ABSTRACT 1

1. INTRODUCTION 1
   1.1 Background 1
   1.2 Objectives 2
   1.3 Scope 3

2. ANALYSIS OF NOISE/INTERFERENCE DATA 5
   2.1. Description of Data 5
   2.2. Analysis Tools 6
   2.3 Case Studies 7

3. MEASUREMENT PROCEDURES 54
   3.1 Description of Model 54
   3.2 Comparisons of Model with Measurements 60

4. SUMMARY AND CONCLUSIONS 83

5. ACKNOWLEDGEMENTS 85

6. REFERENCES 86

APPENDIX 88

LIST OF FIGURES

Page

Figure 1. Measured noise/interference in the I-channel at 5.936 MHz (case study 1) 9

Figure 2. Probability density function of the I-channel data (case study 1) 10

Figure 3. Probability density function of the voltage envelope (case study 1) 11

Figure 4. Probability density function of the phase (case study 1) 12

Figure 5. Probability density function of the power envelope (case study 1) 13

Figure 6. Cumulative distribution function of the power envelope (case study 1) 14

Figure 7. Level crossing distribution of the voltage envelope (case study 1) 15

Figure 8. Power spectrum over a bandwidth of 1.024 MHz (case study 1) . 17

Figure 9. Cumulative distribution function of the power envelope in the frequency domain (case study 1) 18

Figure 10. Probability density function of the phase in the frequency domain (case study 1) 19

Figure 11. I-channel data at 19.29 MHz (case study 2) 21

Figure 12. Probability density function of the power envelope in the time domain (case study 2) 22

Figure 13. Cumulative distribution function of the power envelope in the time domain (case study 2) 23

Figure 14. Power spectrum over a bandwidth of 1.024 MHz (case study 2) 24

List of Figures (cont.)

Figure 15. I -channel data after excision of a single narrowband interferer (case study 2) 25

Figure 16. Probability density function of the power envelope in the time domain after excision of a single narrowband interferer (case study 2) 27

Figure 17. Cumulative distribution function of the power envelope in the frequency domain before excision (case study 2)....28

Figure 18. I-channel data at 13.666 MHz (case study 3) 29

Figure 19. Power spectrum over a bandwidth of 1.024 MHz (case study 3) 30

Figure 20. Probability density function of the I-channel data (case study 3)....31

Figure 21. Probability density function of the power envelope in the time domain (case study 3) 32

Figure 22. Cumulative distribution function of the power envelope in the time domain (case study 3) 34

Figure 23. Cumulative distribution function of the power envelope in the frequency domain (case study 3) 35

Figure 24. I-channel data at 13.666 MHz (case study 4) 36

Figure 25. Probability density function of the I-channel data (case study 4) 37

Figure 26. Power spectrum over a bandwidth of 1.024 MHz (case study 4) 38

Figure 27. Cumulative distribution function of the power envelope in the time domain (case study 4) 40

Figure 28. Cumulative distribution function of the power envelope in the frequency domain (case study 4) 41

Figure 29. I-channel data at 23.862 MHz (case study 5) 42

List of Figures (cont.)

Page

Figure 30. I-channel data at 23.862 MHz (case study 5) 43

Figure 31. Probability density function of the I-channel data (case study 5) 44

Figure 32. Probability density function of the power envelope in the time domain (case study 5) 45

Figure 33. Cumulative distribution function of the power envelope in the time domain (case study 5) 46

Figure 34. Level crossing distribution of the voltage envelope (case study 5) 48

Figure 35. Power spectrum over a bandwidth of 1.024 MHz (case study 5) 49

Figure 36. Cumulative distribution function of the power envelope in the frequency domain (case study 5) 50

Figure 37. Probability density function of the phase in the time domain (case study 5) 51

Figure 38. Probability density function of the phase in the frequency domain (case study 5) 52

Figure 39. Comparison of (a) simulated and (b) measured (case study 1) noise/interference in the I-channel data....62

Figure 40. Comparison of (a) simulated and (b) measured (case study 1) probability density functions of the I-channel data 63

Figure 41. Comparison of (a) simulated and (b) measured (case study 1) probability density functions of the power envelope in the time domain....64

List of Figures (cont.)
