

# An Updated Noise Model for Use in IONCAP

A. D. Spaulding  
F. G. Stewart

**U.S. DEPARTMENT OF COMMERCE**  
**Malcolm Baldrige, Secretary**

Alfred C. Sikes, Assistant Secretary  
for Communications and Information

January 1987

TABLE OF CONTENTS

	Page
LIST of FIGURES.....	iv
LIST of TABLES.....	v
ABSTRACT.....	1
1. INTRODUCTION and BACKGROUND.....	1
2. ATMOSPHERIC NOISE.....	6
3. MAN-MADE and GALACTIC NOISE.....	16
4. COMBINATION of the THREE NOISES.....	26
5. COMPARISONS and CONCLUSIONS.....	34
6. REFERENCES.....	48
APPENDIX: COMPUTER SOFTWARE.....	51

## LIST OF FIGURES

Figure 1	The receiving system and its operating noise factor, $f$ ....	3
Figure 2	Figure 2a from CCIR Report 322-2.....	9
Figure 3	Figures 2b and 2c from CCIR Report 322-3.....	10
Figure 4	The distribution of $F_a$ values for atmospheric radio noise at Boulder, CO, 3 MHz, for the Winter Season, 0000-0400 hours.....	14
Figure 5	Figure 1 from CCIR Report 258-4.....	17
Figure 6	Figure 1 from Spaulding and Disney (1974) with Soviet Moscow noise measurements, Winter Season, 1958-1964.....	18
Figure 7	Figure 3 from Spaulding and Disney (1974).....	21
Figure 8	Figure 4.1 from Lucas and Haydon (1966).....	23
Figure 9	Comparison of the CCIR Report 258 man-made noise estimates and those currently used in GENOIS of IONCAP...	24
Figure 10	The JTAC (1968) man-made noise estimates.....	25
Figure 11	Comparison of present estimates with JTAC (1968) estimates.....	27

## LIST OF TABLES

TABLE 1	Values of the Constants c and d.....	19
TABLE 2	Difference between the updated and corrected man-made noise and galactic noise values and the currently used values (i.e., new-old).....	35
TABLE 3	IONCAP output using current GENOIS, "Industrial" man-made noise and updated atmospheric noise estimates....	38
TABLE 4	IONCAP output using new GENOIS, "Business" man-made noise and updated atmospheric noise estimates.....	39
TABLE 5	IONCAP output using current GENOIS, "Quiet Rural" man-made noise and updated atmospheric noise estimates....	40
TABLE 6	IONCAP output using new GENOIS, "Quiet Rural" man-made noise and updated atmospheric noise estimates.....	41
TABLE 7	IONCAP output using current GENOIS, "Quiet Rural" man-made noise and old atmospheric noise estimates (low atmospheric noise region).....	42
TABLE 8	IONCAP output using current GENOIS, "Quiet Rural" man-made noise and updated atmospheric noise estimates (low atmospheric noise region).....	43
TABLE 9	IONCAP output using current GENOIS, "Quiet Rural" man-made noise and old atmospheric noise estimates (high atmospheric noise region).....	44
TABLE 10	IONCAP using current GENOIS, "Quiet Rural" man-made noise and updated atmospheric noise estimates (high atmospheric noise region).....	45
TABLE 11	IONCAP output using new GENOIS, "Quiet Rural" man-made noise and updated atmospheric noise estimates (high atmospheric noise region) The circuit and ionospheric parameters are the same as in Tables 9 and 10.....	46
TABLE 12	An example of the differences in the noise parameters calculated by the current GENOIS and the new GENOIS (updated atmospheric noise estimates used in both cases and the 3 MHz man-made noise set at -160 dBW).....	47
