Note: Starting in FY 2007, NOAA simplified its reporting of USGCRP climate expenditures into the categories shown in GREEN SMALL CAPS within the above table. For tracking purposes, the previous FY budget line items have been mapped to the new structure, and highlighted in italics. NOAA has included its Arctic Research and Climate and Ecosystems programs as part of USGCRP activities. n/a = not applicable.

Mapping of Budget Request to Appropriations Legislation. In Appropriations Committee reports, funding for National Oceanic and Atmospheric Administration CCSP activities is specified in the Laboratories and Cooperative Institutes and Competitive Research Programs of the Oceanic and Atmospheric Research budget and in the Climate Regimes and Ecosystem Productivity of the National Marine Fisheries Service budget—all within NOAA's Operations, Research, and Facilities account.
