<u>Firefighter:</u>						
© Complete ALL of the medical history questions on pages 2 through 9 of this form and attend the medical exam appointment.						
All "Yes" answers in the medical history sections <u>must be exp</u>	lained, including dates, treatments and current status.					
Your signature is required on page 2. Failure to sign will resu	lt in a delay of rating determination.					

- Take this form to your examination at the CHS network examining physician/clinic.
- Do not eat or drink anything except water for 6 hours prior to exam. You may take medications.
- For best hearing test results, avoid exposure to loud noise for a minimum of 14 hours prior to exam. (May use ear muffs and/or foam ear plugs.)
- A PPD (TB) skin test is required and you will need to return to the clinic within 48-72 hours for your skin test reading. If CHS does not recieve your reading, determination will be delayed, and you will be responsible for payment of the repeated test.

Examining Physician:

- Please contact CHS Client Service Administrator for the Wildland Firefighters at 866-416-5941 if you have any questions about the procedures.
- Review the functional requirements and work conditions of Wildland Firefighters on the last 2 pages of this form.
- Review the firefighter's medical history responses on pages 2 through 9 and provide full explanations on page 9 regarding all "yes" answers. These comments should include dates and current status.
- Complete the "Vital Signs and Required Testing", "Physical Exam", and "Exam Summary" sections. Sign where indicated under the "Physical Exam" and "Exam Summary" sections.
- Forward specimens and laboratory requisition to Quest Laboratories using the enclosed Express Labpak on the day of the collection.
- When the exam is completed, place all pages and all associated test results in the return envelope. It is imperative that this information be sent to CHS via express overnight mail on the day the exam is performed to the address above. Please complete and fax the enclosed PPD Testing Form (page 10.1) as soon as the test is read to 703-288-5482. Do not hold examination results pending PPD reading.
- Do not communicate an opinion of qualification to the examinee. All significant abnormal findings are to be brought to the attention of the firefighter. Recommended additional testing will not be covered under this program, and must be paid for by the examinee. Qualification and further evaluation decisions will be made by the Agency's Central Medical Consultant (CMC) at Comprehensive Health Services, Inc.

PRIVACY ACT INFORMATION	Required Services (Check completed components)
The information contained in this form will be used to determine whether an individual considered for arduous level wildland firefighting can safely and efficiently perform those duties in a manner that will not unduly risk aggravation, acceleration, exaggeration, or permanent worsening of a pre-existing medical condition. Its collection and use are consistent with the provisions of the 5 CFR 339 (Medical Qualification Determinations), 5 USC 552a (Privacy Act of 1974), 5 USC 3301 (Examination, Certification, and Appointment), and Executive Orders 12107 (Merit Systems Protection Board) and 12564 (Drug Free Federal Workplace). The information will be placed in your official Employee Medical File, and is to be used only for official purposes as explained and published annually in the Federal Register under OPM/GOVT-10, the OPM system of records notice. Medical Standards for Wildland Firefighter Arduous Duty

System	Standard	
Psychiatric	Must have judgement, mental functioning, and social interaction that will provide for the safe and efficient conduct of the job requirements.	
Vision	Uncorrected far visual acuity at least 20/100 in each eye for those who wear hard contacts or glasses; far visual acuity of at least 20/40 each eye corrected (if necessary) with contact lenses or glasses; peripheral vision of at least 85 degrees laterally in each eye; normal depth perception; color vision sufficient to distinguish red, green and amber (yellow); no ophthalmologic condition that would increase ophthalmic sensitivity to bright light, fumes, airborne particles, or susceptibility to sudden incapacitation. Note: Successful users of soft contact lenses are not required to meet the "uncorrected" vision guideline.	
Hearing	Documentation of hearing thresholds of no greater than 40 dB at 500, 1000, 2000, and 3000 Hz in each ear. Curre pure tone audiogram using equipment and a test setting which meets ANSI standards (C29CFR1910.95)	
HEENT	Normal conversational speech. No evidence of head, nose, mouth, throat, or neck conditions likely to present a safety risk or to worsen as a result of carrying out the essential functions of the job.	
Dermatology	No evidence of dermatologic conditions likely to present a safety risk or to worsen as a result of carrying out the essential functions of the job.	
Vascular	No current evidence of phlebitis, thrombosis, venous stasis or arterial insufficiency. No evidence of peripheral vasculature conditions likely to present a safety risk or to worsen as a result of carrying out the essential functions of the job.	
Cardiac	No evidence that the cardiovascular system is outside the range of normal. Blood pressure must be less than or equal to 140 mmHg systolic and 90 mmHg diastolic. If taken, a normal baseline EKG.	
Gastrointestinal	No evidence of gastrointestinal conditions likely to present a safety risk or to worsen as a result of carrying out the essential functions of the job.	
Genitourinary	No evidence of genitourinary conditions likely to present a safety risk or to worsen as a result of carrying out the essential functions of the job.	
Endocrine	No evidence of endocrine conditions likely to present a safety risk or to worsen as a result of carrying out the essential functions of the job.	
Nervous and Vestibular	Normal mental status. No evidence of nervous, cerebellar, or vestibular system conditions likely to present a safety risk or to worsen as a result of carrying out the essential functions of the job.	
Chest/Respiratory	No evidence of respiratory conditions likely to present a safety risk or to worsen as a result of carrying out the essential functions of the job. Documentation of a pulmonary function test showing FEV1 and FVC of greater than or equal to 70% and FEV1/FVC greater than or equal to 80%. Note: The requirement to use an inhaler (such as for asthma) requires agency review.	
Immune/Allergic	No evidence of infectious disease, immune system disorder, or allergic conditions likely to present a safety risk or to worsen as a result of carrying out the essential functions of the job.	
Hematopoietic	No evidence of hematopoietic conditions likely to present a safety risk or to worsen as a result of carrying out the essential functions of the job.	
Musculoskeletal	Normal strength, flexibility, range of motion, and joint stability. No musculoskeletal conditions likely to present a safety risk or to worsen as a result of carrying out the essential functions of the job.	
Prosthetics; Transplants; Implants	No evidence that the transplant, prosthesis, implant, or conditions that led to the need for these treatments are likely to present a safety risk or to worsen as a result of carrying out the essential functions of the job. Note: For individuals with transplants, prosthetics or implanted pumps or electrical devices, the firefighter will need to provide documentation that the individual (and, if applicable, his/her prosthetic or implanted device) is considered fully cleared for the specified functional requirements of wildland firefighting.	
Medication	The need for and use of prescribed or over-the-counter medications are not of themselves disqualifying. However, there must be no impairment of body function, mental function, or attention due to medications that is likely to present a safety risk or worsen as a result of carrying out the specified functional requirements.	

Further information regarding the Medical Standards for Wildland Firefighter Arduous Duty can be found at: http://www.nifc.gov/medical_standards/resources/medstand_review-criteria.pdf
