Release Date: October 2007 Next Release Date: October 2008

Table 2.3. Annual Shipments of Solar Thermal Collectors by Type , 1997-2006 (Thousand Square Feet)  $\,$ 

| Year | Low-Temperature                 |                             | Medium-Temperature |                             |  |  |
|------|---------------------------------|-----------------------------|--------------------|-----------------------------|--|--|
|      | Total<br>Shipments <sup>a</sup> | Average per<br>Manufacturer | Total<br>Shipments | Average per<br>Manufacturer | High-Temperature<br>Total Shipments <sup>b</sup> |  |
|      |                                 |                             |                    |                             | _  |  |
| 1997 | 7,524                           | 579                         | 606                | 29                          | 7  |  |
| 1998 | 7,292                           | 607                         | 443                | 23                          | 21   |  |
| 1999 | 8,152                           | 627                         | 427                | 21                          | 4  |  |
| 2000 | 7,948                           | 723                         | 400                | 25                          | 5  |  |
| 2001 | 10,919                          | 1,092                       | 268                | 16                          | 2  |  |
| 2002 | 11,126                          | 856                         | 535                | 31                          | 2  |  |
| 2003 | 10,877                          | 906                         | 560                | 33                          | 7  |  |
| 2004 | 13,608                          | 1,512                       | 506                | 30                          | 0  |  |
| 2005 | 15,224                          | 1,522                       | 702                | 41                          | 115  |  |
| 2006 | 15,546                          | 1,413                       | 1,346              | 38                          | 3,852  |  |

<sup>a</sup> Includes shipments of solar thermal collectors to the government, including some military, but excluding space applications.
<sup>b</sup> For high-temperature collectors, average annual shipments per manufacturer are not disclosed.
