### IM134226 - Access to Benefit Rcd Nbr field

**ISSUE:** Users still had access to the Benefit Rcd Nbr field on the par pages via to links in HR Processing, the Benefits/FEHB Data link on the Job Tab and the Appt Data link on the Employment 1 tab. At some point in time users were using this field to track different appointments. Unfortunately it was never used consistently by all users, and delivered code would often update the numbers without the user's knowledge. It had been decided that HHS would use the delivered Concurrent Hire function to track different appointments – using empl\_rcd to differentiate between the appointments. However, access to the Benefit Rcd Nbr field had not been taken away and some users were still updating this field. Again, though, there was online code that was often converting these numbers back to 0 without the user's knowledge.

**RESOLUTION:** A modification was made to gray the benefit rcd nbr field, so users cannot update the number and all employees will have a benefit rcd nbr equal to 0, as expected. A script will be written in the near future to clean up any employees, who currently are not tied to 0 benefit rcd nbr.

**USER IMPACT:** Users will no longer have access to the benefit rcd nbr field. They will have to track concurrent appointments by empl\_rcd number. If they want to track consultants, they can use pay plan to do so rather than benefit rcd nbr, as there has never been any guarantee that this number is consistently correct.
