

NOP3 WSR-88D Level II Data Flow
Updated 4/16/08

We have stopped sending Build 10 Level II data from NOP3.

Users can obtain Build 10 data from the following operational WSR-88D sites (Super Resolution from KPAH and KMPX; Recombined data from KYUX; and legacy resolution from KVWX). More sites will be loading Build 10 on their radars after field deployment of the software to the rest of the WSR-88D network begins on 5 May 2008. The planned shipment schedule of the Build 10 software kits is available at: http://www.roc.noaa.gov/ssb/cm/csw_notes/compsw.asp. Click on SW 43 under SW Note.
