

Northern Rockies Predictive Services

Daily Outlook – Tuesday 16 Sep 2008

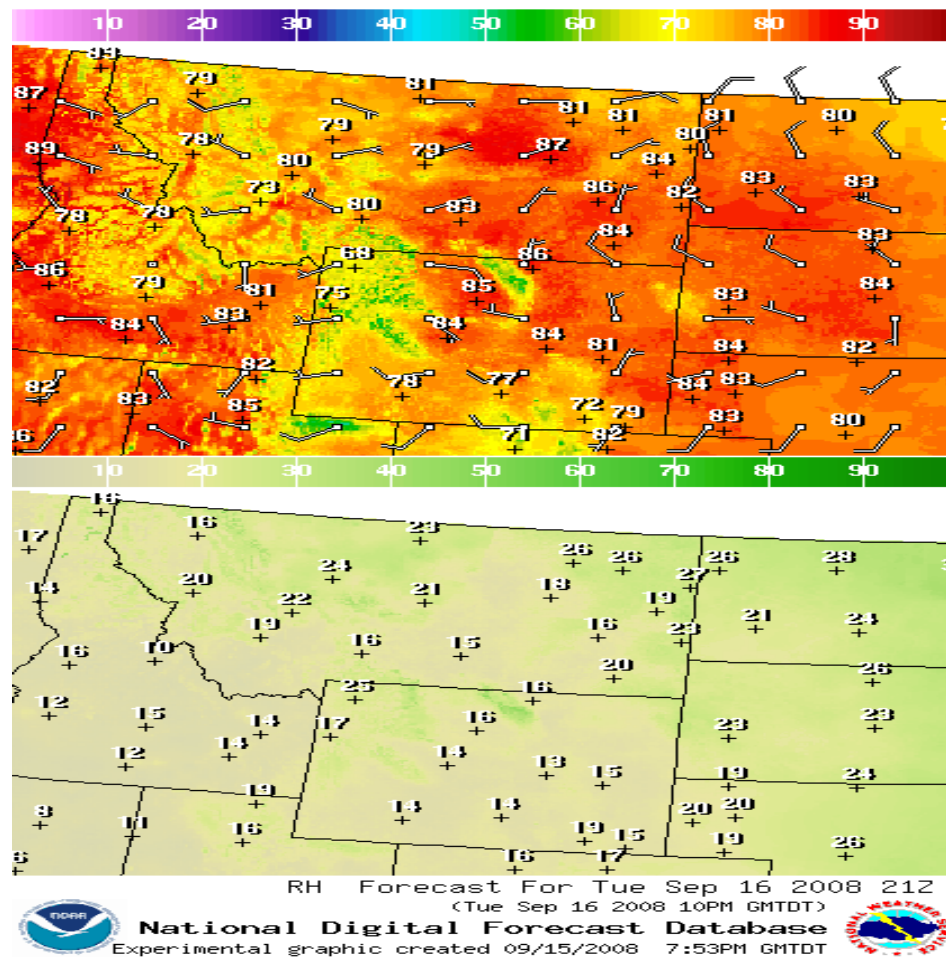

Afternoon
Temp/Wind

Issued: 200 pm Monday, 15 Sep 2008

Synopsis: A strong ridge of High pressure will remain over the region. Sunny, dry and warm temperatures are expected. Look for afternoon humidities to fall into the upper teens in most locations as the air beneath the stable atmosphere warms to be about 5-10 degrees above normal. This warming and drying trend is expected to continue into the middle of next week.

Fire Weather Impacts: Warming, drying trend through end of the week. Some isolated pockets of high Haines possible over southwest MT and central ID for Tuesday. Any fire starts will see active afternoon behavior.

Large Fire Risk: Low.
