## Programming SAT Phone for Non-SIM Use

### I. Purpose:

This procedure explains how to program the Mini-M satellite phone so that it can make calls without a SIM card installed. In this configuration, the phone will be locked to dial only from the internal phonebook. It also allows the system to be pre-paid and to provide email-based notification when the phone is about to run out of the pre-paid credit.

### II. Cautions and Hazards:

None.

### III. Requirements:

- To establish a non-SIM, pre-paid account, first contact Outfitter Satellite Operations at 615-889-8833.

### IV. Procedure:

#### A. Programming SAT Phone for Non-SIM Use

1. Edit the phonebook so that it contains only the numbers that anyone should call.
2. Once the phonebook has been properly configured, follow the steps below:
  - a) Press "Menu" key.
  - b) Enter "Set access level."
  - c) Press "Owner."
  - d) Enter Owner-level pass code: 1234567890
  - e) Once the Owner level is established, return to "Menu."
  - f) Enter "Advanced functions."
  - g) Enter "Access control."
  - h) Enter "Restricted dialing."
  - i) Set to "Dial from book only."
  - j) Return to "Menu."
  - k) Enter "Set access level."

l) Reset to "User level."

**B. Overriding Non-SIM Configuration**

Follow one of the two ways to override the lock.

- a) Use the Owner-level pass code to disable restricted dialing.
- b) Insert a SIM card. **Note: With a SIM card inserted, all calls will be billed to the phone's account.**
