizio della salagione;
- All hams were processed for a minimum of 400 days counting from the date processing began (.....) and from the month of, as indicated on the metal seal placed thereon, in full compliance with US regulation set forth in 9 CFR 94.17;*
Tutte le cosce sono state lavorate per un minimo di 400 giorni a partire dalla data dell'inizio della lavorazione (.....) e dal mese di, come indicato sul sigillo di metallo apposto su di esse, nel pieno rispetto delle disposizioni sancite nel CFR 9 - 94.17;
- The official register shall be kept in my office at the processing establishment together with the records it refers to, identifying all the hams in the consignment;*
Presso lo stabilimento di lavorazione verrà custodito nel mio ufficio per almeno due anni il registro ufficiale, corredato dai certificati a cui esso fa riferimento, da cui risulta l'identità di tutti i prosciutti della partita.

l'Aloyau ou l'Aloyau gros filet) d'un bovin, d'un ovin, d'un porc ou d'un caprin, de peau, de tendon, de nerf et de vaisseaux sanguins qui accompagnent généralement le tissu musculaire et qui n'en sont pas détachées à l'habillage. En ce qui a trait aux équidés, le terme a un sens comparable.

- i. Ne constituent pas de la viande, les muscles des lèvres, du museau ou des oreilles.
- ii. La viande ne peut pas inclure des portions significatives d'os, incluant de l'os dur et ses composantes, telle la moëlle osseuse, ou n'importe quelle quantité de cerveau, de ganglions trigémiques, de moëlle épinière ou de Ganglion de la Racine Dorsale.

Note: meat as defined also includes dressed carcasses, half-carcasses, quarters, boneless meat and bone-in cuts derived from animals aged less than 12 months. / Note: la viande telle que définie comprend aussi les carcasses habillées, les demi-carcasses, les quartiers, la viande désossée et les coupes de viande avec os issus d'animaux âgés de moins de 12 mois.

Meat byproduct / Sous-produit de viande

Any part capable of use as human food, other than meat, which has been derived from one or more cattle, sheep, swine, or goats. This term, as applied to products of equines, shall have a meaning comparable to that provided in this paragraph with respect to cattle, sheep, swine, and goats. / Toute partie autre que la viande pouvant être destinée à la consommation humaine qui est issue d'un ou plusieurs bovins, ovins, porcins ou caprins. En ce qui a trait aux équidés, le terme a un sens comparable.

Meat food product / Produit alimentaire à base de viande

Any article capable of use as human food which is made wholly or in part from any meat or other portion of the carcass of any cattle, sheep, swine, or goats, except those exempted from definition as a meat food product by the Administrator in specific cases or by the regulations in part 317 of this subchapter, upon a determination that they contain meat or other portions of such carcasses only in a relatively small proportion or historically have not been considered by consumers as products of the meat food industry, and provided that they comply with any requirements that are imposed in such cases or regulations as conditions of such exemptions to assure that the meat or other portions of such carcasses contained in such articles are not adulterated and that such articles are not represented as meat food products. This term, as applied to food products of equines, shall have a meaning comparable to that provided in this paragraph with respect to cattle, sheep, swine, and goats. / Tout article pouvant être destiné à la consommation humaine fait, en totalité ou en partie, de viande ou d'une autre partie de la carcasse d'un bovin, d'un ovin, d'un porc ou d'un caprin, à l'exception des articles qui ne sont pas visés par la définition comme produit de viande par l'Administrateur dans certains cas, ou par l'article 317 du présent sous-chapitre, lorsqu'il est déterminé qu'ils contiennent de la viande ou d'autres parties de carcasse seulement en très petites quantités ou qui n'ont jamais été considérés par les consommateurs comme des produits de l'industrie des produits alimentaires à base de viande, et à la condition qu'ils respectent les exigences imposées dans ces cas ou dans la réglementation comme conditions d'exemption pour que la viande ou les autres parties de carcasse contenues dans ces articles ne soient pas altérées et que ces articles ne soient pas représentés comme des produits alimentaires à base de viande. En ce qui a trait aux équidés, le terme a un sens comparable.

Foreign Official Certificate for Animal Casings

FOREIGN OFFICIAL CERTIFICATE FOR ANIMAL CASINGS

Place: _____ Date: _____
(City) (Country)

I hereby certify that the animal casings herein described were derived from healthy animals (cattle, sheep, swine, or goats) which received ante mortem and post mortem veterinary inspections at the time of slaughter, and were found clean and sound, and were prepared and handled only in a sanitary manner and were not subjected to contagion prior to importation.

FIGURE G-1-34 Example of Foreign Official Certificate for Animal Casings (blank)

Purpose

The Foreign Official Certificate for Animal Casings is **not** acceptable for entry of hog casings derived from swine originating in ASF countries.

All animal casings that originate in a foreign country known to be free from ASF **must** be accompanied by a foreign official certificate identifying the following information as prescribed in 9CFR§96.1. The certificate **must** have the insignia of the foreign country's national government or other evidence showing that the certificate is a national document of that country. The certificate **must** be issued by a person authorized by the government of the country in which the animals were slaughtered and the casings were collected. That person may be either a salaried veterinarian of the country or a non-government veterinarian. The signature **must** be an original; printed or stamped signatures are **not** allowed.

Animal casings are **not** classed as meat products; therefore, a foreign meat certificate is **not** acceptable for importations of animal casings.

When animal casings are processed (graded, sized, and sorted) in a country **other than** the country of origin, the importation should be accompanied by a certificate which is issued in the country of processing. The certificate has the same descriptive information as does the foreign official certificate. The certificate has a different certifying statement based on the country of origin and country of processing detailed in the *Reference* section covering casings.

Foreign Official Horse Meat Certificate

OFFICIAL HORSE MEAT CERTIFICATE FOR HORSE MEAT FOOD PRODUCTS

Place: _____ Date: _____
(City) (Country)

The undersigned Official Medical Veterinary, CERTIFIES: That the horse meat and/or horse food products herein described were derived from horses which received ante mortem and post mortem veterinary inspection at the time of slaughter, and that such horse meat products are sound, healthful, wholesome, and otherwise fit for human consumption and have not been treated with, and do not contain any preservative, coloring matter, or other substance not permitted by the regulations governing the horse meat inspection of the U.S. Department of Agriculture, filed with me, and that said horse meat and horse meat food products have been handled only in a sanitary manner in this country.

Foreign Official Veterinary Certificate for Preserved Eggs

FOREIGN OFFICIAL VETERINARY CERTIFICATE
for Preserved Eggs

This shipment consists of _____ egg cases, _____ eggs per case, which totals _____ eggs originating from Flock Number _____, hereafter called this flock.

Owner: _____

Address: _____

Region of Origin: _____

Port of Embarkation: _____

Port of Arrival: _____

Importer: _____

Address: _____

All laboratory tests and analyses were conducted in a laboratory approved by the national government to conduct the tests (name and address of the laboratory):

The criteria in 9 CFR 94.6 are summarized as follows:

The eggs were packed on the premises of origin in previously unused cases.

The eggs are imported in cases marked with the identity of **this flock** of origin and sealed with the seal of the national government of the region of origin by the salaried veterinarian who signed the certificate.

All eggs in this shipment originated from **this flock** and were packed on the premises of origin.

The eggs were washed, to remove foreign material from the surface of the shells, and sanitized on the premises of origin with a hypochlorite solution of 100 ppm to 200 ppm available chlorine.

No more than 90 days before the certificate was signed, inspection procedures of **this flock** were performed and found **no** evidence of Exotic Newcastle disease (END) or other communicable diseases of poultry.

The initial veterinary examination of **this flock** was performed on (date) _____ by a salaried veterinary officer of the national government of the region of origin.

The veterinary inspections of **this flock** for this shipment of eggs was carried out between (list inclusive dates) _____ and _____

Veterinary inspection for END: consisted of the use of sentinel birds in **this flock** OR necropsy of carcasses from **this flock** as described below.

Sentinel birds were present in **this flock** at least 60 days before a government salaried veterinarian signed this certificate. There was at least one sentinel bird per 1000 poultry, with at least 30 sentinel birds per house.

Clinical evidence of END was **not** evident in sentinel birds during the inspection period.

Blood specimens were drawn from the sentinel birds at 10 day intervals and were immunologically negative for END on the hemagglutination inhibition test.

-----OR-----

FIGURE G-1-38 Example of Foreign Official Veterinary Certificate for Preserved Eggs (page 1 of 2)

Sixty days prior to signing this certificate, monthly tests, using the embryonated egg inoculation technique, on tracheal and cloacal swabs from **not** less than 10% of the poultry carcasses of _____ birds, out of _____ birds in **this flock** were negative for END.

Weekly gross necropsy and examination of carcasses after initial inspection found the flock was free of END.

Veterinary inspection revealed **this flock** is free of END and was **not** exposed to END during the 90 days prior to signing this certificate.

Examination for other communicable poultry diseases:

Not more than 90 days prior to signing this certificate, veterinary examination of **this flock** reveals it is clinically free of Fowl Pest (Fowl Plague) and other communicable poultry diseases.

I hereby certify that this shipment of preserved eggs meets the criteria specified in Title 9, Code of Federal Regulations, Section 94.6:

Signature: _____ Date: _____

National government official
having jurisdiction over
the health of **this flock**:

Dr. _____

with official Duty Station

at _____

FIGURE G-1-39 Example of Foreign Official Veterinary Certificate for Preserved Eggs (page 2 of 2)

Purpose

The *Foreign Official Veterinary Certificate for Preserved Eggs* is used for the importation of preserved eggs. If the certificate is officially signed, then the certificate is acceptable for the entry of preserved eggs. Most often preserved eggs will originate from the People's Republic of China or Taiwan, Province of China.

Por el presente certifico que (I hereby certify that):

- (1) Los productos cárnicos que aquí se describen se obtuvieron de carne, vísceras y despojos procedentes de ganado sometido a inspección veterinaria "ante-mortem" y "post-mortem" en el momento del sacrificio en establecimientos autorizados para exportar sus productos a los Estados Unidos; que han sido manipulados higiénicamente, obtenidos bajo la supervisión continua de un inspector de los Servicios Veterinarios Oficiales del establecimiento y que dichos productos cárnicos no están adulterados o mal marcados según define la normativa del Ministerio de Agricultura de los Estados Unidos que regula la inspección de carnes; y que, por lo demás, cumplen requisitos equivalentes a los que impone la Ley Federal de Inspección de Carnes y la mencionada Normativa. Certifico asimismo que todos los productos cárnicos aquí descritos que están destinados habitualmente a ser consumidos sin cocción y que contienen tejido muscular de cerdo, fueron tratados para destrucción de triquina, tal y como se contempla en el apartado 318.10 de las Regulaciones de Inspección de Carnes del Departamento de Agricultura de los EE.UU.
The meat products herein described were derived from livestock which received ante-mortem and post-mortem veterinary inspections at time of slaughter in plants certified for importation of their products to the United States, were handled in a sanitary manner, and were prepared under the continuous supervision of an inspector under control of the national meat inspection system and that said meat food products are not adulterated or misbranded as defined by the regulations governing meat inspection of the U.S. Department of Agriculture; and are otherwise in compliance with requirements equivalent to those in the Federal Meat Inspection Act and said regulations. I further certify that all products herein described that are prepared customarily to be eaten without cooking and contain muscle tissue of pork were treated for destruction of trichinae as prescribed in 318.10 of the Meat Inspection Regulations of the U.S. Department of Agriculture.
- (2) El matadero no está autorizado a recibir animales procedentes de, o que hayan estado en ningún momento, o hayan estado a bordo en un medio de transporte cuando éste haya hecho escala o aterrizado en, una región mencionada en 9CFR94.1 como región infectada por peste bovina o fiebre aftosa;
The slaughtering establishment is not permitted to receive animals that originated in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in, a region listed in 9CFR94.1 as a region infected with rinderpest or foot-and-mouth disease;
- (3) El matadero/planta elaboradora no está autorizado a recibir carne u otros productos animales derivados de rumiantes o suidos que procedan de una de las regiones mencionadas en el punto (2) como infectadas por peste bovina o fiebre aftosa, o carne u otros productos de origen animal procedentes de una región libre de peste bovina y fiebre aftosa, pero que hayan sido transportados a través de una región infectada por peste bovina o fiebre aftosa, excepto cuando el transporte se realice en contenedores precintados con precintos numerados en serie del gobierno nacional de la región de origen libre de peste bovina y fiebre aftosa.
The slaughtering/processing establishment is not permitted to receive meat or other animal products derived from ruminants or swine which originated in a region mentioned in point (2) as a rinderpest or foot-and-mouth disease infected region, or meat or other animal products from a rinderpest and foot-and-mouth disease free region transported through a rinderpest or foot-and-mouth disease infected region except in containers sealed with serially numbered seals of the National Government of the non infected region of origin;
- (4) La carne u otro producto de origen animal amparado por el certificado procede de animales que nacieron y se criaron en una región libre de peste bovina y fiebre aftosa y la carne u otro producto de origen animal nunca ha estado en una región en la que exista la peste bovina o fiebre aftosa.
The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed as free of rinderpest and foot-and-mouth disease and the meat or other animal product has never been in any region in which rinderpest or foot-and-mouth disease existed;

FIGURE G-1-40 Example of Official Health Inspection Certificate for Meat Food Products from Spain (Ref.: ASE-754 02/08) (page 1 of 2)

(5) La carne u otro producto de origen animal ha sido elaborado, almacenado y transportado hasta el medio de transporte que llevará el artículo a los Estados Unidos de forma que se imposibilite que se mezcle o se ponga en contacto de otro modo con carne u otro productos de origen animal que no cumplan con las condiciones indicadas en este certificado.
 The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that do not comply with the conditions contained in this certificate.

(6) El matadero no está autorizado a recibir animales que procedan de, o hayan estado en algún momento en, una región mencionada en 9CFR94.12 como una región en la que se considera que existe la enfermedad vesicular porcina;
 The slaughtering establishment is not permitted to receive animals that originated in, or have ever been in a region listed in 9CFR94.12 as a region in which swine vesicular disease is considered to exist;

(7) El matadero/planta elaboradora no está autorizado a recibir carne de porcino procedente de suidos procedentes de las regiones mencionadas en el punto (6), ni carne de porcino procedente de suidos de una región libre de enfermedad vesicular porcina que haya sido transportado a través de una región donde se considera que existe la enfermedad vesicular porcina, excepto la carne de porcino que haya sido transportada en contenedores precintados con precintos numerados en serie del gobierno nacional de la región de origen considerada libre de la enfermedad.
 The slaughtering/processing establishment is not permitted to receive pork derived from swine which originated in a region mentioned in point (6), or pork from swine from a swine vesicular disease free region which has been transported through a region where swine vesicular disease is considered to exist except pork which was transported in containers sealed with serially numbered seals of the National Government of a region of origin listed as considered free of the disease.

(8) La carne de porcino ha sido elaborada, almacenada y transportada hasta el medio de transporte que llevará el artículo a los Estados Unidos de forma que se imposibilite que se mezcle o se ponga en contacto de otro modo con carne u otros productos de porcino que no hayan sido manipulados de acuerdo con los requisitos de este certificado.
 The pork has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner that precludes its being commingled or otherwise coming in contact with pork or pork products that have not been handled in accordance with the requirements of this certificate.

(9) La carne o productos cárnicos de porcino no pueden proceder de cerdos que hayan estado en una de las regiones o zonas siguientes, excepto en el caso de que los animales fueran sacrificados después de los periodos descritos:
 The pork or pork products must not have been derived from swine that were in any of the following regions or zones, unless the swine were slaughtered after the periods described:

- (i) Cualquier región clasificada en 9CFR94.9(a) y 9CFR94.10(a) como región en la que se sabe que existe la peste porcina clásica, excepto para la UE(*).
 Any region when the region was classified in 9CFR94.9(a) and 9CFR94.10(a) as one in which classical swine fever is known to exist, except for the EU(*).
- (ii) Una zona de la UE(*) restringida por la detección de peste porcina clásica en cerdos domésticos, desde el momento de la detección hasta que la restricción sobre la zona es derogada por la autoridad veterinaria competente de un Estado Miembro de la UE, o hasta transcurridos 6 meses desde la eliminación de los cerdos de las instalaciones afectadas en la zona restringida, la limpieza y desinfección de las últimas instalaciones afectadas en la zona, lo que suceda más tarde, o A restricted zone in the EU(*) established because of detection of classical swine fever in domestic swine, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of an EU Member State or until 6 months following depopulation of the swine on affected premises in the restricted zone and the cleaning and disinfection of the last affected premises in the zone, whichever is later; or
- (iii) Una zona restringida en la UE(*) establecida a causa de la detección de peste porcina clásica en jabalíes, desde el momento de la detección hasta que la restricción sobre la zona es derogada por la autoridad veterinaria competente de un Estado Miembro de la UE.
 A restricted zone in the EU(*) established because of the detection of classical swine fever in wild boar, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of an EU Member State.

(10) La carne o productos cárnicos de porcino no deben haberse mezclado con carne o productos cárnicos de porcino derivados de otros cerdos procedentes de alguna de las regiones o zonas descritas en los párrafos (i) a (iii) del punto (9), excepto si los otros cerdos fueron sacrificados con posterioridad a los periodos descritos. Además, la carne o productos cárnicos de porcino no pueden proceder de cerdos que se hayan mezclado con otros cerdos procedentes de alguna de las regiones o zonas descritas en los párrafos (i) a (iii) del punto (9), excepto si los cerdos de los que se obtuvo la carne o productos cárnicos fueron sacrificados con posterioridad a los periodos descritos.
 The pork and pork products must not have been commingled with pork or pork products derived from other swine that were in any of the regions or zones described in paragraphs (i) through (iii) of point (9), unless the other swine were slaughtered after the periods described. Additionally, the pork and pork products must not have been derived from swine that were commingled with other swine that were in any of the regions or zones described in paragraphs (i) through (iii) of point (9), unless the swine from which the pork or pork products were derived were slaughtered after the periods described.

(11) Los cerdos de los que procede la carne o productos cárnicos no deben haber transitado por ninguna de las regiones o zonas descritas en los párrafos (i) a (iii) del punto (9), excepto si los cerdos fueron transportados directamente a través de dichas zonas o regiones en un medio de transporte precintado, y el precinto considerado intacto a su llegada al punto de destino, o excepto si los cerdos han sido sacrificados con posterioridad a los periodos descritos.
 The swine from which the pork or pork products were derived must not have transited any region or zone in a sealed means of conveyance with the seal determined to be intact upon arrival at the point of destination, or unless the swine were slaughtered after the periods described.

(12) Los materiales y equipos utilizados en el transporte de los cerdos de los cuales procede la carne o productos cárnicos desde la granja de origen al matadero no han sido utilizados previamente para el transporte de cerdos que no cumplan los requisitos de este certificado, excepto si los materiales y equipos han sido limpiados y desinfectados.
 No equipment or materials used in transporting the swine from which the pork or pork products were derived from the farm of origin to the slaughtering establishment may have been used previously for transporting swine that do not meet the requirements of this certificate, unless the equipment and materials have first been cleaned and disinfected.

Firma y Sello Oficial
 (Signature and Official Seal)

Nombre del oficial autorizado por el gobierno nacional extranjero para expedir certificados de inspección de producto cárnico con destino a la exportación a los Estados Unidos.
 Name of official authorized by the national foreign government to issue inspection certificates for meat product exported to the United States.

Cargo Oficial/Official Title

(*) A efectos del presente certificado, se entenderá por UE la región definida por APHIS en relación con la Peste Porcina Clásica
 For this certificate, the term EU must be understood as the APHIS- defined EU region, relative to Classical Swine Fever.

**DRY HAMS CURED FOR AT LEAST 400 DAYS OBTAINED FROM NON-ITALIAN SWINE OR HAMS
PROSCIUTTI CRUDI STAGIONATI PER ALMENO 400 GIORNI DERIVANTI DA SUINI O COSCE SUINE
NON ITALIANE.**

*The undersigned certifies that the hams in this consignment comply with the following requirements:
Il sottoscritto certifica che la partita di prosciutto stagionato risponde alle seguenti condizioni:*

1. *The fresh hams come from swine born in.....¹ and raised in.....¹
Le cosce fresche provengono da suini nati in.....¹ e allevati in.....¹*
2. *The fresh hams were produced in.....² approved for export to the United States
Le cosce fresche sono state prodotte in.....² nel macello.....¹
.....² approvati per l'esportazione negli Stati Uniti d'America*
3. *The fresh hams come from swine that were never on any premises where cases of foot-and-mouth disease, rinderpest, African swine fever, hog cholera or swine vesicular disease existed within 60 days prior to slaughter
Le cosce fresche provengono da suini che non hanno soggiornato in allevamenti in cui si sono registrati focolai di afta epizootica, peste bovina, peste suina africana, peste suina classica o malattia vescicolare nei 60 giorni precedenti la macellazione;*
4. *The fresh hams were accompanied from the slaughtering facility to the processing establishment by a numbered certificate issued by an official veterinarian, stating, among other things, that the health provisions set forth in paragraphs 1 and 3, have been met;
Le cosce fresche sono state trasportate dal macello allo stabilimento di lavorazione sciolte da certificato numerato e rilasciato dal veterinario ufficiale, riportante, tra l'altro, le garanzie sanitarie di cui ai punti 1. e 3.;*
5. *On each fresh ham, the prescribed iron brand or ink seal was placed under the direct supervision of the official veterinarian, indicating the identification number of the slaughtering facility it came from, on the hock of each ham a metal seal was applied under the official veterinarian's supervision, indicating the month and the year the ham entered the processing establishment. Moreover, a hot iron brand was placed under the supervision of the veterinarian on each ham, before salting began, identifying the processing establishment and bearing the date when salting began.
Ogni coscia fresca è stata regolarmente marchiata ad inchiostrino a fuoco sotto la diretta supervisione del veterinario ufficiale con un timbro in cui risulta il numero di riconoscimento del macello da cui proviene. Sul gambetto di ogni coscia è stato apposto sotto la supervisione veterinaria un sigillo metallico recante il mese e l'anno di ingresso della stessa nello stabilimento di lavorazione. Sempre sotto la supervisione veterinaria ogni coscia è stata contrassegnata, prima della salatura, con il timbro a fuoco che identifica lo stabilimento e indica la data di inizio della salazione;*
6. *The processing plant in which the hams were processed is situated in Italy;
Lo stabilimento di trasformazione nel quale i prosciutti sono stati trasformati è situato in Italia;*
7. *All hams were processed for a minimum of 400 days counting from the date processing began (.....) and from the month of....., as indicated on the metal seal placed thereon, in full compliance with US regulation set forth in 9 CFR 94.17;
Tutte le cosce sono state lavorate per un minimo di 400 giorni a partire dalla data dell'inizio della lavorazione (.....) e dal mese di..... come indicato sul sigillo di metallo apposto su di esse, nel pieno rispetto delle disposizioni sancite nel CFR 9 - 94.17.*
8. *The official register shall be kept in my office at the processing establishment together with the records it refers to, identifying all the hams in the consignment;
Presso lo stabilimento di lavorazione verrà custodito nel mio ufficio per almeno due anni il registro ufficiale, corredato dai certificati cui esso fa riferimento, da cui risulta l'identità di tutti i prosciutti della partita.*

Por el presente certifico que
 I hereby certify that:

(1) los productos cárnicos que aquí se describen se obtuvieron de carne, vísceras y despojos procedentes de ganado sometido a inspección veterinaria "ante-mortem" y "post-mortem" en el momento del sacrificio en establecimientos autorizados para exportar sus productos a los Estados Unidos de América; que han sido manipulados higiénicamente, obtenidos bajo la supervisión continua de un inspector de los Servicios Veterinarios Oficiales del establecimiento y que dichos productos cárnicos no están adulterados o mal marcados según define la normativa del Ministerio de Agricultura de los Estados Unidos de América que regula la inspección de carnes; y que, por lo demás, cumplen requisitos por lo menos equivalentes a los que impone la Ley Federal de Inspección de Carnes y la mencionada Normativa. Certifico asimismo que todos los productos cárnicos aquí descritos que están destinados habitualmente a ser consumidos sin cocción y que contienen tejido muscular de cerdo, cumplen con el apartado §318.10 de la Normativa del Ministerio de Agricultura de los Estados Unidos para la destrucción de triquina.

The meat and the meat byproducts herein described were derived from livestock which received ante-mortem and post-mortem veterinary inspections at time of slaughter in plants certified for exportation of their products to the United States of America, were handled in a sanitary manner, and were prepared under the continuous supervision of an inspector under control of the national meat control system and that said meat food products are not adulterated or misbranded as defined by the regulations governing meat inspection of the U.S. Department of Agriculture; and are otherwise in compliance with requirements at least equal to those in the Federal Meat Inspection Act and said regulations. I further certify that all products herein described that are prepared customarily to be eaten without cooking and contain muscle tissue of pork were treated for destruction of trichinae as prescribed in §318.10 of the Meat Inspection Regulations of the U.S. Department of Agriculture.

(2) El matadero no tiene permiso para recibir animales procedentes de, o que hayan estado en ningún momento, o hayan estado a bordo en un medio de transporte cuando éste haya hecho escala o haya descargado en, una región mencionada en la lista en 9CFR94.1(a) como región con peste bovina o fiebre aftosa;

The slaughtering establishment is not permitted to receive animals that originated in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in, a region listed in 9CFR 94.1(a) as a region infected with rinderpest or foot-and-mouth disease;

FIGURE G-1-54 Example of Official Meat-Inspection Health Certificate for Meat Food Products from Spain (page 1 of 2)

(3) El matadero/planta elaboradora no tiene permiso para recibir carne u otros productos animales derivados de rumiantes o suidos que procedan de una región con peste bovina o fiebre aftosa, o carne u otros productos de origen animal procedentes de una región libre de peste bovina o fiebre aftosa, pero que hayan sido transportados a través de una región con peste bovina o fiebre aftosa excepto cuando el transporte se realice en contenedores sellados con sellos, numerados en serie, del gobierno nacional de la región de origen libre de peste bovina o fiebre aftosa.
The slaughtering/processing establishment is not permitted to receive meat or other animal products derived from ruminants or swine which originated in such a rinderpest or foot-and-mouth disease infected region, or meat or other animal products from a rinderpest and foot-and-mouth disease free region transported through a rinderpest or foot-and-mouth disease infected region except in containers sealed with serially numbered seals of the National Government of the noninfected region of origin;

(4) La carne u otro producto animal mencionados en el certificado proceden de animales que nacieron y se criaron en una región libre de peste bovina o fiebre aftosa de acuerdo con 9CFR94.1(a)(2) y que la carne u otro producto animal nunca ha estado en una región en la que la peste bovina o fiebre aftosa existe.
The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed in 9CFR94.1(a)(2) as free of rinderpest and foot-and-mouth disease and the meat or other animal product has never been in any region in which rinderpest or foot-and-mouth disease existed;

(5) La carne u otro producto animal ha sido elaborado, almacenado y transportado de forma que el producto con destino a los Estados Unidos no se haya mezclado o puesto en contacto con carne u otros productos animales que no cumplan con las condiciones indicadas en el certificado.
The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that do not comply with the conditions contained in this certificate.

(6) El matadero no está autorizado a recibir animales que procedan, o hayan estado en una región afectada con la enfermedad vesicular porcina de acuerdo con 9CFR94.12(a);
The slaughtering establishment is not permitted to receive animals that originated in, or have ever been in a region listed in 9CFR94.12(a) as a region in which swine vesicular disease is considered to exist;

(7) El matadero/planta elaboradora no está autorizado a recibir porcino derivado de suido procedente de regiones afectadas o que haya sido transportado a través de una región donde la enfermedad vesicular porcina existe excepto cuando el porcino haya sido transportado en contenedores sellados, numerados en serie, con sellos del gobierno nacional de la región de origen según 9CFR94.12 donde se encuentra la lista de países libres de la enfermedad.
The slaughtering/processing establishment is not permitted to receive pork derived from swine which originated in such a region or pork from swine from a swine vesicular disease free region which has been transported through a region where swine vesicular disease is considered to exist except pork which was transported in containers sealed with serially numbered seals of the National Government of a region of origin listed in 9CFR 94.12 as a region considered free of the disease.

(8) El porcino ha sido elaborado, almacenado y transportado de forma que el producto con destino a Estados Unidos no se haya mezclado o puesto en contacto con porcino u otros productos porcinos que no hayan sido manipulados de acuerdo con los requisitos de esta sección.
The pork has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner that precludes its being commingled or otherwise coming in contact with pork or pork products that have not been handled in accordance with the requirements of this section.

(9) el porcino y los productos porcinos no deben de haberse mezclado con porcino o productos porcinos derivados de suidos que hayan estado en una región clasificada en la 9CFR94.10(a) como afectada de peste porcina clásica;
The pork or pork products must not have been commingled with pork or pork products derived from swine that have been in any region when the region was classified in 9CFR94.10(a) as one in which classical swine fever is known to exist;

(10) El suido de donde procede el porcino o los productos porcinos no puede haber vivido en una región clasificada en 9CFR94.10(a) como afectada por peste porcina clásica y no debe de haber transitado por dicha región al no ser que se haya trasladado en transporte sellado y que el sello esté intacto al llegar a su destino.
The swine from which the pork or pork products were derived must not have lived in a region when the region was classified in 9CFR94.10(a) as one in which classical swine fever is known to exist, and must not have transited such a region unless moved directly through the region in a sealed means of conveyance with the seal determined to be intact upon arrival at the point of destination;

Por el presente certifico que (I hereby certify that):

- (1) **La carne y los despojos comestibles que aquí se describen se obtuvieron de carne, vísceras y despojos procedentes de ganado sometido a inspección veterinaria "ante-mortem" y "post-mortem" en el momento del sacrificio en establecimientos autorizados para exportar sus productos a los Estados Unidos y que no están adulterados o mal marcados según define la normativa del Ministerio de Agricultura de los Estados Unidos que regula la inspección de carnes; y que dichos productos han sido manipulados de forma higiénica en este país y que por lo demás cumplen requisitos equivalentes a los que impone la Ley Federal de Inspección de Carnes y la mencionada Normativa.**
The meat and meat byproducts herein described were derived from livestock which received ante-mortem and post-mortem veterinary inspections at time of slaughter in plants certified for importation of their products into the United States and are not adulterated or misbranded as defined by the regulations governing meat inspection of the U.S. Department of Agriculture; and that said products have been handled in a sanitary manner in this country and are otherwise in compliance with requirements equivalent to those in the Federal Meat Inspection Act and said regulations.
- (2) **El matadero no está autorizado a recibir animales procedentes de, o que hayan estado en ningún momento, o hayan estado a bordo en un medio de transporte cuando éste haya hecho escala o aterrizado en, una región mencionada en 9CFR94.1 como región infectada por peste bovina o fiebre aftosa;**
The slaughtering establishment is not permitted to receive animals that originated in, or have ever been in, or that have been aboard a means of conveyance at the time such means of conveyance called at or landed at a port in, a region listed in 9CFR94.1 as a region infected with rinderpest or foot-and-mouth disease;
- (3) **El matadero/planta elaboradora no está autorizado a recibir carne u otros productos animales derivados de rumiantes o suidos que procedan de una de las regiones mencionadas en el punto (2) como infectadas por peste bovina o fiebre aftosa, o carne u otros productos de origen animal procedentes de una región libre de peste bovina y fiebre aftosa, pero que hayan sido transportados a través de una región infectada por peste bovina o fiebre aftosa, excepto cuando el transporte se realice en contenedores precintados con precintos numerados en serie del gobierno nacional de la región de origen libre de peste bovina y fiebre aftosa.**
The slaughtering establishment is not permitted to receive meat or other animal products derived from ruminants or swine which originate in a region mentioned in point (2) as a rinderpest or foot-and-mouth disease infected region, or meat or other animal products from a rinderpest and foot-and-mouth disease free region transported through a rinderpest or foot-and-mouth disease infected region except in containers sealed with serially numbered seals of the National Government of the non infected region of origin;
- (4) **La carne u otro producto de origen animal amparado por el certificado procede de animales que nacieron y se criaron en una región libre de peste bovina y fiebre aftosa y la carne u otro producto de origen animal nunca ha estado en una región en la que exista la peste bovina o fiebre aftosa.**
The meat or other animal product covered by the certificate was derived from animals born and raised in a region listed as free of rinderpest and foot-and-mouth disease and the meat or other animal product has never been in any region in which rinderpest or foot-and-mouth disease existed;
- (5) **La carne u otro producto de origen animal ha sido elaborado, almacenado y transportado hasta el medio de transporte que llevará el artículo a los Estados Unidos de forma que se imposibilite que se mezcle o se ponga en contacto de otro modo con carne u otros productos de origen animal que no cumplan con las condiciones indicadas en este certificado.**
The meat or other animal product has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner to preclude its being commingled or otherwise in contact with meat or other animal products that do not comply with the conditions contained in this certificate.

FIGURE G-1-56 Example of Official Meat Inspection Certificate for Fresh Meat and Meat Byproducts from Spain (Ref.: ASE-755 02/08) (page 1 of 2)

(6) El matadero no está autorizado a recibir animales que procedan de, o hayan estado en algún momento en, una región mencionada en 9CFR94.12 como una región en la que se considera que existe la enfermedad vesicular porcina;
The slaughtering establishment is not permitted to receive animals that originated in, or have ever been in a region listed in 9CFR94.12 as a region in which swine vesicular disease is considered to exist;

(7) El matadero/planta elaboradora no está autorizado a recibir carne de porcino procedente de suidos procedentes de las regiones mencionadas en el punto (6), ni carne de porcino procedente de suidos de una región libre de enfermedad vesicular porcina que haya sido transportado a través de una región donde se considera que existe la enfermedad vesicular porcina, excepto la carne de porcino que haya sido transportada en contenedores precintados con precintos numerados en serie del gobierno nacional de la región de origen considerada libre de la enfermedad.
The slaughtering/processing establishment is not permitted to receive pork derived from swine which originated in a region mentioned in point (6), or pork from swine from a swine vesicular disease free region which has been transported through a region where swine vesicular disease is considered to exist except pork which was transported in containers sealed with serially numbered seals of the National Government of a region of origin listed as considered free of the disease.

(8) La carne de porcino ha sido elaborada, almacenada y transportada hasta el medio de transporte que llevará el artículo a los Estados Unidos de forma que se imposibilite que se mezcle o se ponga en contacto de otro modo con carne u otros productos de porcino que no hayan sido manipulados de acuerdo con los requisitos de este certificado.
The pork has been processed, stored, and transported to the means of conveyance that will bring the article to the United States in a manner that precludes its being commingled or otherwise coming in contact with pork or pork products that have not been handled in accordance with the requirements of this certificate.

(9) La carne y carne y despojos comestibles de porcino no pueden proceder de cerdos que hayan estado en una de las regiones o zonas siguientes, excepto en el caso de que los animales fueran sacrificados después de los períodos descritos:
The pork or pork byproducts must not have been derived from swine that were in any of the following regions or zones, unless the swine were slaughtered after the periods described:

(i) Cualquier región clasificada en 9CFR94.9(a) y 9CFR94.10(a) como región en la que se sabe que existe la peste porcina clásica, excepto para la UE (*).
Any region when the region was classified in 9CFR94.9(a) and 9CFR94.10(a) as one in which classical swine fever is known to exist, except for the EU (*);

(ii) Una zona de la UE restringida por la detección de peste porcina clásica en cerdos domésticos, desde el momento de la detección hasta que la restricción sobre la zona es derogada por la autoridad veterinaria competente de un Estado Miembro de la UE, o hasta transcurridos 6 meses desde la eliminación de los cerdos de las instalaciones afectadas en la zona restringida, la limpieza y desinfección de las últimas instalaciones afectadas en la zona, lo que suceda más tarde, o A restricted zone in the EU established because of detection of classical swine fever in domestic swine, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of an EU Member State or until 6 months following depopulation of the swine on affected premises in the restricted zone and the cleaning and disinfection of the last affected premises in the zone, whichever is later; or

(iii) Una zona restringida en la UE establecida a causa de la detección de peste porcina clásica en jabalíes, desde el momento de la detección hasta que la restricción sobre la zona es derogada por la autoridad veterinaria competente de un Estado Miembro de la UE.
A restricted zone in the EU established because of the detection of classical swine fever in wild boar, from the time of detection until the designation of the zone as a restricted zone is removed by the competent veterinary authority of an EU Member State.

A estos efectos se entenderá por UE la región como se define en las regulaciones de APHIS para la Peste Porcina Clásica
In this regard, the term EU must be understood as the APHIS- defined EU region for Classical Swine Fever.

(10) La carne y despojos comestibles de porcino no deben haberse mezclado con carne o productos cárnicos de porcino derivados de otros cerdos procedentes de alguna de las regiones o zonas descritas en los párrafos (i) a (iii) del punto (9), excepto si los otros cerdos fueron sacrificados con posterioridad a los períodos descritos. Además, la carne y despojos comestibles de porcino no pueden proceder de cerdos que se hayan mezclado con otros cerdos procedentes de alguna de las regiones o zonas descritas en los párrafos (i) a (iii) del punto (9), excepto si los cerdos de los que se obtuvo la carne y despojos comestibles fueron sacrificados con posterioridad a los períodos descritos.
The pork and pork byproducts must not have been commingled with pork or pork products derived from other swine that were in any of the regions or zones described in paragraphs (i) through (iii) of point (9), unless the other swine were slaughtered after the periods described. Additionally, the pork and pork byproducts must not have been derived from swine that were commingled with other swine that were in any of the regions or zones described in paragraphs (i) through (iii) of point (9), unless the swine from which the pork or pork byproducts were derived were slaughtered after the periods described.

(11) Los cerdos de los que procede la carne y despojos comestibles de porcino no deben haber transitado por ninguna de las regiones o zonas descritas en los párrafos (i) a (iii) del punto (9), excepto si los cerdos fueron transportados directamente a través de dichas zonas o regiones en un medio de transporte precintado, y el precinto considerado íntegro a su llegada al punto de destino, o excepto si los cerdos han sido sacrificados con posterioridad a los períodos descritos.
The swine from which the pork or pork byproducts were derived must not have transited any region or zone described in paragraphs (i) through (iii) of point (9), unless the swine were moved directly through the region or zone in a sealed means of conveyance with the seal determined to be intact upon arrival at the point of destination, or unless the swine were slaughtered after the periods described.

(12) Los materiales y equipos utilizados en el transporte de los cerdos de los cuales procede la carne y despojos comestibles desde la granja de origen al matadero no han sido utilizados previamente para el transporte de cerdos que no cumplen los requisitos de este certificado, excepto si los materiales y equipos han sido limpiados y desinfectados.
No equipment or materials used in transporting the swine from which the pork or pork byproducts were derived from the farm of origin to the slaughtering establishment may have been used previously for transporting swine that do not meet the requirements of this certificate, unless the equipment and materials have first been cleaned and disinfected.

Appendix H

List of Veterinarians

Contents

Introduction	page H-1-1
PPQ-VRS-Headquarters Personnel	page H-1-2
PPQ-AQI-VMO	page H-1-2
VS-TTSPS	page H-1-4
VS-AVIC	page H-1-5

Introduction

Use this appendix to identify the addresses and telephone numbers of the Veterinary Medical Officers (VMOs) of Plant Protection and Quarantine (PPQ), Veterinary Regulatory Support (VRS); the Technical Trade Services Product Staff (TTSPS) of Veterinary Services (VS), and the Area Veterinarians in Charge (AVIC) in VS. The VMOs of PPQ-VRS are located at PPQ Headquarters (PPQ-VRS-HQ, VMOs) and at various State locations (PPQ-VRS-AQI, VMOs). The locations of AVICs are listed by State.

A VS telephone and address list is available on the Internet at the following address: <http://www.aphis.usda.gov/vs/area_offices.htm>.

The area office telephone and address list for AVICs will automatically open in Adobe Acrobat Reader.

Policy for Maintaining the *Animal Product Manual (APM)*

Generally, two copies of the *Animal Product Manual (APM)* will be provided to every work location. However, what constitutes a work location and how many manuals are needed will vary from location to location. At larger ports there should be two manuals placed in every area where animal product importations are regulated. Examples of separate work locations include the air cargo area, each passenger baggage counter, the compliance desk, the international mail facility, and the maritime cargo area.

Some locations may need more than two manuals such as a cargo area and compliance desk where several officers are located and where officers take an APM with them to clear cargo. Some remote work locations such as express air cargo operations may **not** have a mailing address and may **only** need one manual. For remote work locations **without** mailing addresses, include your copy count in the one established for the work location that services the remote location.

Each officer **no** longer needs to maintain an APM. However, an individual(s) at each work location to **must** be designated to maintain the manual should. PPQ's Veterinary Regulatory Services (VRS) will continue to evaluate the accuracy and currency of the APM during port reviews.

Any addition or change to the established copy count **must** be approved by PPQ, VRS. Contact PPQ, VRS through channels at 301/734-7633 or e-mail <margaret.m.dziedziak@usda.gov>.

Supporting and Updating the *Animal Product Manual* (APM)

Manuals **must** be maintained and modified properly. **Without** a systematic procedure for maintaining manuals, they are likely to fail—substantially reducing the effectiveness of the programs they support. So to maintain manuals, a systematic procedure is a **must**. A five-point description of how the APM will be supported and maintained—including the user's responsibility for maintaining the integrity of the manual—follows.

Issuing Revisions

PPQ's Manuals Unit revises the APM by distributing immediate updates. New editions are scheduled at fixed intervals—barring budgetary constraints—at least every 4 years or whenever the percentage of updated pages exceeds 30 percent.

All revisions will be issued as either “add a page” or “replace a page.” For critical updates, PPQ, VRS immediately posts a message to PPQ's bulletin board and the Manuals Unit follows up with a page revision. When the percentage of updated pages exceeds 30 percent, the entire manual section is reprinted, barring budgetary constraints. A new page will **not** be issued solely to correct a minor typographical error. Errors that would lead to an incorrect action are immediately corrected.

Keeping Manuals Current

There are three ways to track revisions for your APM: the Update Record, transmittal memos, and control data.

The *Update Record* is located on the reverse side of the title page of the APM. The purpose of the *Update Record* is to let you know when you are missing a transmittal. The *Update Record* also lets PPQ, VRS know how up to date the work location manuals are when conducting an audit. All transmittals are to be recorded on the ***Update Record***.

All revisions will be accompanied by transmittal memos. These will be numbered consecutively each calendar year, allowing you to know if you have missed something.

Work locations are to numerically file all transmittals. The filed transmittals will be used by Headquarters to audit the APM during port reviews. Individually, you may want to retain and file the transmittals to assure yourself that you have received all the previous issuances.

In addition to having numbered transmittals, each manual page has control data positioned at the bottom. The revised page's control data alerts you to whether or **not** you have the most up-to-date version. See [Figure 10-1-1](#) below.

10/2002-01 PPQ, VRS	◆ 10/2002 is the month and year the manual was issued
	◆ -01 is the transmittal number
	◆ The first transmittal number for the year is always -01

FIGURE 10-1-1 Manual Control Data

Knowing What Is Revised and the Nature of the Revision

Each transmittal will explain the purpose of the revision and give you directions for making the revision, such as adding or replacing pages.

Except for changes to the indexes, each revision will be marked with a change bar as located to the left of this sentence.

Knowing Your Responsibilities So Your APM Is Always Up to Date

To maintain the APM effectively and to enhance professionalism, the APM **must** be kept up to date. If you fail to keep the manual at the work location updated, you run the risk of making a decision that provides the opportunity for an outbreak of an exotic disease. Your diligence is a crucial part of this process.

When you receive revisions, please do the following:

1. Read the revisions when you receive them.
2. Record the transmittal in the *Update Record*.
3. Add or replace the revised pages in the manual on the day they are received.
4. File transmittal memos.
5. If you have missed a transmittal, let APHIS Distribution know. Make sure that you communicate, through channels, the information that allows APHIS Distribution to update the mailing list.
6. Sound off when you feel you know a way to improve the maintenance of the manual system. Use the Comment Sheet at the back of this manual to let the Manual Unit know of technical errors, procedural changes, or needed enhancements. If the suggestion is complex and you need to explain the suggestion to someone, then call John Patterson at 240/629-1934

Important

If you have a situation that requires an immediate response regarding a procedure or regulatory action or you have comments, suggestions, complaints, recommended changes, etc., about the content of the Animal Product Manual, contact PPQ, VRS at 301/734-7633.

Supersede Statements

The Manuals Unit is obligated to the users of any document produced to identify all the previous documents which contain outdated information and are **no** longer valid. Also, supersede statements are critical from a legal standpoint. If a user accessed outdated information which has **not** been formally superseded, our agency may be liable.

Therefore, a supersede statement will be incorporated in each update we produce if the content in fact has superseded existing documents (manual, memorandum, e-mail message, etc.).

Adding and Changing Addresses and Copy Counts

TABLE J-1-1 Contacts for Changing Copy Count or Mailing Address for Manuals

If you need to add or change the:	Then contact through the proper channels:
Copy count (number of copies of the manual your work location is receiving)	<ul style="list-style-type: none"> ◆ PPQ, VRS for approval at 301/734-7633 or <margaret.m.dziedziak@usda.gov> ◆ Refer to the new policy at the beginning of this appendix
Address	Ed Lawson < edward.s.lawson@usda.gov > or FAX: 301/734-8455

When updating mailing lists maintained by APHIS Distribution, always provide the following information:

- ◆ Distribution code: 34043 (for the APM)
- ◆ Access code from a mailing label used to send your work location operational manuals. This code is the top line consisting of numbers and letters, i.e., YM017 34043/20737CGUA 4 0001
- ◆ Old address
- ◆ New address
- ◆ Contact person
- ◆ Telephone and FAX numbers

Mail, FAX, or e-mail APHIS Distribution at the following address:

USDA, APHIS, PDMSC
Printing, Distribution, and Mail Services Center
4700 River Road, Unit 1A01
Riverdale, MD 20737-1229
ATTN: Ed Lawson
FAX: 301/734-8455
E-mail: <edward.s.lawson@usda.gov>

Ordering Additional Manuals and Transmittals

APHIS Distribution is responsible for storing and distributing the APM and its associated updates. The address is as follows:

USDA, APHIS, PDMSC
Printing, Distribution, and Mail Services Center
4700 River Road, Unit 1A01
Riverdale, MD 20737-1229
ATTN: Mary L. Kellington
FAX 301/734-8455
E-mail: <mary.l.kellington@usda.gov>

Use e-mail, FAX, telephone, or mail when requesting services and always provide the following information:

Organization
P.O. Box or Street Address (include room or suite number)
City, State, and nine-digit Zip code
Contact person
Telephone and FAX numbers
Manual title: APM
Transmittal number (i.e., 08/2002-01)
Number of copies needed

Introduction

This appendix covers **only** those forms related to the importation of animal products and by-products which you are directly responsible for completing (wholly or partially), signing, and distributing.

Forms which you provide to the importers for them to complete are listed in **Appendix G** on page **G-1-1**.

Instructions for CBP to Order USDA Forms

CBP Field Offices may order USDA forms by following the procedures below:

1. Obtain a Director Field Operations (DFO) Customer Identification Number by providing the following information to the USDA forms point-of-contact via E-mail to Karen.A.Stratchko@aphis.usda.gov:
 - A. Full name of the person responsible for ordering USDA forms in the DFO office.
 - B. Full mailing address of the DFO office (**no** P.O. box).
 - C. Telephone number of the point-of-contact in the Field Office.
 - D. Facsimile number of the point-of-contact in the Field Office.
 - E. E-mail address of the point-of-contact in the Field Office.
2. A DFO Customer Identification Number will be assigned to the CBP Field Office; and the designated point-of-contact in the CBP Field Office will be notified of the DFO Customer Identification Number.
3. Once the DFO Customer Identification Number has been assigned, the CBP Field Office person responsible for ordering USDA forms is strongly encouraged to order USDA forms via the Internet at www.bsc.usda.gov. As a last resort, the CBP Field Office person responsible for ordering USDA forms may fax the order to the USDA point-of-contact (Ms. Karen Stratchko, FAX 301-734-5319; phone 301-734-7908); however, ordering USDA forms by FAX could lead to delays.
4. The CBP Field Office person ordering USDA forms **must** use the same DFO Customer Identification Number for all forms orders. Order **only** the forms and quantity needed and reorder when necessary. **Do not** order large quantities of USDA forms. Forms take approximately 5-10 days to arrive after receipt of order.

USDA, PPQ/FSIS Notification Sheet for Perishable Cooked Ruminant or Cooked Swine Meat From Restricted Countries

USDA PPQ/FSIS NOTIFICATION FOR PERISHABLE COOKED RUMINANT OR COOKED SWINE MEAT FROM RESTRICTED COUNTRIES (PRINT or TYPE)

Section A: USDA/APHIS/PPQ Today's Date: 9/18/02

Port of arrival: Baltimore
Phone number: 410/631-0087 FAX number: 410/631-0096

1A. Port shipment ID(s) [Container] Bill, or Truck Entry Number] (Circle one): C15769, C15770, C15771, C15772
2A. Country of origin: Argentina
3A. Meat certificate number(s): M876503, M876540, M876521

4A. Species: Ruminant Swine
5A. Pink juice test for FMD required at Rapid-Defrost facility? (Refer to SOP Part II, A)
YES (APHIS Authorized Hold) NO
6A. Seal # (if required) S3882ARG Foreign USDA
(Containers of cooked meat requiring Pink Juice Test must be sealed)

7A. Product to be transferred to the following FSIS I-house (identified by importer/broker):
Name of I-House Merchants Terminal
I-House Establishment Number 1158

(Note: Only APHIS approved Rapid Defrost Facilities are eligible to conduct the Pink Juice Test. Not all FSIS I-Houses are Rapid-Defrost Facilities; refer to Foreign Origin Ruminant Meats and Meat Products Section in the Animal Product Manual. Products not from FMD affected countries are not required to go to a Rapid Defrost Facility but must be forwarded to an FSIS I-House.)

8A. PPQ Officer: Joe Friday Badge # 715
(PRINT)

(PPQ Port Office must retain a copy. Original to FSIS-I House)

Section B: USDA/FSIS: Fill out bottom portion ONLY for shipments requiring pink juice test or for shipments eligible for MIT testing and return entire page to USDA/APHIS/PPQ above.

Today's Date: 9/19/02

1B. The shipment was received intact (as specified above): YES NO
2B. Is the meat boneless? YES NO
3B. Pink juice test performed? YES NO
4B. If test was performed: Pink juice detected Pink juice NOT detected
5B. Were samples selected for MIT testing? YES NO
6B. FSIS Disposition: Released Rejected FSIS Hold Referred back to APHIS

If Item # 1B, #2B, and/or #3B (if required) is NO, or pink juice is detected, immediately contact the USDA/APHIS/PPQ office indicated above.

7B. FSIS Inspector: Nancy Smythe Badge # FSIS245
(PRINT)

September 28, 2001

FIGURE K-1-1 Example of USDA, PPQ/FSIS Notification Sheet for Perishable Cooked Ruminant or Cooked Swine Meat From Restricted Countries

Purpose

The PPQ/FSIS Notification Sheet is to alert FSIS shipments of perishable, cooked meat that may require a Pink Juice Test to evaluate the thoroughness of cooking or cooked pork shipments that require the Maximum Internal Temperature (MIT) test. This sheet is completed at the port of arrival and sent to the FSIS Inspector. The CBP-AI completes *Section A* of this form while the FSIS Inspector completes *Section B* to communicate the results of the Pink Juice Test or the MIT.

Instructions for Section A (CBP-AI)

The CBP-AI completes *Section A* of this sheet on all shipments of perishable, cooked meat or meat products from restricted countries. Fill out the sheet and seal in an Official Government Envelope (OGE). Address the envelope "To Be Opened **Only** By USDA/FSIS Inspector." Have the sheet sent by an APHIS-contracted courier to the FSIS I-House listed in *Section A*. If there are multiple shipments of meat or meat products moving under the **same** Port shipment ID number, you may use a single notification sheet.

Instructions for Section B (FSIS Inspector)

The FSIS Inspector completes *Section B*, the bottom portion of this worksheet, **only** for shipments requiring the Pink Juice Test or shipments eligible for MIT testing. **Immediately** notify the port office listed in *Section A* of this worksheet.

TABLE K-1-1 Instructions for Completing USDA, PPQ/FSIS Notification Sheet for Perishable Cooked Ruminant or Cooked Swine Meat from Restricted Countries

Section	Block	Instructions
A <i>(completed by CBP-AI)</i>	1A	1. Enter the Port Shipment ID Number(s). You may use either of the following: ◆ Container number (bill of lading number/airway bill number/rail bill number) ◆ Truck entry number 2. Circle the one that you used
	2A	Enter the country of origin for the product
	3A	Enter the meat certificate number(s)
	4A	Enter the species of animal(s) from which the product was derived
	5A	If a Pink Juice Test is required for perishable, cooked ruminant meat ¹
	6A	1. If required, confirm and enter the seal numbers 2. Check whether the seals are foreign or USDA's
	7A	Enter the name of the I-House and its Establishment number
	8A	1. Legibly print or type your name and badge number 2. Make copy of the completed sheet for PPQ records
B <i>(completed by FSIS Inspector)</i>	1B	1. Check whether the shipment was received with seals intact 2. Check whether the numbers match those entered in Block 6A
	2B	Check whether the meat is boneless
	3B	Check whether the Pink Juice Test was done
	4B	1. If the Pink Juice Test was done, check whether pink juices were detected 2. If pink juices were detected, immediately notify the Port Office identified in Section A; this office will refuse entry to the shipment
	5B	Check whether MIT testing was done on samples of cooked pork
	6B	Check the disposition of the shipment
	7B	Legibly print or type your name and badge number

¹ Currently there are **no** APHIS Approved Facilities for cooking pork in countries affected with FMD.

Distribution

The CBP-AI at the port of arrival distributes the form as follows:

1. Send the original notification sheet in an Official Government envelope (OGE) addressed "To Be Opened Only by USDA/FSIS Inspector" and sent by APHIS-contracted courier to the FSIS I-House listed in *Section A*, 7A of this form (see [page K-1-3](#)).
2. Make a copy of the notification sheet and attach the copy to the import documents, and keep in the port file for 5 years.

PPQ Form 254, Disposition of Plants and Plant or Animal Products

FIGURE K-1-2 Example of PPQ Form 254, Disposition of Plants and Plant or Animal Products

Purpose

PPQ Form 254, *Disposition of Plants and Plant or Animal Products*, is written documentation of the disposition ordered against animal products. Customs requires this documentation so they can clear manifests, refund duty, or make entry liquidations. PPQ uses the form as evidence for processing violations.

Instructions

Complete PPQ Form 254 when importations of animal products are **not** eligible for entry, or when the importer (given proper opportunity) refuses to take the required, restrictive action or meet the entry requirements.

TABLE K-1-2 Instructions for Completing PPQ Form 254, Disposition of Plant and Animal Products

Block	Instructions
1	Enter the Customs entry number
2	<ul style="list-style-type: none"> ◆ Enter "U.S. Customs Service" ◆ Enter the address of the Customs office for the port
3	<ul style="list-style-type: none"> ◆ List the regulation(s) that prohibits the animal products or by-products and/or the entry requirement that cannot be met <p>EXAMPLE 9CFR 94 prohibits fresh beef from a country of origin known to be affected with FMD. 9CFR 96 requires certification for animal casings, or the importer refuses to have a truckload of steer skulls go forward to an approved establishment</p>

PPQ FORM 287 (FEB 2002) Previous editions are obsolete.			

FIGURE K-1-3 Example of PPQ Form 287, Mail Interception Notice

Purpose

PPQ Form 287, Mail Interception Notice, is completed for the following reasons:

- ◆ Notify individual receiving mail package that unauthorized animal products or by-products were removed
- ◆ Inform sender of the reason for removing the animal products or by-products
- ◆ Record the regulatory action PPQ takes when intercepting mail
- ◆ Provide information for preparing monthly and quarterly reports

Instructions

Complete PPQ Form 287 when you **must** return a package to the sender, when you **must** destroy an entire or partial package, or when you **must** remove decayed or spoiled animal products or by-products from a package.

TABLE K-1-3 Instructions for Completing PPQ Form 287, Mail Interception Notice

Block	Instructions
1	ENTER your port of entry
2	ENTER the date
3	LEAVE blank
4	ENTER the complete address of the individual who is receiving the package
5	ENTER the complete address of the individual who sent the package
6	DESCRIBE in detail the animal product or by-product that you have removed, destroyed, or returned
7	ENTER the location where the package was postmarked
8	ENTER the date of postmark
9	ENTER any mail registry number recorded on the package
10	INDICATE whether or not there were any breaks, leaks, or spills
11	INDICATE whether or not the packaging required reconditioning by the agent of the carrier, broker, or addressee
12	<ul style="list-style-type: none"> ◆ ENTER the regulation that governs the unauthorized animal product or by-product ◆ If you do not know the regulation, SEE Table K-1-4
13	<ul style="list-style-type: none"> ◆ CHECK the block that states what regulatory action you took—removed, destroyed, or returned ◆ DO NOT seek advice from the individual receiving the package as to whether the animal product or by-product should be destroyed or returned to origin
14	<ul style="list-style-type: none"> ◆ CHECK the block that states the reason why you took regulatory action ◆ If the reason is not specifically listed, CHECK the “Other” block and record the reason
15	<ul style="list-style-type: none"> ◆ DETAIL what you did and why so that the individuals who sent and are receiving the package understand what was done and why ◆ If the package is being returned to the sender, RECORD in this block “The package was returned by surface mail.” The postal service will not return packages by air
16	SIGN your name
Reverse side of PPQ Form 287	<ul style="list-style-type: none"> ◆ When some items are removed from a package, then LIST the remaining contents and condition on the reverse of the port copy of PPQ Form 287 ◆ NOTE who handled the repacking and wrapping of the package before returned to the mail; this will be useful to answer any complaints of missing items or breakage

TABLE K-1-4 Determine the Regulation that Governs the Animal Product or By-Product

If the animal product or by-product is:	Then the regulation is:
Semen or embryos	9CFR Part 98
Edible products such as: ◆ Meat and meat products ◆ Milk and milk products ◆ Eggs	9CFR Part 94
Inedible by-products such as: ◆ Bones ◆ Hides ◆ Skins ◆ Hay, straw	9CFR Part 95
Casings	9CFR Part 96
Biological products such as viruses, serum, toxins that are intended for use in treating animals	9CFR Part 104
Organisms and vectors	9CFR Part 122

Distribution

Distribute PPQ Form 287 as shown in [Table K-1-5](#).

TABLE K-1-5 Distribution of PPQ Form 287

If:	And the package is:	And the animal product or by-product:	Then:
Original PPQ Form 287	Released to the addressee		ENCLOSE the original PPQ Form 287 in the package
	Destroyed or returned to sender	Was prohibited or restricted	MAIL the original PPQ Form 287 to the addressee
		Unrestricted	GIVE to the postal official
Copy of PPQ Form 287	Returned to the sender		1. ENCLOSE a copy in the package 2. If necessary, GIVE a copy to the postal official 3. MAINTAIN a copy for the official record and FILE a copy in the port file

VS Form 1-86A, Cleaned, Washed, and Disinfected Tag

U.S. DEPARTMENT OF AGRICULTURE ANIMAL AND PLANT HEALTH INSPECTION SERVICE VETERINARY SERVICES	
CLEANED, WASHED AND DISINFECTED	
DISINFECTANT	
AT	
DATE	SIGNATURE (VS INSPECTOR)

VS FORM 1—86A (SEP 74) ★ U.S. GPO: 1990-257-814

FIGURE K-1-4 Example of VS Form 1-86A, Cleaned, Washed, and Disinfected Tag

Purpose

VS Form 1-86A, Cleaned, Washed, and Disinfected Tag, is a tag that is placed on empty semen containers after they are disinfected. The form testifies to the disinfection.

Instructions

Enter the following information on each tag and attach one tag to each container:

- ◆ Disinfectant used—4 percent sodium carbonate
- ◆ Port where the empty semen containers were disinfected
- ◆ Date of the disinfection
- ◆ Your signature

Purpose

VS Form 10-4, Specimen Submission, accompanies samples sent to NVSL in Ames, Iowa for laboratory testing needed to determine entry status. In addition, VS Form 10-4A, a continuation sheet, is to be used when sending 10 or more samples.

Instructions

TABLE K-1-6 Instructions for Completing PPQ Form 10-4, Specimen Submission

Block	Instructions
1	Enter your name, duty station, and office telephone number
2	Enter the name and address of the consignee, broker, or agent
3, 4, 5, 6	Leave blank
7	<ul style="list-style-type: none"> ◆ Enter the test procedure you are requesting; for PPQ purposes this would be one of the following: animal species, disinfectant percentage, internal temperature (protein coagulation), pH level ◆ When submitting samples of sodium carbonate with sodium silicate: <ul style="list-style-type: none"> ◆ Specify that the examination requested is for concentrate of sodium ◆ Submit samples in plastic containers; never use glass ◆ Do not refer to any specific disease (such as FMD) when submitting samples to determine pH level or internal temperature
8	Enter the name of the CBP-AI who collected the sample from the importer
9	Enter the date collected
10	Enter "PPQ, VRS"
11	Mark the "Import" box
12	Enter the country of origin
13	Leave blank
14	Mark the appropriate preservation used (preserved condition of product as imported)
15	<ul style="list-style-type: none"> ◆ Mark the appropriate specimen being submitted ◆ If the specimen is unknown, mark the "Other" box and enter <i>Unknown</i>
16	Enter the total number of specimens submitted
17	<ul style="list-style-type: none"> ◆ Mark the appropriate species or source submitted ◆ If the species or source is unknown, mark the "Other" box and enter <i>Unknown</i>
18	Leave blank
19	<ul style="list-style-type: none"> ◆ Enter the sample identification as consecutive numbers beginning with 1 ◆ Enter the animal identification with a sequence of numbers legible by laboratory personnel; for example, all or the last part of the air waybill would be a good identification number ◆ Mark all containers (not the lids) with the identification numbers ◆ Leave blank the columns for "Age" and "Sex"
20	<ul style="list-style-type: none"> ◆ Enter any information about the history of submission, sex of importation, number of containers, number sampled, and additional information ◆ For disinfectant samples, Indicate the article(s) being submitted ◆ For all other submissions, add the statement "Please phone or FAX the results to the PPQ office that submitted the request"
21	◆ Sign and date the form

Distribution

1. Send the sample and Parts 1-3 of VS Form 10-4 to the following address using overnight mail:

USDA, APHIS National Veterinary Services Laboratories
Chemistry Section
P.O. Box 844
Ames, IA 50010

2. Send part 4 of the VS Form 10-4 to the following address:

USDA, APHIS, PPQ, VRS
4700 River Road, Unit 129
Riverdale, MD 20737-1236

Consult with PPQ, VRS regarding submissions of **other than** disinfectant percentages.

3. File part 5 of VS Form 10-4.

Results of Test

The test results will be telephoned or faxed to PPQ, VRS, who will inform the originating office.

EXCEPTION: Test results of disinfectant samples will be mailed directly to the port.

If test results **other than** for disinfectant are **not** received within 4 working days of submission, contact PPQ, VRS by telephone at 301/734-7633.

VS Form 16-4, Export Certificate for Animal Products

UNITED STATES DEPARTMENT OF AGRICULTURE ANIMAL AND PLANT HEALTH INSPECTION SERVICE HEALTH CERTIFICATE EXPORT CERTIFICATE ANIMAL PRODUCTS	FOR OFFICIAL USE ONLY PORT Milwaukee DATE 11/21/03 AND NO. C5555

<small>VS FORM 16-4 (MAY 2003) (All previous versions are obsolete after Jan. 2004.)</small>		

FIGURE K-1-6 Example of VS Form 16-4, Export Certificate for Animal Products

Purpose

VS Form 16-4, Export Certificate for Animal Products, is used to certify exportations of inedible and edible animal by-products. **Never** issue VS Form 16-4 for commercial shipments of meat or meat products. **Never** issue VS Form 16-4 for exportations of non-animal products. **Never** issue VS Form 16-4 for the exportation of animal products to the European Union (this includes commercial shipments of pet food or products to be used in pet food). Refer certification of pet food to AVIC.

Instructions

This document **must** be completed in English, using a typewriter, word processor, or computer. **Never** accept a handwritten form. The instructions for completing the form are summarized in [Table K-1-7](#). Follow the steps below to review the VS Form 16-4 and assure that the form is properly completed by the PPQ Officer (APHIS Officer) and the exporter.

Review the form for completeness as follows:

1. Form was completed using a computer, word processor, or typewriter. **Never** accept a handwritten form.
2. Make certain that the document was completed in English. Bilingual information is acceptable as long as one of the languages is English.
3. Check to see that the typed or stamped name and title of the APHIS officer endorsing the form is provided.
4. Make certain that the exporter has completed a description of the consignment as follows:
 - ❖ Name and address of the exporter (**must** be a U.S. address)
 - ❖ Name and address of the consignee
 - ❖ Quantity and type of product; the species of animal **must** be clearly identified. If the product is categorized, a brief explanation **must** follow such as "dairy product of bovine origin"
 - ❖ Identification (waybills, marking, etc.)
 - ❖ Conveyance

5. Check the accept and confirm statements. The exporter most likely will have entered the required and requested additional declarations. See [Table K-1-8](#) and [Table K-1-9](#).

EXAMPLE

For example, the standard anthrax statement to be entered on VS 16-4 under additional declarations is as follows:

This office has on file an affidavit from *[business or company]* stating that the animal product originated in the following States: *[list States]* . There have been **no** outbreaks of anthrax in the States listed above in the past 12 months.

6. Draw a diagonal line from the upper, left corner just under the statement to the lower, right corner.
7. Sign and enter your title as “APHIS Officer” on the designated lines. **Never sign as a PPQ officer.**
8. The exporter will ask for VS Form 16-4. The exporter is responsible for completing the description of the consignment which includes:
 - ❖ Name and address of exporter
 - ❖ Name and address of consignee
 - ❖ Product (kind, quantity, weight)
 - ❖ Identification
 - ❖ Conveyance

TABLE K-1-7 Instructions for Completing VS Form 16-4, Export Certificate for Animal Products

Block	Instructions
For Official Use Only (upper right-hand corner) (completed by PPQ)	This form must be typewritten or computer generated and completed in English. Bilingual information is acceptable as long as one of the languages is English. Do not accept a handwritten form
Port	Enter the port or office of issue
Date	Enter the date of issuance
And No.	Enter the certificate number
Additional Declaration	Completed by the exporter
Signature of Endorsing Official	<ul style="list-style-type: none"> ◆ Complete this section after you have reviewed the form as completed by exporter ◆ Endorsing APHIS/PPQ Officer signs
Typed Name	<ul style="list-style-type: none"> ◆ Complete after you have reviewed form as completed by exporter ◆ Type endorsing officer's name
Title of Endorsing Official	<ul style="list-style-type: none"> ◆ Complete after you have reviewed form as completed by exporter ◆ Type/enter your title as "APHIS Officer" never sign as PPQ Officer
Description of Consignment	<ul style="list-style-type: none"> ◆ Completed by the exporter. ◆ Exporter must have a complete description of the following: Quantity and type of product; the species of animal must be clearly identified. If the product is categorized, a brief explanation must follow such as "dairy product of bovine origin"
Name and Address of Exporter	<ul style="list-style-type: none"> ◆ Completed by the exporter ◆ Exporter must have completed the name and address of the exporter (must be a U.S. address)
Name and Address of Consignee	<ul style="list-style-type: none"> ◆ Completed by the exporter ◆ Exporter must have completed the name and address of the consignee.
Product (quantity, unit of measure, and weight)	Completed by the exporter
Identification	Completed by the exporter (waybills, marking, etc.)
Conveyance	Completed by the exporter

TABLE K-1-8 Determine Which Statements to Accept and Confirm

If the exporter:	And:	Then:
Requires a statement for tallow to Pakistan	You get a laboratory report from the exporter	ACCEPT only the following wording: " <i>[Name of laboratory]</i> laboratory has submitted a laboratory report to USDA and on the basis of this laboratory report only , I hereby certify that the tallow does not contain any lard"
Requires an anthrax statement (common request for cattle hides)	→	CONTACT the Area Veterinarian in Charge in the State where the product originated to confirm the anthrax statement
Wants to add another disease statement or wants to make an additional statement	→	Go to Table K-1-9

TABLE K-1-9 Determine Which Additional Statement to Accept

If the statement is:	And the affidavit is:	And the product is:	Then:
Known to be true or if you don't know if true, but appears plausible	On file for the same product	→	ACCEPT the additional statement such as, "This office has on file an affidavit from <i>[name]</i> stating that..."
	Not on file or on file, but for a different product	Hides or skins	ACCEPT the additional statement, "Based on information available to APHIS, I hereby declare that the animal by-product described below is not likely to disseminate agents of infectious diseases of domestic animals."
		Other than hides or skins	CONTACT PPQ-VRS-AQI or PPQ-VRS-HQ personnel for further action (see Appendix H)
Known to be false or you have doubts about the plausibility of the statement	→		

Distribution

Distribute copies of VS Form 16-4 as follows:

1. Give the exporter the original and up to three copies.
2. Send a copy to PPQ, VRS in Riverdale, Maryland.
3. Keep a copy for the files in the issuing office (plus any laboratory report).

VS FORM 16-78
(FEB 2002)

Previous editions are obsolete.

PART 1 - ORIGINAL

FIGURE K-1-7 Example of VS Form 16-78, Report of Entry, Shipment of Restricted Imported Animal Products and Animal By-Products, and Other Material

Purpose

VS Form 16-78, Report of Entry, Shipment of Restricted Imported Animal Products and Animal By-Products, and Other Material, is used to accompany all restricted animal products moving from the port of entry to APHIS-approved establishments or APHIS-approved storage facilities.

VS Form 16-78 is **not** to be used for foreign shipments of cooked beef or for transiting shipments. Use [USDA, PPQ/FSIS Notification Sheet for Perishable Cooked Ruminant or Cooked Swine Meat From Restricted Countries](#) (see [page K-1-3](#)).

Instructions

The instructions listed below are for VS Form 16-78 (FEB 2002). Previous editions are obsolete.

TABLE K-1-10 Instructions for Completing VS Form 16-78, Report of Entry, Shipment of Restricted Imported Animal Products and Animal By-Products, and Other Material

Block	Instructions
1	Optional (used for identification by the port of entry)
2	List the port of arrival (city, State)
3	List the name and address of the importer or shipper
4	List the name of the country of origin
5	List the Customs Entry Number if applicable, or air waybill number
6	List the product or material (be as specific as possible; such as wart hog hides, wildebeest skulls, etc.), continue in block #17 as needed
7	List the date of arrival
8	List the name of the AVIC in the State where the approved establishment is located (See Figure H-1-4, "List of VS, AVIC," on page-H-1-5 and Appendix E)
9	List the name of the incoming vessel/carrier
10	List the name of the carrier moving the importation/shipment to the address listed in <i>Block 14</i>
11	Identify the seal numbers and whose they are, e.g., USDA, Customs
12	List in pounds only , the total quantity received at the port of arrival
13	List the number of units and type of units (box, bundle, carton, cask, etc.) received at the port of arrival
14	If the importation is for animal products or by-products moving to an approved establishment, then list the name, address, zip code, and phone number of the approved establishment (see Appendix E)
15	List in pounds the total weight of the shipment moved from the port of entry to the approved establishment
16	List the total number of units and type of units moved from the port of entry to the approved establishment

TABLE K-1-10 Instructions for Completing VS Form 16-78, Report of Entry, Shipment of Restricted Imported Animal Products and Animal By-Products, and Other Material (continued)

Block	Instructions
17	List items such as air waybill number and detailed description of each animal product. For trophies or other personal shipments, list the importer's passport number and driver's license State, number, and expiration date, and list the product or material (be as specific as possible; such as wart hog hides, wildebeest skull, etc.). (see Important advisory below) . If used, list the name of the commercial courier service (e.g. Federal Express, DHL, UPS, etc.)
18	Print the name of the inspector and sign
19	List the name and location of the work station
20	List the date
21-32	Leave blank; these blocks will be completed by the approved establishment

Distribution

Distribute VS Form 16-78 as follows:

1. Mail *Part 1* to the address listed in *Block 14*.
2. Send *Part 2* with the importation/shipment by attaching the form to the shipping documents or to the cargo, or giving to the importer.

USDA, APHIS regulations allow shipment of restricted animal product or material consigned to a USDA approved establishment to be shipped by any method listed below:

- ◆ Hand carried
- ◆ Bonded commercial courier service (e.g., Federal Express, DHL, UPS, etc.)
- ◆ In-bond
- ◆ Shipped using airlines, rail, or other carrier services
- ◆ Shipped using mail service

If a commercial courier service is used, then list the name of the service in *Block 17* of VS Form 16-78.

3. FAX¹ *Part 3* to the AVIC in the State where the approved establishment is located (see [Figure H-1-4, "List of VS, AVIC," on page-H-1-5](#)).
4. Keep *Part 4* for the port files.

¹ Do not mail *Part 3*, even though the form directs you to do so. Be sure to FAX the form to the AVIC.

VS Form 17-8, Agreement of Pet Bird Owner

This report is authorized by law (9 CFR 92). Failure to complete and sign form will result in abandonment of birds.		See reverse side for additional OMB information.		FORM APPROVED OMB NO. 0579-0040

VS FORM 17-8 (JAN 90) Previous edition may be used. STATE OF DESTINATION

FIGURE K-1-8 Example of VS Form 17-8, Agreement of Pet Bird Owner

Purpose

VS Form 17-8, Agreement of Pet Bird Owner, is used for the following importations:

- ◆ Canadian origin pet birds which have been in the owner's possession for the past 90 days or more
- ◆ U.S. origin pet birds re-entering the country **without** a health certificate, and the owner chooses to abandon the birds for VS disposition
- ◆ Foreign origin pet birds entering the country, and the owner chooses to return the birds to the country of origin or abandon the birds for VS disposition
- ◆ Foreign origin pet birds accompanied by their owners and are in transit directly to Canada

Instructions

If VS personnel are **not** readily available to obtain applicable information while the owner is present, then the CBP Agriculture Specialist or CBP Officer will obtain the information and fill in the appropriate blocks on VS Form 17-8 (before the owner has to depart the area). Complete the form using the instructions in **Table K-1-11**.

TABLE K-1-11 Instructions for Completing VS Form 17-8, Agreement of Pet Bird Owner

Block	Instructions
1-6	FILL in
7	<ol style="list-style-type: none"> The pet bird owner must COMPLETE and SIGN either Section A, B, C, or D If the owner refuses to sign the form, then ADVISE the owner that option D is automatically in effect, and ATTACH a note to the form explaining the circumstances If the owner is going to contact VS, then INFORM VS
7A	<ol style="list-style-type: none"> FILL in the address where the bird will be held for 30 days LIST the name, address, and telephone number of the AVIC in the State where the bird will be held (see VS-AVIC on page H-1-5) If there is not an owner's signature block or date space on the version of VS Form 17-8 being used, then in any available space in block 7A HAVE the owner sign and date the form and list the telephone number where the owner can be reached
7B	<ol style="list-style-type: none"> If appropriate, then FILL in Have the owner SIGN, DATE, and ENTER the owner's telephone number Witness SIGNS, LISTS title, and ENTERS the date
7C	<ol style="list-style-type: none"> Have the owner FILL in the name of the country to which the birds are being exported Have the owner SIGN and DATE the form
7D	If the owner abandons the birds to APHIS, then HAVE the owner SIGN and DATE the form
8-9	FILL in
10	If postentry by carrier, then ENTER the postentry number
11-14	FILL in
15-20	LEAVE blank; VS will complete

Distribution

Distribute VS Form 17-8 as follows:

- Give the original copy to VS.
- Give the second copy to the pet bird owner.

3. Give the other copies to VS as arranged locally between CBP and VS.

Appendix L

User Fees

Contents

Introduction	page L-1-1
Materials	page L-1-2
Set the Fee	page L-1-2
Collect the Fee	page L-1-3
Record Collected Fees	page L-1-3
Remit Collected Fees	page L-1-4
Manage Records	page L-1-5
Annual Maintenance	page L-1-5
Examples of Forms for Collecting User Fees	page L-1-5

Introduction

Directions for collecting user fees for export certificates on animal products are covered in this appendix. Collect a fee for **each certificate issued**.

Collect fees for the following four types of certificates or certification endorsements:

- ◆ Export Certificate for Animal Products, VS Form 16-4
- ◆ Official USDA letterhead
- ◆ Rubber Stamp Export Certificate applied to a port letterhead
- ◆ Certification accompanying grain shipments attesting to freedom from animal diseases

Exporters must pay by check¹ or money order made payable to “USDA, APHIS.” Require exporters to pay by personal check, money order, cashier's check, certified check, or traveler's check. **Never** accept cash.

Every certificate or certification signed by a PPQ officer **must** be recorded. As officers sign certificates, they **must** log in the appropriate information on a form or log. APHIS Form 80-R, Export Certification Record, may be used to record Phytosanitary Export Certificates may be used.

¹ Make certain that the following information appears on the face of the check: complete mailing address and telephone number, Social Security number or driver's license number or taxpayer identification number, and APHIS Form 81 control number.

If the exporter is willing to pay the overtime, you may Issue certificates or sign endorsements of animal products **outside** of regular business hours.

There are five major tasks associated with collecting user fees. The tasks are listed in **Figure L-1-1** and are further explained in this appendix.

Tasks for Collecting User Fees

1. Set the fee
2. Collect the fee
3. Record fees collected
4. Remit fees collected
5. Manage records

FIGURE L-1-1 Overview of Tasks for Collecting User Fees

Materials

Have the following on hand to collect user fees:

- ◆ Blank copies of the Export Certificate Record (ECR) or similar log
- ◆ Book of blank receipts, SF Form 1165, or your own in-house book of receipts
- ◆ Blank copies of APHIS Form 94, Record of Public Funds Received, for remitting fees to the lock box in St. Louis, MO
- ◆ Blank copies of VS Form 16-4, Export Certificate for Animal Products

Set the Fee

Set the fee as follows:

1. Charge \$32 for each certificate for any animal or nonanimal products (including grain).
2. Use **Table L-1-1** to determine whether to charge or how much to charge if you **must** correct, replace or reissue a certificate or certification.

TABLE L-1-1 Fees for Replaced or Reissued Certificates

If the error:	Then:
Requires more than a minor pen and ink change	CHARGE \$32
Can be corrected by a minor pen and ink change	CORRECT the certificate and don't charge anything

Collect the Fee

Collect the fee **only** after signing the certificate or endorsement.

Accept a personal check only if the charge is for \$100 or less. If the exporter asks for a receipt, issue one using SF 1165 (a generic receipt form). Checks **must** be drawn on a U.S. Bank and **must** be payable in U.S. Funds.

Record Collected Fees

Record and log your actions on APHIS Form 80-R, Export Certification Record, or a similar form, as follows:

1. Date the certificate or certification.
2. Assign a consecutive number based on your port's current system or a new numbering system beginning with 001 preceded by the initials of the port's designation and the fiscal year (for example, Chicago could begin ORD 02-001, CHI 02-001, IKK 02-001, etc.). Examples of current numbering systems:
 - ❖ BOS 0357236, BOS 0357237, BOS 0357238...
 - ❖ Oakland 02-001, Oakland 02-002, Oakland 02-003...
 - ❖ Knoxville 47001, Knoxville 47002, Knoxville 47003...
3. Keep the log scrupulously; the log may be audited. Modify the APHIS Form 80-R, Export Certification Record, to log certificates or certification signed. You may create your own form. As a minimum, include the following information:
 - ❖ Unique number assigned
 - ❖ Date signed
 - ❖ Signature of endorsing PPQ officer
 - ❖ Amount of the fee collected (\$31)
 - ❖ Method of payment
 - ❖ Date payment was remitted

Remit Collected Fees

When a check or money order is collected, remit the funds to the lock box using an APHIS Form 94, Record of Public Funds Received. Make a copy of the check for your port records. You may enter more than one transaction on an APHIS Form 94.

Directions for completing and submitting APHIS Form 94 are as follows:

1. Enter your complete mailing address in *Block 4* of the APHIS Form 94.
2. Enter the 10-digit Accounting code and the 4-digit Budget Object Code (BOC) for each payment. Your use of the full accounting code and revenue source (BOCs) on the APHIS Form 94 allows you to enter more than one type of payment on each form.
3. Make sure all checks are made payable to USDA, APHIS.

Checks drawn on a foreign bank **must** be marked, "Payable in U.S. Dollars."

4. If cash is received, get a money order; **never** take the cost of the money order from the cash received. You may receive reimbursement by completing an SF-1164, Claim for Reimbursement for Expenditures on Official Business.
5. Send the checks or money orders (collected fees) along with the original and one copy of the APHIS FORM 94 to the following address within 24 hours of receipt:

USDA, APHIS, User Fees
P.O. Box 952180
St. Louis, MO 63195-2180

Never send cash. Send check or money order only.

6. Retain one copy of the APHIS Form 94 until a receipted copy is received from MRP-MBS. Please notify the Accounts Receivable Team if you have **not** received the receipted copy within 3 weeks of your submission.

Manage Records

Since the user fee program for export certification is an APHIS program where money is collected and handled directly, certifying officials **must** maintain an audit trail. Therefore, to prevent future difficulty, each issuing office is to maintain a sufficient audit trail as follows:

Annual Maintenance

Collect and maintain records and file as follows:

1. Collect both the issuing office copies of the export certificates associated with the log of certificates issued and each copy of the APHIS Form 94 used to send in money for the certificates listed on the log (ECR), together with a copy of each check.
2. Highlight, on the APHIS Form 94, the amounts that pertain to the certificates listed on the log (ECR).
3. Attach the associated export certificates, a copy of each check, and APHIS Form 94 to its log (ECR).
4. File the assembled records for the current fiscal year. After you close out a fiscal year, you **must** store the records. Records **must** be stored on site for two complete fiscal years plus the current fiscal year.
5. Following storage of the records on site for the appropriate time, forward them to the Records Retention Center. This center will hold on to records for an additional 4 fiscal years and 6 months prior to destroying them.

Examples of Forms for Collecting User Fees

The forms listed below are related to collecting user fees:

- ◆ APHIS Form 47, Transmittal and Receipt for Accountable Items
- ◆ APHIS Form 80-R (ECR), Export Certificate Record
- ◆ APHIS Form 94, Record of Public Funds Received
- ◆ VS Form 16-4, Export Certificate for Animal Products

Glossary

Introduction

Use this glossary to find the meaning of specialized words, abbreviations, acronyms, and terms used in regulating animal products. When applicable, the meaning includes the animal product or section with which the word is associated. Use the [Index](#) to locate where in the manual a given animal product or by-product is mentioned.

Definitions, Terms, and Abbreviations

abattoir. A slaughterhouse.

acid casein. See [casein](#).

acidophilus milk. A cultured milk product wherein *Lactobacillus acidophilus* bacteria have been added to the milk in order to aid in the digestion of lactose (milk sugar). Regulate as [Cultured Milk Products](#).

adequate proof of origin. Documentary evidence of the country from which the product originates. Examples include a bill of lading, certificate of origin, invoice, label, meat inspection certificate, or document on official letterhead prepared by the manufacturer, shipper, or seller.

African swine fever (ASF). A viral disease that affects **only** swine. The disease is acute, causing the swine to die within 7 days of having a high fever.

albumin. A type of protein found in blood, egg white, milk, and seeds.

albumin serum. A protein that accounts for 55% of the total protein in blood plasma. Imported for biological use. Covered under [Blood and Related By-Products](#).

amnion. A thin membrane forming a closed sac around the embryo of birds, mammals, and reptiles. The amnion contains amniotic fluid in which the embryo is immersed. If amniotic fluid cells, then covered under [Live Animals and Related Material](#); regulate as an organism or vector. If amniotic fluid or liquid to be incorporated as an ingredient in cosmetics, then covered under [Miscellaneous Products](#).

amphibian. Cold-blooded vertebrates, such as frogs, toads, or salamanders, intermediate in characteristics between fish and reptiles; have gilled, aquatic larvae and air-breathing adults.

anhydrous milk fat. See *butter oil*.

animal by-products, inedible. Parts or products of ruminants, swine, and poultry unsuitable for human consumption, such as hides, glue stock, bone meal, blood meal, glands, organs, skins, hair, wool, bones, hoofs, horns, hoof meal, horn meal, meat meal, tannage.

animal digest. A powder or liquid mixture of breakdown products from animal tissue resulting from the controlled action of one or more enzymes. Digest contains **only** trace amounts of feathers, hair, horn, or teeth. Digest **must** name its animal source (such as beef, chicken, or pork digests). Regulate as rendered and processed protein under *Animal Waste and Related By-Products*.

animal feed. See *feed*.

animal glue. A protein derived from the chemical breakdown of collagen, which is the principal protein constituent of animal hide, connective tissue, and bones. There are two types of animal glue: hide glue and bone glue. Hide glue and bone glue are considered inedible gelatin or technical gelatin. Both are allowed **unrestricted** entry.

animal products, edible. Parts or products of ruminants, swine, and poultry suitable for human consumption such as meat and meat products, meat by-products (formerly edible offal), meat food products, milk and milk products, and eggs.

ante-mortem. Preceding death.

anthrax. A worldwide disease of wild and domesticated animals that is transmitted by contact with infected animals or their products and, rarely, by vectors. The most prevalent form of this disease first appears as a small pimple which rapidly develops into a black pustule. Prompt diagnosis and early treatment are important in combating this disease in humans. Many antibiotics are effective in the treatment of human anthrax including penicillin, chloramphenicol, tetracycline, erythromycin, and streptomycin.

antibiotic resistance. The ability of a bacterium to synthesize a protein that neutralizes an antibiotic. The gene for antibiotic resistance may be carried on a plasmid.

antibody(ies). Any of various proteins in the blood that are generated in reaction to foreign proteins, microorganisms, or polysaccharides and neutralize them or produce immunity. Imported for biological use or pharmaceutical use. Covered under ***Blood and Related By-Products***.

anticoagulant. Substance that inhibits the clotting of blood.

antigen. A substance, usually a protein or carbohydrate, capable of stimulating an immune response.

antiserum(a). Human or animal serum containing antibodies against at least one antigen. Imported for biological use. Covered under ***Blood and Related By-Products***.

antivenom. An antitoxin derived from antibodies created in a horse's blood to neutralize snake venom in a snake bite victim.

antlers. The solid deciduous bone of an animal of the deer family. Antlers are shed annually. Covered under ***Bones and Related By-Products***.

APHIS-defined EU CSF Region. The European Union Member States of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Poland, Portugal, Republic of Ireland, Spain, Sweden, and the United Kingdom (England, Scotland, Wales, the Isle of Man, and Northern Ireland). The APHIS-defined EU CSF region is a single region of low risk for CSF.

approved defrost facility. An establishment where FSIS inspects defrosted samples of frozen, cooked beef from South America.

approved dye. Proprietary substance or food compound used to decharacterize meat. The substance or compound **must** be accepted and used according to FSIS regulations.

approved establishment. A business which has received prior approval from VS for further processing or storage of restricted import meat and animal products.

aquaculture feed. Food for fish, alligators, crocodiles, crustaceans, turtles, and shellfish which, in addition to plant material, may contain high levels of rendered animal protein ingredients.

ascitic fluid. Fluid formed in the abdomen and which may contain monoclonal antibodies (usually from mice or rats).

ASF. See African swine fever.

Asian medicinal products (animal). Animal products used in Asian medical practice for the treatment of human illnesses. Products include horn, bone, skin, glands, muscle tissue, and extracts. Usually found in a fresh or minimally processed condition. Frequently manifested as medicine, medicinals, or medicinal herbs.

Avian (Aves). Pertaining to birds. Regulate as poultry under *Meat and Meat Products*.

backfat. The subcutaneous fat on the back of hog carcasses. Regulate as under *Foreign Origin Meat and Meat Products, Swine*.

bacon. A side of a pig that has gone through a curing process. When the bacon is processed in a container, treat as perishable. When the bacon is a hanging side or slab, treat as fresh products (chilled, or frozen). Covered under *Foreign Origin Meat and Meat Products, Swine*.

bacterin. A vaccine made from either entire bacteria or bacterial components, such as a protein. When the bacterin is injected into an animal, the animal produces an immune response which provides protection against the disease causing bacteria.

bacterium (bacteria). Unicellular round, spiral, or rod-shaped single-celled microorganisms that are often aggregated into colonies.

balut egg. A fertilized duck egg (rarely chicken) which is artificially incubated for about 14-18 days for embryos to develop. After incubation, the egg is usually boiled and packed in salt. Most baluts originate in the Philippines. **NOTE:** Some importations of baluts have **not** been cooked after incubation and contain live embryos.

beef. The flesh of a slaughtered bovine. Covered under *Meat and Meat Products*.

beef bone stock. The broth from boiled bovine used as a base in preparing soups, gravies, or sauces. Covered under *Foreign Origin Meat and Meat Products, Ruminants*.

beef extract. A concentrated preparation of the essential protein constituents of ruminant meat. Covered under *Foreign Origin Meat and Meat Products, Ruminants*.

beef jerky. Cured and fully dried meat of a ruminant. Has a tough, chewy consistency and may be smoked, unsmoked, air or oven-dried. Covered under *Foreign Origin Meat and Meat Products, Ruminants*. If for a pet chew, covered under *Pet Food, and Livestock, Poultry, and Aquaculture Feed*.

bile. A yellow or greenish secretion of the liver. Also known as gall. Covered under [Organs](#).

biltong. Meat (usually beef, venison, or ostrich) that is cut into long slices or strips and dried in the sun. No smoke or artificial heat is applied. Keeps several months, but becomes brittle with age. Covered under [Meat and Meat Products](#).

bird. All members of the class Avian (including eggs for hatching) other than poultry or game birds. See also [poultry](#), [game bird](#), [migratory](#), and [game bird, nonmigratory](#) definitions.

bird's nest, edible. The dried, glutinous secretion of the salivary glands of southern Asian swifts; used in making soup. Covered under [Miscellaneous Products](#).

bird's nest, inedible. The place in which a bird lays eggs and raises its young. May be made of mud, animal hair, grasses and straw. Covered under [Miscellaneous Products](#).

bladder. A membranous sac in animals that receives a secretion (like urine) or contains gas. May be used for casings.

blood. The fluid circulated by the heart through the vertebrate vascular system, carrying oxygen and nutrients throughout the body and waste materials to excretory channels.

blood albumin. A sample class of protein device from blood. Imported for biological use. Covered under [Blood and Related By-Products](#).

blood fraction. Component separated from whole blood. Examples: fibrin, plasma, plasminogen, platelets, prothrombin, red blood cells, and white blood cells.

blood meal. The ground, dry blood of animals characterized by a high protein content and used for feeding livestock and as a nitrogenous fertilizer. Covered as rendered products under [Animal Waste and Related By-Products](#).

blood plasma. The liquid part of blood often used in transfusions in place of whole blood.

blood pudding or blood sausage. Sausage containing a large portion of blood and very dark colored. Covered under the [Meat and Meat Products](#).

blood serum. Blood from which the fibrin and suspended material (like cells) have been removed.

blue chrome. A partially tanned animal skin (hide), which has been sulfided and limed, picketed with salt and acid, and chromed. Chrome imparts a blue-green color to hides; hides are in a blue state. Chroming is the first step of the final phase of tanning; only softening and finishing remain. Regulate as chrome-tanned hides under *Hides and Related By-Products*.

bologna. A precooked and high-seasoned sausage made of finely-cured pork and beef in artificial or natural casings. Italian bologna sausage is *mortadella*. Regulate under *Meat and Meat Products*.

bone. The hard part of the skeleton of a vertebrate. When the intended use for a trophy, the bones are covered under *Trophies*. When the intended use is other than a trophy, bones are covered under *Bones and Related By-Products*; or if for a pet chew or pet toy, bones are covered under *Pet Food, and Livestock, Poultry, and Aquaculture Feed*.

bone ash. The powdery residue of burnt bones.

bone black. A black substance made from crushed, defatted, carbonized bones; used as a pigment and decolorizing agent. Regulate as *Bones and Related By-Products*.

bone char. See *char*.

bone glue. See *animal glue*.

bone grist. Ground bone. Regulate as *Bones and Related By-Products*.

bone greaves. See *greaves*.

bone marrow. The tissue that occupies the cavities of most bones. Bone marrow consists of maturing blood cells and fat cells, supporting connective tissue and blood vessels. Covered under *Organs*.

bone marrow extract. Crushed or ground animal bones used for feed and fertilizer. Covered as rendered products under *Animal Waste and Related By-Products*.

bone meal, degelatinized. Derived from the manufacture of glue or gelatin. Covered under *Bones and Related By-Products*.

bouillon cube. A small cube of evaporated seasoned meat, poultry, or vegetable stock. Covered under *Meat and Meat Products*.

bovine. An animal of *Bos* or of a closely related genus of the family Bovidae (cattle); a ruminant.

bovine fascia or facia. A sheet of tissue covering the muscles. Imported for biological use. Covered under [Animal Tissue](#).

bovine growth hormone. See [bovine somatotropin \(bovine growth hormone, bST\)](#) definition.

bovine placental extract. A growth factor found in the placenta of mammals. This factor can stimulate cellular division of blood vessels and increase the permeability of some cell layers found in blood vessels and the lymphatics. Regulate as proteins under [Miscellaneous Products](#).

bovine somatotropin (bovine growth hormone, bST). A growth hormone found in cattle. The hormone can be produced by genetically engineered microbes. If the hormone is derived from cattle, then covered under [Organs](#). However, if the hormone was produced by microbes, then covered under [Miscellaneous Products](#).

bovine spongiform encephalopathy (BSE). Abbreviation for bovine spongiform encephalopathy; a neurological disease affecting ruminants.

braunschweiger. A smoked pork liver sausage (liverwurst) enriched with eggs and milk. See also [Liverwurst](#). Regulate under [Foreign Origin Meat and Meat Products, Swine](#).

bresaola. A cured and dried beef product from Italy with a more delicate texture, but stronger flavor than that of prosciutto. Bresaola is obtained from salted, spiced, and air-dried, lean meat (usually beef, but may be horse meat) and contains almost no fat. A Swiss version is called bundnerfleisch.

bristles. Stiff, coarse hairs as found on the back of swine. Regulate as bristles under [Hides and Related By-Products](#).

brush-tail opossum. A marsupial of Australia belonging to the genus *Trichosurus*. Brush-tail opossums are susceptible to bovine tuberculosis.

bST. See [bovine somatotropin \(bovine growth hormone, bST\)](#).

bully stick. See [Pizzle](#).

bundnerfleisch. See [bresaola](#).

bung or bung cap. The cecum, a blind pouch forming the beginning of the large intestine of slaughtered animals. When the intended use is for sausage casing, then bungs or bung caps are covered under **Casings**. When the intended use is for manufacturing prophylactics, then the bung caps are covered under **Organs**, **not** casings.

burro. A small donkey. Covered by the term equine or horse.

butter. A dairy product whereby milk is first separated into cream and skim milk; the cream is then pasteurized, cooled and churned to form a solid mass (butter). Butter is formed by the milkfat and the liquid (buttermilk) is then drained away and used for other purposes. Regulate as **Milk and Milk Products**.

buttermilk, fresh, chilled, frozen. The sour liquid that remains after the butterfat has been removed from whole milk or cream by churning. A cultured sour milk made by adding certain micro-organisms to sweet milk. Can also be in a dried state. Regulate as **Milk and Milk Products**.

butter oil. A product derived from butter scraps or butter or cream **not** meeting the requirements of US Grade A or AA. Butter oil is also known as anhydrous milk fat.

cajeta. A thick, dark syrup or paste made from caramelized sugar and milk (goat's or cow's milk) that is used primarily as a dessert or topping for ice cream or fruit in Mexico and some South American countries. Although milk is an ingredient, the product is classified as a confectionery and is **unrestricted**.

candy. A food made of sugar paste or syrup often enriched and with varied and enriched flavorings that may contain milk products. Candy is unrestricted.

cap. The cecum of sheep casings which are washed, salted, and dried. Covered under **Casings**.

cape, bird. The short feathers covering the shoulders of a fowl below the neck feathers. The feathers are usually attached to skin. When the intended use is a trophy, the cape is covered under **Trophies**. When the intended use is **other than** a trophy, such as tying fishing flies, the capes are covered under **Hides and Related By-Products**.

cape, mammal. The pelt from the head, neck, and forepart of the shoulders of an animal, especially for mounting as a trophy. Covered under **Trophies**.

caprine. Of or pertaining to goats; a ruminant.

carcass. The dead body of an animal, especially one slaughtered for food or for rendering.

cartilage. Tough, white fibrous connective tissue attached to the articular surfaces of bones. Also known as gristle. Covered under [Bones and Related By-Products](#).

cascaron(es). Confetti-filled egg shells. Regulate as empty egg shells under [Eggs and Egg Products from Poultry, Game Birds, or Other Birds](#).

casein. The predominant protein in cow's milk. This protein can be separated from milk by either treating with an acid-like hydrochloric acid (acid casein) or using the enzyme rennet (rennet casein) to produce an insoluble curd. Covered under [Milk and Milk Products](#).

caseinate. A compound of casein with a metal. Covered under [Milk and Milk Products](#).

casings. A membranous case for processed meat. May be of animal or artificial origin. Examples of animal structures used for casings are the bladder, bung, bung caps, ceca, intestine, stomach, rectum, and weasand.

cattle fever (bovine piroplasmiasis). A disease of red blood cells caused by the protozoan parasite, *Babesia bigemina*. Ticks are the principal agents in the spread of cattle fever.

cecum. Blind pouch forming the beginning of the large intestine. Also called bung. Covered under [Casings](#).

cells, cell culture, or cell line. A structured unit of an organism cultivated in a media that is conducive to growth. The media may contain fetal bovine serum or another derivative from animals. Imported for biological use. Covered under [Organisms and Vectors](#).

certificate. Official foreign documents which attest that handling and processing conditions have been met. Certificates are required under 9CFR Parts 92, 94, 95, 96, and 156. These documents **must** be issued by the national government of the country of origin, and they **must** be signed by an official of that government. Refer to [Appendix G](#) for examples of acceptable foreign certificates for casings, meat and meat products, by-products, and hams. Whenever the term is used in the manual, "certificate" refers to an **official** government document endorsed by a full-time, salaried veterinarian of the agency of the exporting country.

certificate of origin. For meat and meat products, the country where the originating animal was both raised and slaughtered. For animal by-products, the country in which such products were taken from an animal or animals. For other materials, the country in which such materials were produced. You **must** determine the country of origin in order to further determine the entry requirements of meat and meat products, animal by-products, or related material. Whenever the term is used in the manual, “certificate of origin” refers to an **official** government document endorsed by a full-time, salaried veterinarian of the agency of the exporting country.

certificate of processing. One endorsed by a full-time, salaried government veterinarian of the exporting country confirming the required processing for the product. Differs from a certificate of origin in that a certificate of processing is proof of a process to render the product free of exotic animal disease agents.

certification. A statement of fact which **must** appear on an official government certificate and which **must** be endorsed by a full-time salaried veterinarian employed by the region of export. Contrast with declaration.

cervelat. A family of sausages that combines chopped pork and/or beef with various mixtures of herbs, spices, and other flavorings. Cervelats are preserved by curing, drying, and smoking, and can range from semi-dry to moist and soft. Both thuringer and mortadella are cervelats. Regulate under ***Meat and Meat Products***.

cervidae (cervids). The family of even-toed, hooved animals most of which are characterized by antlers that are shed and include deer, elk (wapiti), moose, muntjaks, reindeer, sika, and takin.

char. A black substance made from crushed, defatted, carbonized bones, used as a pigment and decolorizing agent. Covered under ***Bones and Related By-Products***.

cheese. A solid food prepared from the pressed curd of milk, often seasoned and aged. Covered under ***Milk and Milk Products***.

chew(s). An object or toy made from various animal parts for pets to gnaw on. Chews may be made from such parts as bones, ears, hoofs, ligaments, meat, organs, pizzles, skin, snouts, or rawhide. They may come from any animal including equine, poultry, ruminants or swine. Covered under ***Pet Food, and Livestock, Poultry, and Aquaculture Feed***.

chemically synthesized proteins/peptides. Compounds which have been manufactured or built artificially. The final product is identical to or closely resembles the natural product. Synthesis is usually done in the laboratory using sophisticated equipment and reagents.

chicharrones. Spanish word for pork rind. See [pork rind](#).

chilorio. Meat filling, usually made with pork but sometimes beef, that is boiled, shredded, and then fried with ground chilies and other spices.

chitterlings. Also known as chitlins or chitlings. Intestines of animals cooked and prepared for human consumption.

chlorinated lime. Bleaching powder used as a disinfectant.

cholesterol. A steroid alcohol present in animal cells and body fluids. Regulate for pharmaceutical use under [Organs](#).

chondroitin sulfate. A sulfated glycosaminoglycan (complex sugar) that is a major constituent in various connective tissues, especially in the ground substance of blood vessels, bone, and cartilage. Covered under [Bones and Related By-Products](#).

chorizo. A highly seasoned, coarsely ground, pork sausage flavored with garlic, chili powder, and other spices. Chorizo from Mexico is usually made with fresh pork, but can also be made of young goat, javelina, venison, beef, or whatever is available. Spanish chorizo is made with smoked pork. Regulate under [Meat and Meat Products](#).

chrome leather. Chrome-tanned leather used largely in the manufacture of shoe uppers.

chrome tan. To tan an animal skin by impregnating with chromium salts.

CITES. Abbreviation for The Convention on International Trade in Endangered Species of Wild Fauna and Flora. CITES establishes a world-wide system of controls on international trade in specified threatened animals and plants, as well as products derived from them, and ensures that the international trade in wildlife does not threaten the survival of the species being traded.

classical swine fever (CSF). A highly contagious viral disease that affects **only swine. The disease causes a high fever and kills the animal 5-19 days after exposure. Also known as hog cholera (HC).**

classical swine fever with special requirements (CSF/SR). A disease status category of a given country which is free of classical swine fever (CSF) with special requirements to apply. Even though a country is known to be free from CSF, the country is known to supplement their pork supplies by importing swine meat from affected countries, import live swine from affected countries under conditions less restrictive than would be acceptable for importation into the United States, or have a common land border with an affected country. This disease status category **only applies to meat, meat products, and edible meat by-products.**

clotted cream. Cream that is allowed to rise on milk, is set by heating (steamed) and then cooling, and skimmed from the underlying skim milk. Also called Devon or Devonshire cream. Covered under ***Milk and Milk Products***.

coating. A layer of a substance spread over a surface for protection, flavoring, or decoration. For example, rawhide imported as pet food may be coated with a red or brown colored glaze or icing.

collagen. A structural protein found in bones, cartilage, connective tissue, and skin; covered under ***Animal Waste and Related By-Products***. Casings can be manufactured from collagen and are covered under ***Casings***. Collagen as an ingredient in cosmetics is covered under ***Miscellaneous Products***.

collagen casings. A membranous case for sausages manufactured from collagen usually derived from split beef hides.

colostrum. The yellow, milky fluid secreted by the mammary gland a few days before and after giving birth. Colostrum is rich in maternal antibodies and provides the newborn with passive immunity against diseases for the few weeks of life. May also be listed as beestings, beastings, or biestings. Covered under ***Milk and Milk Products***.

commercial restricted imports. Those animal products or by-products entering the United States which will ultimately enter trade channels. For example, wet salted hides and skins, bones for industrial purposes, glands for use in the pharmaceutical industry.

commercially accepted manner. A method used by the trade to apply heat. When the heat is applied, the temperature and time curve are such that a long time is taken to reach 156° F.

concentrated milk. The liquid food obtained by partial removal of water from milk. The milkfat and total milk solids contents of the food are **not** less than 7.5 and 25.5 percent, respectively. Concentrated milk is

pasteurized, but **not** processed by heat so as to prevent spoilage; and may be homogenized. Evaporated milk and condensed milk are two types of concentrated milk.

condensed milk. Product made by evaporating part of the water from milk and adding sugar. Covered under [Milk and Milk Products](#).

conditioned media(um). A nutrient material that has already been partially used by cells, but is enriched with material derived from cells (like growth factors). Contact PPQ, VRS for directions on how to regulate.

confectionery. A sweet preparation (such as candy) that may be made from milk or milk products or have dairy products as an ingredient. Examples include burfi, cajeta, gulabjamun, kalakand, khoya, lacto king, milk candy, pastillas de leche, and polvoron. Covered under [Milk and Milk Products](#).

connective tissue. Tissue-forming ligaments, tendons, and aponeuroses. Regulate as glue stock under [Animal Waste and Related By-Products](#).

contaminated aircraft. One with animal contamination such as blood, manure, hay, and straw which may carry animal diseases. Covered under [Miscellaneous Products](#).

cooked (chilled or frozen). A condition that results from the heat process applied to meat and meat products. The fresh, boneless meat is cooked **without** curing agents, except salt, for a sufficient period and at temperatures so that when inspected, the meat or meat product appears to be thoroughly cooked throughout. Then the meat or meat product is kept chilled or frozen during shipment.

cooked, perishable. A condition that applies high temperature to containerized pork and pork products. The process used is as follows: (1) Pack the pork in containers. (2) Completely seal the containers against the escape or entry of air (hermetically sealed). (3) Cook the pork using a commercially accepted method. The internal (center of pork) temperature **must** reach a minimum of 156° F. This condition is hot enough to kill viruses, but **not** hot enough to render the pork or pork product fully sterilized. The pork or pork product requires refrigeration.

cooked, shelf stable. A condition that applies a high temperature to meat and meat products which render the products shelf stable. The process used as follows: (1) Pack the meat in containers. (2) Seal the containers completely against the escape or entry of air (hermetically

sealed). (3) Cook the meat. The temperature **must** be high enough to produce a fully sterile product (one that is free from bacteria or other microorganisms). See [shelf stability](#).

cosmetic. A preparation that is applied to the body for beautifying, preserving, or altering the appearance. May also be used to cleanse, color, condition, or protect the skin, hair, nails, lips, eyes, or teeth. If the cosmetic is an animal product ingredient to be used in cosmetics, then covered under [Miscellaneous Products](#). Cosmetics which contain animal products, but are in finished form, ready for sale are unrestricted.

cottage cheese. A soft, white cheese made of strained and seasoned curds of whole or skim milk, to which cream and salt are added. Covered under [Milk and Milk Products](#).

cotto. See [salami](#).

country of origin. For meat and meat products, the country where the originating animal was both raised and slaughtered. For animal by-products, the country in which such products were taken from an animal or animals. For other materials, the country in which such materials were produced. You **must** determine the country of origin in order to further determine the entry requirements of meat and meat products, animal by-products, or related material.

crème fraîche. A cultured, thickened cream that has a slightly tangy, nutty flavor and velvety texture. Covered under [Milk Products or Mixtures that Contain Milk Products](#).

cresylic compounds. Of or relating to cresol or creosote made synthetically or from coal tar or petroleum. Used as an approved disinfectant against END.

crop. A sac dilatation of the gullet of birds and poultry. When the intended use is for consumption, crop is covered under [Foreign Origin Meat and Meat Products, Poultry](#). When the intended use is **other than** for consumption, crop is covered under [Organs](#).

cryo-vac (kyro-vac). A type of container used to package meat. The process uses freezing and vacuum packing. Cryo-vac containers are acceptable **only** for commercial importations where certification would accompany them.

CSF. See [classical swine fever \(CSF\)](#).

CSF/SR. See [classical swine fever with special requirements \(CSF/SR\)](#).

cubed hay. Grass or other plants (like alfalfa) that have been chopped, heat dried, and formed into the general shape of a cube.

culatello. A lean, rosy-red, raw Italian ham that has been cured and soaked in wine during aging.

culture. Microorganisms or living tissue cells cultivated in a media which may contain fetal bovine serum or another derivative from animals. Imported for biological use. Covered under ***Organisms and Vectors***.

cultured cream. See ***crème fraîche***.

culture media. See ***media(um)***.

cultured milk product. The result of culturing milk with specific microorganisms (bacteria or yeast) so as to induce specific changes in flavor, and physical and chemical qualities. The most noticeable change is the increase in titratable acidity and reduction in pH. The lowering of pH destroys viruses and causes denaturation or coagulation of the milk protein which results in the great increase in viscosity. Cultured milk products include acidophilus milk, buttermilk, crème fraîche, cultured cream, dahi, katyk, kefir, kumuss, lactic acid, laban, leben, madzoon, mast, matzoon, cultured milk-based soft drinks (such as CALPIS®), naja, qurut, raib, ripened cream butter, rob, roba, smetana, sour cream, sour cream dip, taho, tiaourti, yaourt, yogurt, zabady, and zabade.

curd cheese. The coagulated part of milk, used to make cheese. Covered under ***Milk and Milk Products***.

cured and dried. A condition used to describe a combination of processes applied to meat and meat products rendering the products shelf stable. Cured and dried combines the processes of drying, pH, heat, and exposure. For meat to be cured and dried, the meat **must** meet a certain degree of processing depending on the animal class from which the meat was derived and the country of origin. Compare with ***shelf stability***.

cytokine. A soluble molecule that a cell produces to control reactions between other cells. For example, interleukins are cytokines. If the molecule was produced by microbes, then covered under ***Miscellaneous Products***.

dairy products. Those products derived from milk. Covered under ***Milk and Milk Products***.

decharacterize. A process using charcoal or dyes which makes meat unfit for human consumption.

declaration. A formal, written statement specifying the facts as they relate to an importation. The declaration may appear on any document, including a certificate, that accompanies the importation. Contrast with **certification**.

degelatinized bone meal. Derived from the manufacture of glue or gelatin. Covered under **Bones and Related By-Products**.

devonshire cream (Devon). See **clotted cream**.

diagnostic samples. Specimens of various animal parts or body fluids imported for biological use. Covered under organisms and vectors, **Live Animals and Related Material**.

deoxyribonucleic acid (DNA). A chemical inside cells that carries and passes information from one generation to the next. Regulated because DNA may be from livestock or poultry and could harbor livestock or poultry disease agents (such as viruses) that are exotic to the U.S. or may be in media that could have been derived from livestock or poultry. Covered under **Live Animals and Related Material**.

dietary supplements. Products (taken by mouth) that contain a dietary ingredient intended to supplement the diet, and come in many forms e.g., gel caps, liquids, powders, and tablets. Dietary ingredients may include amino acids, herbs, minerals, vitamins, and substances such as enzymes and organ tissues.

diseases of concern. A phrase used to represent the foreign animal diseases listed in the regulations that PPQ is involved in controlling. The diseases of concern related to ruminants are BSE and FMD. The diseases of concern related to swine are ASF, CSF, FMD, and SVD. The disease of concern related to poultry is END.

disinfectant. An agent that cleanses by destroying, neutralizing, or inhibiting the growth of harmful microorganisms.

DNA. See **deoxyribonucleic acid (DNA)**.

doogh. A spiced, watered, and carbonated beverage made from reconstituting yogurt that has been concentrated to dryness. Covered under **Milk and Milk Products**.

dragon blood. A dark-red, resinous substance derived from certain plants and used for coloring in various industries. Dragon blood is **not** regulated.

dressed. To prepare an animal for market: slaughter, eviscerate, remove feet and head, and clean.

drug. See *pharmaceutical*.

dry blood. Blood meal from animals. Regulate as a rendered product under *Blood and Related By-Products*.

duff or fruit duff. A pudding made of flour and possibly suet, and boiled in a bag.

dunglocks. Clumps of dung (manure) in the wool or hair of animals. Covered under *Animal Waste and Related By-Products*.

earthworm. A cylindrically-shaped worm with a segmented body that burrows into and helps aerate and enrich the soil. Earthworms belong to the family Lumbricidae of the annelid phylum. Earthworms are regulated because viruses, like that which cause foot and mouth disease (FMD), may be transported in or on earthworms. To regulate, see *Earthworms* under *Live Animals and Related Material*.

edible offal. See *meat by-product*.

egg. The oval, thin-shelled ovum of a bird. When the intended use is consumption or breaking and pasteurization, the eggs are covered under *Eggs and Egg Products from Poultry, Game Birds, or Other Birds*. When the intended use is for hatching, the eggs are covered under *Live Animals and Related Material*.

egg products. Eggs that are removed from their shells for processing. The processing of egg products includes breaking eggs, filtering, mixing, stabilizing, blending, pasteurizing, cooling, freezing or drying, and packaging. Egg products include whole eggs, whites, yolks, and various blends with or **without** non-egg ingredients that are processed and pasteurized; and may be available in liquid, frozen, and dried forms.

embryo (live). The fertilized egg of a vertebrate animal. Covered under eggs for hatching, *Live Animals and Related Material*.

emu. A swift-running Australian ratite bird with undeveloped wings that is related to, but smaller than the ostrich.

END. See *exotic Newcastle disease (END)*.

END/SR. See *exotic Newcastle disease with special requirements (END/SR)*.

enzyme. An organic catalyst produced within body cells of plants and animals, and has the ability to accelerate organic reactions. Imported for pharmaceutical use. Covered under *Organs*.

equine. A member of the family Equidae, which includes horses, asses, and zebras.

erinaceus. See *hedgehog*.

erythropoietin. Mammalian hormone involved in the regulation of erythrocyte differentiation and the maintenance of a physiological level of erythrocytes in the bloodstream.

esophagus. A hollow, muscular tube that connects the mouth to the stomach. When the intended use is for consumption, the esophagus is covered under *Meat and Meat Products* or *Casings* (weasands). When the intended use is for **other than** consumption, the esophagus falls under *Organs*.

evaporated milk. Pasteurized, unsweetened milk from which half the water has been removed through evaporation by heat and before being hermetically sealed in a can so as to be shelf stable **without** refrigeration. Covered under *Milk and Milk Products*.

eviscerated. Internal parts and organs removed. In birds, this would include the crop.

excretion. Animal material discharged as waste from the blood, tissue, or organs.

exotic Newcastle disease (END). A rapidly spreading viral disease of poultry and one of the most infectious diseases of poultry in the world.

exotic Newcastle disease with special requirements (END/SR). A disease status category of a given country which is free of exotic newcastle disease (END) with special requirements to apply. Even though a country is known to be free from END, the country is known to supplement their national meat supply by importing poultry meat from affected countries, import live poultry from affected countries under conditions less restrictive than would be acceptable for importation into the United States, or have a common land border with an affected country. This disease status category **only applies to meat, meat products, and edible meat by-products**.

exotic. From or introduced from another country; **not** native.

eyran. A beverage made from reconstituting yogurt that has been concentrated to dryness. Covered under *Milk and Milk Products*.

fat. Any of various soft solid or semisolid organic compounds comprising the glyceride esters of fatty acids and associated phosphatides, sterols, alcohols, hydrocarbons, ketones, and related compounds. When the intended use is for industrial use

(manufacturing) or for fertilizer, regulate the fat as a rendered product under **Organs**. Otherwise, regulate the fat as meat under **Meat and Meat Products**.

fatback. Salt pork from the back of a hog carcass. Regulate as under **Foreign Origin Meat and Meat Products, Swine**.

feather. Light, horny structures forming the plumage of birds, consisting of numerous slender, closely arranged, parallel barbs forming a vane on either side of a tapering hollow shaft. When the intended use is trophies, the feathers are covered under **Trophies**. When the intended use is for making fishing tackle or jewelry, the feathers are covered under **Hides and Related By-Products**.

feather meal. Rendered feathers from poultry packing plants. Used as a feed additive. Regulate as a rendered product under **Animal Waste and Related By-Products**.

feces. Waste matter discharged from the intestines. See **manure**.

feed. Food for livestock, poultry, or aquaculture which is usually a combination of plant and animal by-products (bone meal, meat meal, dried milk etc.), that has been through a simple process of preparation (drying, pelleting, grinding), ensiling or compounding.

feta cheese. A soft, white, crumbly, and rindless cheese traditionally made of sheep's or goat's milk, but now commercially produced from cow's milk. Feta cheese is cured and stored in its own salty whey brine (thus sometimes called pickled cheese). The texture of the cheese ranges from soft to semi-dry.

finished veterinary biological product. One that is bottled, sealed, packaged, and labeled as required by regulation; and is ready to be administered.

fish. Cold-blooded, aquatic vertebrates that have limbs in the form of fins and gills to oxygenate the blood. Unrestricted if imported for human consumption.

fish feed. See **aquaculture feed**.

fixed. A process that prevents tissue degradation. Most common fixative is formalin.

flint dried. Hides cured by exposure to the sun until they are stiff and inflexible. The term flint dried describes hides and skins. When bent to a 90° angle, the hide or skin will crack and break. Also called hard dried or air dried.

fish emulsion. By-product of rendering fish, whereby fish solubles are further boiled down to produce a product sold for animal food flavorings and fertilizer. Regulate under *Animal Waste and Related By-Products*.

fish hydrolysate. By-product of rendering whereby fish remains are converted by natural enzymes from a solid to a liquid form. Regulate under *Animal Waste and Related By-Products*.

FMD. See *foot-and-mouth disease (FMD)*

FMD/SR. See *foot-and-mouth disease with special requirements (FMD/SR)*

folk medicine. Traditional medicine as practiced non-professionally by people isolated from modern medical services. Remedies relied on compounds derived primarily from plants.

formalin. Mixture of 37-40 percent water, and usually 10 percent formaldehyde. Used as a tissue fixative.

fomite. An inanimate object or substance that is capable of transmitting infectious organisms to an animal. For example, footwear, container, or straw.

foot-and-mouth disease (FMD). A contagious, viral infection that affects ruminants and swine. Symptoms of the disease are blisters in the mouth and on the feet.

foot-and-mouth disease with special requirements (FMD/SR). A disease status category of a given country which is free of foot-and-mouth disease (FMD) with special requirements to apply. Even though a country is known to be free from FMD, the country is known to supplement their meat supplies by importing ruminant or swine meat from affected countries, import live ruminants or swine from affected countries under conditions less restrictive than would be acceptable for importation into the United States, or have a common land border with an affected country. This disease status category **only applies to meat, meat products, and edible meat by-products**.

fowl. A bird of any kind. Covered under *Foreign Origin Meat and Meat Products, Poultry*.

frankfurter. A smoked sausage of beef and pork made in links. Covered under *Meat and Meat Products*. Regulate as a fresh meat product. When heated and served in a roll, called a hot dog.

fresh chilled. A condition used to describe a cold temperature process applied to fresh meat and meat products. The meat is **not** considered canned, cooked, or cured and dried.

fresh frozen. A condition used to describe a freezing temperature process applied to fresh meat and meat products. The meat is **not** considered canned, cooked, or cured and dried.

fully dried. When referring to meat thoroughly cured and fully dried, fully dried means dried to the extent that the water-to-protein ratio in the wettest portion of the product **does not** exceed 2.25 to 1.

galactose. A breakdown product of lactose that has a structure similar to glucose. Regulate as **Dry Milk Products**.

gall. A yellow or greenish secretion of the liver. Also known as bile. Bile is stored in the gall bladder of most mammals. Covered under **Organs**.

gall stone. An abnormal, hard mass of mineral and salts formed in the gallbladder or biliary passages.

game bird, migratory. Wild, free-flying birds (as opposed to commercial, domestic, or pen-raised birds) characterized by seasonal flight to and from the United States. Migratory game birds include the Anatidae or waterfowl (brant, wild ducks, geese, swans); *Guidae* or cranes (little brown crane, sandhill crane, whooping cranes); *Rallidae* or rails (coots, gallinules, sora, other rails); *Limicolae* or shorebirds (avocets, curlew, dowitchers, godwits, knots, oyster catchers, phalaropes, plovers, sandpipers, snipe, stilts, surf birds, turnstones, willet, woodcock, yellowlegs); *Columbidae* or pigeons (doves, wild pigeons). Compare with **game bird, migratory**.

game bird, nonmigratory. Birds **not** characterized by seasonal flight to and from the United States, but are free-flying and wild (as opposed to commercial, domestic, or pen-raised birds). Examples of nonmigratory game birds include quail, pheasant, and grouse. Compare with **game bird, migratory**.

gelatin. A colorless or slightly yellow, transparent, crystalline protein formed by either acid or alkaline extraction of fresh livestock skins, slaughterhouse bones, waste skins from tanneries, or marine organisms (fish). Gelatin may be classified as either edible or inedible. Edible gelatin is used in foods, drugs, and photographic film. Gelatin which **does not** meet the requirements for edible gelatin is referred to as non-edible, inedible, or technical gelatin. Regulate as gelatin, covered under **Bones and Related By-Products**. See also **gelatin**.

genoa. See **salami**.

genus. A taxonomic category of related organisms ranking below a family and above a species. The scientific name (binomial) of an organism consists of the generic name (genus) written with a capital letter and the specific name (species) written with a small letter.

ghee. A semi-liquid form of butter which has the milk solids and water removed by heating and straining. Ghee is 100 percent fat. Covered under [Milk and Milk Products](#).

giblets. The edible heart, liver, or gizzard of fowl. Covered under [Foreign Origin Meat and Meat Products, Poultry](#).

gizzard. The muscular enlargement of the digestive system of poultry that immediately follows the crop.

glands. Organs that secrete specific substances such as hormones, saliva, and sweat. Examples are pituitary, pancreas, ovaries, testes, thymus, liver, spleen, parathyroid, and mammarys. When the intended use is for consumption, glands are covered under [Meat and Meat Products](#). When the intended use is for **other than** consumption, glands are covered under [Organs](#).

glue stock. Fleshings, hide cuttings and parings, tendons, or other collagenous parts of animal carcasses. Regulate as [Animal Waste and Related By-Products](#).

goat antisera. Serum containing antibodies. Imported for biological use. Covered under [Blood and Related By-Products](#).

greater hedgehog tenrec (*Setifer setosus*). See [tenrec](#).

greaves. An incompletely processed, intermediate product in rendering, after the extraction of tallow, which may be further processed into meat and bone meal. Regulate as a rendered product under [Animal Waste and Related By-Products](#). If greaves cakes are to be fed to pets, regulate as pet food under [Pet Food, and Livestock, Poultry, and Aquaculture Feed](#).

greaves meal. See [greaves](#).

green salted. Neither cured nor tanned, but treated with salt or a salt solution. A term related to hides and skins.

guano. A substance composed chiefly of the dung of birds or bats, accumulated along certain coastal areas or in caves and used as fertilizer. Covered under [Animal Waste and Related By-Products](#).

gullet. The esophagus or windpipe. Regulate as a rennet under [Organs](#).

gut string. Collagen fibers derived from intestines and used for musical instrument strings, racquet strings, and strings used in some grandfather clocks. Covered under *Animal Waste and Related By-Products*.

hackle. The neck plumage of the male domestic fowl. When the intended use is trophies, the hackles are covered under *Trophies*. When the intended use is **other than** trophies, the hackles are covered under *Hides and Related By-Products*.

haggis. A pudding especially popular in Scotland, made of the heart, liver, and lungs of a sheep or calf, minced with suet, onions, oatmeal, and seasonings and boiled in the stomach of the animal. Covered under *Foreign Origin Meat and Meat Products, Ruminants*.

hair. Growth of pigmented filaments growing from the epidermis of animals forming their coats. Covered under *Hides and Related By-Products*.

ham. The meat from the thigh of the hind leg of a hog; available either fresh or cured by smoking or drying.

hard dried. Dried until stiff and inflexible. The term hard dried describes hides and skins. When bent to a 90° angle, the hide or skin will crack and break. Also called flint dried.

hatching eggs. Eggs which are incubated in order to produce chicks.

hay and straw. Dried grasses, cloves, legumes, and similar material or stalks or stems of various grains, such as barley, oats, rice, rye, wheat, and used as food or bedding for animals. Regulate as fomites, covered under *Miscellaneous Products*.

HC (Hog cholera). See **Classical swine fever**.

headcheese. A sausage made from edible parts of the head, feet, and sometimes the tongue and heart of swine or ruminants. The meat is combined with a gelatinous meat broth and cooked in a mold. Covered under *Meat and Meat Products*.

heart. An organ. When the intended use is for consumption, hearts are covered under *Meat and Meat Products*. When the intended use is for **other than** consumption, hearts are covered under *Organs*.

hedgehog. Any of several nocturnal, Old World, insectivorous mammals that belong to the genus *Erinaceus*. The upper part of their bodies has prickles or spines mixed in the hair. Hedgehogs are able to

roll themselves up so as to present the spines outwardly in every direction. Hedgehogs are susceptible both to FMD and bovine tuberculosis. See also **Tenrec**.

heparin and heparin sodium. Substance derived from the liver and lungs that prolongs the clotting time of blood. Imported for pharmaceutical use. Covered under **Organs**.

hermetically sealed containers. Air-tight containers designed and intended to protect the contents against the entry of microorganisms during and after thermal processing.

hide. A raw or tanned pelt (skin) taken from an animal (for example, a cow or ostrich). When the intended use is trophies, the hides are covered under **Trophies**. When the intended use is **other than trophies**, the hides are covered under **Hides and Related By-Products**.

hide glue. See **Animal glue**.

hog cholera. See **Classical swine fever (CSF)**.

hoof. Covering of horn that protects the digits of ruminants, horses, and swine. When the intended use is a trophy, the hoofs are covered under **Trophies**. If for a pet chew, hoofs are covered under **Pet Food, and Livestock, Poultry, and Aquaculture Feed**. When the intended use is **other than** a trophy or chews, the hoofs are covered under **Bones and Related By-Products**.

hoof and horn meal. Ground up hoofs and horns used for feed and fertilizer. Hoof and horn meal is coarser and darker than bone meal. Covered as rendered products under **Animal Waste and Related By-Products**.

hormone. A product of living cells that circulates in body fluids and produces a specific effect on the activity of cells remote from its point of origin. Imported for pharmaceutical use. Covered under **Miscellaneous Products**.

horns. Paired processes on the heads of hoofed animals. In cattle, sheep, and some antelopes horns are composed of keratin overlying a bony core which projects from the skull. Horns are unbranched and permanent. Deer have antlers. Antlers are composed entirely of bone and are shed annually. When the intended use is for a specimen for mounting, horns are covered under **Trophies**. When the intended use is for a pet chew, the horns are covered under **Pet Food, and Livestock, Poultry, and Aquaculture Feed**. When the intended use is for **other than trophies** or pet chews, horns are covered under **Bones and Related By-Products**.

horse. A large, hooved mammal of the family Equine, having a short-haired coat, a long mane, and a long tail. Wherever horse is used in this manual, includes burros and mules.

hot dog. See *frankfurter*.

hot-pack cream cheese or hot pack sour cream. A shelf-stable form of cream cheese or sour cream in which the hot molten product (158° to 185° F) is sheared by batch or continuous cooking.

hundred-year eggs. Eggs that are uncooked, but have been preserved by being covered with a coating of lime, ashes, and salt before being shallowly buried for 100 days. Over time, the egg petrifies, and looks like the egg has been buried for at least a century. The black outer coating and shell are removed to reveal a firm, amber-colored white and creamy, dark-green yolk. Also called pedan eggs, thousand-year eggs, and Ming Dynasty eggs. Eggs from ducks are generally used, though chicken and goose eggs are also preserved in this manner. Covered under *Eggs and Egg Products from Poultry, Game Birds, or Other Birds*.

hybridoma. A cell hybrid produced by the fusion of antibody-producing lymphocyte with a tumor cell, and used to produce monoclonal antibodies. Hybridoma may be cultivated in a medium which is supplemented with fetal bovine serum.

ice cream. A frozen food containing cream or butterfat, flavor, and sweetening. Covered under *Milk and Milk Products*.

ice cream mix. Formulation usually containing dry milk products. Covered under *Milk and Milk Products*.

immunogen. An antigen which produces an immune response; for example, antibody response.

import (imported, importation) into the United States. To bring into the territorial limits of the United States.

importer. A company or individual responsible for an importation including a carrier's agent, representative, broker, individual company, or consignee.

industrial use. Animal products and by-products which are to be used in manufacturing or industry.

inedible. Adulterated, **not** edible, **not** intended for use as food for humans, i.e., **not** to be eaten by people.

inedible offal. See *offal*.

inedible gelatin. See *technical gelatin*.

ingesta. Material taken into the body by way of the digestive tract. May be found in stomachs imported for rennet extraction. Covered under *Animal Waste and Related By-Products*.

interleukin. Any of a group of protein factors (cytokine) which are produced by T lymphocytes and macrophages (a type of white blood cell) in the presence of antigens or mitogens. This class of proteins cause the T lymphocytes to activate and proliferate. Interleukins are referred to as IL1, IL2, IL3, etc. If the protein was produced recombinantly by microbes, then covered under *Chemically Synthesized, Biosynthesized, and Natural Products* on page 3-15-26.

intestine. The portion of the alimentary canal extending from the stomach to the anus. When dried intestines are imported for industrial use, they are covered under *Animal Waste and Related By-Products*. When intestines are imported for animal feed or fertilizer, regulate as rendered products under *Animal Waste and Related By-Products*. When dried or fresh intestines are imported to use as casings for processed meat, they are covered under *Casings*. When intestines are consigned for human consumption (edible), they are covered under *Meat and Meat Products*. See also *gut string*.

in vitro. Outside the living body and in an artificial environment; for example, cultures of cells.

in vivo. In the living body of an animal or plant.

IQF. Abbreviation for individually quick frozen.

jerked beef. Cured and fully dried meat of ruminant. Has a tough, chewy consistency and may be smoked, unsmoked, air or oven-dried. Covered under *Foreign Origin Meat and Meat Products, Ruminants*. If for a pet chew, covered under *Pet Food, and Livestock, Poultry, and Aquaculture Feed*.

kashk, kaskg, kishk, kurut, kushuk. Middle Eastern and Southwest Asian dairy products made from concentrating yogurt to dryness. May be infused with herbs and cereal. Covered under *Milk and Milk Products*.

kidney. Bean-shaped organ that filters blood and excretes waste products in the form of urine or urea. When the intended use is for consumption, kidneys are covered under *Meat and Meat Products* as a meat by-product. When the intended use is for **other than** consumption, the kidneys are covered under *Miscellaneous Products*.

koumiss. A fermented milk product produced by the action of thermophilic lactobacilli and *Saccharomyces* on mares' milk.

kryo-vac. See ***cryo-vac (kyro-vac)***.

kugelham. Cured and fully dried ham. Covered under ***Meat and Meat Products***.

lact, lacti, or lacto. Prefix that indicates a product is or was derived from lactalbumin,

lactalbumin. An albumin found in milk. Covered under ***Milk and Milk Products***.

lactic acid. A fermentation product of lactose. Present in milk, molasses, various fruits, and wines. Used in foods and beverages as an acidifier, flavoring, and preservative. Lactic acid may also be used for adhesives, plasticizers, and pharmaceuticals. When the lactic acid is derived from milk, the lactic acid is covered under ***Milk and Milk Products***. Can be produced synthetically. If you can confirm that the lactic acid is of plant and **not** of animal origin, release.

lactoglobulin. Major whey protein in the milk of ruminants. Regulate as ***Dry Milk Products***.

lactose. Milk sugar. Covered under ***Milk and Milk Products***.

lactulose. An indigestible sugar formed during the processing of milk or by treating lactose with lime water. Regulate as ***Dry Milk Products***.

lamb. A sheep (ruminant) that is less than 1 year old; the meat of young sheep. Compare to **Mutton**. Regulate under ***Foreign Origin Meat and Meat Products, Ruminants***.

lanolin. A yellowish-white, fatty substance refined from wool grease used for soaps, ointments, and cosmetics. Lanolin is **not** regulated. See also ***wool grease***.

lard. Rendered fatty tissue from the hog. If edible, regulate under ***Foreign Origin Meat and Meat Products, Swine***. If inedible, regulate under ***Animal Waste and Related By-Products***.

leukocytes. Scavenger cells in the blood that help to combat infection. Also called white blood cells. Imported for biological use. Covered under ***Blood and Related By-Products***.

ligament. A sheet or band of tough, fibrous tissue connecting bone or cartilage at a joint or supporting an organ. If the use is for a pet chew, covered under *Pet Food, and Livestock, Poultry, and Aquaculture Feed*. Otherwise, regulate as glue stock under *Animal Waste and Related By-Products*.

lips. Fleshy folds surrounding the mouth. When the intended use is for consumption, the lips are covered under *Meat and Meat Products* as meat by-products (formerly edible offal). When the intended use is for **other than** consumption, lips are covered under *Miscellaneous Products*.

liver. A large organ that manufactures and secretes bile. When the intended use is for consumption, then liver is covered under *Meat and Meat Products*. When the intended use is for **other than** consumption, then liver as an inedible ingredient is covered under *Pet Food, and Livestock, Poultry, and Aquaculture Feed*, and liver for research is covered under *Organs*.

liver concentrate. An extract or derivative of the liver. Imported for pharmaceutical use and as a flavoring for pet foods. Covered under *Organs*.

liver extract. A concentrated preparation of the essential constituents of the liver. Imported for pharmaceutical use. Covered under *Organs*.

liver powder. Pulverized liver tissue. Imported for pharmaceutical use and as a flavoring for pet food. Covered under *Organs*.

liverwurst. A well-seasoned, ready-to-eat sausage made of at least 30 percent pork liver mixed with pork or meat. Comes in large links, loaves, or slices; smoked or plain. Also known as liver sausage. See also *braunschweiger*. Regulate under *Meat and Meat Products*.

livestock feed. See *feed*.

long-life milk. A shelf-stable form of milk that has received a heat treatment of 288° to 291° F for 3 seconds. The milk is processed and packaged and can be transported and stored **without** refrigeration. Regulate as *Canned or Packaged Shelf-Stable Milk Products, Including Mixtures*.

lungs. Spongy, sac-like respiratory organs. If for human consumption, regulate as meat by-products (formerly edible offal). If for pet food, regulate under *Pet Food, and Livestock, Poultry, and Aquaculture Feed*.

machaca. The Mexican equivalent of beef jerky. Beef that has been marinated, cooked, shredded, and dried. Regulate as **Cured and Dried Meat of Ruminants**.

madagascan hedgehog (Setifer setosus). See **tenrec**.

manifest. An inventory of all the cargo that is in a transport.

manure. Livestock or poultry excreta, with or **without** bedding material, used for fertilizer. Covered under **Animal Waste and Related By-Products**.

marine mammal. Vertebrates, such as porpoises, seals, sea lions, walruses, and whales, that live in the sea and nourish their young with milk secreted from mammary glands.

maw. Animal stomach. When the intended use is for consumption, maws are covered under **Meat and Meat Products** as meat by-products (formerly edible offal). When the intended use is **other than** for consumption, maws are covered under **Organs**.

meal. Fine-to-coarse ground product. If from animal products, regulate as a rendered product under **Animal Waste and Related By-Products**.

meal, blood. The ground, dry blood of animals characterized by a high protein content and used for feeding livestock and as a nitrogenous fertilizer. Regulate as a rendered product under **Animal Waste and Related By-Products**.

meal, bone. Crushed or ground animal bones used for feed and fertilizer. Regulate as a rendered product under **Animal Waste and Related By-Products**.

meal, hoof and horn. Ground up hoofs and horns used for feed and fertilizer. Hoof and horn meal is coarser and darker than bone meal. Regulate as a rendered product under **Animal Waste and Related By-Products**.

meals, airline. Dinners, lunches, and breakfasts served on airplanes.

mealworms (dead, freeze-dried): Mealworms are the larval form of the mealworm beetle. *Tenebrio molitor*, a species of darkling beetle. Mealworms are typically used as a food source for reptile and avian pets. They are also provided to wild birds in bird feeders, particularly during the nesting season when birds are raising their young and appreciate a ready food supply. They are commonly used for fishing bait. Regulate as a product under **Feed for Livestock, Poultry and Aquaculture**.

meat. The part of the muscle of cattle, sheep, swine, or goats which is skeletal or found in the tongue, diaphragm, heart, or esophagus, with or **without** the accompanying overlying fat, and the parts of bone, skin, sinew, nerve, and blood vessels which normally accompany the muscle tissue and are separated from the muscle tissue in the process of dressing.

meat by-product. Any part capable of use as human food, other than meat, which has been derived from one or more cattle, sheep, swine, or goats. Examples of meat by-products include beef feet, brain, cheeks, heart, hog stomach, kidney, lips, liver, lung, spleen, tails, thymus (sweetbread), tongue, and tripe.

meat extract. A concentrated preparation of the essential constituents of meat. Covered under *Meat and Meat Products*.

meat food product. Any article capable of use as human food which is made wholly or in part from any meat or other portion of the carcass unless the article fits the definition for *meat*. *The part of the muscle of cattle, sheep, swine, or goats which is skeletal or found in the tongue, diaphragm, heart, or esophagus, with or without the accompanying overlying fat, and the parts of bone, skin, sinew, nerve, and blood vessels which normally accompany the muscle tissue and are separated from the muscle tissue in the process of dressing.* or *meat by-product*. Examples of meat food products include lasagna, soup mixes, spaghetti and meatballs, and tamales.

Some articles are exempt from the *meat food product* definition based on a determination that the article contains relatively small proportions of meat or other portions of a carcass. These exemptions to the definition **only** apply to FSIS regulations and **not** APHIS regulations. Exempted articles are referred to as nonamenable by FSIS.

meat meal. The rendered and dried carcasses or parts of the carcasses of animals. Imported as a coarsely ground to finely ground substance. Regulate as a rendered product under *Animal Waste and Related By-Products*.

meat scraps. A by-product of meat packing made of bits and trimmings of meat freed from fat. When the intended use is for animal feed, regulate as a rendered product under *Animal Waste and Related By-Products*.

media(um). A solid or liquid nutrient material used to support the growth of cells, tissues, or entire organisms, such as plants, plant cells, bacteria, fungi in an artificial environment. Media usually contain sugars, salts, vitamins, and amino acids. The media may or may **not** contain components derived from animals. For example,

media for cell or tissue cultures may contain fetal bovine serum or animal derived proteins like insulin or albumin. Contact PPQ, VRS for directions on how to regulate.

mice, knockout. Laboratory mice that develop from a genetically manipulated egg or embryo that has had a selected gene disabled (knocked out). Covered under ***Live Animals and Related Material***.

mice, transgenic. Laboratory mice which are altered through the introduction of foreign DNA from another species by genetically manipulating the egg or embryo. Covered under ***Live Animals and Related Material***.

microbial coagulants. Extracts primarily from bacteria and fungi that are capable of coagulating milk. May also be called microbial rennets. Release if the importer has a statement that the coagulant (rennet) is of microbial origin. If a live culture, covered under microorganisms, ***Live Animals and Related Material***.

microbial rennets. See **Microbial coagulants**.

middles. Natural casings made from the large intestine of beef and hogs. Covered under ***Casings***.

milk, fresh (chilled, or frozen). A secretion produced by mammals to feed their young. Covered under ***Milk and Milk Products***.

milk protein concentrate (MPC). A fine, white to light cream-colored powder resulting from the ultra filtration of milk to extract milk proteins. Regulate as ***Dry Milk Products***.

milk powder. Dry, powdered milk. Covered under ***Milk and Milk Products***.

Ming Dynasty eggs. See **Hundred-year eggs**.

mixed meat. Ruminant and swine meat in combination. Covered under ***Meat and Meat Products***.

monoclonal antibodies. Antibodies which are identical in that they all: (1) Are produced from cells which originated from the same clone; and (2) Recognize the same foreign substance, such as immunogen. Covered under organisms and vectors, ***Live Animals and Related Material***.

mortadella. A category of Italian cervelat sausage made of finely ground pork and seasonings stuffed in a natural casing, usually from the bladder of a hog. Pork jowls are chopped and added in order to give mortadella a unique look and distinctive texture. See also **Cervelat**. Regulate under *Foreign Origin Meat and Meat Products, Swine*

mouse immunoglobulins. Mouse serum proteins that are made up of light chains and heavy chains usually linked by disulfide bonds. These include antibodies. Covered under *Miscellaneous Products*.

mule. A sterile hybrid of a male ass and a female horse; an equine.

musk. A perfume fixative obtained from a sac beneath the abdomen of a male musk deer. Covered under *Organs*.

musk grains or pods. Obtained from a sac of the male musk deer, and when dried, is a grainy powder. Covered under *Organs*.

mutton. A sheep (ruminant) over 2 years old; meat from sheep over 2 years old, having a stronger flavor, and less tender than lamb. Regulate under *Foreign Origin Meat and Meat Products, Ruminants*.

noil. The short fiber removed after scouring and combing wool. Noils are covered as wool under *Hides and Related By-Products*.

noncommercial restricted imports. Those animal products or by-products entering the United States that **do not** enter trade channels. For example, hides, skins, and bones imported as trophies, bird specimen material for museums or educational institutions; and small amounts of animal material imported for examination, testing, or analysis.

nonedible gelatin. See *animal glue*.

nonhuman primate. Any member of the order which includes apes, lemurs, monkeys, and tarsiers.

nucleic acid. Any of various acids that are composed of nucleotide chains. For example, ribonucleic acid (RNA) and deoxyribonucleic acid (DNA).

nutriceutical. See *dietary supplements*

offal. The parts of a butchered animal that are removed in dressing. These parts are intended for use as raw material in the manufacture of inedible by-products, and are **not** intended for use as food for humans. Examples of offal include trimmings (blood, head meat, hooves, skin, tail), and viscera (brain, heart, liver). Regulate offal as a rendered product under *Animal Waste and Related By-Products*.

Even if an inedible animal product complies with APHIS requirements, the product may still have to comply with FSIS requirements. Regulate animal parts for human consumption under ***Meat and Meat Products***.

official government of origin certificate. Certificate used to verify the description of the importation, the country of origin and statements attesting to entry requirements, and can be on a letterhead or a form. An official government of origin certificate is required to allow entry of animal products and by-products, such as: antlers, gelatin, eggs for food, intestines for manufacturing, rennets, meat and meat products, and fresh organs and glands.

oleic acid. An oily liquid derived from inedible tallow for making lubricants. Covered under ***Animal Waste and Related By-Products***.

organ (fresh). A structure consisting of tissue performing a specific function (e.g., heart, kidney). When the intended use is for consumption, organs are covered under ***Meat and Meat Products***. When the intended use is for **other than** consumption, organs are

organism. A living culture or collection of cultures or their derivatives which may introduce or disseminate any contagious or infectious disease of animals. Covered under ***Live Animals and Related Material***.

ossein. The organic constituent of bone that remains after the mineral matter has been dissolved by acid. Ossein looks like grain—small, hard kernels. Regulate as collagen under ***Animal Waste and Related By-Products***.

ostrich. A swift-footed, two-toed ratite bird of Northern Africa that has edible meat and valuable wing and tail plumes. See ***Ratite***.

ovalbumin. Albumin that occurs in egg white.

ovine. Of or relating to sheep; a sheep is ruminant.

ovum (pl. ova). The female reproductive cell or gamete of an animal. Regulate ova under ***Live Animals and Related Material***.

owl pellets. See ***pellets (from birds of prey)***.

ox. The domestic bovine (*Bos taurus*); commonly a castrated, male adult used as a draft animal or for food.

ox gall. Gall of oxen or cattle used in medicine, painting, and marbling books. Covered under ***Organs***.

oxytocin. A pituitary hormone that stimulates the contraction of uterine muscle and the ejection of milk. Imported for pharmaceutical use. Covered under *Miscellaneous Products*.

paddywack. Beef neck ligaments that are cooked and then air dried. Regulate as beef chews.

pancreas. Gland that secretes digestive enzymes and the hormone insulin. Covered under *Organs*. If to be eaten, regulate as meat by-products (formerly edible offal) under *Meat and Meat Products*.

pancreas powder. Dry, finely ground pancreas. Imported for pharmaceutical use. Covered under *Miscellaneous Products*.

pancreatic trypsin. An enzyme that metabolizes protein in the stomach. Imported for pharmaceutical use. Covered under *Miscellaneous Products*.

pancreatin. A product that is composed of various enzymes extracted from the pancreas of cattle, pigs, or sheep and used as a digestive aid. Imported for pharmaceutical use. Covered under *Miscellaneous Products*.

parasites. Various worms, arthropods, and other organisms that live on or in animals. When the parasites are live, they are imported for biological use and covered under *Organisms and Vectors*. Fixed parasites are those that are killed, hardened, and preserved for microscopic study.

parathyroid glands. Small glands embedded in or near the thyroid gland. They regulate calcium metabolism. Covered under *Organs*.

parchment, dry. Hard and stiff like paper. A crease is made when folded.

parenteral. Introduced by means **other than** the digestive system, for example, intramuscular, intravenous, and subcutaneous.

parma ham. Prosciutto (dry-cured spiced ham) from Parma, a city in Northern Italy. Covered under *Foreign Origin Meat and Meat Products, Swine*.

pâté. Meat or liver paste that may come from any animal or fish.

pâté de foie gras. Paste made from poultry livers (usually goose); p

pasteurized canned. See *cooked, perishable*.

pathogenic. Causing or capable of causing disease.

PCR primers. Technology which enables DNA to be exponentially amplified in the laboratory. Regulate as *Miscellaneous Products* under *Chemically Synthesized, Biosynthesized, and Natural Products*.

peedon eggs. See *hundred-year eggs*.

pelletized (pelleted hay). Grass or other plants (like alfalfa) that have been chopped, heat dried, and formed into pellets.

pellets (from birds of prey). Indigestible parts of prey which are compressed and regurgitated in round or sausage shaped casts. Covered under *Animal Waste and Related By-Products*.

penoy. Salted, hard boiled egg from the Philippines. Differs from balut in that the embryo is 9 days old, **not** 14 days old.

pepsin. Acid protease from the stomach of livestock. Imported for pharmaceutical use. Covered under *Miscellaneous Products*.

permit. Formal, written permission granted by VS to authorize importation of restricted animal products, by-products, organisms and vectors, or related material.

pet bird. One that is intended for the pleasure of its owner and **not** for resale.

pet food. A protein or cereal food for animals.

pet toy. An object for pets to gnaw on. Pet toys may be made from bones, cows' or pigs' ears, hoofs, rawhide, ligaments, pizzles, or snouts. Covered under *Pet Food, and Livestock, Poultry, and Aquaculture Feed*. See also *chew(s)*.

pharmaceutical. Any chemical compound that may be used: (a) on or administered to humans or animals as an aid in diagnosis, treatment, or prevention of disease or other abnormal condition; (b) for the relief of pain or suffering; (c) to control or improve any physiological or pathologic condition.

phenol. A coal tar derivative used as a disinfectant.

pickled cheese. See *feta cheese*.

pier area. Area where cargo is off-loaded. Pier areas are regulated as fomites under *Miscellaneous Products* when they come in contact with animals or animal products.

pink juice test (PJT). Test conducted by Food Safety Inspection Service to determine if meat has been thoroughly cooked.

pituitary gland. Small gland attached to the brain. Secretes hormones which regulate the function of many glands. Regulate as glands under **Organs**.

pizzle. The penis of an animal, such as a bull or ox. Imported as pet chews (may be called bully stick), variety meat, or as an aphrodisiac. If imported as pet chew, then covered under **Pet Food, and Livestock, Poultry, and Aquaculture Feed**. If imported as an aphrodisiac, then covered as **Asian Medicinal Products** under **Miscellaneous Products**.

placenta. The vascular (supplied with blood vessels) organ in most mammals that connects the fetus to the uterus of the mother. Placental extracts, usually of bovine origin, are used in cosmetics. If a placental extract is to be incorporated as an ingredient in cosmetics, then placental extract is covered under **Miscellaneous Products**.

plasma. The fluid part of blood, lymph, or milk as distinguished from the suspended material.

plasmid. An autonomously replicating, extra-chromosomal, circular DNA molecule, distinct from the normal bacterial genome and nonessential for cell survival under nonselective conditions. Some plasmids are capable of integrating into the host genome. A number of artificially constructed plasmids are used as cloning vectors. Plasmids are covered under **Miscellaneous Products**.

plum pudding. A boiled or steamed pudding of flour or bread crumbs, tallow (more specifically suet), eggs, raisins, currants, and other fruits with spices and other flavorings. Covered as suet and tallow under **Meat and Meat Products**.

polyclonal antibody. A collection of different antibodies which recognize the same foreign substance (antigen, immunogen). They are produced by injecting an animal, such as a horse, with a foreign substance, such as part of a virus. The horse will produce different types of antibodies which all recognize the virus. The antibodies will be able to kill the virus. Regulate as antibodies under **Blood and Related By-Products**.

porcine. Of, relating to, or suggesting swine.

pork rind. The cooked, crisp skin from roasted pigs; chicharrones.

potato flakes. A processed food made by dehydrating mashed potatoes, adding ingredients like dried milk, and packaging. Regulate as **Dry Milk Products**.

potpourri. A mixture made with aromatic parts along with essential oils and a fixative. When dry milk powder is a fixative in potpourri, the dry milk is **not** regulated; however, dry milk powder alone imported to be used as a fixative is regulated under [Milk and Milk Products](#).

potential of hydrogen (pH). The degree of acidity or alkalinity. A pH value of 7 is neutral, as in the case of distilled water; pH values above 7 are alkaline; pH values below 7 are acidic. High or low pH may inactivate viruses.

poultry. Domesticated birds that serve as a source of eggs or meat. Birds considered poultry include: chicken, turkey, swan, pheasant, grouse, partridge, quail, guinea fowl, pea fowl, and the nonmigratory types of ducks, geese, pigeons, and doves.

poultry feed. A protein/cereal food for poultry. Covered under [Pet Food, and Livestock, Poultry, and Aquaculture Feed](#).

poultry waste. Parts of domestic birds consisting of head, feet, and viscera; regulate under [Animal Waste and Related By-Products](#). If an ingredient in feed, regulate under [Pet Food, and Livestock, Poultry, and Aquaculture Feed](#).

pregnant mare's urine. See [urine](#).

preserved eggs. See [hundred-year eggs](#).

pressed duck. Uncooked, often seasoned duck which has had its juices extracted either under pressure or by air drying.

primate. See nonhuman primate.

primer. A short piece of DNA or RNA complementary to a given DNA sequence; acts as the nucleating point from which replication proceeds via DNA polymerase. Regulate as a biological product under [Miscellaneous Products](#).

probe. A strand of nucleic acid which can be labeled and used to hybridize to a complementary molecule from a mixture of other nucleic acids. In clinical microbiology, short oligonucleotide of unique sequences used as hybridization probes for identifying pathogens.

probiotic. A live, microbial feed additive which benefits the host animal by improving its intestinal microbial balance.

processed animal protein. Meat meal, bone meal, blood meal, dried plasma, and other blood products, hydrolyzed proteins, hoof meal, horn meal, feather meal, fish meal, and any other similar products.

processing. Prescribed procedure that eliminates a virus' ability to infect healthy animals. Four processes related to animal products and by-products are temperature, pH, drying, and radiation.

prohibited product. That which is specified as **not** eligible for entry in 9CFR 93, 94, 95, or 96.

prosciutto. Dry-cured spiced ham. Covered under *Foreign Origin Meat and Meat Products, Swine*.

protease. An enzyme that breaks down protein. Covered under *Miscellaneous Products*.

psittacine. Of, or relating to parrots, macaws, and parakeets.

psittacosis. A disease, caused by the bacterium *Chlamydia psittaci*, transmissible to humans from association with an infected bird, or by inhaling dried droppings, secretions, or feather dust from an infected bird. In birds, the disease is usually mild and many infections may not be diagnosed; however, in humans, the disease can be severe with other complications involving the heart, liver, or brain. The symptoms in humans are variable, may often include fever, headache, muscle aches, chills, cough, and pneumonia.

pudding. A category of products that includes blood sausage, sausage stuffing for roast meat, or a sausage-like preparation often containing suet or having a suet crust; or made with minced meat or various other ingredients stuffed into a bag or skin and baked or boiled. Covered under *Meat and Meat Products*.

rack. A pair of antlers; the neck and spine of a forequarter of veal, pork, or mutton; the rib section of a foresaddle of lamb used for chops and roasts; a nearly full-grown young rabbit or its skin.

ratite. A bird with small or rudimentary wings and flat breastbone belonging to the super order Ratitae. Includes such birds as the cassowary, emu, kiwi, ostrich, and rhea.

rawhide. Untanned cattle skin that is made into leather by dehairing, liming, stuffing, and other processes. Covered under *Hides and Related By-Products* when intended for **other than** pet food. If a chew or pet toy, rawhide is covered under *Pet Food, and Livestock, Poultry, and Aquaculture Feed*.

reagent. A substance used to detect the presence of other substances by the chemical reactions or biological activity. Reagents may be of animal origin or chemically synthesized and are usually imported for

biological use. Amino acids and enzymes can be used as reagents. Covered as organisms and vectors under ***Live Animals and Related Material***.

regulated cargo. Imported freight that is specifically cited in Title 9 or Title 7 of the Code of Federal Regulations (CFR). For example, milk from Denmark would be regulated ***Clearing Regulated Cargo***; used milking machines would **not**.

render. To subject animal tissue to heat or chemical processes to separate fat from protein and mineral components.

rendered product. One that results from converting slaughter house or packing house waste and carcasses into industrial fats and oils (as tallow for soap) and various other products (as meat meal for animal feed and bone meal for fertilizer). Rendered products include blood meal, bone meal, meat meal, meat and bone meal, offal, tallow, and tankage. Regulate under ***Animal Waste and Related By-Products***.

Rendered products from countries affected with BSE are **prohibited** from all species of animals (including fish), regardless of the purpose for which they are imported.

rennet and rennin. Rennet is the inner lining of the fourth compartment of the stomach of calves and other young ruminants. Regulate as rennets under ***Organs***. Rennin is a milk-coagulating enzyme found in the calf stomach and used as a starter in the milk and cheese industry and for pharmaceutical use. Regulate as pharmaceuticals under ***Organs***. Coagulants collected from microbes and plants may sometimes incorrectly be called rennets. See ***vegetable coagulants*** and ***microbial coagulants***.

rennet casein. A see ***casein***.

rennet extract. A liquid or paste preparation from the stomach lining of a ruminant, used to curdle milk. Regulate as rennets under ***Organs***.

reptile. Cold-blooded vertebrates, such as alligators, crocodiles, lizards, snakes, and turtles characterized by short or **no** legs and bodies covered with scales or bony plates.

restricted product. That which is allowed entry **only** if treated, processed, or otherwise handled according to the guidelines presented in this manual. Refuse entry to restricted products if they **do not** meet the specified entry requirements.

retorted. Sterilized in its container (can, carton, flexible pouch) by high-pressure steam in a strong metal vessel (retort).

rhea. Large, tall, flightless ratite birds of South America that resemble, but are smaller than, the ostrich.

ribonucleic acid (RNA). A chemical found in the nucleus and cytoplasm of cells and plays an important role in protein synthesis and other chemical activities of a cell. RNA's structure is similar to that of DNA. Regulated because RNA may be from livestock or poultry and could carry livestock or poultry disease agents that are exotic to the U.S. or may be in media that could have been derived from livestock or poultry. Regulate under ***Live Animals and Related Material***.

ricotta. A milk product made from the whey that has been drained off while making cheese (such as mozzarella and provolone). Regulate as cheese under ***Milk and Milk Products***.

ripened cream butter. A cultured milk product made from starter-ripened cream. Regulate as ***Cultured Milk Products***.

ruminant. Any of various hoofed, even-toed, usually horned mammals of the suborder Ruminantia, such as cows (bovine), sheep (ovine), goats (caprine), deer, giraffes, and camels. They characteristically have a stomach divided into four compartments and chew cud.

Saccharomyces cerevisiae. Example of recombinant yeast. Covered under ***Miscellaneous Products***.

salami. A family of sausage that is usually made of a beef and pork mixture, and is boldly seasoned. Kosher salami is made of beef, not pork. Salami is preserved by curing, either hard (dried for 1-3 months) or soft (semi-dried for 2-5 days). Cooked salami is cured for 48 hours and either cooked or air-dried for a short period of time. Italian salamis are Genoa (rich, fatty, studded with white peppercorns), and cotto (studded with black peppercorns). Regulate under ***Meat and Meat Products***.

salt pork. Fat from the back and sides and belly of a hog. Regulate as under ***Foreign Origin Meat and Meat Products, Swine***.

salt scrapings. Salt claimed from rendered casings.

salted eggs. Usually prepared from duck eggs. In the Philippines, the eggs are immersed in a super-saturated solution of salt. After several weeks, the eggs are taken from the salt solution and boiled. The eggs are then colored red to distinguish them from ordinary eggs. Regulate hard-boiled, salted eggs from the Philippines as hard-boiled eggs. In China, the eggs are coated with a paste made of clay, salt, and water. The paste-coated eggs are then rolled in burned rice hulls, placed in wooden boxes, and stored from 25-to-30 days before marketing. Regulate the salted eggs from China as salted eggs.

sausage. Chopped or ground, seasoned meat frequently stuffed in a casing. May be fresh, cooked, cured, or smoked. Covered under [Meat and Meat Products](#).

schmaltz. Rendered poultry fat (usually chicken or goose fat) used for food. Manufacture involves cutting poultry fat into small pieces, melting, and then collecting the drippings. May also be prepared by a dry process (tissues are cooked over low heat and stirred, gradually yielding fat), or a wet process (fat is melted by direct steam injection, then filtered and clarified).

scrapple. A seasoned mixture of ground pork and cornmeal set in a mold.

secretion. A substance, such as bile, digestive juice, hormone, milk, mucus, or sweat that is generated from cells or bodily fluids.

semen (live). A whitish secretion of a male animal's reproductive organs, the transporting medium for animal sperm. Handle as [Live Animals and Related Material](#) which are regulated by VS.

semen container. Canisters or containers that usually hold liquid nitrogen and tubes or containers of semen. Sometimes semen containers are manifested as nitrogen containers. Regulate empty semen containers as fomites under [Miscellaneous Products](#).

serrano. A ham taken from the hind leg of the pig which is subject to salting, drying, and curing. Covered under [Foreign Origin Meat and Meat Products, Swine](#).

serum. The clear, yellowish fluid obtained upon separating whole blood into its solid and liquid components. The plural form is sera or serums. Imported for biological use. Covered under [Blood and Related By-Products](#).

Setifer setosus. See [tenrec](#).

shelf stability. A condition used to describe a process applied to meat, meat products, and milk which renders the products free of microorganisms capable of growing in the products under non refrigerated conditions. The process applies heat, alone or in combination with other ingredients and/or other treatments.

shell eggs. Unbroken, clean, fresh eggs in their shell to be used as food or for breaking and pasteurization.

sinew. Long, strong, tendon-like fibers supporting an animal's backbone. Regulate as glue stock under [Animal Waste and Related By-Products](#).

skin. Protective outer covering of an animal. When the intended use is as a specimen for mounting, skin is covered under **Trophies**. When the intended use is **other than** trophies, skin is covered under **Hides and Related By-Products**.

skirted wool. A fleece which has had the head, genital, leg, and stomach wool removed. Also called body skirted, farm skirted, and full skirted wool. Regulated as wool under **Hides and Related By-Products**.

skull. The skeleton of the head.

sodium carbonate. A white powdery compound used as a disinfectant. Four percent sodium carbonate is commonly known as soda ash.

sodium hydroxide. A strong alkaline compound used as a disinfectant against FMD. Commonly called caustic soda or lye.

soluble blood meal. Dry, ground blood that will dissolve. Regulate as a rendered product under **Animal Waste and Related By-Products**.

soup mix containing meat. A commercially prepared mixture of dry ingredients for soup, usually requiring the addition of water. Covered under **Meat and Meat Products**.

species. A group of related organisms which have certain characteristics in common and which, if they reproduce sexually, are able to interbreed freely in nature and produce fully fertile offspring. Species is a taxonomic category that ranks below a genus and may be subdivided into several varieties, races, or breeds. The scientific name (binomial) of an organism consists of the generic name (genus) written with a capital letter, and the specific name (species) written with a small letter.

specific pathogen free (SPF). Animals or eggs that are free from a defined set of pathogenic organisms that may cause clinical or subclinical disease.

spleen. An organ near the stomach that destroys blood cells, stores blood, produces erythrocytes. Covered under **Organs** and **Meat and Meat Products** as offal.

stag horns. Paired bony processes on the heads of adult male deer. When the intended use is as a specimen for mounting, stag horns are covered under **Trophies**. When the intended use is **other than** trophies, the horns are covered under **Blood and Related By-Products**.

stall. A small compartment, booth, or cubicle used to house livestock. Regulate as fomites under *Miscellaneous Products*.

starter. Material containing microorganisms used to cause a desired fermentation (as in making butter, cheese, or yogurt) and being either a sample of a natural population (as yogurt or sour cream) or a pure culture of identified microorganisms.

steamed bone meal. Ground bones subjected to steam treatment. Covered under *Bones and Related By-Products*.

stomach. The digestive structure of vertebrates located between the esophagus and the small intestine. When the intended use is for consumption, stomachs are covered under *Meat and Meat Products* as meat by-products (formerly edible offal). When the intended use is **other than** for consumption, stomachs are covered under *Organs*.

straw. Dried grasses, clovers, legumes, and similar materials or stalks or stems of various grains, such as barley, oats, rice, rye, and wheat, and used as food or bedding for animals. Regulate as fomites, under *Miscellaneous Products*. Same as hay and straw.

suet. The hard, unrendered fat around the kidneys of cattle and sheep; used in cooking, feeding birds, and making tallow. Covered under *Foreign Origin Meat and Meat Products, Ruminants*.

suet cake. A formed or shaped article using rendered suet (tallow) alone or as a binder for seeds or similar feed set outside for birds. Covered as suet and tallow under *Foreign Origin Meat and Meat Products, Ruminants*.

suet pudding. A boiled or steamed pudding made with chopped suet, flour, bread crumbs, raisins, and spices. Compare with plum pudding. Covered under *Foreign Origin Meat and Meat Products, Ruminants*.

suidae. Family of swine.

supernatant. The liquid overlaying material deposited by settling, precipitation, or centrifugation. Monoclonal antibodies are frequently shipped as supernatant.

SVD. See *swine vesicular disease (SVD)*.

SVD/SR. See *swine vesicular disease with special requirements (SVD/SR)*.

sweet cream. See *crème fraîche*.

sweetbread. The thymus glands or pancreas of a young animal, especially a calf or lamb. Covered under *Meat and Meat Products* as as meat by-products (formerly edible offal).

swine. Stout-bodied, short legged omnivorous mammals with thick bristly skin and a long snout.

swine vesicular disease (SVD). A contagious viral disease that affects **only swine. The symptoms are blisters on the mouth, snout and feet. The symptoms and course of SVD are indistinguishable from those of FMD.**

swine vesicular disease with special requirements (SVD/SR). A disease status category of a given country which is free of swine vesicular disease (SVD) with special requirements to apply. Even though a country is known to be free from SVD, the country is known to supplement their pork supply by importing swine meat from affected countries, import live swine from affected countries under conditions less restrictive than would be acceptable for importation into the United States, or have a common land border with an affected country. This disease status category **only applies to meat, meat products, and edible meat by-products.**

synthetic oligopeptides. Example of peptides that are chemically synthesized. Covered under *Miscellaneous Products*.

table eggs. Those imported for immediate human consumption rather than for breaking and pasteurization.

tag. A dirty, matted lock of wool. Contrast with *dunglocks*.

tallow. A processed derivative of ruminant (cattle and sheep) fat which has been rendered. If the product is for human consumption, regulate as edible tallow under *Foreign Origin Meat and Meat Products, Ruminants*. If the product is considered to be inedible, regulate as a rendered product under *Animal Waste and Related By-Products*.

tallow derivative. Any chemical obtained through initial hydrolysis, saponification, or transesterification of tallow; chemical conversion of material obtained by hydrolysis, saponification, or transesterification may be applied to obtain the desired product. Tallow derivatives are not considered prohibited materials, even if from BSE-affected countries. Tallow derivatives are produced by subjecting tallow to chemical processes (hydrolysis, saponification, or transesterification) that involve high temperature and pressure. Examples include, but are not limited to, glycerol, fatty acids, fatty alcohols, fatty amines, and fatty amides.

tan. To convert skin into leather by impregnation with an infusion of tree bark, mineral salts, or some other form of tanning or a substitute.

tankage. Animal residue left after rendering fat from animal carcasses or parts of the carcass. Tankage is used as animal feed or fertilizer. Regulate as a rendered product under [Animal Waste and Related By-Products](#).

tasajo. Cured and fully dried meat. Covered under [Meat and Meat Products](#).

taxidermy finished. Prepared, stuffed, and mounted hides, skins, or bones of dead animals ready for exhibition.

technical gelatin. An inedible, collagenous product which is sometimes referred to as “inedible gelatin.” Some uses of technical gelatin are bacteriological culture media, printing industry, and paper and box making. Regulate as animal glue under [Animal Waste and Related By-Products](#).

teeth. Bony appendages borne on the jaws. Covered under [Trophies](#).

tendon. A tough cord of connective tissue that unites a muscle with some other part. Regulate as glue stock under [Animal Waste and Related By-Products](#).

tenrec. Any of numerous, small, often spiny mammals of the family Tenrecidae of Madagascar. No person may import a tenrec into the United States from any region where FMD exists.

thousand-year eggs. See [hundred-year eggs](#).

throat. See [esophagus](#).

thuringer. See [cervelat](#).

thyroid gland. A two-lobed endocrine gland which regulates the body's metabolic rate. Covered under [Organs](#).

TID. Abbreviation for temperature indicator device.

tierce. A cask holding 42 wine gallons for salted meat or casings.

tissue. An aggregation of morphologically and functionally similar cells, such as fat cells forming adipose tissue. If the tissue is live and cultured, regulate as organisms and vectors under [Live Animals and Related Material](#).

tissue culture. Growth of tissue cells in media for experimental research. The media may contain fetal bovine serum or another derivative from animals. Imported for biological use. Covered under organisms and vectors, *Live Animals and Related Material*.

TNF. See *tumor necrosis factor (TNF)*.

top. A continuous strand of the longer wool fibers after straightening and separating from the short fibers by combing. Regulate as wool under *Hides and Related By-Products*.

total milk protein. A powdered concentrate made from whey and casein and having the lactose and fat removed. Regulate as *Dry Milk Products*.

transgenic. Carrying genes transferred from another species or breed; transgenic mice.

transgenic mammal. Laboratory mammals (mice, rabbits, rats) which are altered through the introduction of foreign DNA from another species by genetically manipulating the egg or embryo. Covered under *Live Animals and Related Material*.

transmissible spongiform encephalopathy (TSE). A disease that can be transmitted from one animal to another, and will produce changes in the brain that appear similar to a sponge (i.e., some of the cells are clear when viewed with a microscope). For example, bovine spongiform encephalopathy (BSE), chronic wasting disease of deer, Creutzfeldt-Jacob disease, and scrapie.

Trichosurus vulpecula. See *brushtail opossum*.

Tripe. The light-colored, rubbery lining of the stomach of ruminants and swine. When the intended use is consumption, tripe is covered under *Meat and Meat Products* as meat by-products (formerly edible offal). When the intended use is **other than** for consumption, tripe is covered under *Organs*.

trophy. The entire carcass or parts of dead animals imported for the purpose of taxidermy mounting or preserving. For ruminants and swine, trophies may include hides, skins, horns, hoofs, tusks, and other bony tissues. Bird trophies may consist of the entire carcass, the eviscerated carcass, or **only** the skin and feathers with head and feet attached.

TTSPS. Abbreviation for Technical Trade Services Product Staff. Formerly Import and Export Products Staff (IEPS).

tumor necrosis factor (TNF). A protein secreted by stimulated macrophages which causes tumor necrosis *in vivo* when injected into tumor-bearing mice. Example of proteins/peptides of non-livestock or avian species that are produced by microbes (yeasts). Covered under [Miscellaneous Products](#).

tusks. Long, protruding teeth. Covered under [Trophies](#).

United Kingdom. England, Scotland, Wales, and Northern Ireland.

untanned. **Not** put through a tanning process. Contrast with [tan](#).

urea. *Physiological:* The end product of protein metabolism found in the urine of mammals and other animals. *Chemical:* A water-soluble powder synthesized by heating ammonia and carbon dioxide under pressure. Used as a fertilizer or feed supplement, or to synthesize plastics.

urine. Fluid excreted by the kidney. Consists primarily of water and to a lesser extent urea, acids, and organic salts. Covered under [Animal Waste and Related By-Products](#) and [Live Animals and Related Material](#).

UTH milk. See [long-life milk](#).

veal. A young calf 1-to-3 months of age; meat of a young calf. Covered under [Meat and Meat Products](#).

vector. A carrier which transfers an infective agent from one host to another. A mechanical vector is one where the infective agent does **not** necessarily need the vector to maintain its life cycle. A biological vector serves as a host in which the infective agent **must** multiply before becoming infective. Examples are insects, ticks, mites, mice, rabbits, pigeons, dogs, guinea pigs, rats, ferrets, chickens.

vegetable coagulants. Extracts from plants that coagulate milk (for example, bromelin from the pineapple, papain from the papaya, and ricin from castor oil seeds). May also be called vegetable rennets. Release if the importer has a statement that the coagulant (rennet) is of plant origin.

vegetable rennet. See [vegetable coagulants](#).

vell. The stomach of an unweaned animal, used in making rennet. Regulate as rennets under [Organs](#).

waste bagging material. Burlap or cloth previously used to cover meat. Also called scrap bagging. Regulate as fomites under [Miscellaneous Products](#).

weasand. The musculature associated with the throat or esophagus of an animal.

whey powder. Watery part of the milk separated from the curd that has been dried. Covered under [Milk and Milk Products](#).

white blood cells. See [leukocytes](#).

wiener (wienerwurst). A type of smoked pork or beef sausage similar to a frankfurter. Regulate as a fresh meat product under [Meat and Meat Products](#).

wool. The dense, soft, often curly hair forming the coat of sheep and certain other animals. Regulate under [Hides and Related By-Products](#).

wool grease. A fatty, slightly sticky wax that is extracted from wool containing other impurities that are **not** removed. Wool grease is **not** regulated. Compare with [lanolin](#).

wool manure. Refuse from wool production. Could be dung locks.

wool noil. See [noil](#).

wool top. A continuous strand of the longer wool fibers remaining after straightening and separating from the short fibers by combing. Covered under wool, [Hides and Related By-Products](#).

wool waste. Refuse from wool production. Could be dung locks.

wurst. See [sausage](#).

xarque. Cured and fully dried meat. Covered under [Meat and Meat Products](#).

yeast. Colloquial name for unicellular fungi capable of fermentation and that reproduce by budding. A few yeast are pathogens or can be recombinant.

yogurt. A food of custard-like consistency, prepared from milk, and curdled by bacteria. Covered under [Milk and Milk Products](#).

Yorkshire pudding. Batter of eggs, flour, and milk baked in meat drippings.
