

# Daily Weather Maps

**NOVEMBER 25, 2002 - DECEMBER 1, 2002**

The following charts are the principal charts of the former National Weather Service publication, "Daily Weather Map." They are the Surface Weather Map, the 500-Millibar Height Contours chart, the Highest and Lowest Temperatures chart, and the Precipitation Areas and Amounts chart. All charts are derived from the operational weather maps prepared at the National Centers for Environmental Prediction, Hydrometeorological Prediction Center, National Weather Service. The symbols on the Surface Weather Map and the 500-Millibar Height contours are standard international symbols.

The Surface Weather Map shows station data and the analysis for 7:00 a.m. EST. Areas of precipitation are indicated by shading. The weather reports displayed here are only a fraction of those on which the analyses are based. Occasional apparent discrepancies between the printed station data and the analyses result from the absence of station reports not included here because of a lack of space.

The 500-Millibar Height Contours chart shows height contours (solid lines), temperatures (dashed lines) and winds (arrows) at the 500-Millibar pressure level at 7:00 a.m. EST. The height contours show the height of the 500-millibar pressure level in dekameters above sea level and isotherms, the lines of constant temperature, are shown in degrees Celsius. Arrows show the wind direction and speed at the 500-Millibar level.

The Highest and Lowest Temperature chart shows the maximum temperature for a period from 7:00 a.m. EST the previous day through 1 a.m. EST and the minimum temperature for the period from 7:00 p.m. EST the previous day through 1 p.m. The maximum temperature is plotted above the station location and the minimum temperature is plotted below.

The Precipitation Areas and Amounts chart shows areas (shaded) that had precipitation during the 24 hours ending at 7:00 a.m. EST, with amounts to the nearest hundredth of an inch. "T" indicates a trace of precipitation.

The *Daily Weather Map* is published weekly by the U.S. Department of Commerce, National Oceanic and Atmospheric Administration (NOAA). NOAA and IMC are responsible for managing, printing, and distributing the bulletin. The contents may be reprinted freely, with proper credit.

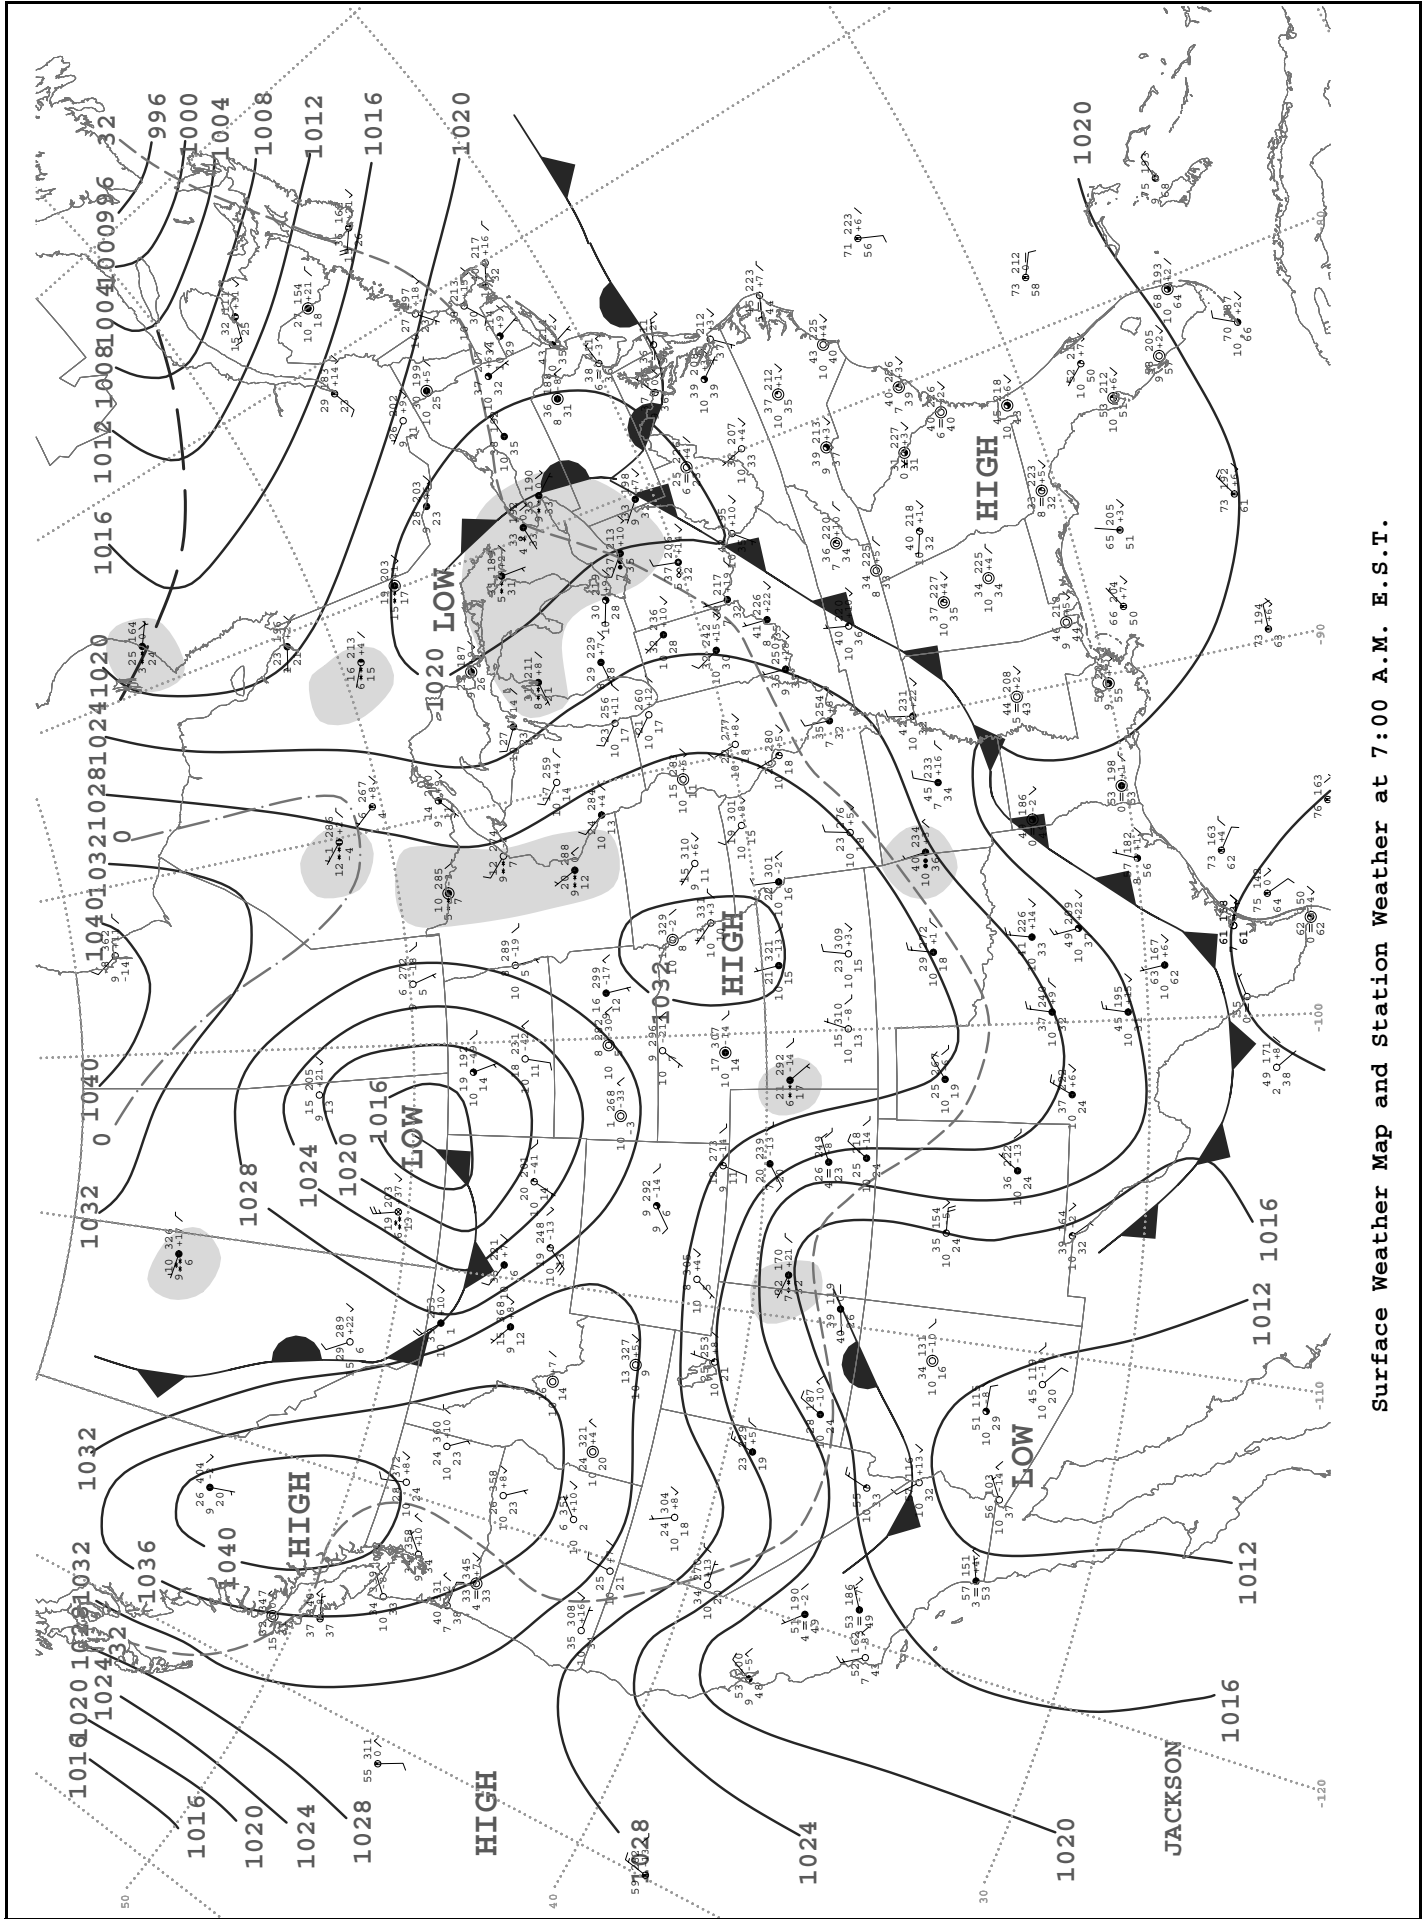

Annual subscriptions: Domestic and International subscriptions are \$75. Check and credit card (Visa, MasterCard, Discover, and American Express) payments are accepted. Payments (invoices) should be mailed to: **NNDC/NCDC, P.O. Box 70169, Chicago, IL 60673-0169**; or invoices faxed to: (304) 726-4409.

Send address changes to: **NCDC Subscription Services Center, 310 State Route 956, Building 300, Rocket Center, WV 26726**; call toll free: (866) 742-3322; TDD: (828) 271-4010; fax: (304) 726-4409; or E-mail: [noaasubsvcs@imcww.com](mailto:noaasubsvcs@imcww.com)

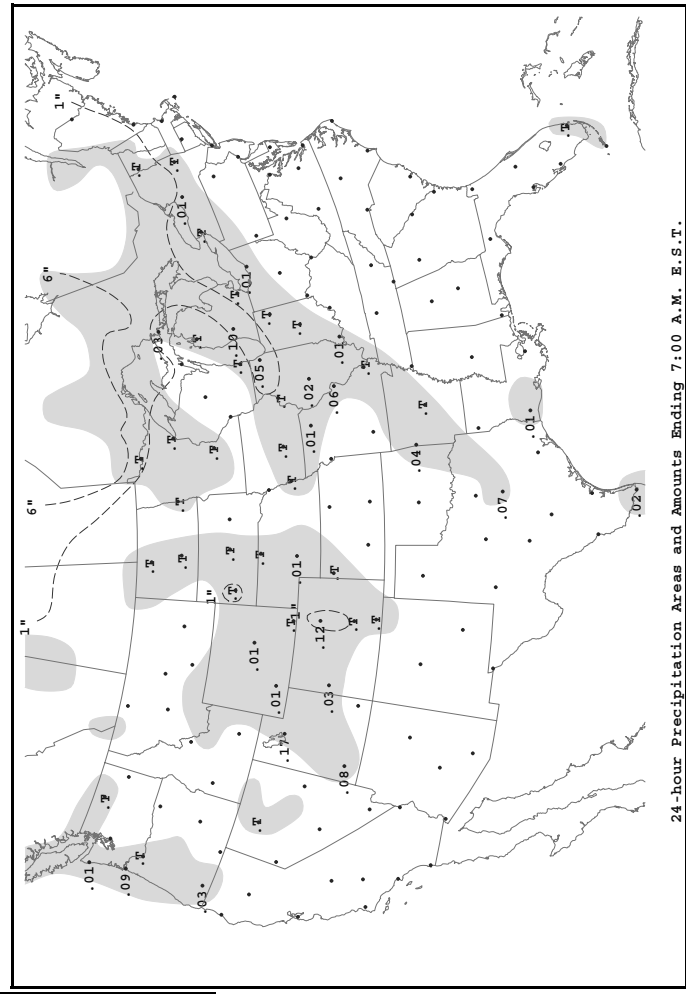

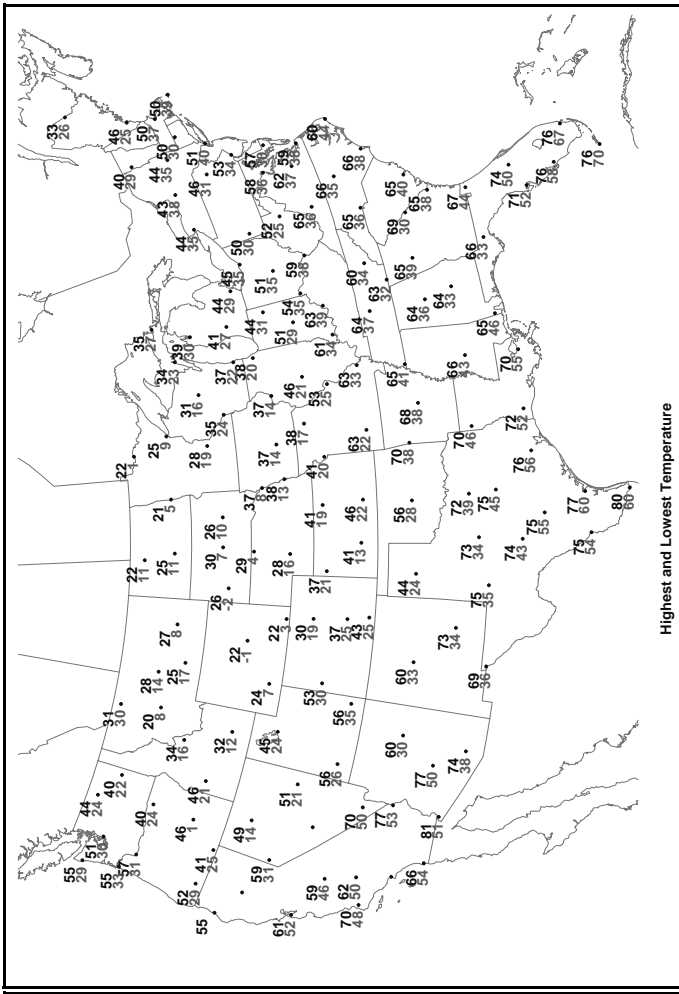

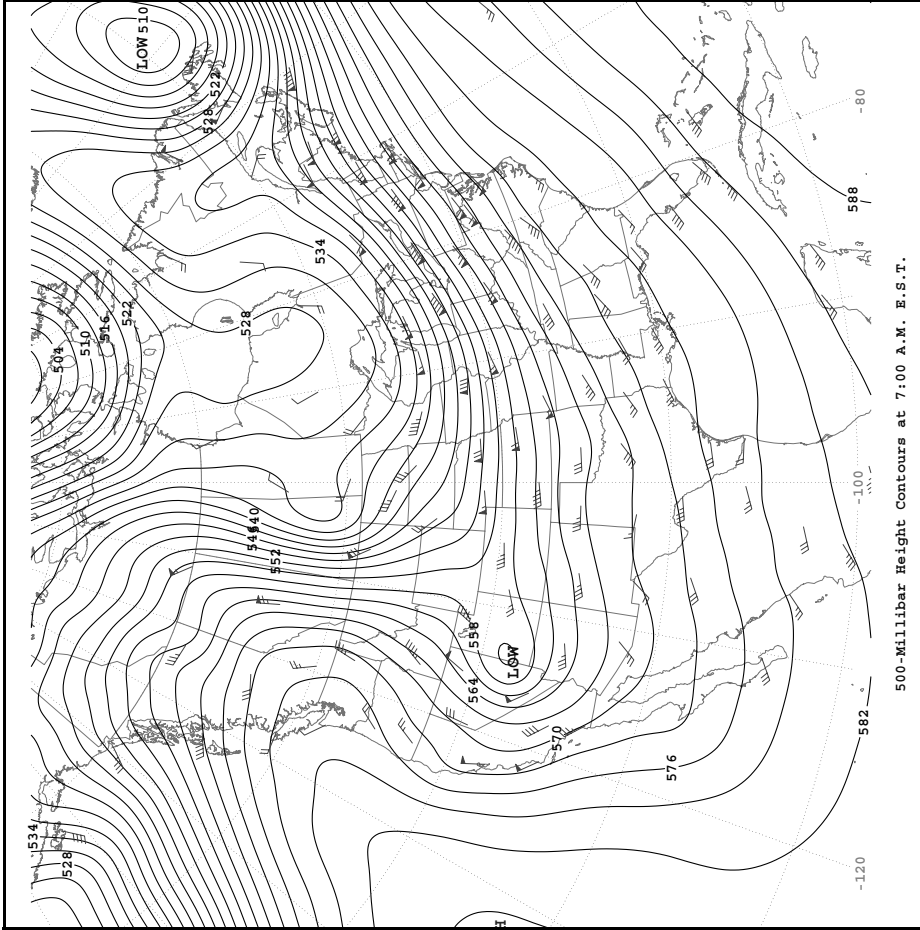

Correspondence to the meteorologists should be directed to: ***Daily Weather Map*, NOAA/National Weather Service, Room 410, 5200 Auth Rd, Camp Springs, MD 20746.**

Surface Weather Map and Station Weather at 7:00 A.M. E.S.T.

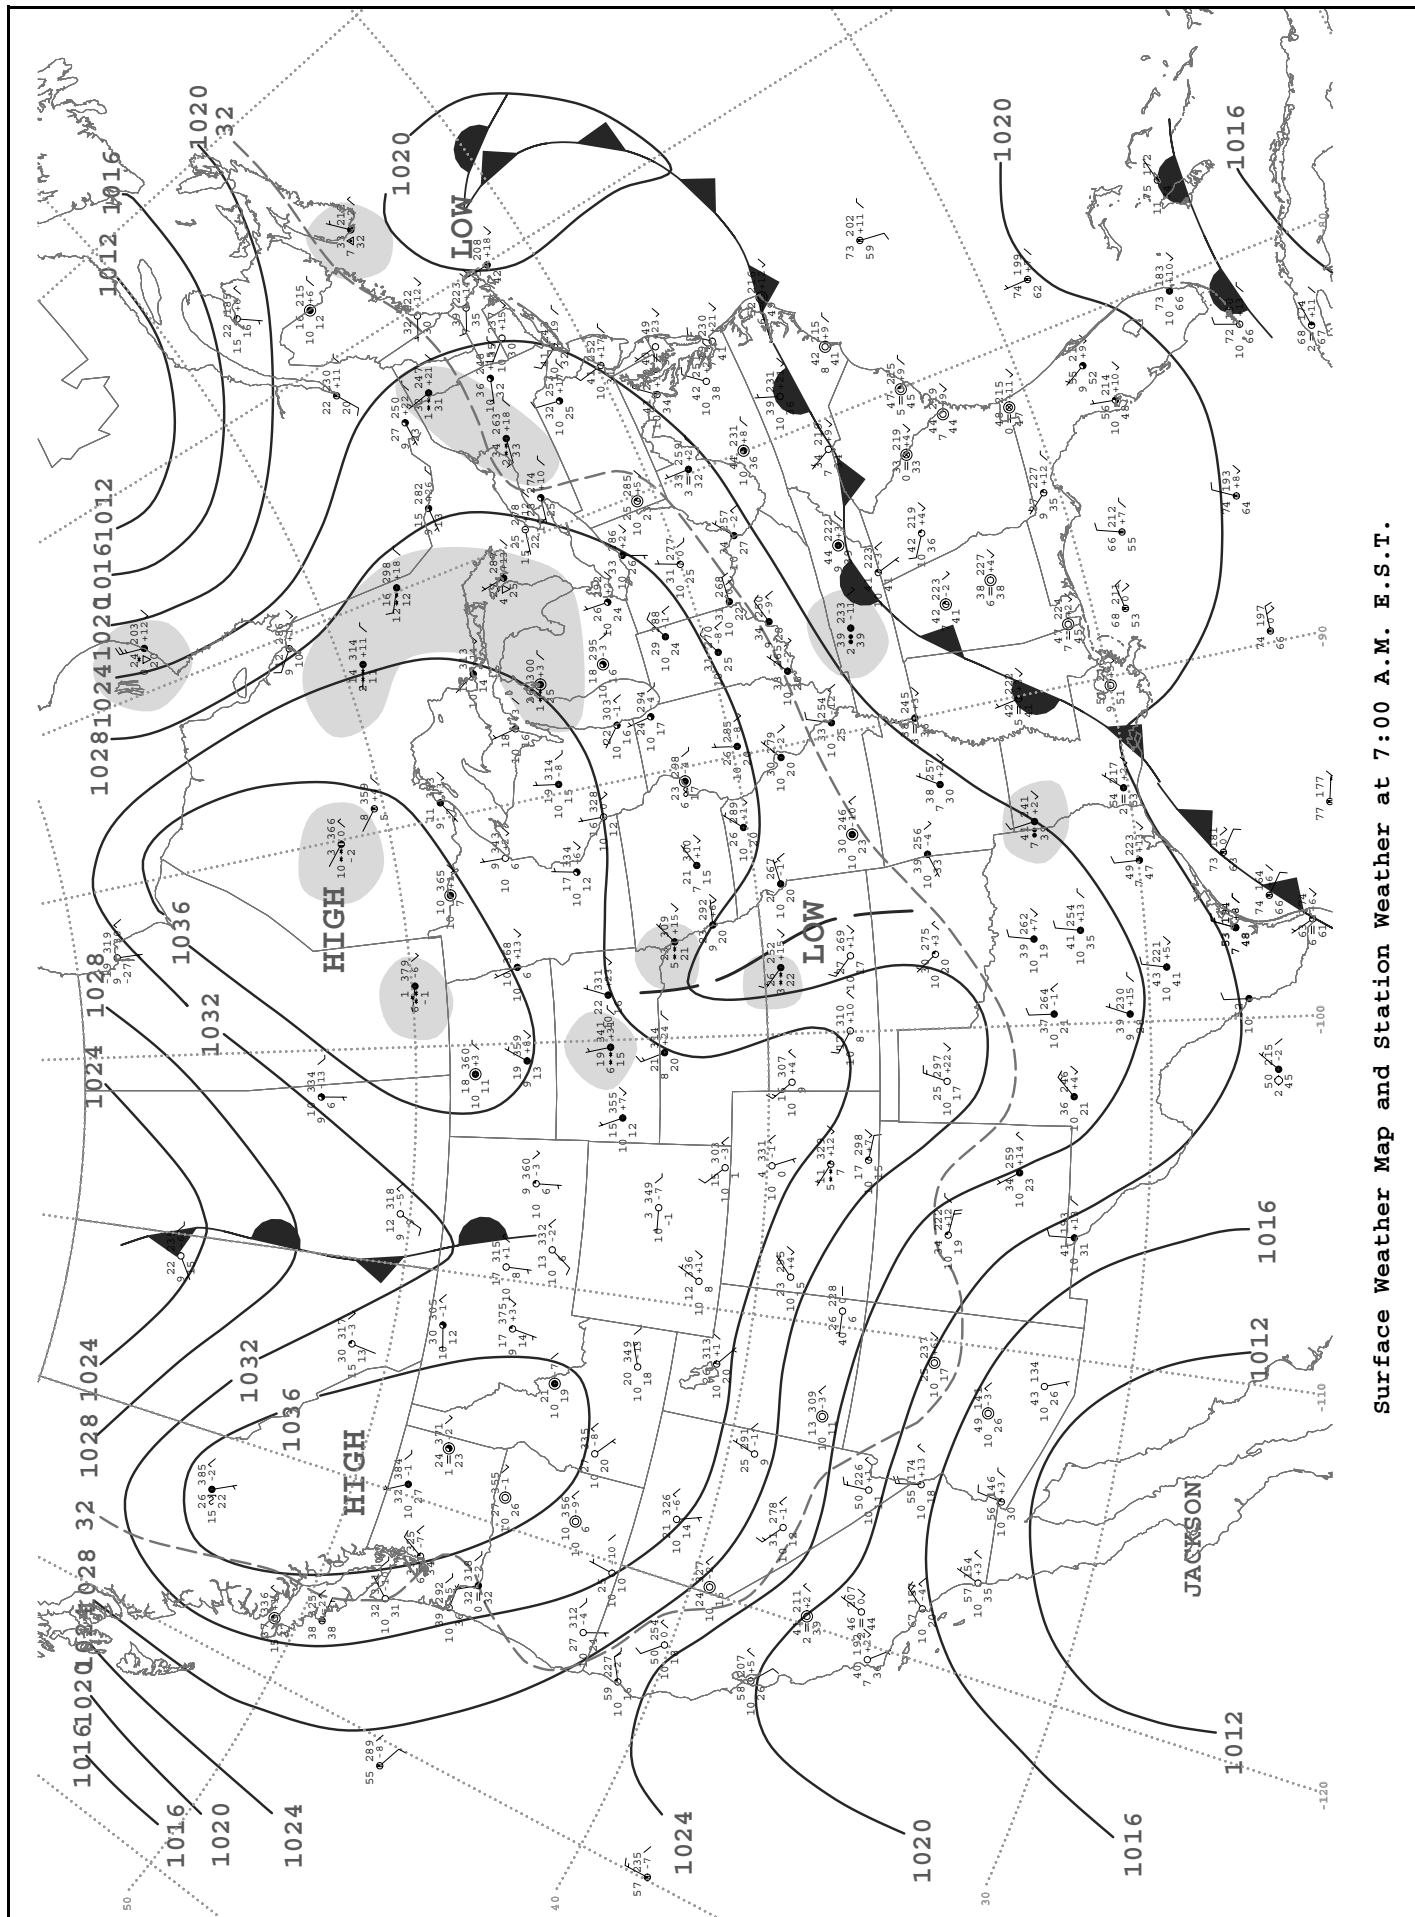

**Station Model**

The diagram illustrates a station model with various symbols and their corresponding data fields:

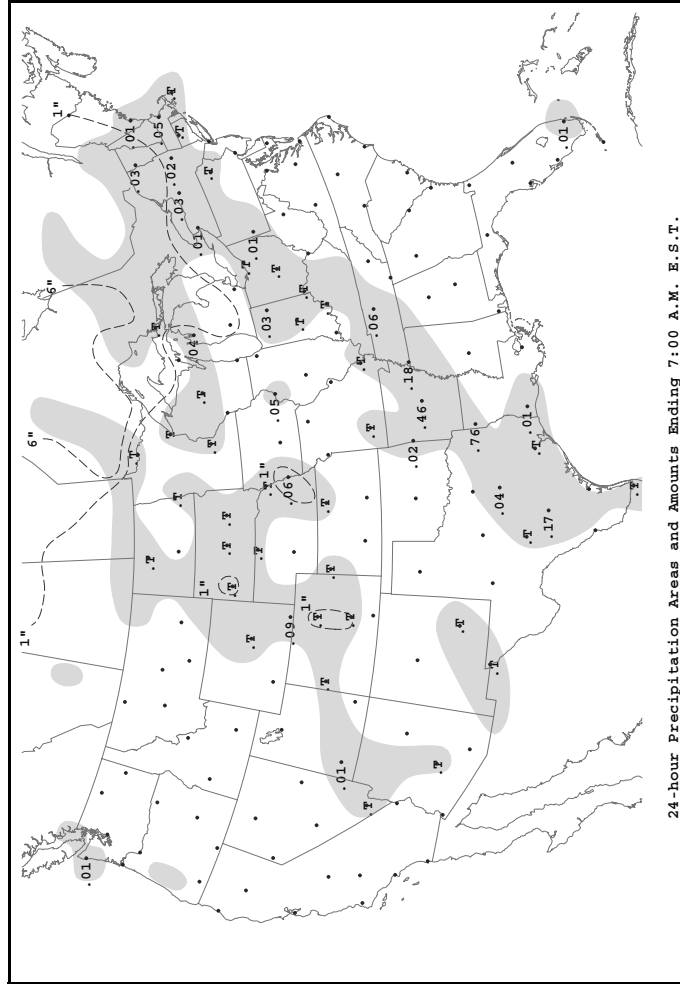

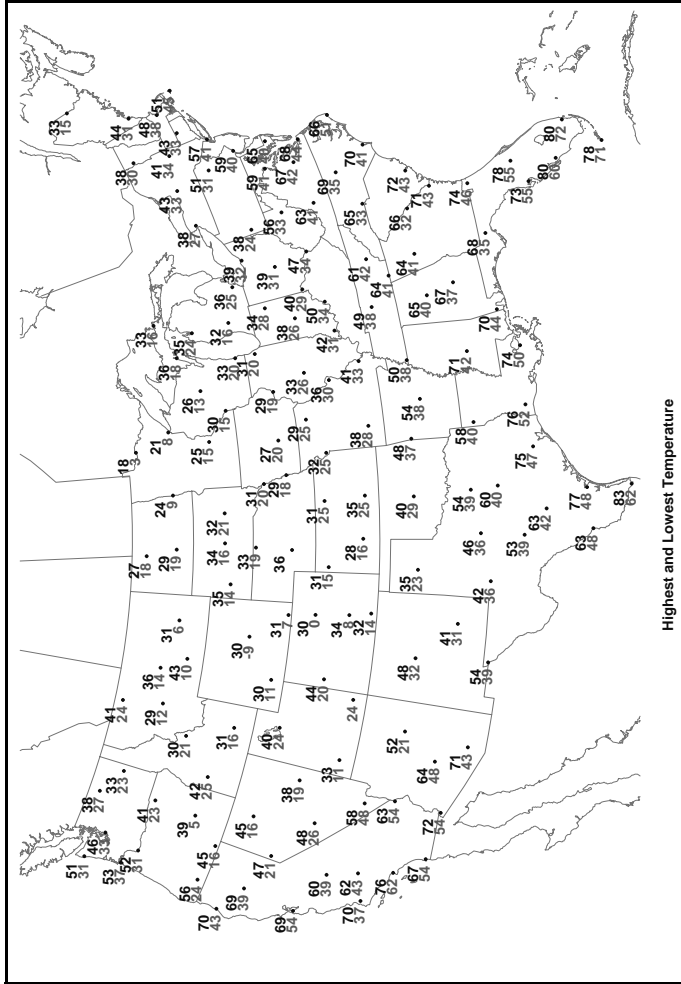

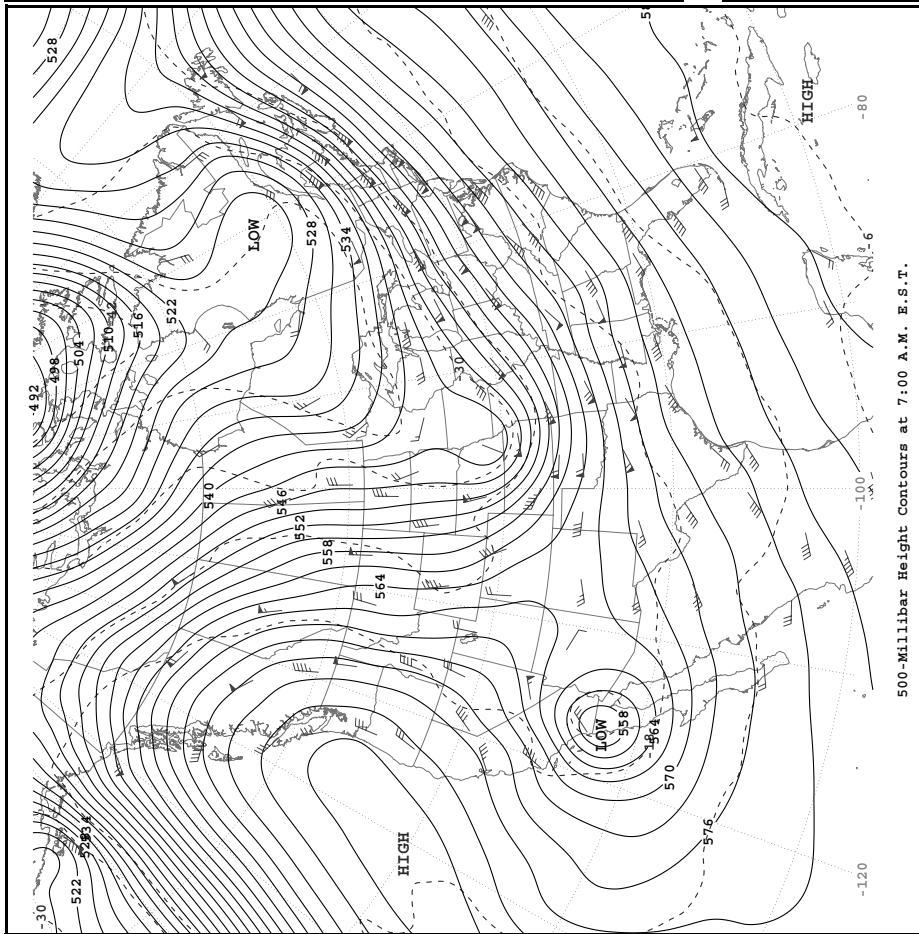

- Wind Direction:** Indicated by a line with a short feather (5 knots) and a long feather (10 knots).
- Wind Speed:** Indicated by the length of the wind barbs.
- Current Temperature (in °F):** Represented by the number 'dd'.
- Visibility (in miles):** Represented by the number 'V'.
- Present Weather Symbol:** Represented by a circle with a dot inside.
- Dew Point Temperature:** Represented by the number 'TD'.
- 3-Digit Surface Pressure (in tenths):** Represented by the number 'PPP'.
- 3 Hour Pressure Tendency (in tenths):** Represented by the number 'PP a'.
- Sky Cover:** Represented by a circle with a horizontal line through it.

# MONDAY, NOVEMBER 25, 2002

Surface Weather Map and Station Weather at 7:00 A.M. E.S.T.

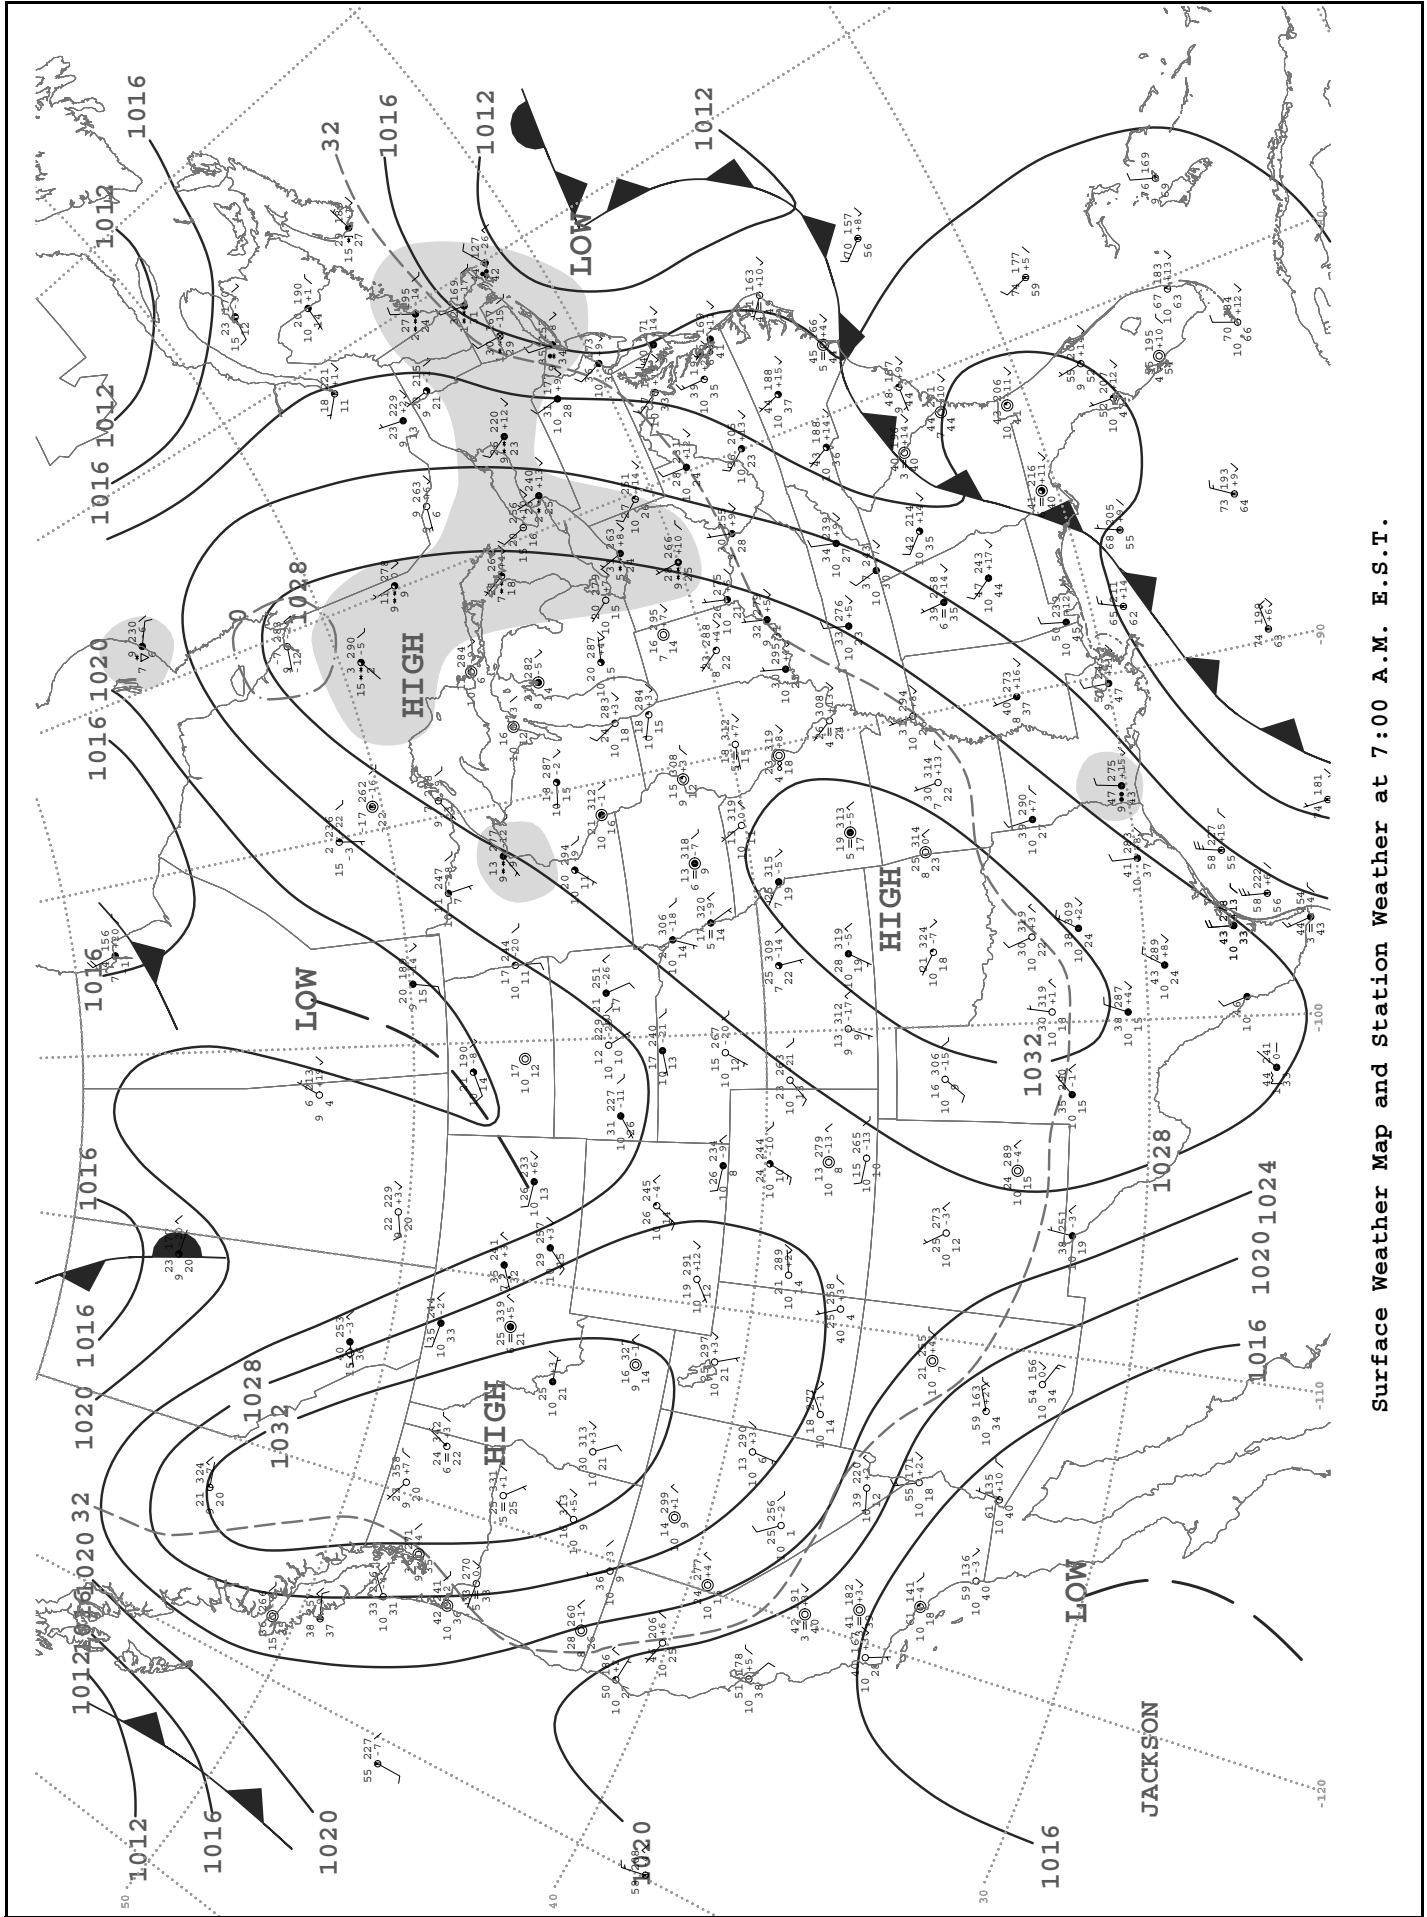

**Station Model**

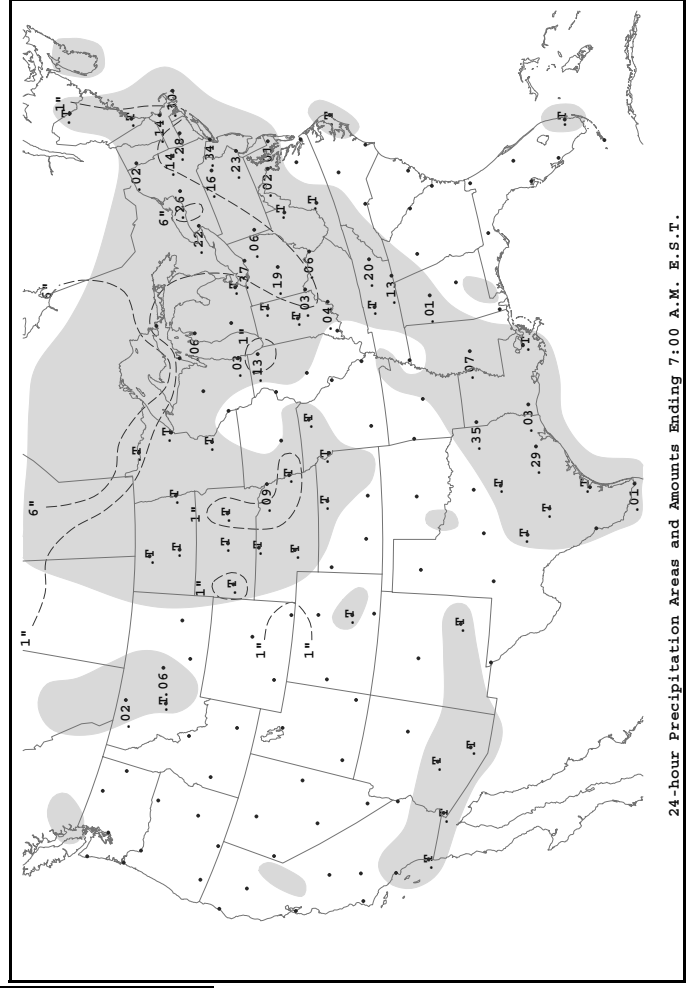

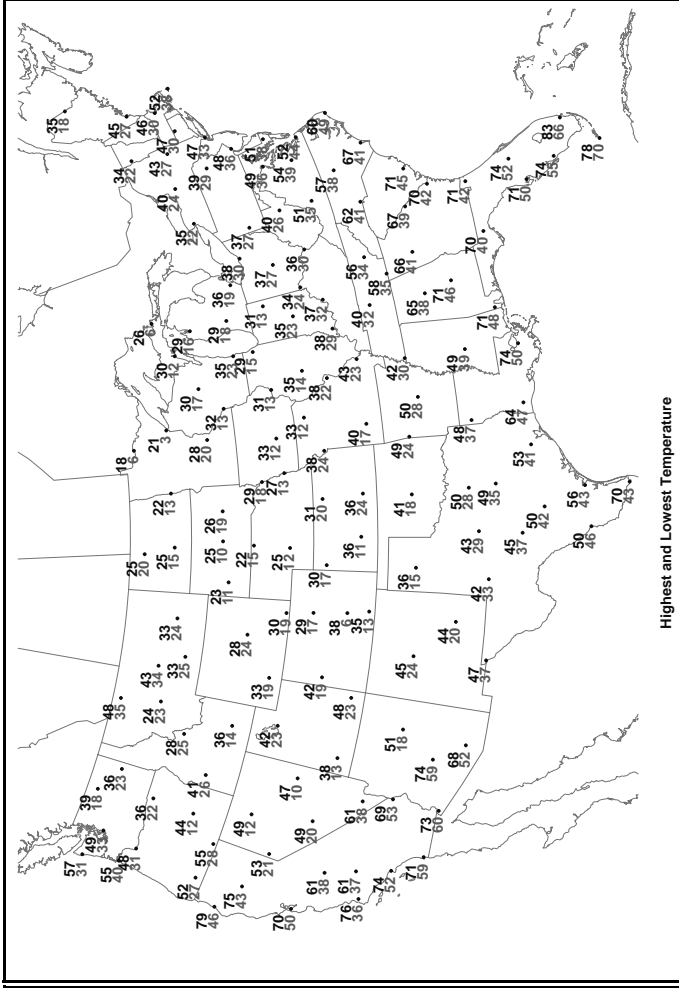

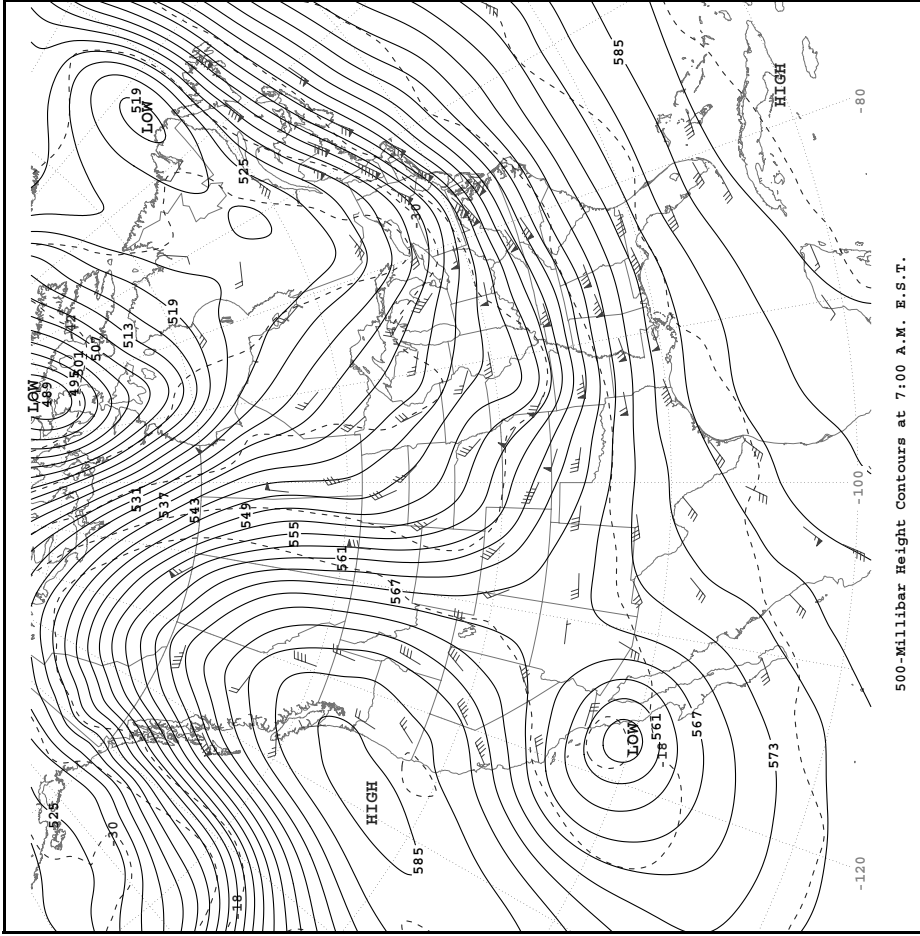

The station model diagram consists of several elements:

- Wind Direction:** Represented by a long feather (10 knots) and a short feather (5 knots).
- Current Temperature (in °F):** Represented by the number 'dd'.
- Visibility (in miles):** Represented by the number 'V'.
- Present Weather Symbol:** Represented by a circle containing a symbol for the weather condition.
- Dew Point Temperature:** Represented by the number 'TD'.
- Wind Speed:** Represented by the number 'PPP'.
- 3-Digit Surface Pressure (in tenths):** Represented by the number 'PP a'.
- 3 Hour Pressure Tendency (in tenths):** Represented by the number 'PP a'.
- 3 Hour Precipitation Tendency (in tenths):** Represented by the number 'PP a'.
- Sky Cover:** Represented by a horizontal line.

Surface Weather Map and Station Weather at 7:00 A.M. E.S.T.

**Station Model**

Wind Direction ——— Wind Speed  
 Long Feather - 10 knots  
 Short Feather - 5 knots

Current Temperature (in °F) ——— dd ff

Visibility (in miles) ——— TT

Present Weather Symbol ——— V WW

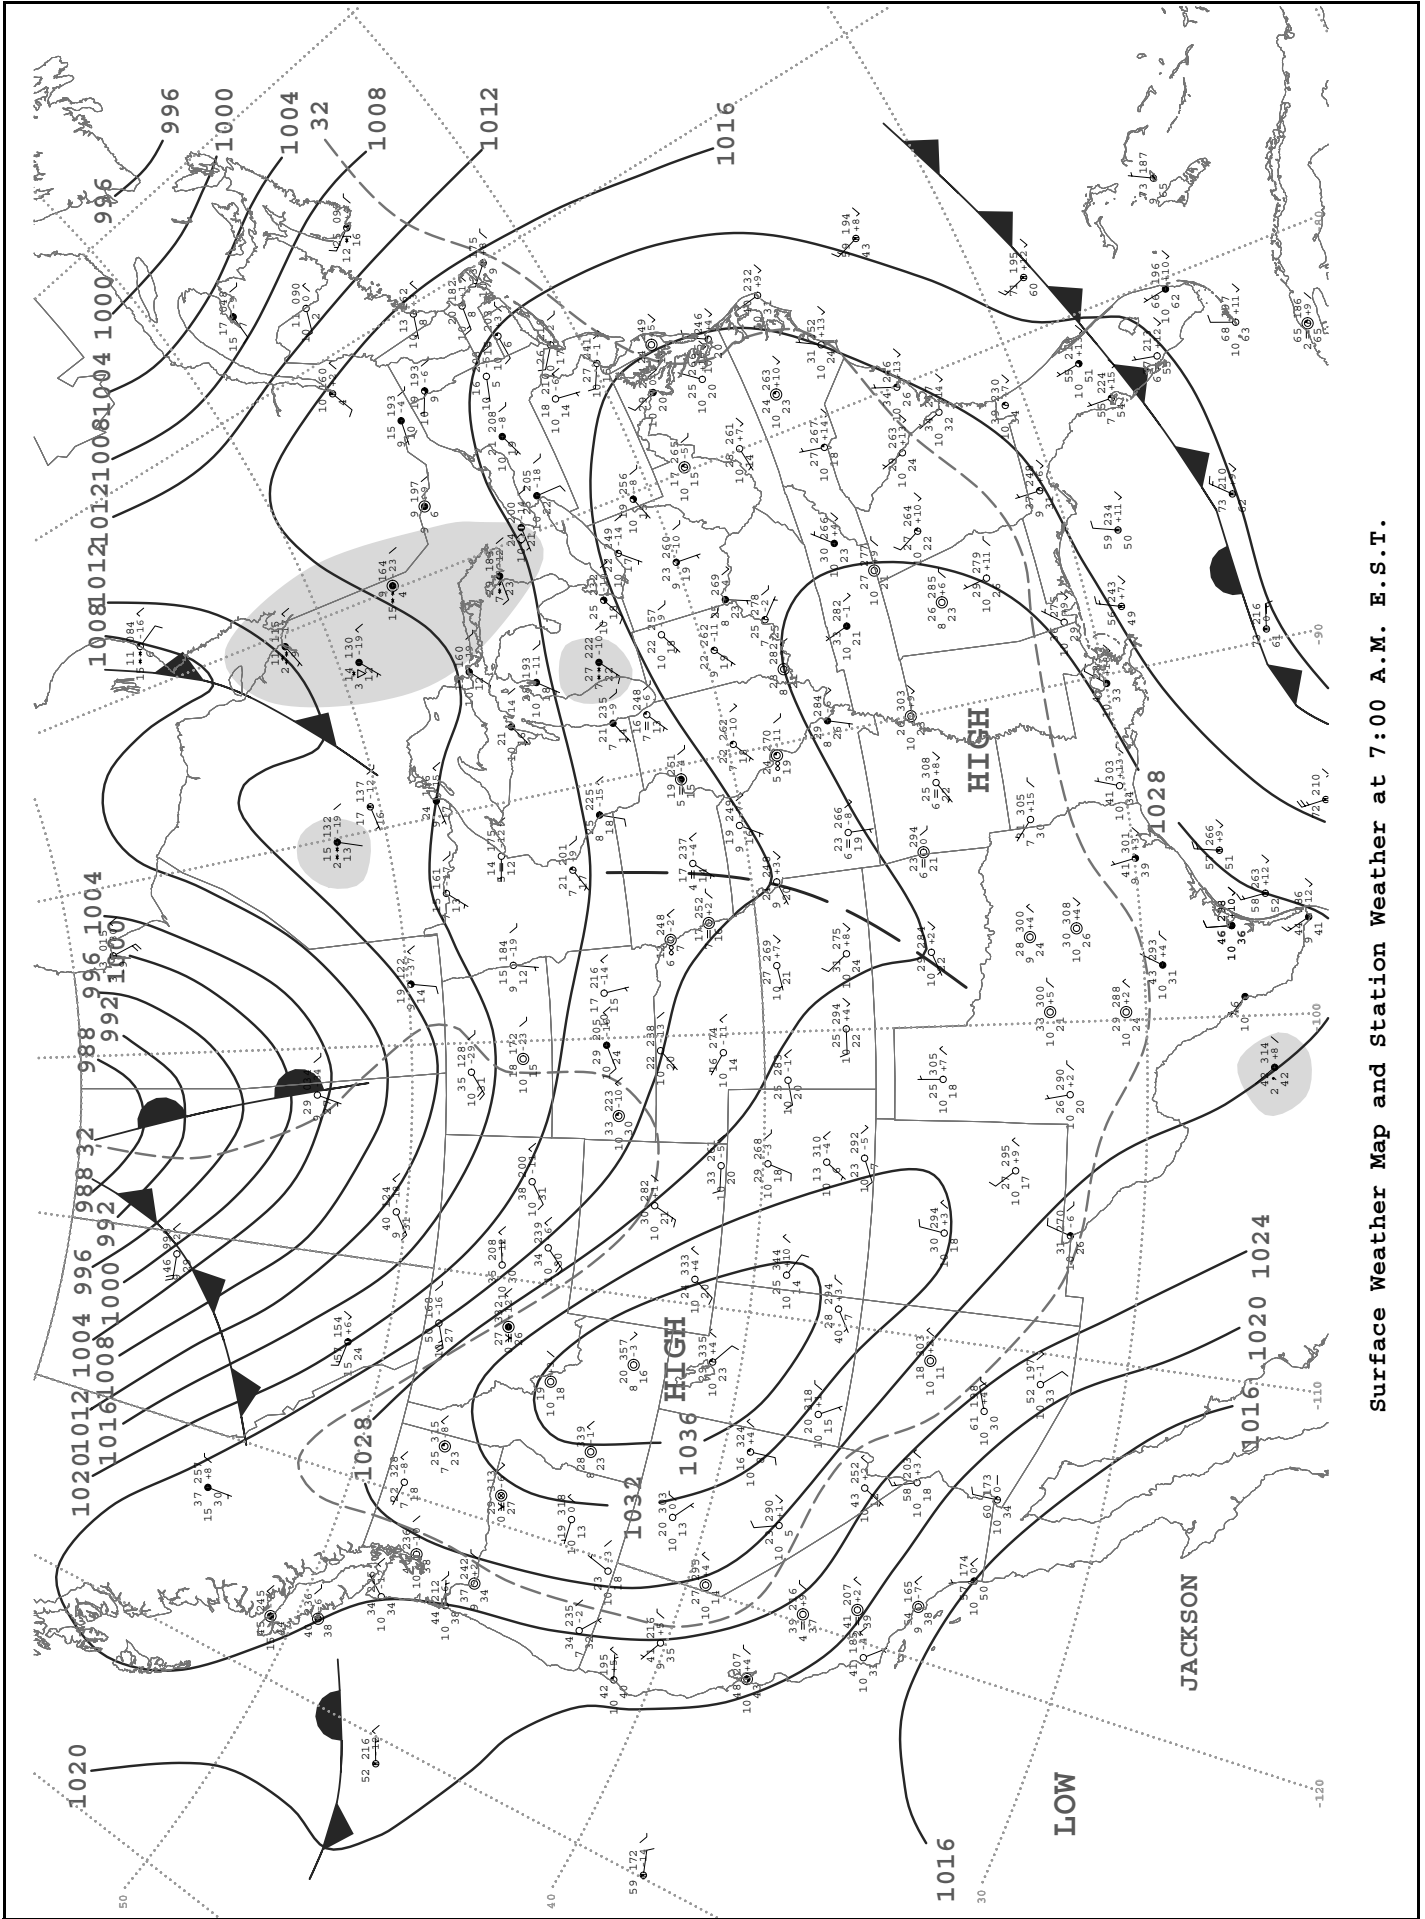

Dew Point Temperature ——— TD

3-Digit Surface Pressure (in tenths), Ex: 989 = 998.9mb, 012 = 1001.2mb

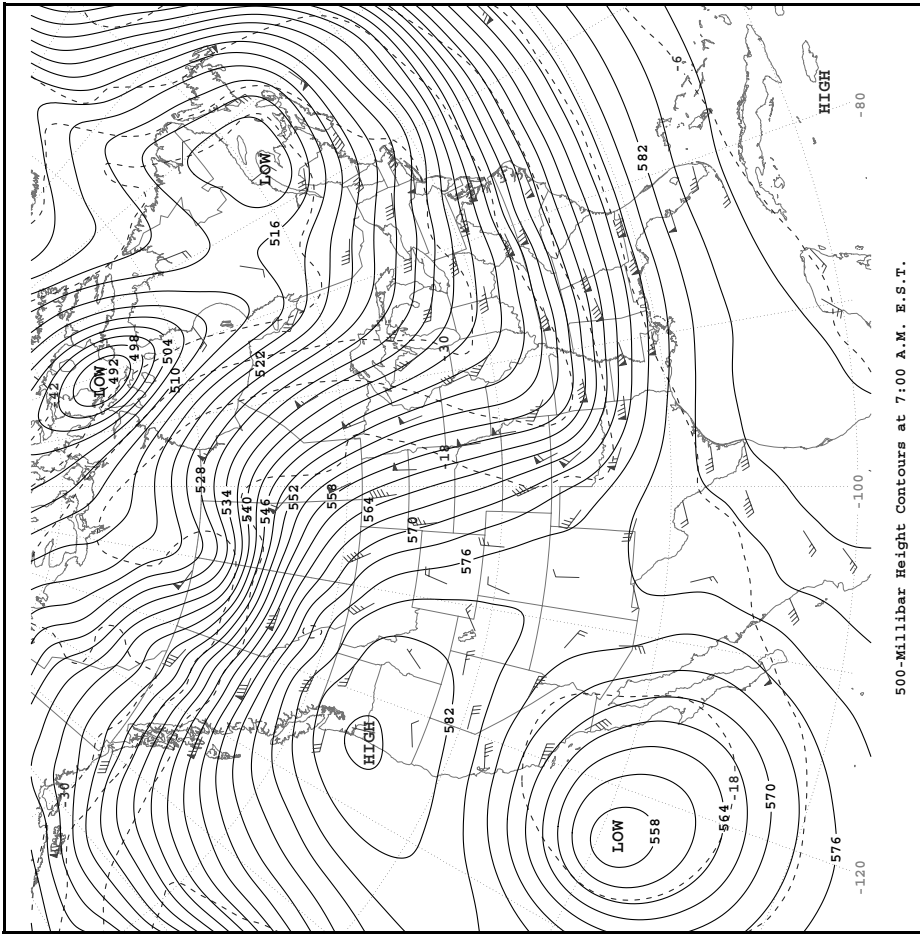

3 Hour Pressure Tendency (in tenths)

Skyl Cover

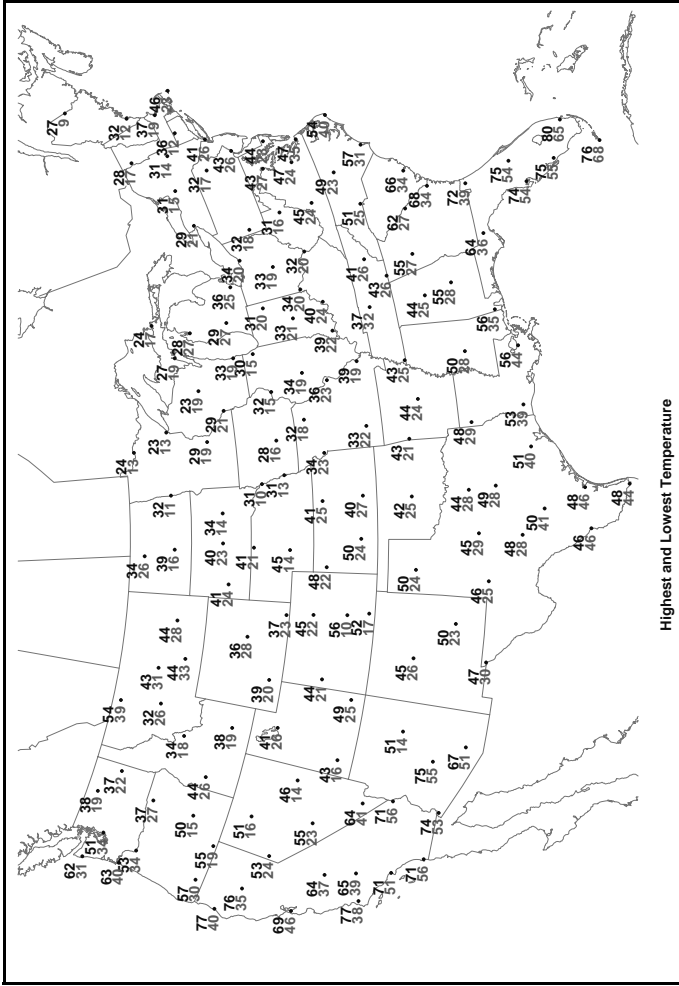

# WEDNESDAY, NOVEMBER 27, 2002

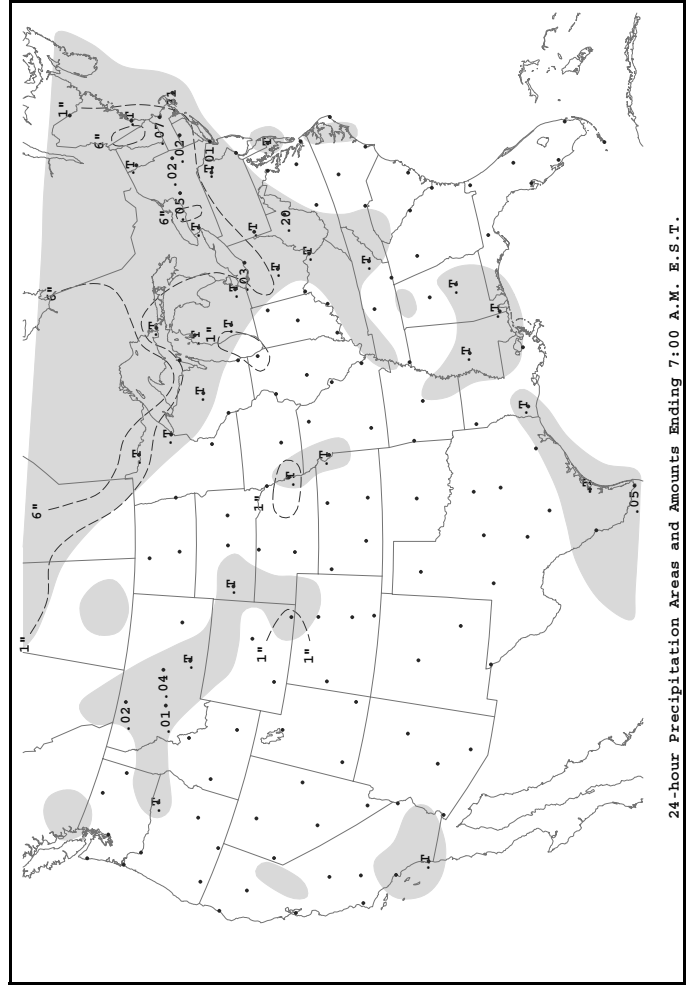

Surface Weather Map and Station Weather at 7:00 A.M. E.S.T.

500-Millibar Height Contours at 7:00 A.M. E.S.T.

Highest and Lowest Temperature

24-hour Precipitation Areas and Amounts Ending 7:00 A.M. E.S.T.

Wind Direction ——— Wind Speed  
 Long Feather - 10 knots  
 Short Feather - 5 knots

Current Temperature (in °F) ——— dd ——— ff

Visibility (in miles) ——— V ——— WW ——— TD ——— Sky Cover

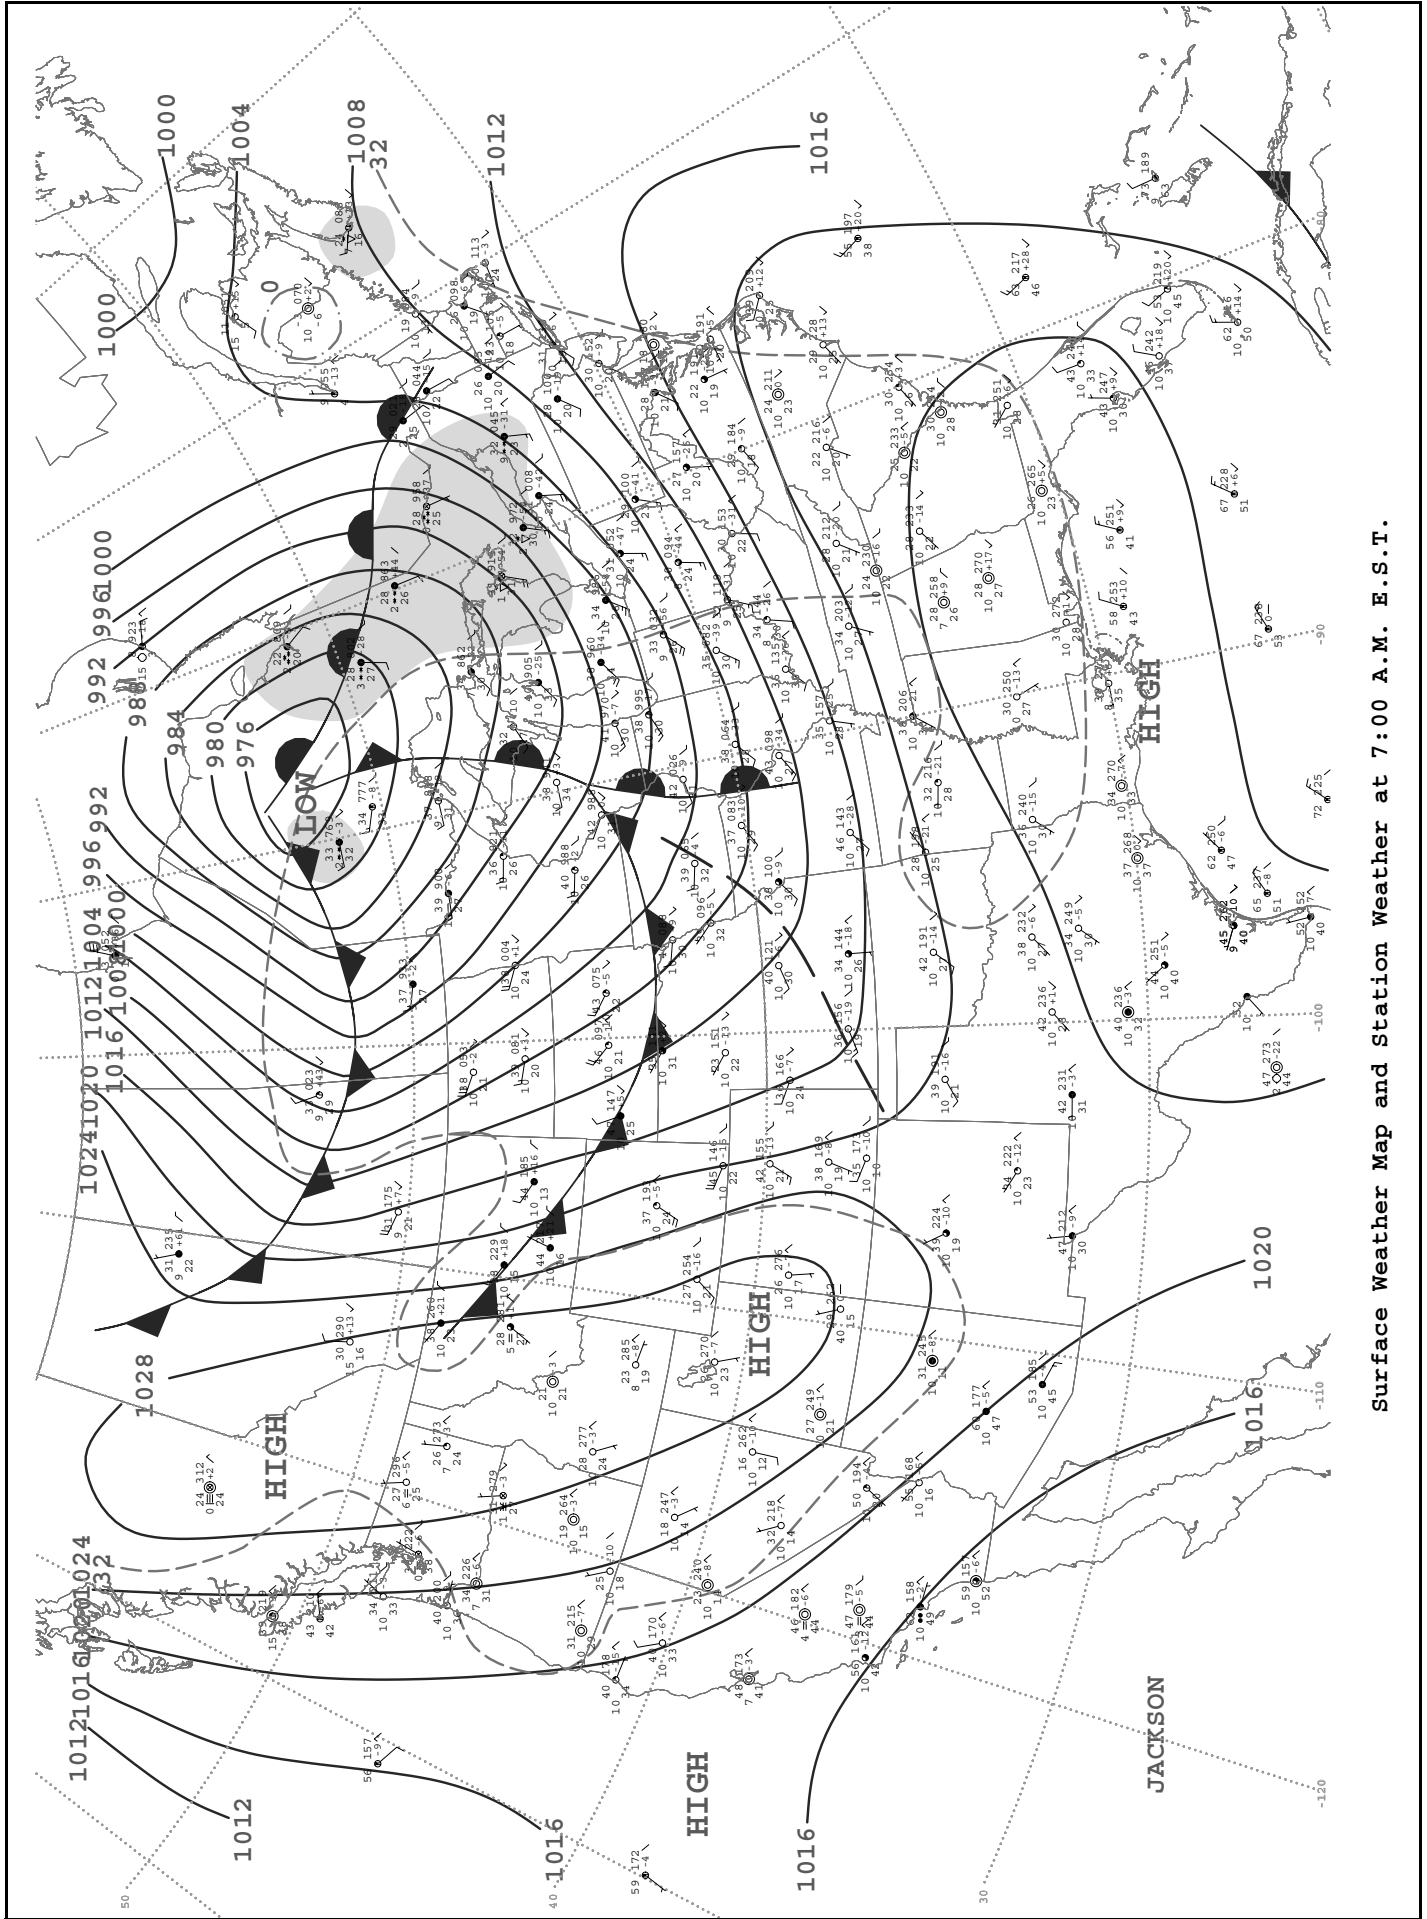

Present Weather Symbol ———

3-Digit Surface Pressure (in tenths), Ex: 989 = 998.9mb, 012 = 1001.2mb  
 3 Hour Pressure Tendency (in tenths)

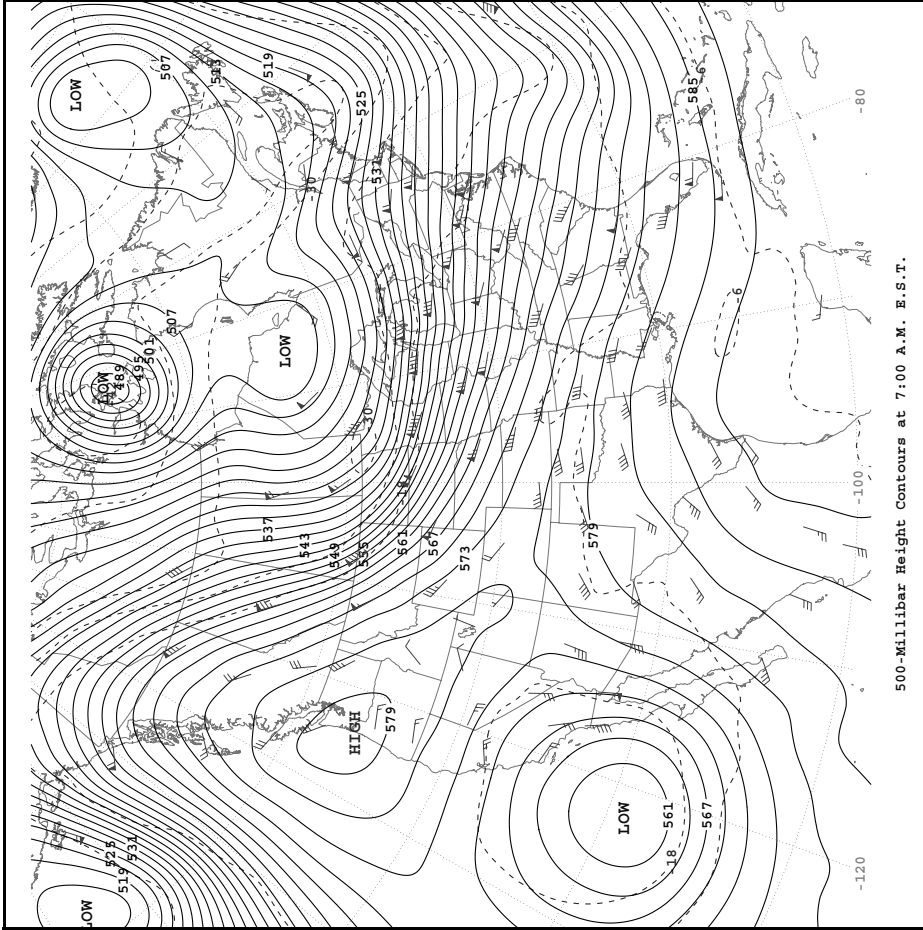

PPP ——— PP a
