

Appendix 6

Establishment of Ready Mobile Reserve Assets

Geographic Areas will identify and have available firefighting resources for initial attack, extended attack, and emerging incidents in response to Area and national priorities

As appropriate, NICC and GACCs will discuss the type and amount of resources that Geographic Areas are to designate for response.

NICC will not target specific resources, but each GACC is responsible for providing the number and kind.

The reserve will typically consist of a mix of the following kinds of resources:

Type 1 Crews

Type 2 Crews

Engines, Type 6-7

All types Helicopter Managers/Crew Modules

Air Tactical Group Supervisors

Other overhead positions identified as situation demands
