

# MIPP Update

Durga Rajaram

University of Michigan

All Experimenters' Meeting

17 October, 2005

# Status

- Running OK. No major detector issues.
- Tune mostly stable except for occasional drifts.
- Beam/extraction downtimes:
  - 10/11: ~ 2h due to MC6Q5 regulation
  - 10/14: ~ 3h LCW leak hunt (leak was in MTest)
  - 10/16: ~ 5h MI DCCT
- Uptime last week: ~ 54%

2005-10-10

2005-10-10

2005-10-10

# Statistics

- Currently running with  $LH_2$  target, -59 GeV beam
- DAQ:  $\sim 120$  evts/spill; 1 spill every 2 minutes
- Event totals:
  - Past week: 2096 spills, 195k events
  - 59 GeV Total on  $LH_2$ :  $0.8 \times 10^6$  evts in  $\sim 7250$  spills

# Summary

- Detectors performing fine
- Data quality is good.
- Making progress on software and analyses
  - Next MIPP Software workshop 11/10
