Subject: Baseline Radiological Monitoring Grid Population Projections

Not privileged
LSN: Not Relevant, Privileged
User Filed as: Excl/AdminMgmt-14-4/DA:NA
7/6/07

Here is the Subject deliverable. The spreadsheet provides projections for each cell within the Radiological Monitoring Grid. All sources of data and assumptions are listed on the "Readme" tab within the spreadsheet. Projections are made to 2075 to encompass current needs.

The starting point for the projections is the population distribution identified in 2003 in the following report:

BSC (Bechtel SAIC Company) 2003. Yucca Mountain Project Summary of Socioeconomic Data Analyses Conducted in Support of the Radiological Monitoring Program, During FY 2003. TDR-MGR-EV-000040 REV 00. Las Vegas, Nevada: Bechtel SAIC Company. ACC: DOC.20031203.0003.

That report is no longer funded and has not been updated; nor is it scheduled to be updated.

Population projections for counties are the basis for projections beyond 2003. For Nye County, the Nevada State Demographer is the source. For Clark County, the Center for Business and Economic Research (CBER) at UNLV is the source. CBER provides annual population projections for Clark County under contract to Clark County, the Regional Transportation Commission, and the Southern Nevada Water District. For Inyo County, the source is the Demographic Research Unit of the California State Department of Finance.

QA: NA
