

For generations upon generations,
we have lived on and learned to use soils.
Soils sustain our world.

Soils are **ALIVE**

They are born, they age, they breathe. Soils are constantly created and lost. Soils are everywhere in our everyday lives.

Come and explore this amazing world in the exhibition
Dig It! The Secrets of Soils
at the Smithsonian's National Museum of Natural History

July 19, 2008 – January 4, 2009

 Smithsonian
National Museum of Natural History

The Dig It! exhibition was made possible by support from the Society of America and The Fertilizer Institute's Nutrients for Life.
