FOR IMMEDIATE RELEASE  
December 28, 2006

### **PACIFIC COAST GROUNDFISH FISHERY** **COMMERCIAL AND RECREATIONAL MANAGEMENT MEASURES** **FOR JANUARY THROUGH DECEMBER 2007 AND 2008**

The National Marine Fisheries Service (NMFS) announces management measures for January through December 2007 and 2008 in the Pacific Coast groundfish fishery off Washington, Oregon, and California, **effective at 0001 hours (local time) January 1, 2007** until modified, superceded or rescinded. These management measures were recommended by the Pacific Fishery Management Council (Council); the states of Washington, Oregon, and California will implement similar restrictions. These management measures are being implemented in a *Federal Register* notice that will publish on December 29, 2006, and are described in this public notice. Any discrepancies between this public notice and the *Federal Register* will be resolved in favor of the *Federal Register*.

Specifications and management measures for 2007-2008 were developed along with new rebuilding plans for the seven overfished species of groundfish - bocaccio, canary rockfish, cowcod, darkblotched rockfish, Pacific ocean perch (POP), widow rockfish, and yelloweye rockfish, with the goal of rebuilding overfished groundfish stocks and achieving as much of the optimum yields (OYs) as possible for co-occurring non-overfished groundfish stocks. Commercial management measures for 2007-2008 include landings limits, size limits, gear restrictions, and time/area closures. Recreational management measures include bag limits, size limits, gear restrictions, and time/area closures. For 2007 and 2008, NMFS will continue the coastwide depth-based management program that closes portions of the continental shelf to fishing for groundfish and to fishing for many non-groundfish species in fisheries that take groundfish incidentally (see "Area Closures," "Commercial Fishery: Time and Area Closures" and the "Recreational Fishery" sections below). These closures are intended to protect and rebuild overfished groundfish species.

Continuing in 2007 and 2008, the commercial groundfish fishery will be managed with separate landing limits for limited entry trawl vessels, limited entry fixed gear (longline and pot) vessels,

and open access vessels. The open access fishery includes all groundfish gear except for pot or longline gear fished by a vessel that has a limited entry permit endorsed for that gear, or groundfish trawl. Although groundfish trawl is not legal gear in the open access fishery, groundfish may be taken by shrimp, prawn, California halibut, or sea cucumber trawl gear under certain conditions. These non-groundfish trawl gears are considered to be participating in the open access fishery, and have separate landing limits for some groundfish species from the rest of the open access fishery (see “Commercial Fishery: Non-groundfish Trawl Gear” below). Additionally, new recreational fisheries limits are introduced for 2007 and 2008 (see “Recreational Fisheries” below).

For more information on the new overfished species rebuilding plans, please see the Pacific Council's website for Amendment 16-4 to the Pacific Coast Groundfish Fishery Management Plan:

<http://www.pcouncil.org/groundfish/gffmp/gfa16-4.htm>.

A vessel monitoring system (VMS) program to monitor vessel activities in and around closed areas continues to be required for all groundfish limited entry vessels in 2007 and 2008. For more information on the VMS requirements, visit our website at <http://www.nwr.noaa.gov/Groundfish-Halibut/Groundfish-Fishery-Management/Vessel-Monitoring-System/Index.cfm> or call the contact names above. During 2007, NMFS and the Council will be expanding coverage of the VMS program to both directed open access groundfish vessels and vessels in other target fisheries that incidentally take and retain groundfish within the Exclusive Economic Zone (3-200 nm). VMS requirements for vessels that fish only in state waters are not currently being considered by NMFS. Following publication of the proposed rule in 2007 NMFS will be accepting public comment. The proposed rule will be followed by a final rule that is expected to be published prior to the end of the year.

## **Area Closures**

Area closures, or groundfish conservation areas, include different types of closed areas: the rockfish conservation areas (RCAs), the yelloweye rockfish conservation areas (YRCAs), the cowcod conservation areas (CCAs), the Farallon Islands closure, the Cordell Banks closure, and essential fish habitat conservation areas (EFHCAs). These closed areas are intended to protect a particular groundfish species, species group or species complex, or groundfish habitat. The closed areas that apply to the various fishery sectors are described in the code of federal regulations (CFR) at 50 CFR Part 660.381 through 660.384 (limited entry trawl, limited entry fixed gear, open access, and recreational fisheries, respectively) [Note: CFR references may also be shown in this notice as : § 660.381 through § 660.384].

Changes for 2007 and 2008 include: (1) the C-shaped YRCA off northern Washington is renamed the North Coast Recreational YRCA; (2) three new YRCAs are established off the Washington coast: the North Coast Commercial YRCA, which is closed to commercial fishing; the Salmon Troll YRCA, which is closed to commercial salmon trolling; and the South Coast Recreational YRCA, which is closed to recreational fishing for groundfish and halibut; (3) a new Stonewall Bank YRCA is established off the Oregon coast and is closed to recreational fishing for groundfish and halibut; and (4) new and revised RCA coordinates approximating depth contours.

The RCAs, a depth-based management measure, continue to apply to all gears and sectors of the groundfish fishery, including the recreational sector. For the commercial fishery, there is both a trawl RCA and a non-trawl RCA depending on the gear type being used. Boundaries for the RCAs will be referred to as either the “eastern boundary,” meaning the RCA boundary that is closest to shore, or the “western boundary,” meaning the RCA boundary that is farthest offshore or seaward of the closed area. The RCA boundaries are generally defined by straight lines drawn between specific latitude and longitude coordinates that approximate depth contours. The coordinates approximating the RCA boundaries, effective for the various fishery sectors from January through December, are included at the end of this public notice and are available on our website at <http://www.nwr.noaa.gov/Groundfish-Halibut/Groundfish-Fishery-Management/Groundfish-Closed-Areas/Index.cfm> or by calling the contact names at the top of this public notice. These coordinates will be published in the *Federal Register* on December 29, 2006. All of these lines, except the 10 fm depth contour off Oregon and California and the 20 fm depth contour off California, are specifically defined in the regulations at § 660.390 through § 660.394, using latitude/longitude coordinates.

The **North Coast Recreational YRCA** is a C-shaped area off the northern Washington coast intended to protect yelloweye rockfish. These coordinates for this area have not changed since 2006. The **Farallon Islands**, off San Francisco and San Mateo Counties, include Southeast Farallon Island, Middle Farallon Island, North Farallon Island and Noon Day Rock. Generally, the State of California prohibits fishing for groundfish between the shoreline and the 10-fm (18-m) depth contour around the Farallon Islands.

The **Cordell Banks** are located offshore of California's Marin County. Generally, fishing for groundfish is prohibited in waters of depths less than 100-fm (183-m) around Cordell Banks as defined by specific latitude and longitude coordinates. These coordinates for this area have changed since 2006. The Cordell Banks closed area is defined by straight lines connecting the following specific latitude and longitude coordinates in the order listed:

- (1)  $38^{\circ} 03.18'$  N. lat.,  $123^{\circ} 20.77'$  W. long.;

- and connecting back to  $38^{\circ} 03.18'$  N. lat.,  $123^{\circ} 20.77'$  W. long.

Essential Fish Habitat (EFH) protection measures implemented area closures for specific gear types, effective June 12, 2006, called EFH Conservation areas, or **EFHCAs**. These closed areas are intended to reduce the adverse effects of fishing on groundfish EFH. The EFHCA boundaries are generally defined by straight lines drawn between specific latitude and longitude coordinates, and these coordinates may be found in §§ 660.396 through § 660.399 of the regulations.

For more information these EFHCAs, or any other groundfish closed areas, see

## Commercial Fishery

For complete regulations governing the commercial groundfish fishery, please see 50 CFR Part 660, Subpart G. For regulations specific to the limited entry trawl, limited entry fixed gear, open access fisheries, please see § 660.381, § 660.382, and § 660.383, respectively.

### **Trip Limit Tables**

The trip limit tables for 2007 and 2008 are structured similarly to those in 2006. Each trip limit table (Limited Entry Trawl, Limited Entry Fixed Gear and Open Access) is separated into a North and South table. For instance, there is Table 3 (North) for limited entry trawl trip limits north of  $40^{\circ}10'$  N. lat. to the US/Canada border, and Table 3 (South) for limited entry trawl trip limits south of  $40^{\circ}10'$  N. lat. to

the US/Mexico border. At the top of each table, the depth-based management restrictions, or RCAs, for the appropriate gear type and area are included; however, other closed areas may apply (See “Area Closures” above and “Commercial Fishery: Time and Area Closures” below). The trip limit tables included in this public notice are subject to change during the year. Any changes in the trip limits will be published in the *Federal Register* as an inseason action, and a public notice will be sent out to the fleet and posted on our website.

#### ***Time and Area Closures, including depth-based management***

There are several closed times and areas described in the trip limit tables, as well as a schedule of 2007 RCA boundaries. Both of these can be found below, at the end of the “Commercial Fishery” section. “Closure” when referring to closure of a fishery, means that taking and retaining, possessing, or landing that particular species or species group is prohibited. (See also § 660.302.) Offloading must begin before the time the fishery closes.

A header in the trip limit tables (Tables 3-5) generally describes the commercial RCAs that apply coastwide, but may not include all other closed areas.

- **Trawl RCAs.** The trawl RCAs are closed areas, defined by specific latitude and longitude coordinates designed to approximate specific depth contours, where fishing with limited entry trawl gear is prohibited. Coastwide, it is unlawful to take and retain, possess, or land any species of fish taken with trawl gear within the trawl RCA, except as permitted for vessels participating in the primary whiting season and for vessels fishing with demersal seine gear between 38°N. lat. and 36°N. lat. shoreward of a boundary line approximating the 100-fm (183-m) depth contour as provided below and defined at § 660.393. Throughout the year, boundaries for the trawl RCA are provided in Table 3 (North) and Table 3 (South) and may be modified by NMFS inseason. Trawl RCA boundaries are defined by specific latitude and longitude coordinates which are provided at §§ 660.390 through 660.394. Trawl vessels may undergo continuous transit through the trawl RCA, with or without groundfish on board, provided all groundfish trawl gear is stowed either: (1) below deck; or (2) if the gear cannot readily be moved, in a secured and covered manner, detached from all towing lines, so that it is rendered unusable for fishing; or (3) remaining on deck uncovered if the trawl doors are hung from their stanchions and the net is disconnected from the doors. These restrictions do not apply to vessels fishing with mid-water trawl gear for Pacific whiting or taking and retaining yellowtail rockfish or widow rockfish in association with Pacific whiting caught with mid-water trawl gear. If a vessel fishes in the trawl RCA, it may not participate in any fishing on that trip that is prohibited by the restrictions that apply within the trawl RCA. [For example, if a vessel participates in the pink shrimp fishery within the RCA, the vessel cannot on the same trip participate in the slope groundfish trawl fishery seaward of the RCA.] Federal regulations do not supercede any state regulations that may prohibit trawling shoreward of the 3-nm state waters boundary line.
- **Non-groundfish Trawl RCAs.** Fishing with non-groundfish trawl gear in the open access fisheries is prohibited within the non-groundfish trawl RCA coastwide, except as explained in this paragraph. Federal regulations do not supercede any state regulations that may prohibit trawling shoreward of the 3-nm state waters boundary line. Trawlers operating in the open access fisheries with legal groundfish trawl gear are considered to be operating in the non-groundfish trawl fishery and are, therefore, prohibited from fishing in the non-groundfish trawl RCA. Coastwide, it is unlawful to take and retain, possess, or land any

species of fish taken with non-groundfish trawl gear within the non-groundfish trawl RCA, except as described in this paragraph for vessels participating in the pink shrimp and ridgeback prawn trawl fisheries. Boundaries for the non-groundfish trawl RCA throughout the year in the open access fishery are provided in Table 5 (North) and Table 5 (South) and may be modified by NMFS inseason. Non-groundfish trawl RCA boundaries are defined by specific latitude and longitude coordinates which are specified below and at §§ 660.390 through 660.394. The non-groundfish trawl RCA is closed coastwide to open access non-groundfish trawl fishing, except as follows: (A) Pink shrimp trawling is permitted in the non-groundfish trawl RCA, and; (B) When the shoreward line of the non-groundfish trawl RCA is shallower than 100 fm, the ridgeback prawn trawl fishery south of 34°27.00' N. lat. may operate out to the 100 fm boundary line(i.e., the shoreward boundary of the non-groundfish trawl RCA is at the 100 fm boundary line all year for the ridgeback prawn trawl fishery in this area). If a vessel fishes in the non-groundfish trawl RCA, it may not participate in any fishing on that trip that is prohibited by the restrictions that apply within the non-groundfish trawl RCA. [For example, if a vessel participates in the pink shrimp fishery within the RCA, the vessel cannot on the same trip participate in the slope groundfish trawl fishery seaward of the RCA.]

- **Non-trawl RCAs.** Fishing for groundfish with non-trawl gear (limited entry or open access longline and pot or trap, open access hook-and-line, gillnet, set net, trammel net and spear) is prohibited within the non-trawl RCA, except that commercial fishing for “other flatfish” is permitted within the non-trawl RCA off California (between 42° N. lat. south to the U.S./Mexico border) using no more than 12 hooks, "Number 2" or smaller, which measure no more than 11 mm (0.44 inches) point to shank, and up to two 1 lb (0.45 kg) weights per line. It is unlawful to take and retain, possess, or land groundfish taken with non-trawl gear within the non-trawl RCA, unless otherwise authorized in this section. Limited entry fixed gear and open access non-trawl gear vessels may transit through the non-trawl RCA, with or without groundfish on board. These restrictions do not apply to vessels fishing for species other than groundfish or Pacific halibut with non-trawl gear, although non-trawl vessels on a fishing trip for species other than groundfish and Pacific halibut that occurs within the non-trawl RCA may not retain any groundfish taken on that trip (The Pacific halibut regulations at 50 CFR 300.63(e) describe the RCA that applies to the commercial halibut fishery). If a vessel fishes in the non-trawl RCA, it may not participate in any fishing on that trip that is prohibited by the restrictions that apply within the non-trawl RCA. [For example, if a vessel participates in the salmon troll fishery within the RCA, the vessel cannot on the same trip participate in the sablefish fishery outside of the RCA.] Retention of groundfish caught by salmon troll gear is prohibited in the non-trawl RCA, except that salmon trollers may retain yellowtail rockfish caught both inside and outside the non-trawl RCA subject to the limits in Tables 5 (North) and 5 (South) of this subpart. Boundaries for the non-trawl RCA throughout the year are provided in the header to Table 4 (North), Table 4 (South), Table 5 (North) and Table 5 (South) and may be modified by NMFS inseason. Non-trawl RCA boundaries are defined by specific latitude and longitude coordinates and are provided at §§ 660.390 through 660.394.

Off Washington's coast, the **North and South Coast Recreational YRCAs** are designated as voluntary closures for the commercial fixed gear fisheries, the **North Coast Commercial YRCA** (formerly known as the C-shaped YRCA) prohibits fishing with limited entry fixed gear and open access gear, and the **Salmon Troll YRCA** prohibits fishing with salmon troll gear.

Off California's coast, commercial fishing is generally prohibited within the CCAs. However, commercial fishing with non-trawl gear for rockfish and lingcod is permitted shoreward of the 20-fm depth contour and fishing for "other flatfish" is permitted within the CCAs using no more than 12 hooks, "Number 2" or smaller, which measure no more than 11 mm (0.44 inches) point to shank, and up to two 1-lb (0.45-kg) weights per line. It is unlawful to take and retain, possess, or land groundfish within the CCAs, except as stated above, when those waters are open to fishing. Commercial fishing vessels may transit through the Western CCA with their gear stowed and groundfish on board only in a corridor through the Western CCA bounded on the north by the latitude line at 33°00.50' N. lat., and bounded on the south by the latitude line at 32°59.50' N. lat.

Under California law, commercial fishing for all groundfish is prohibited between the shoreline and the 10 fm depth contour around the **Farallon Islands**, except that commercial fishing with non-trawl gear for "other flatfish" is permitted with non-trawl gear around the Farallon Islands using no more than 12 hooks, "Number 2" or smaller, which measure no more than 11 mm (0.44 inches) point to shank, and up to two 1-lb (0.45-kg) weights per line. (See § 660.390)

Also off California's coast, commercial fishing for groundfish is prohibited in waters of depths less than 100 fm (183 m) around **Cordell Banks**, as defined by specific latitude and longitude coordinates at § 660.390, except that commercial fishing with non-trawl gear for "other flatfish" is permitted around Cordell Banks using no more than 12 hooks, "Number 2" or smaller, which measure no more than 11 mm (0.44 inches) point to shank, and up to two 1-lb (0.45-kg) weights per line.

The **EFHCAs** are closed areas, defined by specific latitude and longitude coordinates at §§ 660.396 through 660.399, where specified types of fishing are prohibited, including commercial fishing with bottom trawl gear and bottom contact gear. Prohibitions applying to specific EFHCAs are found at § 660.306.

### **Minor Rockfish**

Minor rockfish are those species without species-specific limits. Minor rockfish species are divided into three separate landing limit groups: nearshore, shelf, and slope. Black rockfish, bocaccio, canary rockfish, chilipepper rockfish, cowcod, shortbelly rockfish, widow rockfish, yelloweye rockfish, yellowtail rockfish, darkblotched rockfish, Pacific ocean perch (POP), and splitnose rockfish are not considered "minor" rockfish and must be sorted separately from other minor rockfish species and identified by species on fish tickets. Minor rockfish must be sorted by species group and their species groups must be identified on fish tickets. Rockfish may not be listed on fish tickets as "unspecified" or "unidentified." The minor rockfish species in each species group are listed below. Species listed below are considered "minor" in the geographic area listed (north or south of 40°10' N. lat.).

#### *Minor nearshore rockfish species:*

- North of 40°10' N. lat.: black and yellow rockfish, blue rockfish, brown rockfish, calico rockfish, China rockfish, copper rockfish, gopher rockfish, grass rockfish, kelp rockfish, olive rockfish, quillback rockfish, treefish.
- South of 40°10' N. lat.: nearshore rockfish are divided into three management categories:
  - (1) Shallow nearshore rockfish consists of black and yellow rockfish, China rockfish, gopher rockfish, grass rockfish, kelp rockfish.
  - (2) Deeper nearshore rockfish consists of black rockfish, blue rockfish, brown rockfish,

rockfish, copper rockfish, olive rockfish, quillback rockfish, treefish.  
(3) California scorpionfish.

**Sorting Requirements**

It is unlawful for any person to "fail to sort, prior to the first weighing after offloading, those groundfish species or species groups for which there is a trip limit, size limit, scientific sorting designation, quota, harvest guideline, or OY, if the vessel fished or landed in an area during a time when such trip limit, size limit, scientific sorting designation, quota, harvest guideline, or OY applied." The States of Washington, Oregon, and California may also require that vessels record their landings as sorted on their state fish tickets. This provision applies to both the limited entry and open access fisheries. The following species must be sorted by species:

*For vessels with a limited entry permit:*

- *Coastwide* – widow rockfish, canary rockfish, darkblotched rockfish, yelloweye rockfish, shortbelly rockfish, black rockfish, minor nearshore rockfish, minor shelf rockfish, minor slope rockfish, shortspine and longspine thornyhead, Dover sole, arrowtooth flounder, rex sole, petrale sole, other flatfish, lingcod, sablefish, and Pacific whiting
- *North of 40°10' N. lat.* – POP, yellowtail rockfish, and, for fixed gear, blue rockfish;
- *South of 40°10' N. lat.* – minor shallow nearshore rockfish, minor deeper nearshore rockfish, California scorpionfish, chilipepper rockfish, bocaccio rockfish, splitnose rockfish, Pacific sanddabs, and cabezon.

**For open access vessels (vessels without a limited entry permit):**

- *Coastwide*--widow rockfish, canary rockfish, darkblotched rockfish, yelloweye rockfish, black rockfish, minor nearshore rockfish, minor shelf rockfish, minor slope rockfish, Dover sole, arrowtooth flounder, petrale sole, rex sole, other flatfish, lingcod, sablefish, Pacific whiting, and Pacific sanddabs;
- *North of 40°10' N. lat.*--blue rockfish, POP, yellowtail rockfish;
- *South of 40°10' N. lat.*--minor shallow nearshore rockfish, minor deeper nearshore rockfish, chilipepper rockfish, bocaccio rockfish, splitnose rockfish, and cabezon;
- *South of Point Conception, CA (34°27' N. lat.)*--thornyheads.

***Fishing in areas with Different Landing Limits for the Same Species***

Trip limits for a species or a species group may differ in different north-south management areas along the coast. The following “crossover” provisions apply to vessels operating in different geographical areas that have different cumulative or “per trip” trip limits for the same species or species group. Such crossover provisions do not apply to species that are subject only to daily trip limits, or to the trip limits for black rockfish off Washington (see § 660.371).

During the fishing year, NMFS may implement management measures for a species or species group that set different types of trip limits (*for example, per trip limits versus cumulative trip limits*) for different areas. If a vessel fishes for a species or species group that is managed with different types of trip limits in two different areas within the same cumulative limit period, then that vessel is subject to the most restrictive overall cumulative limit for that species, regardless of where fishing occurs.

If a vessel takes and retains any groundfish species or species group of groundfish in an area where a more restrictive trip limit applies, before fishing in an area where a more liberal trip limit (or no trip limit) applies, then that vessel is subject to the more restrictive trip limit for the entire period to which that trip limit applies, no matter where the fish are taken and retained, possessed, or landed. If a vessel takes and retains a groundfish species or species group in an area where a higher trip limit (or no trip limit applies) and takes and retains, possess or lands the same species or species group in an area where a more restrictive trip limit applies, then that vessel is subject to the more restrictive trip limit for the entire period to which that trip limit applies, no matter where the fish are taken and retained, possessed, or landed.

If a vessel takes and retains minor slope rockfish north of 40°10' N. lat., that vessel is also permitted to take and retain, possess or land splitnose rockfish up to its cumulative limit south of 40°10' N. lat., even if splitnose rockfish were a part of the landings from minor slope rockfish taken and retained north of 40°10' N. lat. If a vessel takes and retains minor slope rockfish south of 40°10' N. lat., that vessel is also permitted to take and retain, possess or land POP up to its cumulative limit north of 40°10' N. lat., even if POP were a part of the landings from minor slope rockfish taken and retained south of 40°10' N. lat. If a trawl vessel takes and retains minor shelf rockfish south of 40°10' N. lat., that vessel is also permitted to take and retain, possess, or land yellowtail rockfish up to its cumulative limits north of 40°10' N. lat., even if yellowtail rockfish is part of the landings from minor shelf rockfish taken and retained south of 40°10' N. lat. Yellowtail rockfish is included in overall shelf rockfish limits for limited entry fixed gear and open access gear groups. Widow rockfish is included in overall shelf rockfish limits for all gear groups. If a trawl vessel takes and retains minor shelf rockfish north of 40°10' N. lat., that vessel is also permitted to take and retain, possess, or land chilipepper rockfish up to its cumulative limits south of

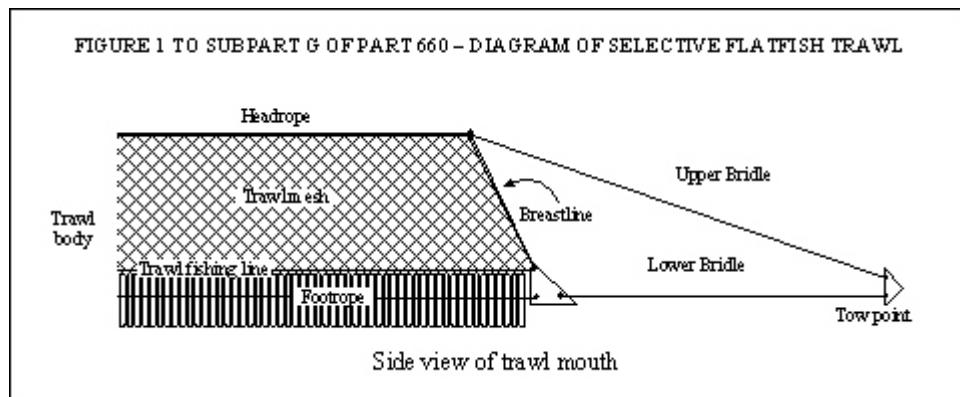

40°10' N. lat., even if chilipepper rockfish is part of the landings from minor shelf rockfish taken and retained north of 40°10' N. lat.

Vessels operating in the limited entry trawl fishery are subject to these crossover provisions when making landings that include any one of the four species in the “DTS complex” (Dover sole, thornyheads, and sablefish) or any of the species in the flatfish complex. (See limited entry trawl trip limit tables below.) Several rockfish species are designated with species-specific limits on one side of the 40°10' N. lat. management line, and are included as part of a minor rockfish complex on the other side of the line. A vessel that takes and retains fish from a minor rockfish complex (nearshore, shelf, or slope) on both sides of a management line during a single cumulative limit period is subject to the more restrictive cumulative limit for that minor rockfish complex during that period.

### **Limited Entry Trawl Gear**

For more detailed regulations applying to the limited entry trawl fishery, see § 660.381 of the Pacific Coast groundfish regulations. The limited entry trawl trip limit tables below, Table 3 (North) and Table 3 (South), describe limits for four different types of limited entry trawl gear (large footrope gear, small footrope gear, selective flatfish trawl gear and midwater gear). Large footrope gear is bottom trawl gear with a footrope diameter larger than 8 inches (20 cm) (including rollers, bobbins or other material encircling or tied along the length of the footrope). Small footrope gear is bottom trawl gear with a footrope diameter of 8 inches (20 cm) or smaller (including rollers, bobbins or other material encircling or tied along the length of the footrope).

Other lines or ropes that run parallel to the footrope may not be augmented such that they have a diameter larger than 8 inches (20 cm). For enforcement purposes, the footrope will be measured in a straight line from the outside edge to the opposite outside edge at the widest part on any individual part, including any individual disk, roller, bobbin, or any other device. Selective flatfish trawl gear is a type of small footrope trawl gear. The selective flatfish trawl net must be a two-seamed net with no more than two riblines, excluding the codend. The breastline may not be longer than 3 ft (0.92 m) in length. There may be no floats along the center third of the selective flatfish trawl net’s headrope or attached to the top panel except on the riblines. The headrope must be at least 30 percent longer in length than the footrope. Selective flatfish trawl gear may not have a footrope that is longer than 105 ft (32.26 m) in length. Midwater trawl gear must have unprotected footropes at the trawl mouth, and must not have rollers, bobbins, tires, wheels, rubber discs, or any similar device anywhere on any part of the net. The footrope of midwater gear may not be enlarged by encircling it with chains or by any other means. Ropes or lines running parallel to the footrope of midwater trawl gear must be bare and may not be suspended with chains or any other materials. Sweep lines, including the bottom leg of the bridle, must be bare. For at least 20 ft (6.15 m) immediately behind the footrope or headrope, bare ropes or mesh of 16-inch (40.6-cm) minimum mesh size must completely encircle the net. A band of mesh (a “skirt”) may encircle the net under transfer cables, lifting or splitting straps (chokers). However, the skirt

must be over riblines and restraining straps, it must be the same mesh size and coincide knot-to-knot with the net to which it is attached, and it must be no wider than 16 meshes.

All trawl nets may be fished with or without otter boards, and may use warps or cables to herd fish. Only single-walled codends may be used in any trawl. Double-walled codends are prohibited. Groundfish trawl gear must meet minimum mesh size requirements. Mesh size requirements apply throughout the net. Minimum trawl mesh sizes are: bottom trawl, 4.5 inches (11.4 cm); midwater trawl, 3.0 inches (7.6 cm). Minimum trawl mesh size requirements are met if a 20-gauge stainless steel wedge, less one thickness of the metal wedge, can be passed with only thumb pressure through at least 16 of 20 sets of two meshes each of wet mesh. Chafing gear may encircle no more than 50 percent of the net's circumference, and no section of chafing gear may be longer than 50 meshes of the net to which it is attached. Chafing gear may be used only on the last 50 meshes, measured from the terminal (closed) end of the codend. Except at the corners, the terminal end of each section of chafing gear must not be connected to the net. (The terminal end is the end farthest from the mouth of the net.) Chafing gear must be attached outside any riblines and restraining straps. There is no limit on the number of sections of chafing gear on a net.

It is unlawful for any vessel using large footrope gear to fish for groundfish shoreward of the trawl RCAs. The use of large footrope gear is permitted seaward of the trawl RCAs coastwide. The use of selective flatfish trawl gear is permitted seaward of the trawl RCA coastwide. Small footrope gear is permitted seaward of the RCA coastwide. North of 40°10' N. lat., it is unlawful for any vessel using small footrope gear (except selective flatfish gear) to fish for groundfish or have small footrope trawl gear (except selective flatfish gear) onboard while fishing shoreward of the trawl RCA. Selective flatfish gear is required shoreward of the trawl RCA north of 40°10' N. lat. North of 40°10' N. Lat., midwater trawl gear is permitted only for vessels participating in the primary Pacific whiting fishery (for details on the Pacific whiting fishery see § 660.373). South of 40°10' N. lat., small footrope gear is required shoreward of the RCA. Selective flatfish gear is permitted, but not required, shoreward of the trawl RCA. The use of midwater trawl gear is prohibited shoreward of the trawl RCA and permitted seaward of the trawl RCA.

#### *More than one type of trawl gear onboard*

A vessel that is trawling within a Groundfish Conservation Area (GCA), or closed area, with trawl gear authorized for use within a GCA may not have any other type of trawl gear on board

North of 40°10' N. lat.: A vessel may have more than one type of limited entry trawl gear on board, either simultaneously or successively, during a cumulative limit period. If a vessel fishes exclusively with selective flatfish trawl gear during an entire cumulative limit period, then the vessel is subject to the selective flatfish trawl gear cumulative limits during that limit period, regardless of whether the vessel is fishing shoreward or seaward of the RCA. If a vessel fishes exclusively with large or small footrope trawl gear during an entire cumulative limit period, the vessel is subject to the small or large footrope trawl gear cumulative limits and that vessel must fish seaward of the RCA during that limit period. If more than one type of bottom trawl gear (selective flatfish, large footrope, or small footrope) is on board, either simultaneously or successively, at any time during a cumulative limit period, then the most restrictive cumulative limit associated with the bottom trawl gears on board during that cumulative limit period applies for the entire cumulative limit period, regardless of whether the vessel is fishing shoreward or seaward of the RCA. Midwater trawl gear is allowed only for vessels participating in the

primary whiting season. On non-whiting trips (defined as any fishing trip that takes, retains, possess, or lands less than 10,000 lb (4,536 kg) of whiting), vessels with both large footrope and midwater trawl gear on board during a trip may access the large footrope limits while fishing with large footrope gear seaward of the trawl RCA. Table 3 North provides trip limits for vessels that use multiple types of bottom trawl gear within the same cumulative limit period.

South of 40°10' N. lat.: A vessel may have more than one type of limited entry trawl gear on board, but the most restrictive trip limit associated with the gear on board applies for that trip and will count toward the cumulative limit for that gear. If a vessel has small footrope trawl gear on board, then it may not have any other trawl gear on board. For vessels using more than one type of trawl gear during a cumulative limit period, limits are additive up to the largest limit for the type of gear used during that period. (*Example: If a vessel harvests 300 lb (136 kg) of chilipepper rockfish with small footrope gear, it may harvest up to 11,700 lb (5,209 kg) of chilipepper rockfish with large footrope gear during July and August.*) If a vessel fishes north of 40°10' N. lat. with either selective flatfish or small footrope gear onboard the vessel at any time during the cumulative limit period, the most restrictive trip limit associated with the gear on board applies for that trip and will count toward the cumulative trip limit for that gear.

#### **Limited Entry Fixed Gear**

For more detailed regulations applying to the limited entry fixed gear fishery, see § 660.382 of the Pacific Coast groundfish regulations. The limited entry fixed gear trip limit tables are listed below, Table 4 (North) and Table 4 (South). The following types of fishing gear are authorized in the limited entry fixed gear fishery: longline and pot or trap. Vessels participating in the limited entry fixed gear fishery may also fish with open access gear subject to the gear restrictions at § 660.383(b), but will be subject to the most restrictive trip limits for the gear used. The trip limit for black rockfish caught with hook-and-line gear also applies, see “Black Rockfish” below or § 660.371 of the regulations.

#### **Limited Entry Fixed Gear Primary Sablefish Fishery**

For more detailed regulations applying to the limited entry fixed gear primary sablefish fishery, see § 660.372 of the Pacific Coast groundfish regulations. The limited entry fixed gear primary sablefish fishery occurs north of 36° N. lat. beginning at 12 noon local time on April 1 and ending at 12 noon local time on October 31, unless NMFS takes inseason action. If a vessel is registered for use with a sablefish-endorsed limited entry permit, all sablefish taken after the start of the primary season count against the cumulative limits associated with the permit(s) registered for use with that vessel.

A vessel participating in the primary season will be constrained by the sablefish cumulative limit associated with each of the permits registered for use with that vessel. During the primary season, each vessel authorized to participate in that season may take, retain, possess, and land sablefish, up to the cumulative limits for each of the permits registered for use with that vessel. If multiple limited entry permits with sablefish endorsements are registered for use with a single vessel, that vessel may land up to the total of all cumulative limits announced in this paragraph for the tiers for those permits, unless the permit is registered to more than one vessel during the primary season. If a permit is registered to more than one vessel during the primary season in a single year, the second vessel may only take the portion of the cumulative limit for that permit that has not been harvested by the first vessel to which the permit was registered. The combined primary season sablefish landings for all vessels registered to that permit may not exceed the cumulative limit for the tier associated with that permit. Up to 3 permits may be registered for use with a single vessel during the primary season; thus, a single vessel may not take and

retain, possess or land more than 3 primary season sablefish cumulative limits in any one year. A vessel registered for use with multiple limited entry permits is subject to per vessel limits for species other than sablefish, and to per vessel limits when participating in the daily trip limit fishery for sablefish. The following annual limits are in effect: **Tier 1 at 48,500 lb (21,999 kg), Tier 2 at 22,000 lb (9,979 kg), and Tier 3 at 12,500 lb (5,670 kg)**.

Any person who owns or has ownership interest in a limited entry permit with a sablefish endorsement must be on board the vessel registered for use with that permit at any time that the vessel has sablefish on board the vessel that count toward that permit's cumulative sablefish landing limit. A permit owner is not obligated to be on board the vessel registered for use with the sablefish-endorsed limited entry permit during the primary sablefish season if:

- The person, partnership or corporation had ownership interest in a limited entry permit with a sablefish endorsement prior to November 1, 2000. A person who has ownership interest in a partnership or corporation that owned a sablefish-endorsed permit as of November 1, 2000, but who did not individually own a sablefish-endorsed limited entry permit as of November 1, 2000, is not exempt from the owner-on-board requirement when he/she leaves the partnership or corporation and purchases another permit individually. A person, partnership, or corporation that is exempt from the owner-on-board requirement may sell all of their permits, buy another sablefish-endorsed permit within up to a year from the date the last permit was approved for transfer, and retain their exemption from the owner-on-board requirements. Additionally, a person, partnership, or corporation that qualified for the owner-on-board exemption, but later divested their interest in a permit or permits, may retain rights to an owner-on-board exemption as long as that person, partnership, or corporation purchases another permit by March 2, 2007. A person, partnership or corporation could only purchase a permit if it has not added or changed individuals since November 1, 2000, excluding individuals that have left the partnership or corporation, or that have died.
- The person who owns or who has ownership interest in a sablefish-endorsed limited entry permit is prevented from being on board a fishing vessel because the person died, is ill, or is injured. The person requesting the exemption must send a letter to NMFS requesting an exemption from the owner-on-board requirements, with appropriate evidence.

A vessel that is eligible to participate in the primary sablefish season may participate in the daily trip limit fishery for sablefish once that vessel's primary season sablefish limit(s) have been taken, or after the end of the primary season, whichever occurs first. No vessel may land sablefish against both its primary season cumulative sablefish limits and against the daily trip limit fishery limits within the same 24 hour period of 0001 hour local time to 2400 hours local time. If a vessel has taken all of its tier limit except for an amount that is smaller than the daily trip limit amount, that vessel's subsequent sablefish landings are automatically subject to daily and/or weekly trip limits.

#### *Sablefish Daily Trip Limit Fishery*

Vessels registered for use with a limited entry, fixed gear permit that does not have a sablefish endorsement may participate in the limited entry, daily and/or weekly trip limit fishery for as long as that fishery is open during the year. Daily and/or weekly trip limits for the limited entry fishery north and south of 36° N. lat. are provided in Tables 4 (North) and 4 (South). A vessel landing sablefish under the daily limit may take multiple daily limits within the same week as long as the cumulative monthly or two-month landings limit for sablefish is not exceeded. [For example, if the limits read, "300 lb/day, or

*1 landing per week of up to 1,000 lb, not to exceed 5,000 lb/2 months" and a vessel fishing with nontrawl gear were to land 300 lb of sablefish on a Sunday, and then land 400 lb of sablefish on the Monday of the same week, then 100 lb of the second landing would be deemed an unlawful landing in excess of a 300 lb daily limit; the vessel would be prohibited from landing any more sablefish during the rest of that week.] A vessel landing sablefish under the weekly limit may make only one landing of sablefish per week (Sunday through Saturday) and may not exceed the monthly or two-month landings limit for sablefish. If a vessel makes a landing in excess of the daily trip limit, then that vessel is considered to be participating in the fishery under the weekly limit and is subject to the constraints of the weekly limit fishery. [For example, if a vessel fishing with nontrawl gear were to land 400 lb of sablefish on a Sunday, that vessel would have exceeded a daily limit of 300 lb and not be eligible to land any further sablefish that week even though that vessel had not achieved the full weekly limit.] If a week falls between two cumulative limit periods, a vessel is not entitled to take two separate weekly limits within the same calendar week.*

### ***Open Access Fisheries***

For more detailed regulations applying to the open access fisheries, see § 660.383 of the Pacific Coast groundfish regulations. The open access trip limit tables are listed below, Table 5 (North) and Table 5 (South), which includes trip limits and RCAs for open access non-trawl gear and non-groundfish trawl gear. Open access gear is gear used to take and retain groundfish from a vessel that is not registered for use with a limited entry permit for the Pacific Coast groundfish fishery with an endorsement for the gear used to harvest the groundfish. This includes longline, trap, pot, hook-and-line (fixed or mobile), setnet (anchored gillnet or trammel net, which are permissible south of 38° N. lat. only), spear and non-groundfish trawl gear (trawls used to target non-groundfish species: pink shrimp or ridgeback prawns, and, south of Pt. Arena, CA (38° 57.50' N. lat.), California halibut or sea cucumbers).

#### ***Open Access Non-groundfish Trawl Gear***

The trip limits for groundfish taken incidentally with exempted trawl gear by vessels engaged in fishing for pink shrimp, ridgeback prawns, California halibut, or sea cucumbers are included at the bottom of the open access trip limit tables, Table 5 (North) and Table 5 (South) (see below). In addition to the groundfish trip limits for non-groundfish trawl fisheries at the bottom of the open access tables, the other trip limits in the open access tables also apply. A vessel that takes and retains pink shrimp and also takes and retains groundfish in either the limited entry or open access fishery during the same applicable cumulative limit period (which may be 1 month or 2 months, depending on the fishery and the time of year), may retain the larger of the 2 limits, but only if the limit(s) for each gear or fishery are not exceeded when operating in that fishery or with that gear. The limits are not additive; the vessel may not retain a separate trip limit for each fishery.

#### ***Open Access Non-Trawl Gear***

The trip limit for black rockfish caught with hook-and-line gear also applies, see "Black Rockfish" below or § 660.371 of the regulations. Open access vessels may participate in the open access, daily trip limit sablefish fishery for as long as that fishery is open during the year. Daily and/or weekly trip limits for the open access fishery north and south of 36° N. lat. are provided in Tables 5 (North) and 5 (South). A vessel landing sablefish under the daily limit may take multiple daily limits within the same week as long as the cumulative monthly or two-month landings limit for sablefish is not exceeded. [For example, if the limits read, "300-lb/day, or 1 landing per week of up to 700 lb, not to exceed 2,100 lb/2 months" and a vessel fishing with open access nontrawl gear were to land 300 lb of sablefish on a

*Sunday, and then land 400 lb of sablefish on the Monday of the same week, then 100 lb of the second landing would be deemed an unlawful landing in excess of a 300-lb daily limit; the vessel would be prohibited from landing any more sablefish during the rest of that week.] A vessel landing sablefish under the weekly limit may make only one landing of sablefish per week (Sunday through Saturday) and may not exceed the monthly or two-month landings limit for sablefish. If a vessel makes a landing in excess of the daily trip limit, then that vessel is considered to be participating in the fishery under the weekly limit and is subject to the constraints of the weekly limit fishery. [For example, if a vessel fishing with nontrawl gear were to land 400 lb of sablefish on a Sunday, that vessel would have exceeded a daily limit of 300 lb and not be eligible to land any further sablefish that week even though that vessel had not achieved the full weekly limit.] If a week falls between two cumulative limit periods, a vessel is not entitled to take two separate weekly limits within the same calendar week.*

### ***Black Rockfish***

The trip limit for black rockfish for commercial fishing vessels using hook-and-line gear between the U.S.-Canada border and Cape Alava ( $48^{\circ}09.50'$  N. lat.), and between Destruction Island ( $47^{\circ}40'$  N. lat.) and Leadbetter Point ( $46^{\circ}38.17'$  N. lat.), is 100 lbs or 30 percent, by weight of all fish on board, whichever is greater, per vessel per fishing trip. These per trip limits apply to limited entry and open access fisheries, in conjunction with the cumulative trip limits and other management measures in §§ 660.382 and 660.383. The crossover provisions do not apply to the black rockfish per-trip limits.

<sup>1/</sup> Bocaccio, chilipepper and cowcod are included in the trip limits for minor shelf rockfish.<sup>2/</sup> Spinydog rockfish is included in the trip limits for minor slope rockfish.<sup>3/</sup> "Other flatfish" are defined at § 660.302 and include butter sole, curtin sole, flathead sole, Pacific sanddab, rex sole, rock sole, and sand sole.<sup>4/</sup> The minimum size limit for lingcod is 24 inches (61 cm) total length.<sup>5/</sup> "Other fish" are defined at § 660.302 and include sharks, skates, ratfish, mordids, grenadiers, and kelp greenling.

Cabezon is included in the trip limits for "other fish".

<sup>6/</sup> The Rockfish Conservation Area is a gear and/or sector specific closed area generally described by depth contours but specifically defined by lat/long coordinates set out at § 660.390.<sup>7/</sup> The "modified 250 fm" line is modified to exclude certain petrale sole areas from the RCA.<sup>8/</sup> If a vessel has both selective flatfish gear and large or small footrope gear on board during a cumulative limit period (either simultaneously or successively), the most restrictive cumulative limit for any gear on board during the cumulative limit period applies for the entire cumulative limit period.

The amount of groundfish landed may not exceed the amount of the target species landed, except that the amount of spiny dogfish landed may exceed the amount of target species landed. Spiny dogfish are limited by the 300 lb/trip overall groundfish limit. The daily trip limits for sablefish coastwide and thomyheads south of Pt. Conception and the overall groundfish "per trip" limit may not be multiplied by the number of days of the trip. Vessels participating in the California halibut fishery south of 38°57'50" N. lat. are allowed to (1) land up to 100 lb/day of groundfish without the ratio requirement, provided that at least one California halibut is landed and (2) land up to 3,000 lb/month of flatfish, no more than 300 lb of which may be species other than Pacific sanddabs, sand sole, starry flounder, rock sole, curfin sole, or California scorpionfish (California scorpionfish is also subject to the trip limits and closures in line 31). |  |  |

The following sublimits also apply and are counted toward the overall 500 lb/day and 1,500 lb/trip groundfish limits: ling cod 300 lb/month (minimum 24 inch size limit); sablefish 2,000 lb/month; canary, thomyheads and yelloweye rockfish are PROHIBITED. All other groundfish species taken are managed under the overall 500 lb/day and 1,500 lb/trip groundfish limits. Landings of these species count toward the per day and per trip groundfish limits and do not have species-specific limits. The amount of groundfish landed may not exceed the amount of pink shrimp landed.  |  |  |

1/ Yellowtail rockfish is included in the trip limits for minor shelf rockfish and POP is included in the trip limits for minor slope rockfish.

2/ "Other flatfish" are defined at § 660.302 and include butter sole, curfin sole, flathead sole, Pacific sanddab, rex sole, rock sole, and sand sole.

3/ The size limit for lingcod is 24 inches (61 cm) total length.

4/ "Other fish" are defined at § 660.302 and include sharks, skates, ratfish, morids, grenadiers, and kelp greenling.

5/ The Rockfish Conservation Area is a gear and/or sector specific closed area generally described by depth contours but specifically defined by lat/long coordinates set out at § 660.390, except that the 20-fm depth contour off California is defined by the depth contour and not coordinates.

6/ The "modified 200 fm" line is modified to exclude certain petrale sole areas from the RCA.

## **Recreational Fishery**

---

Federal recreational groundfish regulations are not intended to supersede any more restrictive state recreational groundfish regulations relating to federally-managed groundfish. The bag limits include fish taken in both state and Federal waters. The only types of fishing gear authorized for recreational fishing are hook-and-line and spear. Off the coast of Washington, Oregon, and California, boat limits apply, whereby each fisher aboard a vessel may continue to use angling gear until the combined daily limits of groundfish for all licensed and juvenile anglers aboard has been attained (additional state restrictions on boat limits may apply). A guide to the recreational fishery closed areas for the year is at the end of this “Recreational Fishery” section.

### ***Washington Recreational Regulations***

For each person engaged in recreational fishing seaward of Washington, the groundfish bag limit is 15 groundfish per day, including rockfish and lingcod, and is open year-round (except for lingcod). South of Leadbetter Point, WA to the Washington/Oregon border, when Pacific halibut are onboard the vessel, no groundfish may be taken and retained, possessed or landed, except sablefish and Pacific cod. The following sublimits and closed areas apply:

#### ***Recreational Groundfish Conservation Areas off Washington.***

- *North Coast Recreational YRCA.* Recreational fishing for groundfish and halibut is prohibited within the North Coast Recreational Yelloweye Rockfish Conservation Area (YRCA). It is unlawful for recreational fishing vessels to take and retain, possess, or land groundfish taken with recreational gear within the North Coast Recreational YRCA. A vessel fishing in the North Coast Recreational YRCA may not be in possession of any groundfish. Recreational vessels may transit through the North Coast Recreational YRCA with or without groundfish on board. The North Coast Recreational YRCA is defined by latitude and longitude coordinates specified above under “Area Closures” and at § 660.390 in the regulations.
- *South Coast Recreational YRCA.* Recreational fishing for groundfish and halibut is prohibited within the South Coast Recreational YRCA. It is unlawful for recreational fishing vessels to take and retain, possess, or land groundfish taken with recreational gear within the South Coast Recreational YRCA. A vessel fishing in the South Coast Recreational YRCA may not be in possession of any groundfish. Recreational vessels may transit through the South Coast Recreational YRCA with or without groundfish on board. The South Coast Recreational YRCA is defined by latitude and longitude coordinates specified above under “Area Closures” and at § 660.390 in the regulations.
- *Recreational RCA.* Fishing for groundfish with recreational gear is prohibited within the recreational RCA. It is unlawful to take and retain, possess, or land groundfish taken with recreational gear within the recreational RCA. A vessel fishing in the recreational RCA may not be in possession of any groundfish. [For example, if a vessel participates in the recreational salmon fishery within the RCA, the vessel cannot be in possession of groundfish while in the RCA. The vessel may, however, on the same trip fish for and retain groundfish shoreward of the RCA on the return trip to port.]

Between the U.S. border with Canada and the Queets River, recreational fishing for groundfish is prohibited seaward of a boundary line approximating the 20-fm (37-m) depth contour from May 1 through September 30, except on days when the

Pacific halibut fishery is open in this area. Days open to Pacific halibut recreational fishing off Washington are announced on the NMFS hotline at (206)526-6667 or (800)662-9825. Coordinates for the boundary line approximating the 20-fm (37-m) depth contour are listed below and in § 660.391. Between the Queets River and Leadbetter Point, recreational fishing for groundfish is prohibited seaward of a boundary line approximating the 30-fm (55-m) depth contour in from March 17, 2007, through July 31, 2007, except that recreational fishing for sablefish and Pacific cod is permitted within the recreational RCA from May 1 through June 15. In 2008, recreational fishing for groundfish is prohibited seaward of a boundary line approximating the 30-fm (55-m) depth contour in from March 15, 2008, through July 31, 2008, except that recreational fishing for sablefish and Pacific cod is permitted within the recreational RCA from May 1 through June 15. Coordinates for the boundary line approximating the 30-fm (55-m) depth contour are listed below and in § 660.391.

**Rockfish.** In areas seaward of Washington that are open to recreational groundfish fishing, there is a 10 rockfish per day bag limit. Taking and retaining canary rockfish and yelloweye rockfish is prohibited.

**Lingcod.** In areas seaward of Washington that are open to recreational groundfish fishing and when the recreational season for lingcod is open, there is a bag limit of 2 lingcod per day, which may be no smaller than 22 in (56 cm) total length. The recreational fishing season for lingcod is open as follows:

Between the U.S./Canada border to 48°10' N. lat. (Cape Alava) (Washington Marine Area 4), recreational fishing for lingcod is open, for 2007, from April 15 through October 13, and for 2008, from April 15 through October 15.

Between 48°10' N. lat. (Cape Alava) and 46°16' N. lat. (Washington/Oregon border) (Washington Marine Areas 1-3), recreational fishing for lingcod is open for 2007, from March 17 through October 13, and for 2008, from March 15 through October 18.

## **Oregon Recreational Regulations**

**Recreational Groundfish Conservation Areas off Oregon.** Fishing for groundfish with recreational gear is prohibited within the recreational RCA, a type of closed area or GCA. It is unlawful to take and retain, possess, or land groundfish taken with recreational gear within the recreational RCA. A vessel fishing in the recreational RCA may not be in possession of any groundfish. [For example, if a vessel participates in the recreational salmon fishery within the RCA, the vessel cannot be in possession of groundfish while in the RCA. The vessel may, however, on the same trip fish for and retain groundfish shoreward of the RCA on the return trip to port.] Off Oregon, from June 1 through September 30, recreational fishing for groundfish is prohibited seaward of a recreational RCA boundary line approximating the 40 fm depth contour. Coordinates for the boundary line approximating the 40 fm depth contour are listed below and at § 660.391 in the regulations. Recreational fishing for all groundfish may be prohibited inseason seaward of the 20 fm depth contour or a boundary line approximating the 30 fm depth contour. If the closure seaward of the 20 fm depth contour or a boundary line approximating the 30 fm depth contour is implemented inseason, a document will be published

in the Federal Register. Coordinates for the boundary line approximating the 30 fm depth contour are listed below and at § 660.391 in the regulations.

- *Stonewall Bank YRCA*. Recreational fishing for groundfish and halibut is prohibited within the Stonewall Bank YRCA. It is unlawful for recreational fishing vessels to take and retain, possess, or land groundfish taken with recreational gear within the Stonewall Bank YRCA. A vessel fishing in the Stonewall Bank YRCA may not be in possession of any groundfish. Recreational vessels may transit through the Stonewall Bank YRCA with or without groundfish on board. The Stonewall Bank YRCA is defined by latitude and longitude coordinates specified above under “Area Closures” and at § 660.390 in the regulations.
- *Recreational RCA*. Fishing for groundfish with recreational gear is prohibited within the recreational RCA, a type of closed area or GCA. It is unlawful to take and retain, possess, or land groundfish taken with recreational gear within the recreational RCA. A vessel fishing in the recreational RCA may not be in possession of any groundfish. [For example, if a vessel participates in the recreational salmon fishery within the RCA, the vessel cannot be in possession of groundfish while in the RCA. The vessel may, however, on the same trip fish for and retain groundfish shoreward of the RCA on the return trip to port.] Off Oregon, from April 1 through September 30, recreational fishing for groundfish is prohibited seaward of a recreational RCA boundary line approximating the 40–fm (73–m) depth contour. Coordinates for the boundary line approximating the 40–fm (73–m) depth contour are listed below and at § 660.391 in the regulations.
- *EFHCA*. The Essential Fish Habitat Conservation Areas (EFHCAs) are closed areas, defined by specific latitude and longitude coordinates at §§ 660.396 through 660.399, where specified types of fishing are prohibited. Prohibitions applying to specific EFHCAs are found at § 660.306. Information on an EFHCA near President Jackson Seamount that applies to the recreational fishery off Oregon can be found at § 660.306.

**Seasons.** Recreational fishing for groundfish is open from January 1 through December 31, subject to the closed areas described above.

**Bag Limits, Size Limits.** The bag limits for each person engaged in recreational fishing in the EEZ seaward of Oregon are two lingcod per day, which may be no smaller than 22 in (56 cm) total length; and 8 marine fish per day, which excludes Pacific halibut, salmonids, tuna, perch species, sturgeon, sanddabs, flatfish, lingcod, striped bass, hybrid bass, offshore pelagic species and baitfish (herring, smelt, anchovies and sardines), but which includes rockfish, greenling, cabezon and other groundfish species. The bag limit for all flatfish is 25 fish per day, which excludes Pacific halibut, but which includes all soles, flounders and Pacific sanddabs. In the Pacific halibut fisheries, retention of groundfish is governed in part by annual management measures for Pacific halibut fisheries, which are published in the *Federal Register*. Between the Oregon border with Washington and Cape Falcon, when Pacific halibut are onboard the vessel, groundfish may not be taken and retained, possessed or landed, except sablefish and Pacific cod. Between Cape Falcon and Humbug Mountain, during days open to the Oregon Central Coast “all-depth” sport halibut fishery, when Pacific halibut are onboard the vessel, no groundfish may be taken and retained, possessed or landed, except sablefish. “All-depth” season days are established in the annual management measures for Pacific halibut fisheries, which are published in the *Federal Register* and are announced on the NMFS halibut hotline, 1–800–662–9825. The minimum size limit for cabezon retained in the recreational fishery is 16

in (41 cm), and for greenling is 10 in (26 cm). Taking and retaining canary rockfish and yelloweye rockfish is prohibited at all times and in all areas.

### ***California Recreational Regulations***

Seaward of California, California law provides that, in times and areas when the recreational fishery is open, there is a 20-fish bag limit for all species of finfish, within which no more than 10 fish of any one species may be taken or possessed by any one person. [Note: There are some exceptions to this rule.

*The following groundfish species are not subject to a bag limit: petrale sole, Pacific sanddab and starry flounder.]* For groundfish species not specifically mentioned in this paragraph, fishers are subject to the overall 20-fish bag limit for all species of finfish and the depth restrictions listed below. Recreational spearfishing for all federally-managed groundfish, except lingcod during January, February, March, and December, is exempt from closed areas and seasons, consistent with Title 14 of the California Code of Regulations. This exemption applies only to recreational vessels and divers provided no other fishing gear, except spearfishing gear, is on board the vessel. California state law may provide regulations similar to Federal regulations for the following state-managed species: ocean whitefish, California sheephead, and all greenlings of the genus Hexagrammos. Kelp greenling is the only federally-managed greenling. Retention of cowcod, yelloweye rockfish, and canary rockfish is prohibited in the recreational fishery seaward of California all year in all areas. For each person engaged in recreational fishing in the EEZ seaward of California, the following closed areas, seasons, bag limits, and size limits apply:

#### ***Recreational Groundfish Conservation Areas off California.***

- *Recreational RCAs.* The recreational RCAs are areas that are closed to recreational fishing for groundfish. Fishing for groundfish with recreational gear is prohibited within the recreational RCA, except that recreational fishing for "other flatfish" is permitted within the recreational RCA as specified in the paragraph on "other flatfish" below. It is unlawful to take and retain, possess, or land groundfish taken with recreational gear within the recreational RCA, unless otherwise described in this section. A vessel fishing in the recreational RCA may not be in possession of any species prohibited by the restrictions that apply within the recreational RCA. [For example, if a vessel participates in the recreational salmon fishery within the RCA, the vessel cannot be in possession of rockfish while in the RCA. The vessel may, however, on the same trip fish for and retain rockfish shoreward of the RCA on the return trip to port.]

Between 42°N. lat. (California/Oregon border) and 40°10.00' N. lat. (North Region), recreational fishing for all groundfish (except "other flatfish" as specified below) is prohibited seaward of a boundary line approximating the 30-fm (55-m) depth contour along the mainland coast and along islands and offshore seamounts from May 1 through December 31; and is closed entirely from January 1 through April 30 (i.e., prohibited seaward of the shoreline). Coordinates for the boundary line approximating the 30-fm (55-m) depth contour are specified below and in § 660.391 of the regulations.

Between 40°10' N. lat. and 37°11' N. lat. (North Central Region), recreational fishing for all groundfish (except "other flatfish" as specified below) is prohibited seaward of the 30-fm (55-m) depth contour along the mainland coast and along islands and offshore seamounts from June 1 through November 30; and is closed entirely from January 1 through May 31 and from December 1 - 31 (i.e., prohibited seaward of the shoreline). Closures around the Farallon Islands (see "Area Closures" above) and Cordell Banks (see "Area Closures" above) also apply in this area.

Between 37°11' N. lat. and 34°27' N. lat. (South Central Regions - Monterey and Morro Bay), recreational fishing for all groundfish (except "other flatfish" as specified below) is prohibited seaward of a boundary line approximating the 40-fm (73-m) depth contour along the mainland coast and along islands and offshore seamounts from May 1 through November 30; and is closed entirely from January 1 through April 30 and from December 1 - 31 (i.e., prohibited seaward of the shoreline). Coordinates for the boundary line approximating the 40-fm (73-m) depth contour are specified below and in § 660.391 of the regulations.

South of 34°27' N. latitude (South Region), recreational fishing for all groundfish (except California scorpionfish as specified below and "other flatfish" as specified below) is prohibited seaward of a boundary line approximating the 60-fm (110-m) depth contour from March 1 through December 31 along the mainland coast and along islands and offshore seamounts, except in the CCAs where fishing is prohibited seaward of the 20-fm (37-m) depth contour when the fishing season is open. Recreational fishing for all groundfish (except California scorpionfish and "other flatfish") is closed entirely from January 1 through February 28 (i.e., prohibited seaward of the shoreline). Recreational fishing for California scorpionfish south of 34°27' N. lat. is prohibited seaward of a boundary line approximating the 40-fm (73-m) depth contour from January 1 through February 28, and seaward of the 60-fm (110-m) depth contour from March 1 through December 31, except in the CCAs where fishing is prohibited seaward of the 20-fm (37-m) depth contour when the fishing season is open. Coordinates for the boundary line approximating the 40-fm (73-m) and 60-fm (110-m) depth contours are specified below and in §§ 660.391 and 660.392 of the regulations.

- Cowcod Conservation Areas (CCAs). The latitude and longitude coordinates of the Cowcod Conservation Areas (CCAs) boundaries are specified above in "Area Closures" and at § 660.390 of the regulations. In general, recreational fishing for all groundfish is prohibited within the CCAs, except that fishing for "other flatfish" is permitted within the CCAs as specified below. However, recreational fishing for the following species is permitted shoreward of the 20-fm (37-m) depth contour when the season for those species is open south of 34°27' N. lat.: minor nearshore rockfish, cabezon, kelp greenling, lingcod, California scorpionfish, and "other flatfish" (subject to gear requirements below during January-February). [NOTE: *California state regulations also permit recreational fishing for California sheephead, ocean whitefish, and all greenlings of the genus Hexagrammos shoreward of the 20-fm (37-m) depth contour in the CCAs when the season for the RCG complex is open south of 34°27' N. lat.*] It is unlawful to take and retain, possess, or land groundfish within the CCAs, except for species authorized in this section.
- Farallon Islands. Under California state law, recreational fishing for groundfish is prohibited between the shoreline and the 10-fm depth contour around the Farallon Islands, except that recreational fishing for "other flatfish" is permitted around the Farallon Islands. (Note: *California state regulations also prohibit the retention of other greenlings of the genus Hexagrammos, California sheephead and ocean whitefish.*) For a definition of the Farallon Islands, see "Area Closures" above or § 660.390 of the regulations.
- Cordell Banks. Recreational fishing for groundfish is prohibited inside the area around Cordell Banks enclosed by a line connecting specific latitude and longitude coordinates listed above in "Area Closures" and at § 660.390 that approximate the 100 fm depth contour, except that recreational fishing for "other flatfish" is permitted around Cordell Banks. [Note: *California state regulations also prohibit fishing for all greenlings of the genus*

*Hexagrammos, California sheephead and ocean whitefish.]*

- *EFHCA.* The Essential Fish Habitat Conservation Areas (EFHCAs) are closed areas, defined by specific latitude and longitude coordinates at §§ 660.396 through 660.399, where specified types of fishing are prohibited. Prohibitions applying to specific EFHCAs are found at § 660.306. Information on an EFHCAs that apply to the use of bottom contact gear in the recreational fishery off California can be found at § 660.306 and include: Cordell Bank (50-fm (91-m) isobath), Harris Point, Richardson Rock, Scorpion, Painted Cave, Anacapa Island, Carrington Point, Judith Rock, Skunk Point, Footprint, Gull Island, South Point, and Santa Barbara.

***RCG Complex.*** The California rockfish, cabezon, greenling complex (RCG Complex), as defined in state regulations (Section 1.91, Title 14, California Code of Regulations), includes all rockfish, kelp greenling, rock greenling, and cabezon. This category does not include California scorpionfish, also known as “sculpin.”

*Seasons.* When recreational fishing for the RCG Complex is open, it is permitted only outside of the recreational RCAs.

- *North of 40°10.00' N. lat. (North Region),* recreational fishing for the RCG Complex is open from May 1 through December 31.
- *Between 40°10' N. lat. and 37°11' N. lat. (North Central Region),* recreational fishing for the RCG Complex is open from June 1 through November 30 (i.e., it's closed from January 1 through May 31 and from December 1 - 31).
- *Between 37°11' N. lat. and 34°27' N. lat. (South Central Regions - Monterey and Morro Bay),* recreational fishing for the RCG Complex is open from May 1 through November 30 (i.e., it's closed from January 1 through April 30 and from December 1 - 31).
- *South of 34°27' N. lat. (South Region),* recreational fishing for the RCG Complex is open from March 1 through December 31 (i.e., it's closed from January 1 through February 29).

*Bag limits, hook limits.* In times and areas when the recreational season for the RCG Complex is open, there is a limit of 2 hooks and 1 line when fishing for rockfish. The bag limit is 10 RCG Complex fish per day coastwide. Retention of canary rockfish, yelloweye rockfish and cowcod is prohibited. *North of 40°10' N. lat.,* within the 10 RCG Complex fish per day limit, no more than 2 may be bocaccio, no more than 2 may be greenling (kelp and/or other greenlings) and no more than 1 may be cabezon. *South of 40°10' N. lat.,* within the 10 RCG Complex fish per day limit, no more than 1 may be bocaccio, no more than 2 may be greenling (kelp and/or other greenlings) and no more than 1 may be cabezon. Multi-day limits are authorized by a valid permit issued by California and must not exceed the daily limit multiplied by the number of days in the fishing trip.

***"Other flatfish".*** Coastwide off California, recreational fishing for "other flatfish" is permitted both shoreward of and within the closed areas described above in "Recreational GCAs off California". "Other flatfish" are defined at § 660.302 of the regulations and include butter sole, curlfin sole, flathead sole, Pacific sanddab, rex sole, rock sole, and sand sole. Recreational fishing for "other flatfish" is permitted within the closed areas, subject to a limit of up to 12 hooks, "Number 2" or smaller, which measure no more than 11 mm (0.44 inches) point to shank, and up to 2 lb (0.91 kg) of weight per line. "Other flatfish," except Pacific sanddab, are subject to the overall 20-fish bag limit for all species of finfish, of which there may be no more than 10 fish of any one species. There is no season restriction or size limit for "other flatfish;" however, it is prohibited to filet "other flatfish" at sea.

## **Additional Information**

---

- Trip limits are used in the commercial fishery to specify the maximum amount of a fish species or species group that may legally be taken and retained, possessed, or landed, per vessel, per fishing trip, or cumulatively per unit of time, or the number of landings that may be made from a vessel in a given period of time, as follows: (1) A per trip limit is the total allowable amount of a groundfish species or species complex, by weight, or by percentage of fish on board, that may be taken and retained, possessed, or landed per vessel from a single fishing trip. (2) A daily trip limit is the maximum amount that may be taken and retained, possessed, or landed per vessel in 24 consecutive hours, starting at 0001 hours (local time). (3) A weekly trip limit is the maximum amount of a groundfish species or species group that may be taken and retained, possessed, or landed per vessel in 7 consecutive days, starting at 0001 hours local time on Sunday and ending at 2400 hours local time on Saturday. Weekly trip limits may not be accumulated during multiple week trips. If a calendar week falls within two different months or two different cumulative limit periods, a vessel is not entitled to two separate weekly limits during that week. (4) A cumulative trip limit is the maximum amount that may be taken and retained, possessed, or landed per vessel in a specific period of time, without a limit on the number of landing or trips.
- All limits are coastwide unless otherwise specified and in round weight or round weight equivalents. Percentages apply only to the round weight of legal fish on board unless otherwise specified.
- Unless otherwise specified, size limits in the commercial and recreational fisheries apply to the “total length.”
- One metric ton is 2,204.6 lbs.
- For the purposes of the above limits, the following conversions apply. Sablefish: processed weight will be converted to round weight using the States’ conversion factor of 1.6. Lingcod: North of 42° N. lat., minimum size limit of 22 inches is equivalent to 18 inches with the head removed. South of 42° N. lat., minimum size limit of 24 inches is equivalent to 19.5 inches with the head removed. Processed weight will be converted to round weight using 1.5 for headed-and-gutted lingcod, and 1.1 for gutted lingcod with the head on. To convert the round weight trip limit to its dressed weight equivalent, divide the round weight by the conversion factor. *For example, a 300 lb sablefish trip limit divided by 1.6 equals 187.5 lb dressed weight.*
