

**Topics and Techniques for Forensic DNA Analysis**

# miniSTRs and Degraded DNA

Houston DNA Training Workshop  
Houston, TX April 3-4, 2007

Dr. John M. Butler  
National Institute of Standards and Technology  
[john.butler@nist.gov](mailto:john.butler@nist.gov)

## Outline for This Section

- NIST projects funded by NIJ
- Background on miniSTRs
- MiniFiler kit and concordance studies performed
- New non-CODIS (NC) miniSTR loci

**National Institute of Justice**  
The Research, Development, and Evaluation Agency of the U.S. Department of Justice

### Current Areas of NIST Effort with Forensic DNA

- **Standards**
  - Standard Reference Materials
  - Standard Information Resources (STRBase website)
  - Interlaboratory Studies
- **Technology**
  - Research programs in SNPs, miniSTRs, Y-STRs, mtDNA, qPCR
  - Assay and software development, expert system review
- **Training Materials**
  - Review articles and workshops on STRs, CE, validation
  - PowerPoint and pdf files available for download

<http://www.cstl.nist.gov/biotech/strbase/NIJprojects.htm>

### Standard Reference Materials

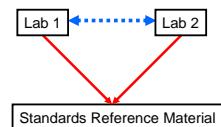

[http://www.cstl.nist.gov/biotech/strbase/srm\\_tab.htm](http://www.cstl.nist.gov/biotech/strbase/srm_tab.htm)

Traceable standards to ensure accurate measurements in our nation's crime laboratories

Helps meet DAB Std. 9.5 and ISO 17025

SRM 2391b – CODIS STRs  
SRM 2392-I – mtDNA  
SRM 2395 – Y-STRs  
SRM 2372 – DNA quantitation

Calibration with SRMs enables confidence in comparisons of results between laboratories

### Information Resource

<http://www.cstl.nist.gov/biotech/strbase>

**Includes information on:**

- Core STR loci
- Validation
- STR reference list
- NIST publications
- miniSTRs
- Forensic SNPs
- Variant STR alleles
- Population data resources
- Addresses of scientists

Provides up-to-date information and has been used in court cases to support application of DNA technology

### Recent STRBase Updates...

<http://www.cstl.nist.gov/biotech/strbase/updates.htm>

Recent STRBase Updates...

This page will include a brief summary of what has been recently updated on the NIST STRBase website.

18-Oct-2006	Updates to HSTT publications and presentations and software section with User Manual for Multiple_CIA program
17-Oct-2006	Added MTTRP CIA Training Manual from Ruth Montgomery to training section
12-Oct-2006	Updates to HSTT publications and presentations
10-Oct-2006	Added new <a href="#">current sites</a> and updated <a href="#">address</a> information, added new <a href="#">reference</a> (V2967 #2714)
3-Oct-2006	Updates to HSTT publications and presentations, <a href="#">readTH</a> and <a href="#">readTH2</a> sections, <a href="#">D2346</a> , <a href="#">D2332</a> , <a href="#">D14145</a> , <a href="#">D23304</a>
22-Sep-2006	Added maxSTR typing protocols and Genotyper macros from Bruce McCord's lab (see <a href="#">maxSTR</a> section)
13-Sep-2006	Added mtDNA workshop files from Steve Edmon (AFCL) to training section
30-Aug-2006	Added new <a href="#">current sites</a> and updated <a href="#">address</a> information
29-Aug-2006	Updates to HSTT publications and presentations
11-Aug-2006	Updated <a href="#">newest site report</a> and <a href="#">to allele pattern</a> pages (enables addition of Y-STR variants)
1-Aug-2006	Added <a href="#">PCR workshop materials</a> (see <a href="#">training</a> section)
26-Jul-2006	Creation of the STRBase update page

[Return to Home Page](#)

### Technology: Research Programs

- miniSTRs
- Y-chromosome STRs
- mtDNA
- SNPs
- qPCR for DNA quantitation
- DNA stability studies
- Variant allele characterization and sequencing
- Software tools
- Expert System review
- Assay development with collaborators

A miniSTR is a reduced size STR amplicon that enables higher recovery of information from degraded DNA samples

Conventional PCR primer → miniSTR primer ← STR repeat region ← miniSTR primer → Conventional PCR primer

Testing must be performed to show allele concordance between primer sets

Conventional STR test (COFiler™ kit)

~150 bp smaller

MiniSTR assay (using Butler et al. 2003 primers)

Butler, J.M. (2005) *Forensic DNA Typing, 2nd Edition*, Figure 7.2, ©Elsevier Science/Academic Press

### miniSTR Overview Article

**Applied Biosystems**

**Forensic News**

October 2006 Customer Corner

**MiniSTRs: Past, Present, and Future**  
By John M. Butler, National Institute of Standards and Technology

DNA molecules that are exposed to water and/or heat will over time begin to break down into smaller pieces. This degradation occurs due to bacterial, biochemical or oxidative processes. A number of situations have demonstrated that meaningful analysis of degraded DNA can be made if sufficient amounts of degraded forensic evidence can be converted into smaller PCR products. For example, in 1994 the Forensic Science Service noted that smaller STR loci worked more often on biological remains recovered from the Branch Davidian fire. The first major effort to purposefully reduce STR amplicon size was for use in time-of-flight mass spectrometry. Later, many of these "miniSTR" primers were labeled with fluorescent dyes and used to aid identification of World Trade Center victims. A timeline covering the development of miniSTRs may be found at <http://www.cstl.nist.gov/biotech/strbase/miniSTR/timeline.htm>.

[http://marketing.appliedbiosystems.com/images/enews/ForensicNews\\_Vol7/PDF/02A\\_CustomerCorner\\_Butler.pdf](http://marketing.appliedbiosystems.com/images/enews/ForensicNews_Vol7/PDF/02A_CustomerCorner_Butler.pdf)

### Timeline for miniSTRs and Demonstrating the Value of Using Reduced Size Amplicons for Degraded DNA

- 1994 – FSS finds that smaller STR loci work best with burned bone and tissue from Branch Davidian fire
- 1997 – New primers developed for time-of-flight mass spectrometry to make small STR amplicons
- 2001 – Work at NIST and OhioU with CODIS STRs; **BodePlexes** used in WTC investigation starting 2002
- 2004 – Work at NIST with **non-CODIS (NC) miniSTRs**
- 2007 – Applied Biosystems releases 9plex MiniFiler

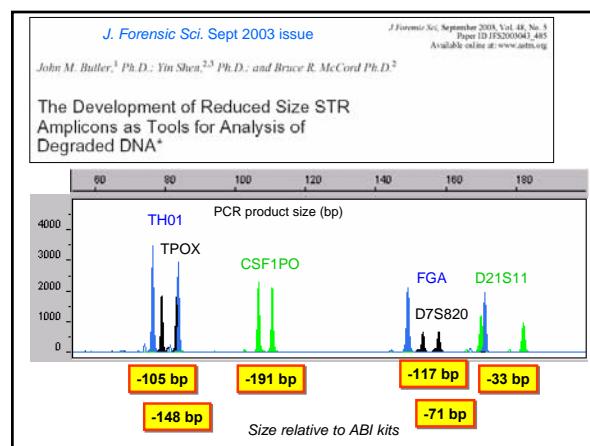

<http://www.cstl.nist.gov/biotech/strbase/miniSTR/timeline.htm>

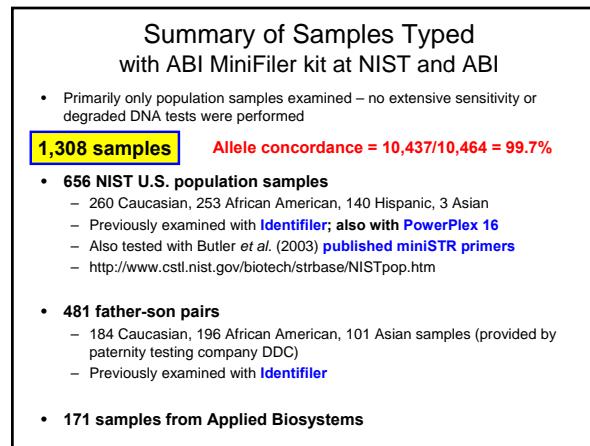

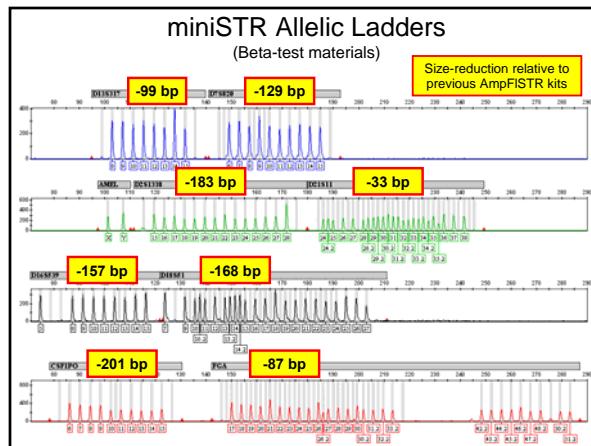

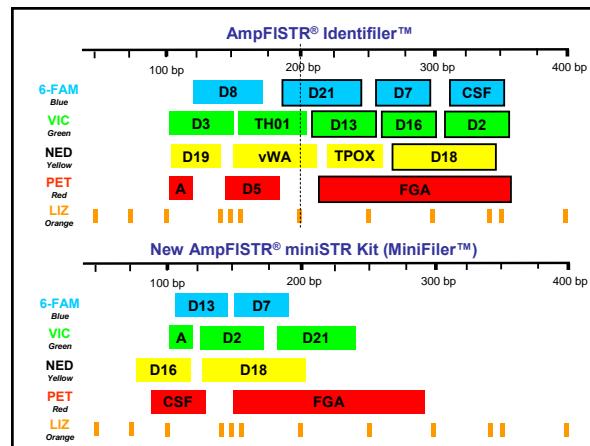

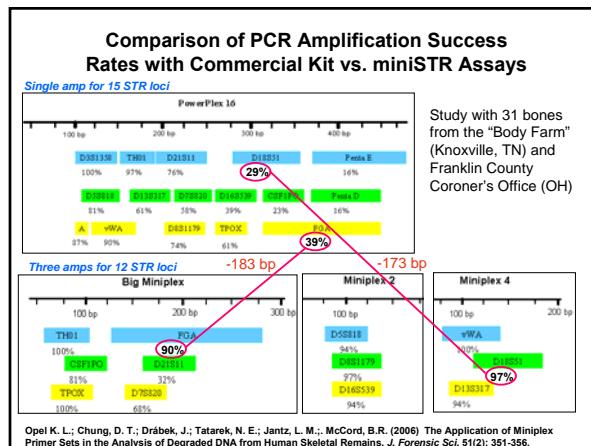

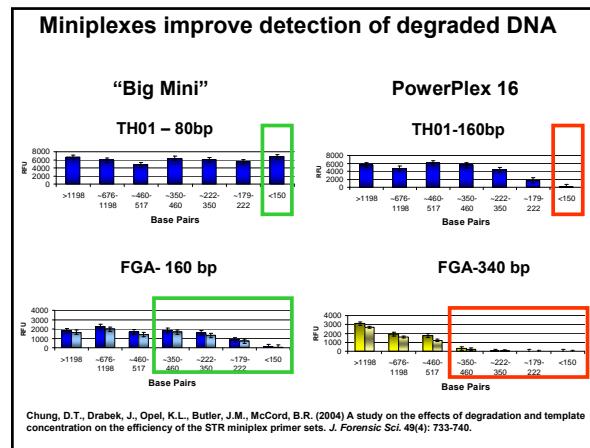

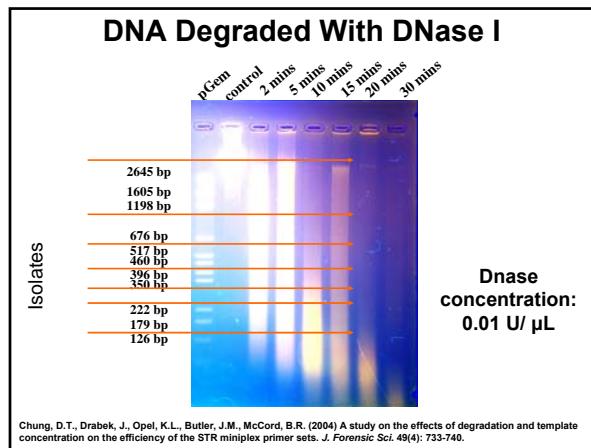

### Recent Publications on miniSTRs

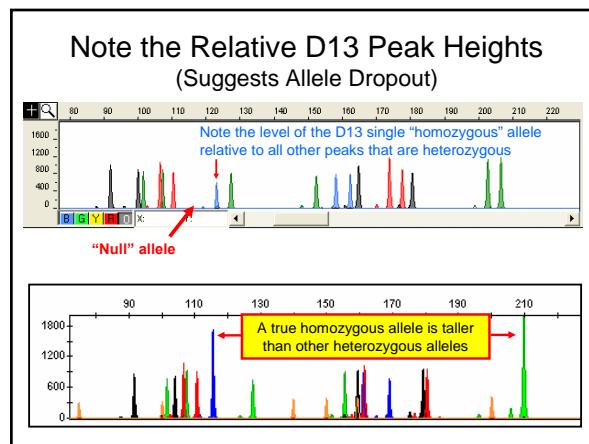

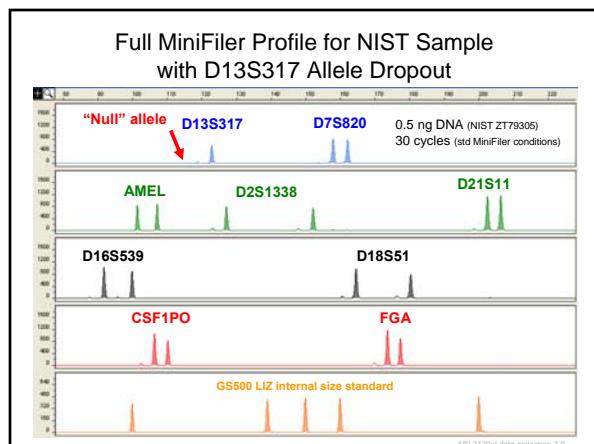

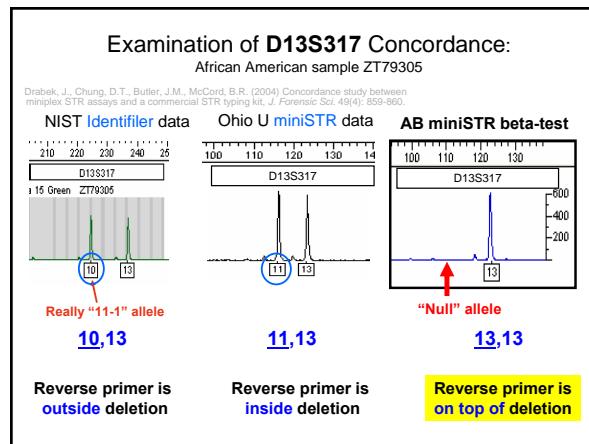

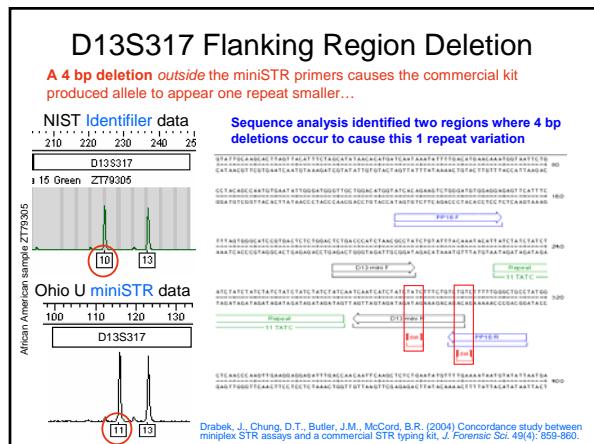

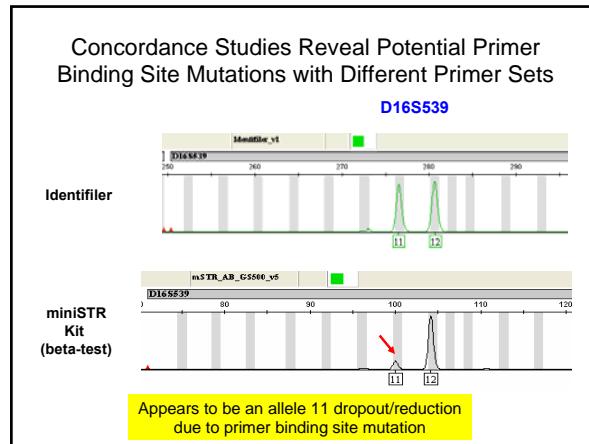

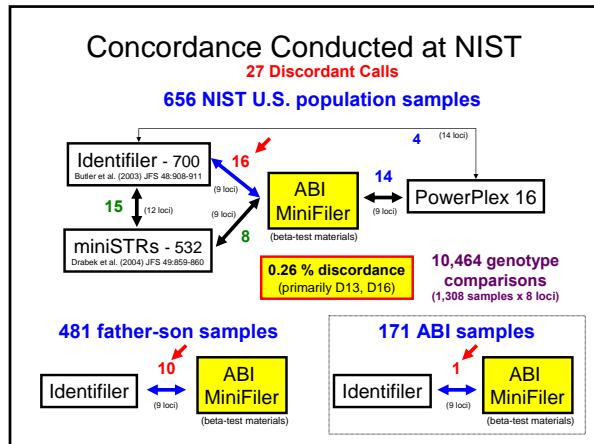

- Butler, J.M., Shen, Y., McCord, B.R. (2003) The development of reduced size STR amplicons as tools for analysis of degraded DNA. *J. Forensic Sci.* 48(5): 1054-1064.
- Chung, D.T., Drabek, J., Opel, K.L., Butler, J.M., McCord, B.R. (2004) A study on the effects of degradation and template concentration on the efficiency of the STR miniplex primer sets. *J. Forensic Sci.* 49(4): 733-740.
- Drabek, J., Chung, D.T., Butler, J.M., McCord, B.R. (2004) Concordance study between miniplex STR assays and a commercial STR typing kit. *J. Forensic Sci.* 49(4): 859-860.
- Coble, M.D. and Butler, J.M. (2005) Characterization of new miniSTR loci to aid analysis of degraded DNA. *J. Forensic Sci.*, 50: 43-53.

Mike Coble      Becky Hill      John Butler

↑ No longer at NIST (AFDIL Research Section Chief since April 2006)

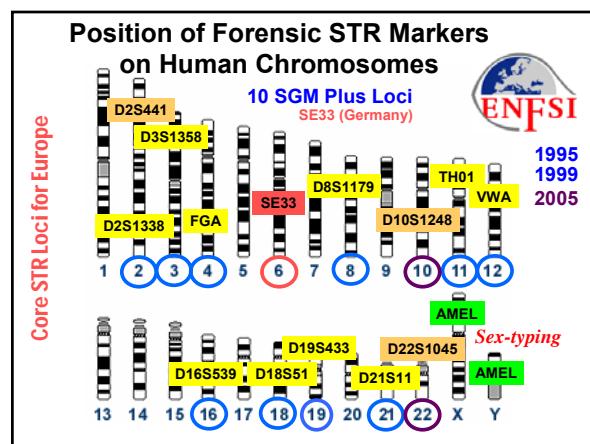

- 32 STR loci tested on NIST **665 U.S. population samples**
- **26 STR loci** with allele sizes below 140 bp and good heterozygosities (above TPOX level)
- All new STR loci are **physically unlinked** to the 13 CODIS core loci
- **Submitted articles** regarding primer sequences and locus characterization including population statistics
- **SRM 2391b components are being certified** through sequencing for D10S1248, D2S541, D22S1045; for reference purposes, genotypes for standard samples (9947A, 9948, 007, K562) will be made available on STRBase

<http://www.cstl.nist.gov/biotech/strbase/newSTRs.htm>

Comparison of heterozygosity values on 26 non-CODIS loci across the U.S. samples examined in this study.

# European Labs Have Adopted the NIST-Developed NC miniSTRs

### Summary of miniSTRs

- **Reduced size amplicons improve success rates with degraded DNA or samples possessing PCR-inhibitors – European leaders view miniSTRs as “the way forward”**
- A new kit will be available soon from ABI called MiniFiler – concordance testing done at NIST
- **New miniSTR loci are being characterized** at NIST – 26 loci in development
