

SAMHDA provides both the DATA you need and the TOOLS to analyze them.

SAMHDA offers public access to the nation's substance abuse and mental health research data and facilitates use of the data by providing related tools and resources. Some of the data acquired and archived under SAMHDA have never before been publicly distributed. Data files, documentation, and reports are downloadable from the Web site in public use format. Our Web site features tools that allow users to conduct analyses on selected datasets within the archive. We also provide user support through e-mail and a toll-free helpline.

Our holdings include:

- Annual data on drug use, health, mental health, treatment admissions, treatment facility services and characteristics, and drug use among youth
- Preeminent studies on co-morbidity and treatment outcomes and cost

The Substance Abuse and Mental Health Data Archive (SAMHDA) is an initiative of the Office of Applied Studies, Substance Abuse and Mental Health Services Administration (SAMHSA) of the United States Department of Health and Human Services, and is based at the Inter-university Consortium for Political and Social Research (ICPSR).

The views expressed in written conference materials or publications and by speakers and moderators at HHS-sponsored conferences, do not necessarily reflect the official policies of the Department of Health and Human Services; nor does mention of trade names, commercial practices, or organizations imply endorsement by the U.S. government.

Substance Abuse and Mental Health Data Archive

A national resource providing public data access and online analysis

www.icpsr.umich.edu/SAMHDA

Sponsored by the Office of Applied Studies, Substance Abuse and Mental Health Services Administration

Using SAMHDA's Resources

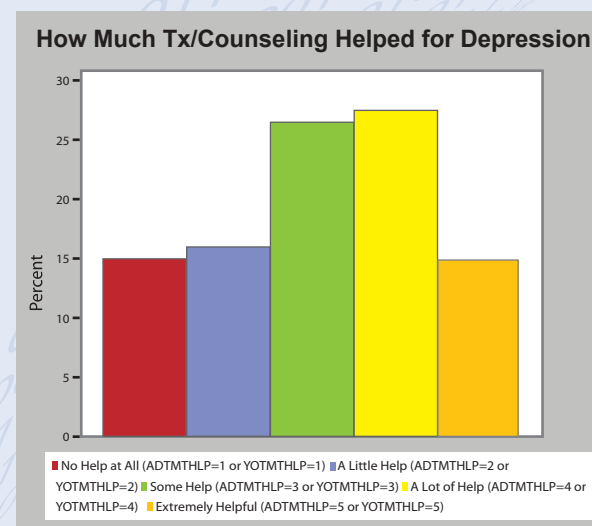

Find Data With Our Variable-Level Search

SAMHDA's unique **variable-level search** encompasses all our studies. A single query searches thousands of variables, helping users locate data of interest with ease. Results include hypertext links to studies and variables. This tool helps find specific variables:

- When you do not know which studies include a topic or variable you need
- When variable names do not intuitively match their content
- When the full subject matter of a study is unknown
- For comparisons across studies
- For studies with large numbers of variables

Analyze Data Online

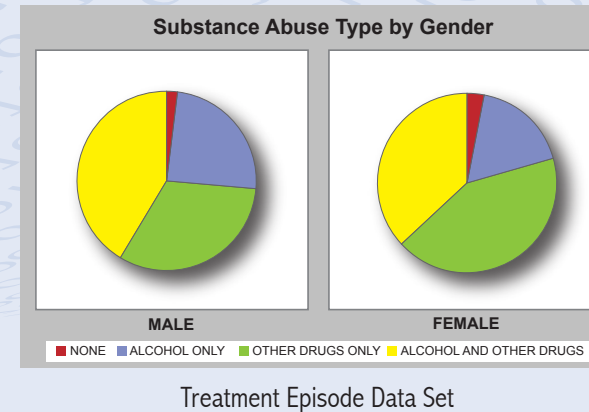

Our online Data Analysis System (DAS) allows users to run both simple and complex analyses and produce immediate results, including charts from the cross-tabulation program. Users select variables from easy-to-use online codebooks.

National Survey on Drug Use and Health

Produce Analytic Tables

Quick Tables provides tables, charts, and an explanation of the results. Users select variables from drop-down menus and customize the way charts are displayed.

View Survey Instruments

All survey instruments for studies accessible from our Web site are available for download in PDF format.

Find Related Publications

SAMHDA provides links to publications based on our data holdings through the Bibliography of Data-related Literature. Hypertext links to full-text publications are included when possible.

Download Datasets

For users who wish to conduct analyses with their own software, data are available for download in the following formats:

- SAS Transport
- SPSS Portable
- Stata System
- ASCII Data File + SAS Setup Files
- ASCII Data File + SPSS Setup Files
- ASCII Data File + Stata Setup Files

Additional Resources

SAMHDA also provides:

- Answers to most user questions within one hour
- Online tutorials and FAQs
- Links to related Web sites

Our Holdings

Series

- Drug Abuse Warning Network (DAWN)
- Health Behavior in School-aged Children (HBSC)
- Monitoring the Future (MTF)
- National Comorbidity Survey (NCS)
- National Survey on Drug Use and Health (NSDUH, formerly NHSDA)
- National Survey of Substance Abuse Treatment Services (N-SSATS)
- Treatment Episode Data Set (TEDS)

Studies

- Alcohol and Drug Services Study (ADSS)
- California Drug and Alcohol Treatment Assessment (CALDATA)
- Cooperative Agreement for AIDS Community-Based Outreach/Intervention Research Program
- (Washington) DC Metropolitan Area Drug Study (DC*MADS)
- Drug Abuse Treatment Outcomes Study (DATOS)
- Drug Abuse Treatment Outcome Study--Adolescent (DATOS-A)
- Drug Services Research Survey (DSRS)
- Gambling Impact and Behavior Study
- National Pregnancy and Health Survey (NPHS)
- National Treatment Improvement Evaluation Study (NTIES)
- National Youth Survey (NYS)
- Policy Research on Aging and Mental Health Services (PRAMHS)
- Services Research Outcomes Study (SROS)
- Substance Abuse Treatment Cost Allocation and Analysis Template (SATCAAT)
