^a Motor gasoline prices are the same for the commercial, industrial, and transportation sectors.^b Due to consumption weighting, U.S. average commercial price is \$14.32 per million Btu, U.S. average industrial price is \$14.50 per million Btu, U.S. average transportation price is \$14.57 per million Btu, and the U.S. average price of all sectors is \$14.57 per million Btu.

(s) = Btu value less than 0.05

Note: Totals may not equal sum of components due to independent rounding.

Sources: Data sources, estimation procedures, and assumptions are described in the Technical Notes.
