Executive Summary

The Paperwork Reduction Act (PRA) requires OMB to report to Congress on the paperwork burden imposed on the public by the Federal government and efforts to reduce this burden. As has been the case in recent years, we are reporting that the overall paperwork burden increased during the past fiscal year (FY). Government-wide PRA burden increased from 8.24 billion hours in FY 2005 to 8.92 billion hours in FY 2006, a rise of more than 8 percent. There are many factors that contributed to this increase. The most significant factor (83 percent) causing the burden increase involved changes resulting from “adjustments,” which represent either an agency’s *re-estimate* of burden (with there being no actual change in burden) or an actual increase or decrease in burden due to changes beyond the agency’s control (such as demographic and economic trends). A relatively small portion (11 percent) of the increase in burden in FY 2006 was due to discretionary decisions made by agencies acting within their pre-existing statutory authority. Additionally, another small portion (5 percent) contributing to the burden increase resulted from new collections that are necessary to implement statutory mandates.

In addition to accounting for the burden hours for FY 2006 and projecting burden estimates for FY 2007, this report highlights the following issues:

The impact of “adjustments” to agency estimates in calculating the overall paperwork burden (Chapter 1). This year’s increase in burden was due to a number of factors, some of which were within the control of agencies, and others that were not. The principal driver of new burden in FY 2006 was not, in fact, new burden at all, but rather adjustments to agency estimates of existing information collections.

Achieving zero violations of the PRA (Chapter 2). OMB and the agencies have devoted significant efforts to eliminating PRA violations, and in FY 2006 we continued to reap the rewards of those efforts. We are reporting for FY 2006 only 12 violations involving lapses of OMB approval for ongoing collections – this represents the continued success that has resulted from OMB’s adoption in November 2001 of the “zero tolerance” approach to PRA violations. The 12 violations in FY 2006 represent an 88 percent reduction from the 97 violations that were reported for FY 2005, and a 98 percent reduction from the 795 violations that were reported in the ICB for FY 1998. OMB and the agencies continue to work towards the goal of zero PRA violations.

Taxpayer burden (Chapter 3). The Internal Revenue Service (IRS) accounts for approximately 78 percent of the total Federal information collection burden. Chapter 3 of this report addresses the burdens imposed on taxpayers, highlighting the reporting requirements associated with new tax benefits available to large numbers of taxpayers. The chapter also describes the agency’s experience during their first full year of a new methodology to estimate taxpayer burden more accurately. As OMB explained in last year’s ICB, this statistical model -- the Individual Taxpayer Burden Model -- takes into account the dramatic change in recent years in the way taxpayers prepare and file their tax returns by relying on computerized preparation and filing software.

Agency initiatives to reduce paperwork burden (Chapter 4). This report includes specific initiatives that the agencies are planning to undertake (or are currently undertaking) to reduce the overall burden that the agencies impose on the public. OMB has encouraged agencies to develop practical initiatives aimed at improving efficiency and reducing the public burden. Each agency's proposal for a new burden reduction initiative is described in Chapter 4, which also provides an update on burden reduction initiatives reported in previous years.

Chapter 1. Information Collection Burden for FY 2006 and FY2007

In the Information Collection Budget (ICB), the Office of Management and Budget (OMB) provides a comprehensive accounting of the information collection activities of the Federal government in a given fiscal year. This report presents the overall paperwork burden that the Federal government imposes on the American public, and also identifies efforts that the Federal agencies are making to reduce burden and collect information more effectively and efficiently. Under the Paperwork Reduction Act (PRA),¹ OMB oversees agency information collection activities and reports annually to Congress on the Act's implementation.

When an agency estimates, and seeks to reduce, the paperwork burden that it imposes on the public, the agency must consider the time that an individual or entity spends reading and understanding a request for information, as well as the time spent developing, compiling, recording, reviewing, and providing the information. Moreover, paperwork burden includes more than just the time necessary to file a tax form or fill out a benefits application; for example, it also includes the time a business spends keeping records required by Federal regulation or disclosing required information to third parties (such as consumers or employees).

As we have reported in previous years, it continues to be the case that the Department of the Treasury, in carrying out its responsibilities under the tax code, constitutes the vast majority (78 percent) of the Federal government's paperwork burden. For a description of burden by agency, see Table 3 in Appendix A.

FY 2006

Based on agency estimates of PRA burden, the public in FY 2006 spent approximately 8.92 billion hours responding to or complying with Federal information collections. This represents an 8.3 percent increase over the 8.24 billion hours that were reported for FY 2005.

In understanding the nature of this increase, it is important to recognize that this burden increase is the result of a number of independent factors, as outlined below.

1. Increases in Burden due to Discretionary Agency Action (11 percent).

Of this increase, approximately one-tenth (11 percent) was due to discretionary actions taken by the agencies (i.e., due to factors *within* the agencies' direct control).² The remaining 89 percent of the FY 2006 burden increase was due to factors *outside* of an agency's control.

¹ 44 U.S.C. § 3514

² The portion of burden that is "Due to Lapse of OMB Approval" is also within the agency's control. However, because OMB is reporting an historically low number of PRA violations this year, the "Due To Lapse of OMB Approval" figure is a negligible amount for FY 2006 (-40,000 hours).

2. Increases in Burden due to Recently-Enacted Statutes (5 percent).

Of the 89 percent of burden increase that was due to *outside factors*, a small portion (only 5 percent of the *total* increase for FY 2006) resulted from agency implementation of recently enacted statutes that required agencies to engage in new or expanded collections of information. The implementation of statutes is associated with an increase of 36.7 million burden hours, a significant decrease in statutory burden from the situation in FY 2005, when approximately 92 percent of the increase in burden was attributed to agency implementation of statutory mandates.

3. Increases in Burden due to “Adjustments” (83 percent).

The majority of the 89 percent of burden-increase that was due to *outside factors* is attributable to “adjustments” (which corresponds to 83 percent of the *total* increase for FY 2006). These increases amount to nearly 569 million burden hours. Burden changes that result from an “adjustment” are of two kinds.

A. Agency Re-estimation of Burden.

The first kind of a burden “adjustment” is when an agency has prepared a *re-estimate* of the burden that is imposed by a collection, with there being *no change* in the *requirements* of the collection, or in *who is required to respond* to the collection, or in the *number of individuals or entities* that (the agency estimates) will in fact respond to the collection. Rather, in this situation, an agency has re-evaluated its prior burden estimate for the collection and has concluded that its prior estimate was either low or high, and thus the agency revises the estimate accordingly. The agency then includes this revised burden estimate in the agency’s ICB submission, as well as in the agency’s next request to OMB for approval of the collection (unless the agency has in the meantime further revised the burden estimate).

In FY 2006, an adjustment of this kind resulted in an increase in estimated burden of approximately 343 million burden hours (which is approximately half of the *total* burden increase in FY 2006). As explained further in Chapter 3, below, this increase is the result of the IRS’s implementation of the new Individual Taxpayer Burden Model (ITBM), and the application of ITBM to the Form 1040 suite of forms.³ This adjustment increase, however, reflects a new *estimate of burden*, not an actual *change in burden* imposed on taxpayers.

B. Burden Changes from demographic, economic, and other outside factors.

The second kind of a burden “adjustment” is when there has been *no change* in the requirements of the collection as well as *no change* in who is required to respond to the collection, but there has been a change in the *number of individuals or entities* that (the agency estimates) will respond to the collection – and this change is due to factors outside an agency’s control.

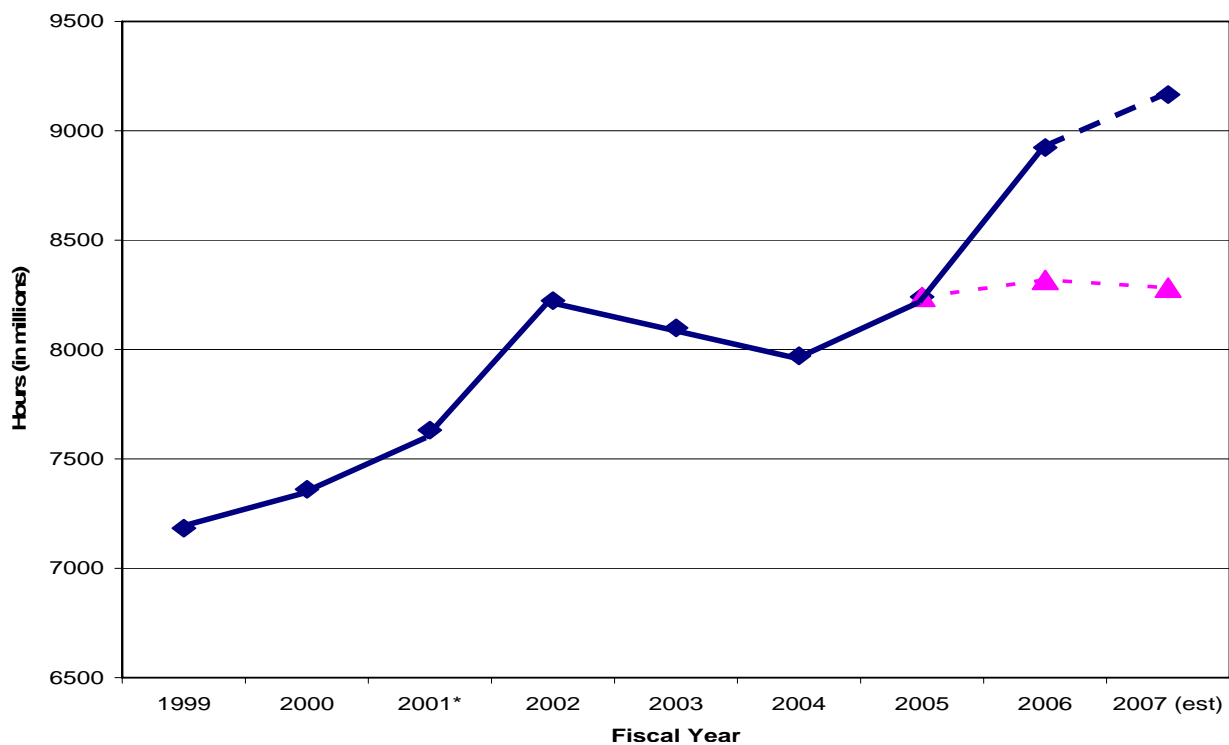

A typical example of such an adjustment is when demographic changes result in more (or fewer) people applying for a Federal benefit, and thus in more (or fewer) applications being filled-out and

³ In its forthcoming 2007 request for PRA approval of OMB Control Number 1545-0074, IRS will restate burden for several years back using the updated methodology to provide a consistent time-series for analysis of burden changes in recent years.

submitted (e.g., the retirement of the Baby Boom generation will result in more individuals applying to participate in Medicare). Another example of such an adjustment is when economic changes result in more (or fewer) people being unemployed (and thus applying for unemployment benefits) or in more (or fewer) businesses being created (and thus filing the related tax forms). In both these types of situations, the agency has not changed the requirements of the collection, and the agency has not redefined who has to respond to the collection. Instead, the changes in these outside factors either increase or decrease the number of individuals or entities that will respond to the collection.

For example, in FY 2006 the Department of Education did not revise the Student Aid Report (SAR), the disclosure form which includes a student's preliminary eligibility information for Federal student aid and the student's Expected Family Contribution. However, the burden for this collection still increased, as the Department recognized that greater numbers of students were applying for Federal student aid and, therefore, receiving a SAR. This factor was outside of the Department's immediate control, but still resulted in an increase (an adjustment) of 54,007 hours for this collection.

Figure 1. Total Burden (FY 1999 - FY 2007)⁴

- ◆ Total Burden
- ▲ Total burden excluding adjustments and program changes due to new statutes.*

⁴As discussed in Chapter 3, IRS has changed the methodology it uses to estimate individual taxpayer burden. As a result, the total burden for FY 2006 and FY 2007 has different underlying assumptions than estimates for previous years. Since IRS has not yet re-estimated prior years' burden under the new model, the higher line for FY 2006 and FY 2007 overstates the overall increase in burden. To control for this and other adjustments and burden changes beyond the control of agencies, the dotted triangular line represents changes due to agency discretion since FY 2005.

*Adjustments include changes in burden estimation methodology. This line reflects program changes due to agency action.

FY 2007

In FY 2007, the Federal government anticipates a smaller overall increase in burden imposed on the public. The projected total governmentwide burden for FY 2007 is 9.2 billion hours, a 2.7 percent increase over the previous year's reported burden.

A significant portion (approximately 28 percent) of the projected burden increase in FY 2007 is due to the introduction by the IRS of one new form -- Form 8913, Credit for Federal Telephone Excise Tax Paid. This new form allows taxpayers to request a refund of Federal excise tax paid on nontaxable telephone service. Because taxpayers can only request this refund on their 2006 income tax returns, this is a one-time increase in burden. Although the burden per response is relatively low, the one-time burden spike is high (67.6 million burden hours) because of the very large number of taxpayers who are eligible to claim the refund. The IRS is initiating this collection due to several recent Federal court decisions which have held that the excise tax does not apply to long-distance phone service as it is billed today. The IRS is following these court decisions and, as a result, the IRS (prospectively) is no longer collecting this portion of the excise tax and (retrospectively) is refunding to taxpayers the portion of the tax that had been charged on long-distance calls. In order to make these refunds to those taxpayers who claim them, the IRS developed Form 8913.

The remainder of the estimated burden increase in FY 2007 is attributable to the following.

As in FY 2006 and prior years, agency implementation of new statutes will increase paperwork burden in FY 2007. The largest increase in this regard is expected from the Department of Agriculture's (USDA) implementation of the Child Nutrition and WIC Reauthorization Act of 2004 (Pub. L. No. 108-265), with an estimated increase of 6.86 million burden hours. This law reauthorized several Federal nutrition programs, including the National School Lunch Program (NSLP) and School Breakfast Program (SBP), and it requires those schools that participate in NSLP and SBP to implement food safety programs for their preparation and service of school meals served to children. The paperwork increase involves the recordkeeping and reporting requirements associated with these food safety programs. Another significant statutory increase in burden will result from the Commerce Department's implementation of the Digital Television Transition and Public Safety Act of 2005 (Pub. L. No. 109-171), which will increase burden by 5.25 million burden hours. This burden is associated with individuals applying to the Commerce Department for the new benefit that the Act created, which is a coupon that they will be able to use to help defray the cost of their purchasing a digital converter box. This benefit was created to assist those people who have analog televisions, and rely on over-the-air transmission, rather than on cable or satellite transmission, because under Federal law these over-the-air transmissions will cease to be analog by February 18, 2009.

The following discussion explains, in more detail, the various factors that affected paperwork burden hours in FY 2006 and that we expect will affect such hours in FY 2007.

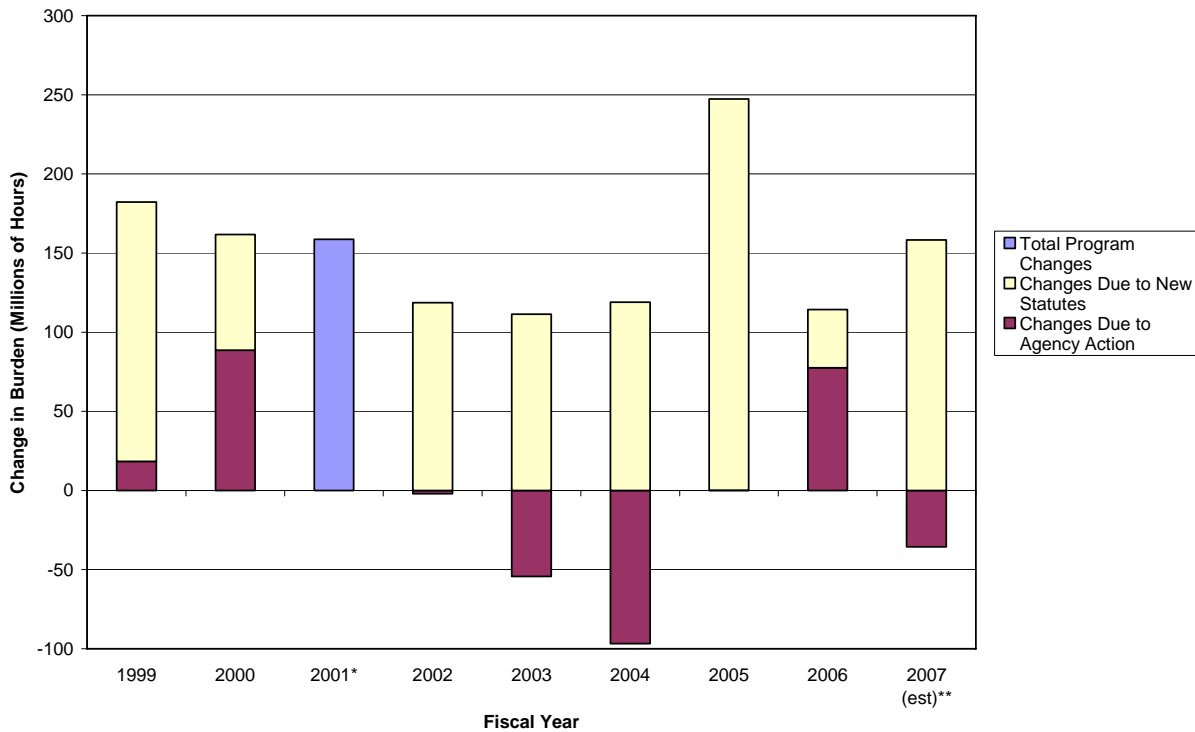

Changes within Agency Control

In some areas, agencies have considerable discretion in managing their information collection activities. For example, in administering a grant program where performance reporting is statutorily required, an agency may have discretion in deciding the frequency or depth of grantee reporting.

OMB considers actions within this category of “Due to Agency Action” to be the most accurate measure of agency activity with respect to information collection.

As indicated in Figure 2, in FY 2006 agencies reported a net increase in discretionary burden as part of their programmatic responsibilities. Although the overall picture shows an increase, in FY 2006 a number of agencies took significant actions to decrease the discretionary burden imposed. Some notable examples include:

- The Department of Transportation revised its Hours of Service of Drivers regulations so that over 239,400 commercial motor vehicle drivers operating in the short-haul sector would be relieved of the requirement to file Record of Duty Status (RODS) information. This change resulted in a decrease of 7.27 million burden hours.
- The Department of Homeland Security (DHS) expanded electronic reporting options for its National Fire Incident Reporting System (NFIRS), which allows the Department to analyze fire incident data at the Federal, State, and local levels. The revised system continues to help DHS identify common fire trends on a national scale, but in a more efficient manner. The revisions to the system resulted in a reduction of 1.28 million burden hours and \$17.545 million in costs to respondents.
- Within the Department of Health and Human Services, the Health Resources and Services Administration (HRSA) managed a work group to examine some of its forms for possible duplication or redundancy with currently approved Standard Forms. The group found that the health professions programs could operate with the Standard Forms, allowing HRSA to discontinue on of its program-specific forms, the Competing Grant Training Application. As a result, burden was reduced by 101,531 hours.
- The Social Security Administration (SSA) reduced the amount of time necessary to complete the initial online filing for Social Security retirement and disability benefits by enabling respondents to sign the application electronically, rather than in hard copy. This portion of the SSA’s Signature Proxy Initiative resulted in an annual reduction of 32,401 hours.

Figure 2. Change in Burden Due to Program Changes (FY 1999 – FY 2007)

*In FY 2001, OIRA did not disaggregate Total Program Changes into Changes Due to Agency Action, Changes Due to New Statutes, and Changes Due to Lapse in OMB Approval.

**More than a quarter of the change indicated for FY 2007 as due to statute resulted from new IRS Form 8913 (Credit for Federal Telephone Excise Tax Paid), which allows taxpayers to receive telephone excise tax refunds. IRS was required to refund this tax because of court decisions that interpreted tax legislation. Accordingly, OMB is classifying the program change as due to statute, since the burden is legislatively driven.

As these examples and the data in Figure 3 and Figure 4 demonstrate, individual agencies are continuing to look for ways to reduce the burden they impose on the public. However, taken as a whole, the Federal agencies are reporting a net increase in program changes for FY 2006. A considerable portion of the program change increase (79 percent) can be attributed to two large-scale changes made by the Centers for Medicare and Medicaid Services (CMS) within the Department of Health and Human Services. First, CMS created a new standardized claim form, the CMS-1500 (08-05), for use in both the Medicare and Medicaid programs to apply for reimbursement for covered services. The form replaces the previous form used by CMS (12-90). While transitioning from the old form to the new form, CMS has reported a one-time burden increase of 46.4 million hours. The agency expects that the overall burden for collecting this information will be reduced as the old form is phased out. Second, CMS instituted a new process to verify at a high level of assurance all persons requesting access to CMS' computer systems, the Individuals Authorized Access to the CMS Computer Services (IACS). This new information collection resulted in a program change that increased burden by 15 million hours.

Figure 3. FY 2006 Percentage Change in Burden Due to Program Changes (Departments)

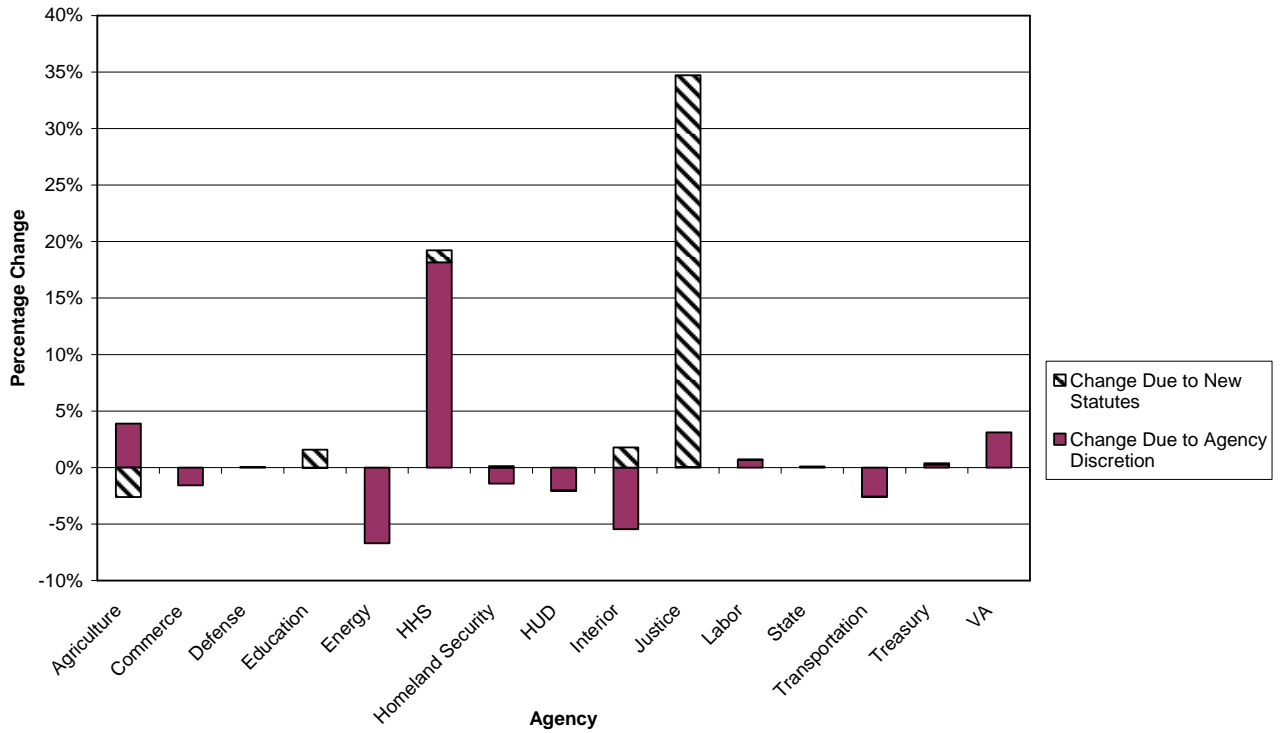

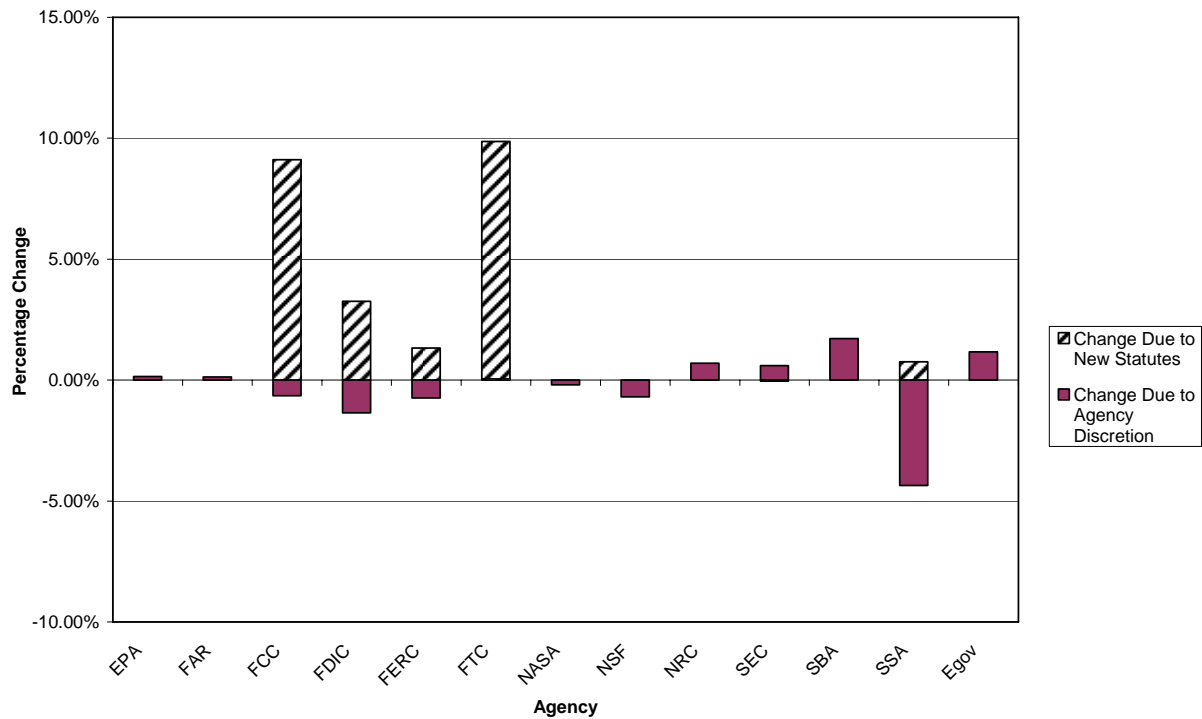

Figure 4. FY 2006 Percentage Change in Burden Due to Program Changes (Other Agencies)

New Statutory Changes

In each session of Congress, laws are passed that create new programs for the agencies to implement and, quite frequently, new information to collect, use, and disseminate. Typically, new legislative initiatives and amendments require more, not less, data collection. In the past fiscal year, approximately 5 percent (36.7 million hours) of the increase in burden resulted from the implementation of new statutes passed by Congress in recent years. Among other public policy goals, these statutory changes were designed to increase employment, protect consumers, improve public health, promote fiscal responsibility and enhance transportation security. Examples of statutory changes that resulted in the largest burden increases are provided in Table 1.

American Indian Probate Reform Act of 2004 (Pub. L. No. 108-374)	Interior	-	1,037,362

In FY 2006, the most significant statutory burden increase resulted from the Federal Communications Commission's (FCC) implementation of the Unsolicited Facsimile Advertisements, Junk Fax Prevention Act, which permits the faxing of unsolicited advertisements to individuals and businesses with which the sender has an established business relationship and provides a process by which any sender must stop sending these faxes upon the request of the recipient. Although neither the disclosure of this process to the fax recipient nor the request to stop sending faxes imposes large PRA burdens, these requirements apply to an extremely large number of persons.

The next largest statutory increase resulted from the Department of the Treasury's implementation of the American Jobs Creation Act of 2004. This law created the Domestic Production Activities Deduction, a tax benefit for certain domestic production activities. The new deduction provides a tax

savings against income attributable to domestic production activities, and is available for tax years beginning after December 31, 2004.

Qualified production activities include manufacturing, producing, growing, and the construction and substantial renovation of real property. The production of certain films is also a qualifying activity as are certain engineering or architectural services.

To help taxpayers calculate this deduction, IRS created Form 8903. Due to the complexity of the form and length of the instructions, IRS estimates that the average time to complete it for non-individual taxpayers is almost 32 hours. With over 300,000 non-individual taxpayers expected to prepare and file Form 8903, IRS estimates that the total burden of the new form to be 8.7 million hours.

In FY 2007, the agencies anticipate that they will impose an increase of 158.3 million hours to fulfill their responsibilities under new legislation or other recent legal mandates. As discussed previously, the IRS will be implementing a telephone tax refund form that accounts for most of this increase, and this refund is required by several recent court decisions which held that the IRS could no longer collect an excise tax on long-distance phone calls. The largest anticipated increase from a new statute is expected from the Department of Agriculture's (USDA) implementation of the Child Nutrition and WIC Reauthorization Act of 2004. This law reauthorized several Federal nutrition programs, including the National School Lunch Program (NSLP) and School Breakfast Program (SBP). The law required school food authorities participating in the NSLP and SBP to implement food safety programs for the preparation and service of school meals served to children. As part of its implementation of this law, USDA will establish a risk-based Hazard Analysis Critical Control Point (HACCP) system to assist participating schools in identifying potential food hazards and critical points where hazards can be controlled or minimized. USDA will also develop monitoring procedures to determine if the hazards identified are being effectively controlled. USDA's expected burden increase stems from the recordkeeping and reporting requirements associated with State and school participation in the HACCP system.

Changes Beyond Agency Control

Not all changes in agency burden can be attributed to discretionary actions the agency has taken. Indeed, many increases and decreases in burden are outside the realm of an agency's control. These changes, referred to under the PRA as "adjustments," differ from program changes in that the burden imposed on actual respondents for individual information collections does not change. Rather the change in burden occurs due to an agency's re-estimate of the amount of time necessary to respond to an information collection or due to a change in the population responding to the collection.

Re-estimates of burden reflect attempts by an agency to assess more accurately the burden a particular collection of information imposes on the public. For example, the Department of Labor (DOL) conducted an analysis of the time required for construction contractors and subcontractors to comply with recordkeeping and reporting requirements for nondiscrimination and affirmative action obligations for Federal contracts. Although DOL did not create new requirements or change the existing requirements, the burden for the collection was reduced because DOL was able to disaggregate the time necessary for different sized firms to respond to the information collection. Additionally, DOL used multiple data sources to obtain a more exact measure of the respondent universe. As a result of these efforts, DOL adjusted downward its estimate of the burden for its

Construction Recordkeeping and Reporting information collection (OMB number 1215-0163) by 3.1 million hours.

Changes in the population that must respond to the information collection often result from demographic trends, economic growth, or natural disasters. For example, even if the program eligibility and information collection requirements for a Social Security benefit program targeted at elderly populations do not change, the burden for the collection may still increase as greater numbers of Baby Boomers reach the target age for program eligibility and apply for benefits.

More than three quarters (568.77 million hours) of the burden increase reported for FY 2006 is attributable to adjustments in agency estimates. As explained below, the Department of the Treasury's adjustment for a select set of tax forms accounts for nearly 89 percent of the overall adjustment figure. Absent the Treasury's sizeable adjustment, FY 2006 adjustments for the other Federal agencies totaled 63.4 million hours, or approximately 9 percent of the overall increase from FY 2005.

Chapter 2. Paperwork Reduction Act Compliance

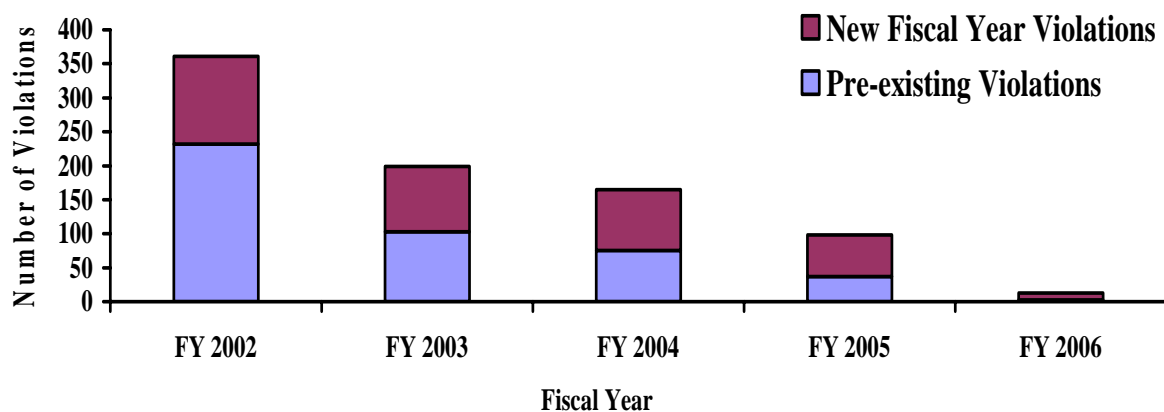

The Paperwork Reduction Act of 1995 (PRA) requires Federal agencies and OMB to ensure that information collected from the public minimizes burden and maximizes practical utility. The Act assigns each agency's Chief Information Officer (CIO) the responsibility for ensuring that the agency complies with the PRA. OMB's Office of Information and Regulatory Affairs (OIRA) is responsible for approving information collection reviews under the PRA. OIRA desk officers review and approve over 3,200 information collections each year.

To help the public and the agencies monitor compliance with the information collection provisions of the PRA, OMB annually publishes a list of violations in the ICB (see Appendix C). This year, OMB is reporting the lowest number of violations (resulting from the lapse of OMB's approval for an ongoing collection) that it has ever reported since implementing a "zero tolerance" approach to violations of the PRA. During FY 2006, the agencies reported 12 information collections that were violations, eight of which had expired in FY 2006 and four of which were pre-existing collections that had expired before October 1, 2005 and were on-going violations until their reinstatement in FY 2006.⁵

Achieving Zero Violations

Agencies have made great progress in reducing the number of violations that occur and in resolving them more promptly. However, it is still the case that a number of collections become violations each year because agencies do not submit to OMB, on a timely basis, requests for renewal of OMB approval under the PRA. Thus, even if these violations are resolved quickly, agencies are nevertheless out of compliance with the law for relatively brief periods of time.

Figure 5. Total Number of Agency New and Pre-existing Violations, FY 2006

⁵ See Appendix C for a further explanation of the circumstances surrounding the four ongoing violations that are reported here.

OMB tracks the number of information collections that expire each month and determines whether the collections are violations. Each year, OMB lists in the ICB the total number of agency violations. Figure 5 represents the total number of agency violations that occurred during recent fiscal years and the total number of pre-existing violations carried over from the previous fiscal year.

OMB is committed to working with agencies to reduce the number of new violations and resolve all pre-existing violations. OMB is pleased to report that 64% of agencies reported zero violations in FY 2006, up from 57% in FY 2005. Of the agencies reporting violations, moreover, violations were usually resolved quickly: 70% of the agencies reporting violations in FY 2006 were able to reinstate their expired information collections within an average of 4 months.

Table 2 rates each of the 28 agencies for their compliance. For FY 2006, no agencies reported more than five violations and received an OMB rating of “poor.” In fact, no agency had more than two violations. This is a significant improvement over FY 2005, when three agencies received a poor rating, and over FY 2004, when eight agencies received a poor rating. Similarly, the number of agencies rated as good increased from 16 to 18.

Steps to Improve Agency Compliance

In addition to routine efforts to inform agency staff of the steps they can take to avoid incurring PRA violations, OMB has taken action in recent years to minimize violations further, including:

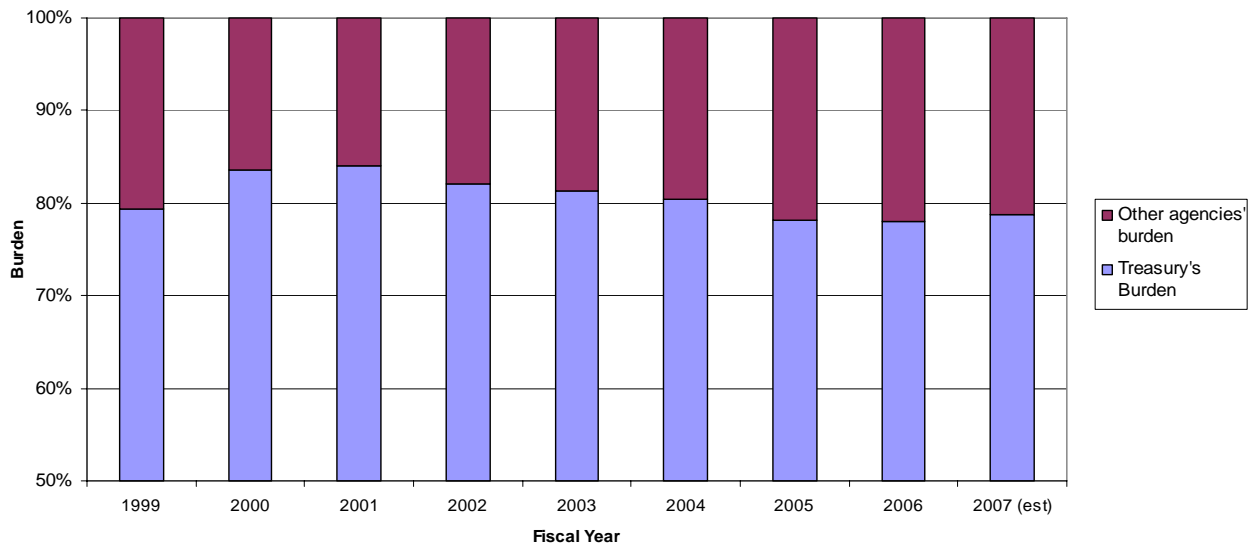

- **September 2006:** In the FY 2006 ICB Bulletin (describing the agency requirements for submission of ICB documents), OMB asked agencies to identify and resolve all violations that occurred in the past fiscal year.
- **January 2007:** OMB enhanced the electronic database of information collections to enable agencies to prepare a watchlist of all the information collections that will expire in the next 150 days. This watchlist provides the agency with ample time to prepare a 60-day *Federal Register* notice, incorporate any public comments from the Notice into the collection, submit the collection to OMB for a 30-day review period, and receive clearance for the collection. Moreover, this watchlist specifically flags those information collections which the agency has not yet submitted to OMB for renewal so that agencies can focus on those information collections which most urgently require their attention.
- **April 2007:** OMB provided instructions to the agencies on how to use the watchlist and encouraged agencies to use this feature as a management tool to prevent future violations.

Chapter 3. Recent Developments in Taxpayer Burden

A continuous theme in OMB’s annual reports to Congress on the Paperwork Reduction Act has been the predominant role played by the Internal Revenue Service (IRS) in the Federal government’s information collection activities. Due to the nature of the Federal income tax system, IRS affects the lives and businesses of Americans like no other agency. Accordingly, in FY 2006 IRS again accounted for a large share (78 percent) of the Federal government’s reporting burden on the public. As we report in this year’s ICB, significant changes in IRS burden have affected the government totals.

As shown in Figure 6, Treasury’s share of all PRA burden (made up almost entirely of IRS burden hours) has been close to 80 percent since FY 1999. IRS experienced a slight downward trend in burden over the past four fiscal years. This trend leveled off in FY 2006 and is expected to increase slightly in FY 2007. While IRS administers a large number of information collections that are subject to the PRA, two collections in particular explain much of the current developments in taxpayer burden. This chapter discusses these two collections— a pair of related forms that will be used only once by taxpayers in FY 2007 and the individual tax return burden, which was the focus of significant burden estimation and accounting changes in FY 2006.

Figure 6. Treasury Burden as a Percentage of All Burden, FY 1999 – FY 2007

Forms 8913 and 1040-EZ-T: The Telephone Excise Tax Refund

The telephone tax refund is a one-time payment available to taxpayers filing a 2006 Federal income tax return. It is intended to refund previously collected Federal excise taxes on long-distance or bundled service. It is available to anyone who paid such taxes on landline, wireless, or Voice over Internet Protocol (VoIP) service. IRS is refunding the taxes paid on long-distance or bundled service billed to taxpayers for the period after Feb. 28, 2003, and before Aug. 1, 2006.

To understand the reasons behind this tax refund and the creation of Forms 8913 and 1040-EZ-T, one must begin with a three percent excise tax that was instituted in 1898 to finance the Spanish-American war, and that had been legally collected for many years. Due to recent changes in the telecommunications industry, part (but not all) of this tax was no longer applicable. The applicability of the tax became the subject of debate, and was ultimately resolved by the courts.

Until the matter was resolved by the courts, the IRS continued (appropriately) to collect the taxes, and would have continued collecting them if the IRS had ultimately prevailed in the court cases.

Once the issues had been resolved by the courts, however, IRS needed to stop collecting the excise tax and make refunds of already-paid taxes (back to the date of the initial court cases, which was over three years ago).

While the availability of this refund was good news for taxpayers, the burden of calculating and claiming the refund can be significant. To assist taxpayers eligible for this one-time credit, IRS created Form 8913, Credit for Federal Telephone Excise Tax Paid. IRS assumes that nearly 2.4 million non-individual filers will file Form 8913, with an average burden of over 28 hours per filer. The large average burden is due to the complexity of calculating the credit or refund. Filers, for example, must have phone records for each month of the refund period for which a credit or refund is requested, and they must calculate the interest due on the refund. To reduce this burden, IRS developed a Business and Nonprofit Estimation Method that requires only six consecutive months of phone records. Even with this method available to many taxpayers, the aggregate burden for non-individual taxpayers for this one-time collection is 67.6 million hours.

Burden associated with the telephone excise tax incurred by individuals is covered under OMB control number 1545-0074, with the exception of certain individuals only filing a return for purposes of claiming the credit. To meet the needs of these taxpayers, who would otherwise typically not need to file a return, IRS created Form 1040-EZ-T. This form is only used for claiming the telephone excise tax refund and is covered under OMB control number 1545-2039. Approximately one million individuals are expected to use this form with an average burden of almost two and a half hours. The aggregate burden for this one time collection, over 2.4 million hours, compares favorably with the higher burden that would have been required had these individuals been required to file a full income tax return in order to claim this credit.

Individual Tax Return Burden

As explained in last year's ICB, in FY 2006 IRS updated its burden estimation methodology for calculating the PRA burden of individual taxpayers. Under IRS' new Individual Taxpayer Burden

Model (ITBM), the aggregate burden for all individual forms and schedules was estimated to be three billion hours. This total burden figure reflected the burden associated with Forms 1040, 1040A, 1040EZ, 1040NR, or 1040NR-EZ, and their associated schedules and other tax forms that can be attached to these forms. Under the new methodology, *all* forms used by individual income taxpayers are assigned a single control number: 1545-0074.

The new three billion hour burden estimate was 1.44 billion hours higher than was previously assigned to Control Number 1545-0074. Much of this increase was due to double counting of individual burden that had previously been accounted for in separate information collections. Previously, each individual tax form was assigned a separate control number, and each had a separate burden estimate. As noted above, the previously separate burden estimates from other control numbers are now included under Control Number 1545-0074. As a result, IRS has had to (1) discontinue OMB's approval of individual tax forms now covered under 1545-0074 and (2) adjust the burden of "dual-use" forms (i.e., those filed by both individual and non-individual taxpayers) to reflect the fact that the portion of burden imposed on individual taxpayers is now accounted for under 1545-0074.

In last year's ICB, OMB reported that approximately 1.19 billion hours of the 1.44 billion hour increase was due to double-counting. Since then, IRS has reviewed the burden accounting changes and found that 93 million of the 1.19 billion hours was previously accounted for under Control Number 1545-0074, and should not have been considered double counting. With this change, the total adjustment increase in individual taxpayer burden in FY 2006 was approximately 343 million hours, instead of 250 million hours. This adjustment increase, however, reflects a new *estimate of burden*, not an actual *change in burden* imposed on taxpayers. For FY 2007, IRS estimates that the total burden imposed on individual taxpayers is 3.31 billion hours.

Annual burden changes estimated by ITBM reflect the three major PRA categories of change: statutory changes, IRS discretionary changes, and adjustments. Statutory changes are reflected in the model by changing tax parameters (such as the amount of the AMT exemption for married taxpayers filing jointly) and by making adjustments to the model code and input data to reflect new provisions. IRS discretionary changes are reflected in the model by changing administrative parameters (such as the documentation requirements for claiming a deduction for certain charitable contributions) and by editing the compliance burden attributes associated with the forms, instructions, and publications to reflect any changes. Adjustments made using ITBM fall into three major subcategories: (1) a change in the number of filers due to population or economic changes; (2) changes in the Consumer Price Index and other inflation and wage growth adjustment factors; and (3) changes from technical adjustments made during the process of inputting updated data into the model. Each year, an updated input data file is incorporated into the model as the new data become available. The combination of these three components determines the annual adjustment in reported burden.

Chapter 4. Agency Initiatives to Reduce Burden

OMB regularly works with the agencies to examine ways to minimize the Federal paperwork burden on the public. One way that OMB formalizes this process is through the ICB report; this year, as we have done in previous years, OMB requested that agencies (with total burden equal to or in excess of 10 million hours) develop initiatives that will result in a cumulative burden reduction level of approximately 1 percent of total agency burden.⁷ OMB also requested agencies to provide a status update for the burden reduction initiatives that they developed for the FY 2005 ICB.

The nature of these burden reduction initiatives varies across government agencies. However, all initiatives are designed to improve program performance by enhancing the efficiency of agency information collections, reduce the burden per response on the public, or lead to a comprehensive review of an entire program, including regulations and procedures. Agencies were asked to provide a description of the initiative; a total estimate burden reduction; a date of completion; a list of information collections affected; and potential hurdles to accomplishing the initiative, including statutory or policy barriers.

This chapter contains a summary of newly-reported initiatives that agencies plan to implement in FY 2007 and beyond, as well as an update on past burden reduction initiatives (from FY 2005) that were not reported as completed in the FY 2006 ICB.

⁷ Agencies with total burden hours less than 10 million hours provided initiatives, but they were not subject to the 1 percent target.

New Burden Reduction Initiatives for FY 2007

OMB requested burden reduction initiatives from 27 of the 28 Federal agencies reported on in the ICB.⁸ Of the 18 agencies that reported more than 10 million hours for FY 2006, 16 agencies reported a one percent burden reduction initiative. Three agencies (the Department of Defense, the Department of the Treasury, and the Securities and Exchange Commission) submitted initiatives, but did not meet the 1 percent burden reduction target. One agency, the Federal Trade Commission, declined to submit an initiative, explaining that approximately 84 percent of its paperwork burden was essentially beyond its practical ability to reduce. Summaries of the new burden reduction initiatives are as follows:

Department of Agriculture

Office:	Animal and Plant Health Inspection Service (APHIS)
Initiative Title:	Providing Online Access to Permit Applications (ePermits)
Description:	The ePermits system is a large initiative that has been in development for several years and is being implemented in multiple phases. The ePermits system is an ongoing effort to improve citizens' knowledge of and access to USDA. The next phase will bring even more services to accommodate our customers and will reduce data-entry, processing, and delivery time and expense
Estimated Burden Reduction:	9,073 hours
Collection(s) Affected:	0579-0049, 0579-0054, 0579-0076, 0579-0129, 0579-0261, 0579-0285, 0579-293, 0579-0015, 0579-0094, 0579-0145, 0579-0167, 0579-0183, and 0579-0245
Expected Date of Completion:	FY 2008
Potential Hurdles to Completion:	None expected

Department of Agriculture

Office:	Cooperative State Research, Education, and Extension Service (CSREES)
Initiative Title:	CSREES eGrants and Grants.gov
Description:	The purpose of the CSREES eGrants initiative is to automate back-end grant processes such as peer review. CSREES is also leveraging the federal wide Research and Related (R&R) forms and making great strides in the implementation of its Peer Review System. With

⁸ OMB did not request a burden reduction initiative from Egov, as the Egov initiative is itself designed to reduce the overall burden.

	the adoption of eGrants, CSREES will be able to consolidate its Grant Applications processes and thereby reduce burden on respondents.
Estimated Burden Reduction:	1,424 hours
Collection(s) Affected:	0524-0025, 0524-0039, 0524-0041
Expected Date of Completion:	FY 2009
Potential Hurdles to Completion:	Ownership issues with the Standard Research and Related Forms

Department of Agriculture

Office:	Rural Development
Initiative Title:	Rural Development Guaranteed loans
Description:	The initiative will create a common platform for Rural Development guaranteed loan programs, including a common set of forms. The use of common forms across four loan programs will create efficiencies in reporting and reduce burden to lenders and borrowers.
Estimated Burden Reduction:	29,716 hours
Collection(s) Affected:	TBD
Expected Date of Completion:	December 31, 2007
Potential Hurdles to Completion:	Completion of rulemaking.

Department of Agriculture

Office:	Rural Development Utilities Programs
Initiative Title:	Streamline Telecommunications Program Contracts
Description:	Over the past year and a half, USDA has undertaken a comprehensive review of its Telecommunications Program contracts. The purpose of this undertaking is to improve customer service to our rural borrowers with a more efficient and effective means to complete a contract transaction. USDA and its Office of General Counsel have been working with industry groups to obtain their input as to what types of changes they would like to see made to existing contracts and forms. The goal is to collapse the current twelve (12) contracts into four (4) master contracts: equipment, construction, services, and software. This will allow for the borrower to have a greater flexibility to adapt project information in

completing a contract which in turn may reduce their overall burden.

Estimated Burden Reduction:	TBD
Collection(s) Affected:	0572-0059, 0572-0107, 0572-0118, 0572-0023, 0572-0074
Expected Date of Completion:	December 31, 2007
Potential Hurdles to Completion:	Completion and approval of new contracts for timely publication of a proposed and final rule.

Department of Agriculture

Office:	Food and Nutrition Service (FNS)
Initiative Title:	FNS Burden Reduction Initiative
Description:	This initiative targets FNS information collections that are used to assure program eligibility, monitor income security, and compliance with legislation and Agency regulations. FNS will systematically review ICRs as they come up for review to attempt to improve program performance. Specifically, this initiative aims to cut redundancy, promote automation efforts, and partner with other agencies where feasible. Best faith efforts on this reduction will be accomplished within four years.
Estimated Burden Reduction:	820,000 hours
Collection(s) Affected:	0584-0006; 0584-0012, 0584-0026; 0584-0043; 0584-0064; 0584-0293; and 0584-0535
Expected Date of Completion:	FY 2011
Potential Hurdles to Completion:	Unknown.

Department of Commerce

Office:	NOAA National Marine Fisheries Service
Initiative Title:	National Permit System (NPS)
Description:	The NPS will be a centralized database with Web-based permit application, which will reduce public burden through: (1) harmonization and linkage of data residing in stovepipe regional permit, dealer, and vessel databases; (2) standardization of permit applications renewals, and electronic submission of fees; and (3) use of common components and data throughout the permit process to reduce duplicative submission of recurrent data.

Estimated Burden Reduction:	19,400 hours (9,700 hours annually)
Collection(s) Affected:	0648-0194, -0202, -0203, -0204, -0205, -0206, -0269, -0272, -0304, -0327, -0334, -0393, -0398, -0401, -0471, -0490, -0512, -0513, -0514, -0545.
Expected Date of Completion:	Before end of FY 2008
Potential Hurdles to Completion:	None expected

Department of Commerce

Office:	Bureau of the Census
Initiative Title:	Company Organization Survey (COS)
Description:	The Census Bureau conducts the annual COS in order to maintain and update a centralized, multipurpose Business Register (BR). Specifically, the COS supplies critical information on the organizational structure, operating characteristics, employment, and payroll of multilocation enterprises. In 2007, COS will be conducted in conjunction with the Quinquennial Economic Census which will reduce burden on business by collecting BR data only once for multilocation enterprises. The Economic Census uses a Web-based reporting system -- the Generalized Instrument Design System -- that greatly reduces the reporting burden on businesses.
Estimated Burden Reduction:	111,834 hours
Collection(s) Affected:	0607-0444
Expected Date of Completion:	January 2008
Potential Hurdles to Completion:	None expected

Department of Defense

Office:	Defense Finance and Accounting Service (DFAS)
Initiative Title:	Burden Reduction for Personal check Cashing Agreement Collection
Description:	Several key initiatives within DoD lessen the need to provide check cashing services. These initiatives include the introduction of the ATM at Sea Program, Eagle Cash, Navy Cash and Marine Cash. These programs provide military members and civilian employees with the ability to access funds via ATMs, transfer funds between accounts and perform other financial transactions, reducing the need

to cash personal checks.

Estimated Burden Reduction:	181,462 hours ⁹
Collection(s) Affected:	0730-0005
Expected Date of Completion:	2007
Potential Hurdles to Completion:	None

Department of Education

Office:	Office of the Chief Information Officer
Initiative Title:	Information Collection Transformation Process (ICTP)
Description:	This initiative will require a more robust, cross-cutting, and analytical review of information collection requests to address more effectively the guidance and spirit of the Paperwork Reduction Act. Analysts in the Regulatory Information Management Services (RIMS) will work with offices within the Department of Education (ED) to reduce duplication, consolidate collections, and collect information more efficiently. With each collection that ED submits as a “revision” to OMB, ED will submit a statement outlining the steps that were taken for that collection to meet the goals of this initiative and identifying the amount of burden reduced, if any, as a result of this initiative.
Estimated Burden Reduction:	434,000 hours
Collection(s) Affected:	1845-0001, 1845-0008, 1845-0041, 1845-0052, 1845-0002, 1845-0012, 1845-0032, 1845-0055, 1845-0066, 1845-0072, 1845-0039 and 1845-0007
Expected Date of Completion:	FY 2009
Potential Hurdles to Completion:	A review of this complexity will be resource- and time-intensive and will involve coordination among numerous ED offices.

Department of Energy

Office:	Office of Procurement and Assistance Management
Initiative Title:	Federal Financial Assistance Management Improvement Act

⁹ When implemented, this initiative will result in a cumulative burden reduction of approximately 0.4% of the Department of Defense’s total burden.

Description:	The Department of Energy (DOE) will continue to work to improve and standardize its financial assistance reporting requirements as part of the government-wide Grants.gov initiative. The Office of Procurement and Assistance Management is actively involved in the implementation of the Federal Financial Assistance Management Improvement Act in an effort to streamline and simplify the application process and the administration of grants in the area of financial assistance. The Grants.gov initiative allows potential applicants to search the website to easily find and apply for financial assistance opportunities. As a result of this initiative, application forms previously used by DOE in financial assistance have been and will continue to be replaced by standardized Government-wide electronic forms maintained by the Grants.gov Project Office.
Estimated Burden Reduction:	7,918 hours
Collection(s) Affected:	1910-0400
Expected Date of Completion:	second quarter of FY 2007
Potential Hurdles to Completion:	None

Department of Health and Human Services

Office:	Centers for Medicare and Medicaid Services (CMS), Food and Drug Administration (FDA), Administration for Children and Families (ACF), National Institutes of Health (NIH), Substance Abuse and Mental Health Services Administration (SAMHSA), Office of the Secretary (OS)
Initiative Title:	Departmental Targeted Plan for 1% Reduction in Burden Hours
Description:	This initiative aims to achieve the maximum possible burden reduction among the Department of Health and Human Services's (HHS) largest collections. The plan will begin with an analysis of all information collections that have the largest number of burden hours in order to identify opportunities for burden reduction within each collection. The initiative will focus on improving the efficiency of information collections by eliminating or revising obsolete forms, promoting where feasible the increased use of electronic reporting and electronic signatures for larger collections, working with agency legislative staff to identify statutory paperwork burden, and identifying data collections which can support decreased frequency of reporting requirements.
Estimated Burden Reduction:	5,316,000 hours
Collection(s) Affected:	0970-0148, 0970-0166, 0980-0140, 0910-0001, 0910-0014, 0910-0037, 0910-0073, 0910-0119, 0910-0130, 0910-0152, 0910-0230,

U.S. Citizenship and Immigration Services (USCIS)

Initiative Title:

Business Transformation – Account Based Processing

Description:

The U.S. Citizenship and Immigration Services (USCIS) Business Transformation Project is an account based, electronic processing initiative that eliminates the need for applicants, employers, and attorneys to file redundant biographical or corporate data when requesting benefits on their own behalf or on behalf of another petitioner. Customers will create online accounts, which will store customer centric data typically required to be filed with each form. Burden reduction occurs when data is re-used between applications and petitions.

Initiative Title:

“Logic Model” Grant Performance Report Standard

Description:	Applicants of Department of Housing and Urban Development (HUD) Federal Financial Assistance are required to indicate intended results and impacts of proposed grants implementation. The information is used by grantees to better manage their programs and encourages self-evaluation to ensure time progress and compliance. HUD will revise the form currently used to collect this information, by automating responses through a drop down table listing. The new version of the form will take a third of the time compared to the previous 18 hours per response.

Initiative Title:	Reduction of Forms used for Grant Applications
Description:	This initiative will simplify the application process for grants administered by the U.S. Fish and Wildlife Service (Service) by reducing the numbers and different types of forms that applicants must complete. During the past year, the Service has increased its use of Grants.gov and has eliminated four forms. We will continue to review our information collections to consolidate or eliminate forms where possible

Initiative Title:	Cost Recovery Regulations, Communications Assistance for Law Enforcement Act of 1994
Description:	This collection allows telecommunications carriers to recover the costs associated with complying with the Communications Assistance for Law Enforcement Act, which went into effect on October 25, 1994. In implementing the law, FBI adopted a strategy to develop “buy-out” agreements with telecommunication manufacturers which were distributed to multiple carriers. Since one agreement covers multiple carriers, it becomes unnecessary to make individual cost recovery agreements with each carrier.

Department of Labor

Office:	Office of the Chief Information Officer
Initiative Title:	Internal E-Government Scorecard
Description:	As part of an agency-wide program for implementing the President’s Management Agenda, the Department of Labor’s (DOL) Office of the Chief Information Officer included rating elements for

Paperwork Reduction Act implementation into its Internal E-Government Scorecard (the Scorecard). In this regard, DOL sub-agencies cannot receive a rating of “green” unless, among other things, they are effectively implementing the PRA. In order to ensure each sub-agency explores opportunities for practical burden reduction, one rating element in the Scorecard requires a plan to reduce burden by at least 1% of the sub-agency’s over all burden hours. From this effort, the Department identified four activities to reduce overall burden: 1) revise the Annual Information Return/Report (Form 5500 series) and add a short form which could be filed by many small employee benefit plans, 2) discontinue the Equal Opportunity Survey since it lacked utility, 3) remove or revise duplicative, unnecessary, and inconsistent safety and health standards, and 4) streamline reporting and recordkeeping requirements for seven Workforce Investment Act programs currently approved under three OMB control numbers into one collection of information

Description:

The new electronic IBRS allows U.S. citizens residing or traveling abroad to register their travel plans using the Internet prior to their trip. The implementation of this system allows for more accurate respondent and burden calculations, allows U.S. citizens to complete the form at home instead of at the Consulate or Embassy, and reduces the number of hours respondents spend filling out paper forms. The service is available on the Department of State, Bureau of Consular Affairs web site at <https://travelregistration.state.gov/ibrs/>. Initiative Title: Annual Report by Sponsors of J-1 Exchange Visitor Program

Description: The Exchange Visitor Program Annual Report form provides a means for sponsoring organizations to report a summary of exchange visitor activity and an accounting of the number of Forms DS-2019 used. It also provides a means for the Department of State to maintain appropriate oversight of the Exchange Visitor Program. This report will be integrated into the electronic SEVIS system (Student and Exchange Visitor Information System). The ability to provide information electronically will reduce the administrative and financial burdens on the sponsors when submitting their annual report.

Department of Transportation

Office: Federal Motor Carriers Safety Administration (FMCSA)
Initiative Title: Electronic On-Board Recorders (EOBRs) for Hours-of-Service Compliance
Description: FMCSA proposes to amend the Federal Motor Carrier Safety Regulations (FMCSRs) to incorporate new performance standards for EOBRs installed in commercial motor vehicles (CMVs) in a Notice of proposed rule making (NPRM). One provision of the NPRM would require certain motor carriers with severe Hour-of-Service (HOS) noncompliance records to install and use EOBRs to record and manage their drivers' HOS in accordance with the regulations in the proposed Appendix C of 49 CFR Part 385. Under the proposed rulemaking, FMCSA would also provide partial relief from HOS supporting documents requirements for certain motor carriers that voluntarily use EOBRs and encourage EOBR use by motor carriers of property that have CMVs equipped with sleeper berths.

Department of Transportation

Office: Federal Transit Administration (FTA)

Initiative Title: Metropolitan and Statewide Transportation Planning

Description: DOT's FTA and Federal Highway Administration (FHWA) jointly carry out the federal mandate to improve metropolitan and statewide transportation under authority of Title 49, Chapter 53, and Title 23 of the United States Code. The Metropolitan and Statewide Transportation Planning programs provide financial assistance to states for transportation planning, operations and capital investments. The reporting frequency required for some reports has been reduced as a result of the implementation of the transportation reauthorization law of 2005 (SAFETEA-LU) and this resulted in a reduction in burden hours.

Department of the Treasury

Office: Department of the Treasury, Internal Revenue Service (IRS), Office of Taxpayer Burden Reduction

Initiative Title: Form 940 Simplification

Description: In May 2004, a team led by the IRS Office of Taxpayer Burden Reduction (TBR) began the process of redesigning Form 940. IRS employment tax experts worked with representatives from other Federal and State agencies, gathering input from internal and external stakeholders to create a plain language form that is logical, easy to follow, and compatible with optical scanning. The new 940 incorporates the advantages of Form 940-EZ (discontinued for tax

year 2006) into a simplified form for all filers. Highlights include: arrangement in a logical sequence from the taxpayer's point of view; organization into eight separate parts with visual cues, breaking up the task into smaller steps; a new Schedule A for multi-State employers or credit reduction situations; check boxes instead of "A, B, C" questions; and no more need for hand-written explanations of exempt payments.

Initiative Title:	Office in the Home (OIH) – Form 8829 Simplification
Description:	<p>Tax practitioners have identified Form 8829 as one of "the most burdensome Federal tax forms or schedules that must be completed by small business taxpayers." They stated that the Form 8829 is burdensome because the Form 8829 has three parts to complete and is difficult to explain to clients. To address these concerns, the TBR OIH project team proposed a simplified <u>optional</u> method for the Schedule C, F and A filers to calculate the amount of their deduction for business use of their home by using a "dollar rate per square foot" (as determined by IRS) similar to the standard mileage rate for business use of automobiles. This approach would: (1) reduce the taxpayer's burden in calculating this allowable deduction; and (2) allow IRS examination resources to be applied to more critical areas of the Tax Gap.</p>
Estimated Burden Reduction:	<p>Approximately 2.6 million of the 18.5 million Schedule C filers claimed an OIH deduction in Tax Year (TY) 2003.¹² In 2003, the average recordkeeping, preparation time, etc., was 2.57 hours, and the total burden for Schedule C filers who claimed OIH in TY 2003 equaled 6.84 million hours. In 2005, under the new Individual Taxpayer Burden Model (ITBM), the Form 8829 time is incorporated into the aggregated burden of Form 1040, and is not separately identified. The IRS recognize that, while all filers may</p>

Simplification of the S-Corporation Election

Description:

Currently 26 percent of Form 2553 filers are unsuccessful in filing their first tax return. This initiative proposes to establish a more efficient and less burdensome process that makes it easier for taxpayers to file the return. Specifically, the initiative will simplify the S-election form (Form 2553) by removing the requirement for duplicate information and the potential for mismatch. The initiative will also simplify the election process by streamlining filing/due dates of the election and the return and making the election filing/reporting consistent with other elections.

Editable Forms

Description:

The Veterans Health Administration (VHA) will continue to convert paper forms to an electronic format that allows respondents to submit, save, and edit forms on-line. VHA will target forms that are used multiple times by individuals to reduce the hour burden significantly. For example: VA Form 10-10EZR Health Benefits Renewal Form is required from certain veterans every year, and it

was converted to the electronic format in 2006. The time burden for this form is 24 minutes. By having the form saved from 2006 and only needing to make minimal changes, a veteran would likely only take 4 minutes to review and complete the form for 2007.

Initiative Title:	VA Loan Electronic Reporting Interface and Loan Administration Redesign
Description:	This initiative will modernize the Loan Guaranty Service's supplemental servicing and claims payment functions. The initiative will reduce paperwork burden on servicers, who handle 2.1 million VA-guaranteed home loans, by changing the reporting of delinquent loans and submission of claims from a paper-based system to a completely electronic system, allowing servicers to take many actions that previously would have required filling out OMB-approved forms for VA approval, and eliminating reporting to VA of certain events.

Initiative Title:	State Reporting Burden Reduction Initiative
Description:	EPA has launched a State Reporting Burden Reduction Initiative, which seeks recommendations from States on how high-burden/low-value reporting requirements might be streamlined,

	eliminated or otherwise improved. The first phase of this multi-phase process involves collecting and analyzing data from States in order to identify short- and long-term opportunities for burden reduction.
Estimated Burden Reduction:	A preliminary assessment by EPA estimates potential burden reduction for States of one percent.
Collection(s) Affected:	Potential key collections include: 2040-0004: Discharge Monitoring Reports 2040-0250: Concentrated Animal Feeding Operations 2050-0095: Superfund Site Evaluation 2060-0084: Ambient Air Quality Surveillance 2060-0088: Air Emissions Reporting
Expected Date of Completion:	2012 - 2015
Potential Hurdles to Completion:	EPA has recently commenced this effort and is in the preliminary stages of surveying the States on their potential burdens. Estimates are completely contingent on a wide range of variables including State agreement, available resources, and public acceptance. Reductions are also contingent upon State adoption of the Exchange Network for virtually all data exchanges with EPA.

Federal Acquisition Regulation

Federal Communications Commission

Office:	Federal Communications Commission
Initiative Title:	Numbering Resource Optimization
Description:	Carriers that receive numbering resources from the North American Numbering Plan (NANP) Administrator or receive

numbering resources from the Pooling Administrator must report forecast and utilization data semi-annually. The data collected from FCC Form 502 help the Commission manage the ten-digit NANP. Participating carriers are also required to maintain detailed internal records of their number usage. The information is used by the FCC, state regulatory commissions, and the NANP Administrator to monitor numbering resource utilization. The reduction is a result of a review of the NANP program which will result in the elimination of a section of the data collection that is no longer required.

----------------	----------------------------------------------

Initiative Title:	Call Report Revision
Description	Section 604 of the Financial Services Regulatory Relief Act requires the Federal banking agencies, including FDIC, to review data requirements for the quarterly report of condition and income from insured financial institutions (Call Report), used by regulators to determine the health of individual institutions and the industry as a whole. The review must be completed by October 12, 2007. After completing their reviews, the FDIC and the other Call Report agencies will propose revisions to the Call Report to reduce or eliminate any reporting requirement that is no longer necessary or appropriate. Because the Call Report agencies already regularly review the Call Report and eliminate data that are no longer of sufficient utility, it may be difficult to achieve a more significant burden reduction.

Expected Date of Completion:	December 2008
Potential Hurdles to completion	Converting remaining document types to a format that permit electronic submission. Funding limitations.

Federal Trade Commission

In response to OMB's request last September (that each agency prepare and submit to OMB an initiative to reduce the agency's overall paperwork burden by 1%), the Federal Trade Commission (FTC) replied that it is unable to identify any measures by which the FTC can reduce by 1% the paperwork burdens that the FTC imposes on the public.

National Aeronautics and Space Administration

Office	Office of Procurement
Initiative Title:	Analysis of Forms used in NASA Acquisition Process, Leading to Consolidation of Information Collections
Description	NASA uses many information collection instruments to support the agency's acquisition process. For example, forms to collect information on bids and proposals, purchase orders and bank card orders, and reports for contracts, while similar, vary depending on their overall value. This initiative will work with the President's Business Gateway E-Government Initiative to identify and assess these related collection activities. The initiative may also review other collections indirectly supporting the acquisition process, including information collections used to establish cooperative agreements, grants, Space Act Agreements, and other acquisition arrangements.
Estimated Burden Reduction	Up to 1,000,000 hours
Collection(s) Affected:	2700-0085, 2700-0086, 2700-0087, 2700-0088, and 2700-0089

National Science Foundation

Office:	Office of Budget, Finance and Award Administration
Initiative Title:	National Science Foundation (NSF) Proposal and Award Information - NSF Proposal and Award Policies & Procedures Manual
Description:	NSF has combined its <i>Grant Proposal Guide</i> and <i>Grant Policy Manual</i> , into a new policy framework—the <i>NSF Proposal and Award Policies and Procedures Manual</i> . Previously, these documents were maintained separately and were issued with different effective dates. The new policy framework will improve both awareness and knowledge of the complete set of NSF policies and procedural documents; increase ease of access to the policies and procedures governing the entire grant lifecycle; and eliminate redundancies between coverage in the documents. NSF anticipates that this effort will result in additional streamlining over time as applicants and awardees become more familiar with the new format of the proposal and award management processes.
Estimated Burden Reduction:	10,000 hours.
Collection(s) Affected:	3145-0058 and 3145-0060
Expected Date of Completion:	January 2007

Potential Hurdles to Completion: None

Nuclear Regulatory Commission

Office: Office of Nuclear Reactor Regulation (NRR)

Initiative Title: Revision to Occupational Dose Records, Labeling Containers, and the Total Effective Dose Equivalent

Description: The Nuclear Regulatory Commission (NRC) is proposing to revise its regulations in 10 CFR Parts 19, and 20, related to the reporting of annual dose to workers, 10 CFR 19.13, and the labeling of certain containers holding licensed material, 10 CFR 20.1905, and the requirement to provide cumulative occupational radiation dose records, 10 CFR 20.2104. The proposed rule provisions would reduce the burden for Part 19 by requiring that dose reports be provided only to individuals exceeding specified limits or who request the reports and also reduce the burden for NRC Form 4 by eliminating the need to provide cumulative occupational dose history reports except for planned special exposures. The rule would eliminate specific labeling requirements for containers kept in protected areas.

Office: Securities and Exchange Commission

Initiative Title: Termination of a Foreign Private Issuer's Registration of a Class of Securities under Section 12(g), and Duty to File Reports under Section 15(d), of the Securities Exchange Act of 1934

Description: SEC plans to repropose Rule 12h-6, which, if adopted, would make it easier for a foreign private issuer to exit the Exchange Act registration and reporting regime when there is relatively little U.S. investor interest in its securities. SEC estimates that the burden reduction will stem from a reduced number of Form 20-F, 40-F and 6-K filings. (See <http://www.sec.gov/news/press/2006/2006-207.htm>)

Estimated Burden Reduction:	605,403 hours ¹³
Collection(s) Affected:	3235-0288; 3235-0381; 3235-0116
Expected Date of Completion:	TBD
Potential Hurdles to Completion:	A majority of the Commission needs to approve final rules.

Small Business Administration

Office:	Office of Surety Guarantees (OSG)
Initiative Title:	Surety Bond Guarantee (SBG) Electronic Processing System
Description:	Through the SBG Program, SBA guarantees a portion of a surety's losses and expenses incurred as a result of a small contractor's default on a bonded contract. The Small Business Investment Act gives SBA the authority to reimburse participating sureties for claims in the event of a contractor default. This initiative will revise the forms used in the application process by consolidating the information collected, eliminating the redundancies in the information collected, and eliminating the collection of information multiple times.
Estimated Burden Reduction:	4,000 hours
Collection(s) Affected:	3245-0007
Expected Date of Completion:	March, 2007
Potential Hurdles to Completion:	None anticipated.

Social Security Administration

Office:	Social Security Administration (SSA)
Initiative Title:	Electronic Death Registration (EDR)

¹³ When implemented, this initiative will result in a cumulative burden reduction of approximately .3% of the Securities and Exchange Commission's total burden.

Description:	SSA is implementing the Electronic Death Registration System (EDRS) to update death report data to its records. EDRS is a more timely process that eliminates the submission of the paper form SSA-721 completed by the Funeral Director. It further enables the states to provide death information to SSA within five days of an individual's death. EDRS reports can be processed as first-party reports of death and benefits can be terminate without the need for field office death input which saves time, recourses and will reduce overpayments.
Estimated Burden Reduction:	154,487 hours
Collection(s) Affected:	0960-0142.
Expected Date of Completion:	2011
Potential Hurdles to Completion:	Ability of states to enter into agreements and to absorb the initial start-up and maintenance costs.

Social Security Administration

Office:	Social Security Administration
Initiative Title:	Electronic Records Express (ERE)
Description:	ERE is an initiative designed to streamline the existing paper-based submission process and will provide users with several convenient, secure and fast electronic records submission options. ERE will benefit anyone who provides health or school records to Social Security or the state Disability Determination Services (DDS). Participants are able to send records at their convenience directly to Social Security or the state DDS via the internet, fax, or scanner and internet for multiple patient document batches.
Estimated Burden Reduction:	1,424,899 hours
Collection(s) Affected:	0960-0555
Expected Date of Completion:	2011
Potential Hurdles to Completion:	Conversion from paper files to electronic medium. There is neither a Federal mandate nor monetary incentive.

Update on FY 2005 Burden Reduction Initiatives

In the FY 2006 ICB, OMB published updates from 27 Federal agencies, covering 40 separate initiatives.¹⁴ The majority of the 40 initiatives has been completed or is nearing completion. To date, the completed initiatives have accounted for approximately 77.5 million hours of burden on the public. When the ongoing initiatives are finished, burden is expected to drop by another 4.66 million hours.

Department of Commerce		Status: IN PROGRESS
Office:	Bureau of the Census (the Bureau)	
Initiative Title:	Automated Export System	
Description:	The Automated Export System (AES) is a collaborative effort by the U.S. Census Bureau (Census) and the Bureau of Customs and Border Protection (CBP) at the Department of Homeland Security. The AES will eliminate the manual process for filing the Shipper's Export Declaration (SED) and Outbound Carrier Manifests by requiring the U.S. export trade community to file SED information electronically to the CBP mainframe computer system or through the Census Internet service, <i>AESDirect</i> . The AES initiative will reduce burden on respondents by reducing costs, removing the number of duplicative submissions reported monthly, making the filing more user-friendly, and improving the efficiency of the data collection process.	
Estimated Burden Reduction:	167,000 hours	
Collection(s) Affected:	0607-0152	
Expected Date of Completion:	December 2007	
Potential Hurdles to Completion:	The Bureau is dependent on successfully working with other Federal agencies to complete final regulations.

Expected Date of Completion: May 2007

Potential Hurdles to Completion: None.

Status: Final Rule published March 21, 2006.

Department of Defense

Status: NOT IMPLEMENTED

Due to changes in legislation and regulation, the Department of Defense is unable to implement the initiative titled, "Burden Reduction for Health Care Collections." Public Law 109-163 greatly expanded the number of personnel subject to coverage under the TRICARE Reserve Select program. Additional information collections are necessary to receive refunds from Pharmaceutical manufactures due to the application of Federal pricing on purchases made through the TRICARE Retail Pharmacy program. Also, the TRICARE for Life burden continues to increase as the beneficiary population ages.

Department of Education

Status: IN PROGRESS

Office: Department of Education

Initiative Title: *EDFacts*

Description: *EDFacts* will fundamentally transform the way that the Department accesses information and meets the requirements of the No Child Left Behind Act, while concurrently reducing respondent burden. The initiative continues the development of an Education Data Exchange Network (EDEN), providing State Education Agencies (SEAs) and the Federal government the capacity to transfer and analyze information about education programs. When fully implemented, EDEN will not only provide timely performance data to education decision makers and grant managers, but also streamline the data collection process and reduce the burden of grant reporting.

Office: Single Family Housing

Initiative Title: Paperless Single Family Mortgage Case Binder

Description: Beginning January 1, 2006, the Office of Single Family Housing began accepting paperless case binders for mortgagees approved under the Lender Insurance (LI) program. Paperless case binders streamline the process of filing FHA insurance-related data and substantially reduced lender back-office workloads. All

Homeownership Centers were on line by the end of March 2006, ahead of schedule. In addition, FHA reviewed all its forms and eliminated form HUD-92564-VC and form HUD-92564-HS HUD, opting instead to use standard Fannie Mae appraisal documents. HUD is still planning to replace the mortgage credit analysis worksheet with a simple loan transmittal, but no additional burden reduction is anticipated.

In 2006, EPA completed the final phase of a study to examine the effects of CDX on a cross section of six EPA information collections: safe drinking water; unregulated contaminant monitoring for drinking water; lead abatement; air quality; toxic release inventory; and stormwater abatement. The

results of this study show that CDX lowered costs and improved information quality, timeliness and accessibility. One example of the significant burden reduction that can result from electronic reporting is the Toxic Release Inventory (TRI) forms (estimated burden reduction indicated below). EPA is working to implement CDX throughout all its programs and is expected to complete transition of all Agency collections using a phased approach by 2012.

Estimated Burden Reduction:	166,000 hours
Collection(s) Affected:	2070-0093
Expected Date of Completion:	2012
Potential Hurdles to Completion:	None
Status:	On schedule

Environmental Protection Agency
Status: COMPLETED

Office:	Environmental Protection Agency
Initiative Title:	Toxics Release Inventory (TRI) Streamlining Initiative
Description:	In 2002, EPA initiated a process to reduce burden in the Toxics Release Inventory (TRI) Program. As part of this initiative, EPA published the proposed TRI Burden Reduction Rule in October 2005 to allow more of the facilities that report to the TRI Program to use a “short form” to fulfill their reporting obligations, rather than a more-detailed, longer form. On December 22, 2006 EPA published the final rule. In response to concerns from commenters about potential loss of chemical release data to local communities, EPA added a 2,000 pound release threshold to the short form eligibility requirements for non-PBT chemicals. This preserves most of the burden reduction while significantly reducing the amount of detailed release information that would no longer be reported on the long form.
Estimated Burden Reduction:	123,000 hours; \$5.9 million annually
Collection(s) Affected:	2070-0093, 2070-0143
Date of Completion:	December 2006

Federal Acquisition Regulation
Status: IN PROGRESS

Office:	Federal Acquisition Regulation
Initiative Title:	Electronic Subcontract Reporting System (eSRS)
Description:	The FAR is proposing an e-Government Integrated Acquisition Environment (IAE) initiative. The Small Business Act requires contractors receiving a contract for more than \$100,000 to agree to have small business interests participate in the performance of the contract as far as practicable. The subcontracting plans and report are both currently paper information collections. This initiative will transition the collections to electronic submissions.
Estimated Burden Reduction:	237,041 hours
Collection(s) Affected:	9000-0006, 9000-0007
Expected Date of Completion:	April, 2007
Potential Hurdles to Completion:	Requires implementing a new computer system. The Electronic Subcontracting Reporting System (eSRS) became operational on October 28, 2005, for civilian agencies
Status:	A FAR rule has been initiated.

Federal Acquisition Regulation		Status: IN PROGRESS
Office:	Federal Acquisition Regulation	
Initiative Title:	Government Property	
Description:	The FAR is proposing to simplify procedures, clarify language, and eliminate obsolete requirements related to the management and disposition of Government property in the possession of contractors. Various FAR parts are amended to implement a policy that fosters efficiency, flexibility, innovation, and creativity, while continuing to protect the Government's interest in the public's property. The proposed rule specifically impacts contracting officers, property administrators, and contractors responsible for the management of Government property.	
Estimated Burden Reduction:	348,959 hours	
Collection(s) Affected:	9000-0075	
Expected Date of Completion:	April, 2007	
Potential Hurdles to Completion:	The proposed rule was published in the Federal Register on September 19, 2005. Final rulemaking is in progress.	

Federal Energy Regulatory Commission**Status: IN PROGRESS**

Office:	Federal Energy Regulatory Commission (FERC)
Initiative Title:	FERC Information Assessment Team (FIAT)
Description:	The Federal Energy Regulatory Commission established in January 2004 the FERC Information Assessment Team (FIAT). The FIAT evaluates the agencies information collections and filing requirements, assesses the practical utility of each information collection, and proposes ways to reduce the reporting burden on industry through the elimination or modifications of collections.
Estimated Burden Reduction:	Additional 2,150 hours to be completed
Collection(s) Affected:	1902-0043, 1902-0073, and 1902-0140
Expected Date of Completion:	2008
Potential Hurdles to Completion:	Software compatibility associated with electronic filing.
Status:	1,868 hour reduction achieved in 2005

Federal Energy Regulatory Commission**Status: IN PROGRESS**

Office:	Federal Energy Regulatory Commission (FERC)
Initiative Title:	Electronic Filing of Documents
Description:	Electronic filing of documents is an e-Government initiative to expand the types of electronic documents the Commission would accept. On July 7, 2004, FERC proposed in RM01-5-000 that future tariff filings be made over the Internet with software developed by the Commission. This initiative will make it easier for regulated entities to file and view tariffs and rate schedules and to facilitate tariff research by permitting companies to submit tariffs and rate schedules electronically.
Estimated Burden Reduction:	26,923 hours
Collection(s) Affected:	1902-0096, 1902-0154, 1902-0086, and 1902-0089
Expected Date of Completion:	2007
Potential Hurdles to Completion:	Industry concerns regarding the use of a tariff data base instead of the paper-based tariff document.

Status: Completion delayed due to application problems with the prototype software. Commission's senior management will determine resolution to industry's concerns.

Federal Trade Commission		Status: COMPLETED
Office:	Federal Trade Commission	
Initiative Title:	Electronic Pre-Merger Filing	
Description:	As part of the overall program to make government more accessible electronically, the FTC has worked with the Department of Justice to develop an electronic system for filing Hart-Scott-Rodino Act (HSR) pre-merger notifications. E-filing will reduce burden for businesses and government and create a valuable database of information on merger transactions to inform future policy deliberations.	
Estimated Burden Reduction:	Negligible ¹⁵	
Collection(s) Affected:	3084-0005	
Date of Completion:	2006	

National Aeronautics and Space Administration		Status: IN PROGRESS
Office:	Procurement, Aeronautics Mission Directorate, Education	
Initiative Title:	Review of Agency Forms-based Collections	
Description:	This initiative is streamlining the format and content of the information collected by NASA. NASA is reviewing collections to clarify who must respond and under what circumstances, and consolidating collections where appropriate.	
Estimated Burden Reduction:	23,660	
Collection(s) Affected:	2700-47, 2700-0093, 2700-0094, 2700-97, 2700-0102, 2700-0112, 2700-0118, 2700-0099.	
Expected Date of Completion:	September 30, 2008	
Potential Hurdles to Completion:	None	
Status:	The following collections have been discontinued, modified, or replaced: 2700-47, 2700-0093, 2700-0094, 2700-97, 2700-0102,	

¹⁵ The e-filing system has been successfully implemented; however, due to the low volume of electronic filings, the FTC conservatively declines to reduce its burden estimate at this time.

2700-0112, 2700-0118. Collection 2700-0099 will be reviewed in 2007.

National Science Foundation		Status: IN PROGRESS
Office:	Division of Science Resources Statistics	
Initiative Title:	Information Collection (Survey) Assessment	
Description:	<p>The National Science Foundation (NSF) manages a central clearinghouse for the collection, interpretation, and analysis of scientific and engineering data for the Federal government. NSF utilizes an information collection survey designed to provide feedback on the quality and timeliness of government survey data and analyses. This information collection survey is most successful when respondents are presented with plain, coherent and unambiguous questionnaires that are compatible with their reporting and record keeping practices. NSF seeks to continuously improve its information collection surveys using laboratory techniques, field studies, focus groups, behavior coding and pilot tests to assess the practical utility of the government's information collections and reduce overall costs and burden on the public.</p>	
Estimated Burden Reduction:	15,000 hours	
Collection(s) Affected:	3145-0174	
Expected Date of Completion:	Completion is dependent on each new survey evaluated by this information collection.	
Potential Hurdles to Completion:	None	
Status:	NSF continues to use this collection to study the methodology of its surveys housed within the Division of Science Resources Statistics.	

Nuclear Regulatory Commission		Status: IN PROGRESS
Office:	Office of Federal and State Materials and Environmental Management Programs (FSME) (Formerly Office of Nuclear Material Safety and Safeguards)	
Initiative Title:	Project Safesource (Web-Based Licensing Safesource Phase I)	
Description:	<p>The Nuclear Regulatory Commission (NRC) is developing an initiative to provide materials licensees with the option of using an electronic system to apply for licenses, amend licenses, and conduct other license-related transactions. The on-line system will validate the input to ensure quality and avoid delays due to application deficiencies. Routine administrative data updates may be accomplished on-line, eliminating the need for some types of</p>	

correspondence and consequent delays.

Estimated Burden Reduction: 7,032 hours

Collection(s) Affected: 3150-0120, 3150-0017, 3150-0016, 3150-0001, 3150-0007, 3150-0010, 3150-0158, and 3150-0130

Expected Date of Completion: Late Fall 2007

Potential Hurdles to Completion: None

Status: Web-based Licensing is expected to be on-line by October 2007. Currently, a security review of the system is being completed.

Small Business Administration

Status: IN PROGRESS

Office: Office of Government Contracting and Business Development

Initiative Title: 8(a) Business Development Automation System

Description: This multi-year initiative provides for the continued development and deployment of an Internet-based system called the Business Development Automation System. This system will automate all of the business processes of the 8(a) Business Development (BD) Program. The BD Program provides assistance to economically disadvantaged individuals who own small business. This initiative will simplify the application process for submitting annual reviews of program participants. The new Internet-based system will reduce burden on respondents and enable certification of greater number of businesses each year.

Estimated Burden Reduction: To be determined

Collection(s) Affected: 3245-0031

Expected Date of Completion: FY 2008

Potential Hurdles to Completion: None

Status: Electronic application module has been re-engineered and will be released in FY 2007.

Small Business Administration

Status: IN PROGRESS

Office: Office of Disaster Assistance (ODA)

Initiative Title: Disaster Assistance Credit Modernization (DCMM)

Description:	This initiative created a fully integrated “Electronic Loan Process” for victims of declared disasters. Processing applications and loans electronically has minimized the need for physical files, which previously were passed from person to person and department to department in order to be processed. Electronic files have provided users access to critical key data, which allowed various processes to occur simultaneously without having to wait on physical files. This concept enhances our ability to meet our performance goals for processing 85 percent of home loans within 14 days and 85 percent of business and Economic Injury Disaster Loans (EIDL) within 18 days. The initiative is on-going with the development of additional improvements aimed at improving customer service, such as providing on-line loan application capability for disaster victims.
Estimated Burden Reduction:	To be determined ¹⁶
Collection(s) Affected:	3245-0017, 3245-0018, 3245-0326, 3245-330, 3245-0084, 3245-0136
Expected Date of Completion:	Ongoing
Status:	The Disaster System Management System was completed by October 1, 2005.

Social Security Administration		Status: COMPLETED
Office:	Social Security Administration	
Initiative Title:	Signature Proxy	
Description:	SSA is implementing a Signature Proxy initiative as an alternative to the traditional pen and ink or “wet” signature to eliminate the need to retain paper applications. The Signature Proxy initiative allows technicians to process the application without a signature. Additionally, it permits SSA to store and process the entire benefit application electronically, thus reducing costs associated with mailing and storing physical files.	
Estimated Burden Reduction:	383,831 hours	
Collection(s) Affected:	0960-0618, 0960-0003, 0960-0010, 0960-0012, 0960-0013, 0960-0014, 0960-0004, 0960-0229, 0960-0444, and 0960-0416	
Date of Completion:	November 2006	

¹⁶The initiative was severely challenged during FY 2006 due to the unprecedented volume of loan applications received following the 2005 hurricane season.

Social Security Administration		Status: IN PROGRESS
Office:	Social Security Administration	
Initiative Title:	Social Security Number Verification Service (SSNVS)	
Description:	Employers must frequently verify employee names and Social Security Numbers (SSNs) to ensure accurate wage reporting and tax data. To do this, employers currently contact the Social Security Administration via phone, mail, or by sending in diskettes and magnetic tape for verification. This process is time-consuming and delays transmission of the information to employers. However, in FY 2005, SSA began verifying employee data using the SSNVS, a secure, rapid, Internet-based system that protects privacy by only providing employers with a “match” or “no match” response and not linking names and SSNs. Using SSNVS, employers can receive immediate verification of up to ten names/SSN requests or can upload a file containing more names for overnight processing.	
Estimated Burden Reduction:	223,750 hours	
Collection(s) Affected:	0960-0669, 0960-0508	
Expected Date of Completion:	2010	
Status:	SSA projects a 25,000 hour burden decrease in 0960-0508 and a 9,167 burden decrease in 0960-0699 during FY 2007.

Appendix B. Significant Paperwork Reductions and Increases

-- FY 2006 & FY 2007

The Paperwork Reduction Act of 1995 (PRA) assigns responsibility for the agency's information collection activities to the head of each agency, supported by its Chief Information Officer (CIO). Agencies are expected to develop and coordinate initiatives that will produce meaningful improvements for the public. This includes reducing the amount of paperwork required of the public.

This appendix highlights significant burden changes agencies made in the last year, as well as significant burden changes expected in FY 2007. To identify the source of the burden reduction or increase, the appendix is divided into five sub-categories. For reductions, these exhibits of burden changes are organized as follows: cutting redundancy, using information technology, changing regulations, changing forms, and miscellaneous actions. For increases in burden, the exhibits are placed into three categories: caused by statute, changing regulations, miscellaneous actions. When legislation or Administration policies result in an increase in burden to achieve the benefits of the law or new program, the appendix includes the statute title and public law number when available.

FY 2006 Changes in Burden

FY 2006 Burden Reduction from Changing Regulations

Agency:	Department of Agriculture
OMB Control Number:	0584-0293
Title:	Food Distribution Forms
Purpose of the Collection:	This collection allows states to purchase commodities and distribute them to organizations to provide food assistance to those in need.
How Reduction Achieved:	Rule revised and clarified requirements with respect to the distribution, management, and use of donated foods in the National School Lunch Program and other child nutrition programs, the Nutritional services incentive Program, and by charitable institutions.
Change in Burden:	-15,683 hours
Agency:	Department of Education
OMB Control Number:	1820-0600
Title:	State and Local Educational Agency Record and Reporting Requirements Under Part B of the Individuals with Disabilities Education Act (IDEA)
Purpose of the Collection:	This collection ensures that States and/ or Local Educational Agencies (LEAs) deliver special education services as specified in updated regulations for Part B of IDEA.
Why Increase Occurred:	The final regulations implementing the Individuals with Disabilities Education Improvement Act required additional State reporting to other public agencies or the public rather than to the Secretary.
Change in Burden:	360,295 hours
Agency:	Department of Health and Human Services
OMB Control Number:	0938-0679
Title:	Durable Medical Equipment Regional Carrier, Certificates of Medical Necessity Provider Cost Report Reimbursement
Purpose of the Collection:	These forms contain medical information necessary to make an appropriate claim determination and to ensure that claims are properly paid.
How Reduction Achieved:	The collection was revised by removing the burden associated with complex medical review. Complex medical review is addressed in the regulation CMS-6022-P and approved under 0938-0969.
Change in Burden:	-135,000 hours
Agency:	Department of Health and Human Services
OMB Control Number:	0910-0139
Title:	Current Good Manufacturing Practice (CGMP) and Investigational New Drugs Intended for Use in Clinical Trials – Proposed Rule
Purpose of the Collection:	The proposed rule will amend the CGMP regulations for human drugs to exempt most investigational “Phase I” drugs from complying with the requirements in the CGMP regulations.
How Reduction Achieved:	The proposed rule affected the data collection cleared under the CGMP regulations. This change resulted in a decrease in burden.
Change in Burden:	-50,493 hours
Agency:	Department of Homeland Security
OMB Control Number:	1615-0047
Title:	Employment Eligibility Verification

Purpose of the Collection:	For employers verifying employment eligibility of their hires.
How Reduction Achieved:	Regulation Change - Interim Regulation, Electronic Signature and Storage of Form I-9 (71 FR 34510)
Change in Burden:	-650,000 hours
Agency:	Department of Homeland Security
OMB Control Number:	1615-0075
Title:	Affidavit of Support under Section 213A of the Act
Purpose of the Collection:	To show that the applying immigrant has enough financial support to live without concern of becoming reliant on U.S. government welfare.
How Reduction Achieved:	Regulation Change – Final Regulation, (71 FR 35732)
Change in Burden:	-763,200 hours
Agency:	Department of Homeland Security
OMB Control Number:	1651-0095
Title:	Textiles and Textile Products
Purpose of Collection:	This collection required that importers, exporters and manufacturers submit a Textile Certificate/Declaration to CBP providing information about whether imported articles were manufactured in a foreign country.
How Reduction Achieved:	CBP discontinued the collection of this certificate to reduce paperwork for importers and other parties and to move toward paperless entries. 19 CFR 12.130, which mandated the Textile Certificate/Declaration, was removed from the CBP Regulations.
Change in Burden:	-171,591 hours
Agency:	Department of Labor
OMB Control Number:	1215-0196
Title:	Equal Opportunity Survey
Purpose of the Collection:	Data collected by the Equal Opportunity (EO) Survey was intended to improve the selection of Federal contractors for compliance evaluations.
How Reduction Achieved:	Due to lack of accuracy and utility, the Department published a Final Rule on September 8, 2006, amending 41 CFR Part 60-2 to eliminate this collection.
Change in Burden:	-210,000 hours
Agency:	Department of Transportation
OMB Control Number:	2126-0001
Title:	Hours of Service of Drivers Regulations
Purpose of the Collection:	This information is required for the Record of Duty Status (RODS) of drivers of commercial motor vehicle (CMVs) drivers to help ensure that motor carriers and CMV drivers comply with the limitations on maximum driving and duty time prescribed in the Federal Motor Carrier Safety Regulations (FMCSRs).
How Reduction Achieved:	DOT estimates that at least 239,400 commercial drivers operating in the short-haul sector would be relieved of the requirement to file RODS as a result of the 2005 Hour of Service of Driver Regulation final rule.
Change in Burden:	-7,273,200 hours
Agency:	Federal Communications Commission
OMB Control Number:	3060-0206
Title:	Part 21 - Domestic Public Fixed Radio Services
Purpose of the Collection:	The information requested under Part 21 is used by the Commission staff to fulfill its obligations as set forth on Sections 308 and 309 of the Communications Act of 1934, as amended, to determine the technical, legal and other qualifications of applicants to operate a station in the Multipoint Distribution Service (MDS).
How Reduction Achieved:	Collection discontinued when Commission created Broadband Radio Service to replace MDS.

Change in Burden:	-10,221 hours
Agency:	Federal Communications Commission
OMB Control Number:	3060-0704
Title:	Policy and Rules Concerning the Interstate, Interexchange Marketplace; Implementation of Section 254(g) of the Communications Act of 1934, as amended, CC Docket No. 96-61.
Purpose of the Collection:	The Federal Communications Commission reinstated the public disclosure requirement and required that nondominant interexchange carriers with Internet websites pass this information on-line in a timely and easily accessible manner. These carriers were also required to file annual certifications and maintain price and service information.
How Reduction Achieved:	The tariff cancellation requirement was eliminated.
Change in Burden:	-74,598 hours
Agency:	Federal Communications Commission
OMB Control Number:	3060-0897
Title:	MDS and ITFS Two-way Transmissions
Purpose of the Collection:	The rules for two-way transmissions for MDS and ITFS will allow two-way licensing and provide greater flexibility in the use of the allotted spectrum to licensees. The Commission will use this information to ensure that MDS and ITFS applicants and licensees have considered properly under the Commission's rules the potential for harmful interference from their facilities.
How Reduction Achieved:	Collection discontinued when Commission created Broadband Radio Service to replace MDS and Educational Broadband Service to replace ITFS.
Change in Burden:	-223,618 hours
Agency:	Federal Deposit Insurance Corporation
OMB Control Number:	3064-0113
Title:	External Audits
Purpose of the Collection:	Facilitates early identification of problems in financial management at insured depository institutions above a certain size.
How Reduction Achieved:	Increased asset size threshold for covered institutions from \$500 million to \$1 billion.
Change in Burden:	-52,923 hours
Agency:	Federal Energy Regulatory Commission
OMB Control Number:	1902-0038
Title:	Application for the Determination of the Maximum Lawful Price under the Natural Gas Policy Act (FERC Form 121)
Purpose of the Collection:	In Order No. 616, (July 14, 2000) FERC reinstated provisions for making well category determinations under Section 503 of the Natural Gas Policy Act for certain categories of high cost gas. Such determinations allow natural gas producers to claim a tax credit for certain types of high cost gas production.
How Reduction Achieved:	The tax credit has expired and all applications submitted under the previous authorizations have been processed.
Change in Burden:	-23,284 hours
Agency:	Federal Energy Regulatory Commission
OMB Control Number:	1902-0060; 1902-0062 and 1902-0128
Title:	Gas Pipeline Certificates: Construction, Acquisition and Abandonment (0060); Gas Pipeline Certificates: Import/Export Related (0062); Gas Pipeline Certificates: Environmental Impact Statement (0128)
Purpose of the Collection:	In Order No. 608, (64 FR 51209-51222, September 22, 1999), FERC allowed prospective applicants seeking to construct, operate or abandon natural gas facilities

	or services to provide a collaborative process that includes environmental analysis and issue resolution.
How Reduction Achieved:	The Commission eliminated this collaborative pre-filing procedure because it found that it was impracticable.
Change in Burden:	-12,760 hours (1902-0060); -270 hours (1902-0062); and -13,580 hours (1902-0128)
Agency:	Securities and Exchange Commission
OMB Control Number:	3235-0288 (Form 20-F)
Title:	Termination of Foreign Private Issuer's Registration of a Class of Securities Under Section 12(g) and Duty to File Reports Under Section 15(d) of the Securities Exchange Act of 1934
Purpose of the Collection:	To make it easier for Foreign Private Issuers to terminate their Exchange Act reporting obligations when there is relatively little U.S. investor interest in its securities.
How Reduction Achieved:	Securities Exchange Commission issued a propose rule to streamline the Exchange Act requirements for Foreign Private Issuers.
Change in Burden:	- 72,325 hours and -\$65,092,000

FY 2006 Burden Reduction from Cutting Redundancy

Agency:	Department of Education
OMB Control Number:	1810-0021
Title:	Indian Education Formula Grants to Local Educational Agencies (LEAs)
Purpose of the Collection:	This grant application ensures that the programs meet the purpose of the Elementary and Secondary Education Act, are based on challenging State content and student performance standards, and are designed to assist Indian students in meeting those standards, and meet Government Performance and Results Act (GPRA) requirements.
How Reduction Achieved:	Planned consolidation with ED Facts collection (1875-0240).
Change in Burden:	-17,340 hours
Agency:	Department of Education
OMB Control Number:	1810-0576
Title:	Consolidated State Application
Purpose of the Collection:	For States to apply for federal formula program grant funds under the Elementary and Secondary Education Act, as amended by sections 9301-9306 of the No Child Left Behind Act (NCLB).
How Reduction Achieved:	Eliminated the burden associated with the statutory requirements that States have already satisfied through earlier submissions (2002-2003) of the Consolidated State Application.
Change in Burden:	-10,360 hours
Agency:	Department of Education
OMB Control Number:	1810-0614
Title:	Consolidated State Performance Report (CSPR)
Purpose of the Collection:	To collect data from States that is required under section 1111 of the No Child Left Behind Act and to collect data to monitor program outcomes.
How Reduction Achieved:	Some data was electronically pre-populated from previous year submissions in the Education Data Exchange Network (EDEN) and some data duplicative data was eliminated.
Change in Burden:	-34,561 hours

Agency:	Department of Health and Human Services
OMB Control Number:	0915-0060
Title:	HRSA Competing Grant Training Application
Purpose of the collection:	This application collected information for a number of health professions training grant programs and contained general and program specific guidance and program instructions.
How Reduction Achieved:	A HRSA work group examining agency forms for possible duplication or redundancy with currently approved Standard Forms found that the health professions programs could operate with the Standard Forms, allowing HRSA to discontinue this form and its associated burden.
Change in Burden:	-101,531 hours
Agency:	Department of Health and Human Services
OMB Control Number:	0938-0742
Title:	Adjusted Community Rate (ACR) and Supporting Regulations in 42 CFR
Purpose of the Collection:	This collection was used to approve contract applications, monitor compliance with contract requirements, make proper payment to Medicare+Choice organizations, and to ensure that correct information was disclosed to Medicare beneficiaries.
How Reduction Achieved:	Collection discontinued due to similar collection requirements under 0938-0944 and 0938-0763 as required by the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (Pub. L. No. 108-173).
Change in Burden:	-57,000 hours
Agency:	Department of Health and Human Services
OMB Control Number:	0938-0781
Title:	Home Health Advance Beneficiary Notices and Supporting Regulations in 42 CFR, Section 411.404 and 484.10 (a) and (e)
Purpose of the Collection:	Home Health Agencies are required to provide written notice to Medicare beneficiaries under various circumstances involving the initiation, reduction, or termination of services.
How Reduction Achieved:	The basis of the burden estimation was changed from home health claims to home health beneficiaries because claim data was difficult to cross-reference to the number of beneficiaries.
Change in Burden:	-11,497 hours
Agency:	Department of Housing and Urban Development
OMB Control Number:	2507-0001
Title:	Customer Service and Satisfaction Survey
Purpose of the Collection:	To measure resident satisfaction with living conditions and assess the overall living conditions of residents.
How Reduction Achieved:	The reduction is attributed to the removal of multifamily assessment burden hours for which HUD no longer conducts survey assessments.
Change in Burden:	-12,555 hours
Agency:	Department of the Treasury
OMB Control Number:	1545-1277
Title:	Form 1040-Telefile
Purpose of the Collection:	For individuals file their return using the telephone
How Reduction Achieved:	IRS eliminated this form because of continual shrinkage in use and because taxpayers now e-file their returns for a faster, safer, and more efficient way of meeting their tax obligation.
Change in Burden:	-7,133,900 hours
Agency:	Federal Communications Commission
OMB Control Number:	3060-0690

Title: Section 101.17, Performance Requirements for the 38.6 - 40.0 GHz Frequency Band
Purpose of the Collection: All 38.6 - 40.0 GHz band licensees must demonstrate substantial service at the time of license renewal. This collection provides information for a licensee's substantial service showing in each market or portion of a market covered by their license in order to qualify for renewal.
How Reduction Achieved: Eliminated Federal Communications Commission Form 415/415T
Change in Burden: -75,235 hours

FY 2006 Burden Reduction from Changing Forms

Agency: Department of Health and Human Services
OMB Control Number: 0938-0301
Title: Medicare Provider Cost Report Reimbursement Questionnaire and Supporting Regulations in 42 CFR 413.20, 413.24, and 415.60
Purpose of the Collection: To assist providers in the collection of data to support acceptable cost reports and to minimize subsequent contact between the providers and their intermediaries.
How Reduction Achieved: Chain home offices are no longer required to complete part of this form as the same information is collected in 0938-0202.
Change in Burden: -14,904 hours

Agency: Environmental Protection Agency
OMB Control Number: 2030-0020
Title: General Administrative Requirements for Assistance Programs
Purpose of the Collection: The information is collected from applicants/recipients of EPA assistance and is used to make awards, pay recipients, and collect information on how Federal funds are being spent.
How Reduction Achieved: EPA removed five forms (EPA Forms: 5700-20A, 5700-20B, 5700-30, 5700-49 and 5700-52A) and added three forms ("Lobbying Cost Certificate for Indirect Costs," NCER Form 5, and NCER Form 3212).
Change in Burden: -65,287 hours

Agency: Federal Deposit Insurance Corporation
OMB Control Number: 3064-0052
Title: Consolidated Reports of Condition and Income (Call Report)
Purpose of the Collection: Determines the financial condition of insured financial institutions.
How Reduction Achieved: Deletion of data items that are no longer needed (result of interagency review by the Federal Reserve, OCC, and FDIC).
Change in burden: -45,334 hours

FY 2006 Burden Reduction from Using Information Technology

Agency: Department of Agriculture
OMB Control Number: 0524-0036
Title: Reporting Requirements for State Plans of Work for Agricultural Research and Extension Formula Funds
Purpose of the Collection: To comply with statutory requirements that require States and eligible institutions to submit a plan of work for approval by the Secretary of Agriculture.
How Reduction Achieved: Providing an option to submit plans of work and other information collected related to the plans of work electronically will reduce burden.
Change in Burden: - 25,260 hours

Agency:	Department of Education
OMB Control Number:	1845-0008
Title:	Student Aid Report (SAR)
Purpose of the Collection:	The SAR is used to notify all applicants of their eligibility to receive federal student aid for postsecondary education.
How Reduction Achieved:	The Department made process changes to encourage web applications.
Change in Burden:	-214,034 hours
Agency:	Department of Education
OMB Control Number:	1850-0582
Title:	Integrated Postsecondary Education Data (IPEDS)
Purpose of the Collection:	IPEDS is a system of surveys designed to collect basic data from Title IV postsecondary institutions in the United States through a web-based data collection system.
How Reduction Achieved:	The implementation of a new Classification of Instructional Programs increased burden during the 2004-05 and 2005-06 collection years. With that conversion complete, the burden per response will decrease.
Change in Burden:	-34,568 hours
Agency:	Department of Energy
OMB Control Number:	1910-0300
Title:	Environment, Safety and Health
Purpose of the Collection:	The information obtained from DOE contractors by these information collections are used to manage the environment, safety and health issues throughout the DOE complex.
How Reduction Achieved:	These changes are a result of the implementation of information technology to electronically collect the information. DOE in response to the President's Management Agenda item, <i>Expanded Electronic Government</i> , improved the design and capabilities of several systems that collect and report information.
Change in Burden:	-74,475 hours
Agency:	Department of Health and Human Services
OMB Control Number:	0938-0878
Title:	Collection of Diagnostic Data from Medicare Advantage Organizations for Risk Adjusted Payments Supporting Reg 42 CFR Part 422 & 423 Subparts F and G
Purpose of the Collection:	This collection implements health status risk adjustment payment methodology for Parts C and D that takes into account the health status of plan enrollees. CMS collects inpatient and outpatient data. CMS will use the data to make risk adjusted payment under Parts C and D, MA plans and Medicare Advantage Prescription Drug plans.
How Reduction Achieved:	CMS reduced the burden by streamlining the systems used to collect risk adjustment data and requiring a substantially reduced data set.
Change in Burden:	-10,526 hours
Agency:	Department of Homeland Security
OMB Control Number:	1660-0069
Title:	National Fire Incident Reporting System (NFIRS) Versions 4.1 and 5.0
Purpose of the Collection:	To collect and analyze fire incident data at the Federal, State, and local levels.
How Reduction Achieved:	Expanded use of electronic reporting.
Change in Burden:	-1,277,586 hours and -\$17,545,000
Agency:	Department of Transportation
OMB Control Number:	2105-0534
Title:	Passenger Manifest Information

Purpose of the Collection:	The purpose of this collection is to comply with Part 243 (Passenger Manifest Information) in Chapter II of Title 14 of the Code of Federal Regulations.
How Reduction Achieved:	Through improvements in airline information technology and increased use of internet bookings, revised annual reporting burden expected to remain constant through end of collection period (833,464 annual hours).
Change in Burden:	- 216,536 hours
Agency:	Social Security Administration
OMB Control Number:	0960-0010
Title:	Application for Child's Insurance Benefits
Purpose of the Collection:	The SSA-4 is used to collect information necessary for a child to receive Title II benefits.
How Reduction Achieved:	In late 2005, the SSA-4 became available for electronic signature via the Signature Proxy Initiative.
Change in Burden:	-13,775 hours
Agency:	Social Security Administration
OMB Control Number:	0960-0618
Title:	Internet Social Security Benefits Application (ISBA)
Purpose of the Collection:	The information collected on the benefit application forms SSA-1, SSA-2 and SSA-16 are used to establish initial filing for social security retirement and disability benefits.
How Reduction Achieved:	ISBA collections became available for electronic signature via the Signature Proxy Initiative.
Change in Burden:	-32,401 hours

FY 2006 Burden Reduction from Statutory Requirements

Agency:	Department of Agriculture
OMB Control Number:	0560-0025
Title:	Farm Reconstitutions (7CFR 718)
Purpose of the Collection:	The reconstitution process was a required procedure when a producer wishes to increase acreage attributed to the farm from leases of purchases, or change farm acreage records as a result of any part of a farm. The FSA county committee must act on all proposed farm reconstitutions and issue their approval or disapproval.
How Reduction Achieved:	Collection was discontinued.
Change in Burden:	-15,024 hours
Statute Title and Public Law:	Fair and Equitable Tobacco Reform Act of 2004 (Pub. L. No. 108-357)
Agency:	Department of Agriculture
OMB Control Number:	0560-0182
Title:	Tobacco Marketing Quota Referenda
Purpose of the Collection:	To proclaim national marketing quotas for tobacco and to conduct a referendum of the farmers who were engaged in the production of the crop of tobacco harvested immediately prior to the referendum to determine whether these farmers are in favor of, or opposed to, national marketing quotas for the next three marketing years.
How Reduction Achieved:	Collection was discontinued.
Change in Burden:	-29,556 hours
Statute Title and Public Law:	Fair and Equitable Tobacco Reform Act of 2004 (Pub. L. No. 108-357)
Agency:	Department of Agriculture
OMB Control Number:	0560-0217
Title:	Designation of Burley Tobacco Sales and Annual Waiver to Release Information Restricted by the Privacy Act.

Purpose of the Collection:	This collection of information is used for burley tobacco marketing and other producer services.
How Reduction Achieved:	Collection was discontinued.
Change in Burden:	-187,504 hours
Statute Title and Public Law:	Fair and Equitable Tobacco Reform Act of 2004 (Pub. L. No. 108-357)
Agency:	Department of Agriculture
OMB Control Number:	0584-0012
Title:	7 CFR 220, School Breakfast Program
Purpose of the Collection:	The School Breakfast Program (SBP) provides cash assistance to States to operate nonprofit breakfast programs in schools and residential childcare institutions.
How Reduction Achieved:	Sec. 201 of the Child Nutrition and WIC Reauthorization Act of 2004 eliminates the requirement to document costs in order to receive the severe need reimbursement rate.
Change in Burden:	-2,169,932 hours
Statute Title and Public Law:	Child Nutrition and WIC Reauthorization Act of 2004 (Pub. L. No. 108-265)
Agency:	Department of Education
OMB Control Number:	1820-0622
Title:	Special Education -- Personnel Preparation to Improve Services and Results for Children with Disabilities
Purpose of the Collection:	The information is used to ensure eligibility of trainees for scholarship assistance, determine progress in completion of training, and ensure that the service obligation is completed or that the scholarship assistance is repaid.
Why Decrease Occurred:	The requirement that grantees track the progress of scholars has been eliminated.
Change in Burden:	-21,750 hours
Statute Title and Public Law:	Individuals with Disabilities Education Improvement Act (Pub. L. No. 108-446)
Agency:	Department of Education
OMB Control Number:	1845-0001
Title:	Free Application for Federal Student Aid (FAFSA)
Purpose of the Collection:	This form collects identifying and financial information from students applying for Federal student aid for postsecondary education.
Why Decrease Occurred:	The Higher Education Reconciliation Act of 2005 (HERA) required collection of additional data via last-minute mailed paper form in 2006 to determine eligibility for two new grants, causing a one-time spike in burden hours. The new questions have now been integrated into routine FAFSA processing for 2007-2008.
Change in Burden:	- 147,664 hours
Statute Title and Public Law:	Higher Education Reconciliation Act of 2005 (Pub. L. No. 109-171)
Agency:	Department of Homeland Security
OMB Control Number:	1651-0076
Title:	Modernization Act Recordkeeping Requirements
Purpose of Collection:	These recordkeeping requirements are necessary to substantiate the correctness of information regarding import entry documents.
How Reduction Achieved:	The NAFTA agreement sharply reduced the number of drawback claimants which resulted in fewer companies required to keep records.
Change in Burden:	-941,417 hours
Statute Title and Public Law:	NAFTA Implementation Act (Pub. L. No. 103-182)
Agency:	Department of Housing and Urban Development

OMB Control Number: 2577-0029
Title: Operating Fund Subsidies Allocation Formula
Purpose of the Collection: The Operating Fund program provides operating subsidies to public housing agencies to fund the operating and maintenance expenses associated with 1.2 million public housing units.
How Reduction Achieved: The decrease is a result of the revised funding formula requiring significantly less information by the elimination of five HUD forms.
Change in Burden: -13,248 hours
Statute Title and Public Law: FY 2004 Consolidated Appropriations Act (Pub. L. No. 108-99)

Agency: Department of Transportation
OMB Control Number: 2132-0529
Title: Metropolitan and Statewide Transportation Planning
Purpose of the Collection: Information is used to determine eligibility for financial assistance and ensure compliance with federal requirements.
How Reduction Achieved: Reporting frequency required for some reports has been reduced as a result of the implementation of SAFETEA-LU.

Title:	EEOICPA Dose Reconstruction Interviews and Form
Purpose of the Collection:	NIOSH is estimating the radiation doses incurred occupationally by U.S. nuclear weapons production employees with cancer covered by the "Energy Employees Occupational Illness Compensation Program Act of 2000." An essential data source for conducting the dose reconstructions is the claimant and, when the claimant is not the employee but a surviving family member, then a co-worker of the employee as well.
How Reduction Achieved:	The program determined that the collection and review of government data could be completed and summarized for the interviewer prior to the interview with the claimant. Thereby allowing the interview to be tailored to efficiently identify/confirm critical information and facilitate the claimant's memory in response to the interview questions.
Change in the Burden:	-11,350 hours
Agency:	Department of Health and Human Services
OMB Control Number:	0935-0116
Title:	Needs Assessment of Primary Care Practice-Based Research Networks (PBRNs)
Purpose of the Collection:	In order to be maximally responsive to the needs of the PBRNs, it is essential that the PBRN Resource Center has a strong understanding of the strength and weaknesses of each PBRN it will serve. Therefore, an assessment of needs that looks in-depth at each PBRN is required.

How Reduction Achieved:	The program has completed all the data collection for this survey and will not reinstate this collection.
Change in Burden:	-14,740,000
Agency:	Department of Health and Human Services
OMB Control Number:	0938-0875
Title:	Durable Medical Equipment Regional Carrier, Certificate of Medical Necessity (CMN) and Supporting Documentation Requirements

Title:	Paperless Single Family Mortgage Case Binder

Purpose of the Collection:	Beginning January 1, 2006, the Office of Single Family Housing began accepting paperless case binders for mortgagees approved under the Lender Insurance (LI) program. Approximately seven percent of FHA mortgagees currently qualify for this program.
How Reduction Achieved:	Paperless case binders streamline the process of filing FHA insurance-related data. FHA also reviewed all its forms and eliminated form HUD-92564-VC and form HUD-92564-HS HUD, opting instead to use standard Fannie Mae appraisal documents. This was an FY 2006 burden reduction initiative.
Change in Burden:	-480,000 hours
Agency:	Department of Transportation
OMB Control Number:	2120-0651
Title:	Additional Flight Data Recorder Requirements for Certain Boeing 737 Airplanes
Purpose of the Collection:	This rule requires the recording of additional operating parameters for certain Boeing 737 airplanes. These additional parameters allow the NTSB and FAA to investigate and establish causes for accidents so that the aviation industry can make appropriate modifications to prevent future incidents.
How Reduction Achieved:	This collection was discontinued in January 2006.
Change in Burden:	-\$205,000,000
Agency:	Department of Transportation
OMB Control Number:	2120-0680
Title:	Part 60 - Flight Simulation Device Initial and Continuing Qualification and Use (NPRM)
Purpose of the Collection:	The collection of this information is necessary to ensure safety of flight by ensuring complete and adequate training, testing, checking, and experience is obtained and maintained by those who conduct flight simulation training.
How Reduction Achieved:	The FAA changed the rule based on comments received during the NPRM stage.
Change in Burden:	-22,174 hours

Title:	Form 7004, Application for Automatic 6-Month Extension of Time to File Certain Business Income Tax, Information, and Other Returns
Purpose of the Collection:	Taxpayers use this form to request an automatic 6-month extension of time to file certain business income tax, information, and other returns
How Reduction Achieved:	This form was removed because taxpayers can now get more time to file without having to file this form
Change in Burden:	-7,595,999 hours
Agency:	Department of the Treasury
OMB Control Number:	1557-0081
Title:	Reports of Condition and Income (Call Report)
Purpose of the Collection:	To monitor the condition, performance, and risk profile of individual institutions and the national bank industry as a whole. The reports provide the most current statistical data available for evaluating institutions' corporate applications, for identifying areas of focus for examinations, and for monetary and other public policy purposes.
Why Decrease Occurred:	The overall decrease in burden is due to the elimination or simplification of a number of line items.
Change in Burden:	-39,302 hours
Agency:	Department of Veterans Affairs
OMB Control Number:	2900-0355
Title:	Verification of Pursuit of Course (Leading to a Standard College Degree)

Purpose of the Collection:	VA Form 22-6553 serves to verify the student's enrollment and report of change in enrollment status.
How Reduction Achieved:	VA is discontinuing this information collection, effective May 31, 2007 as a result of changing Dept. regulations. Schools will continue to submit relevant enrollment information to VA under OMB control number 2900-0074.
Change in Burden:	-14,000 hours
Agency:	Department of Veterans Affairs
OMB Control Number:	2900-0646
Title:	Regulation on Medication Prescribed by Non-VA Physicians, VA Form 10-0411
Purpose of the Collection:	During the period VHA experienced inordinate delays between enrollment and the veteran's first appointment, this system was established to permit veterans to obtain pharmacy benefits at no or a reasonable cost.
How Reduction Achieved:	The system was phased out.
Change in Burden:	-30,287 hours
Agency:	Environmental Protection Agency
OMB Control Number:	2060-0443
Title:	The Consolidated Federal Air Rule for the Synthetic Organic Chemical Manufacturing Industry
Purpose of the Collection:	Respondents will submit initial notification, initial compliance reports, exception reports and periodic monitoring information indicating the performance of air pollution controls.
How Reduction Achieved:	The changes are due to no longer requiring Notifications of Anticipated Startup industries regulated by 40 CFR part 60, subparts Kb, VV, DDD, III, NNN and RRR.
Change in Burden:	-35,758 hours
Agency:	Environmental Protection Agency

OMB Control Number:	3060-0207
Title:	Part 11- Emergency Alert System (EAS)
Purpose of the Collection:	The Emergency Alert System provides the President with the capability to provide immediate communications and information to the public during periods of national emergency. The Emergency Alert System also provides state and local governments and the National Weather Service with the capability to provide immediate communications and information to the public concerning emergency situations posing a threat to life and property.
How Reduction Achieved:	Eliminated requirement to purchase computer chip to update event and location codes.
Change in Burden:	-16,490 hours
Agency:	National Science Foundation
OMB Control Number:	3145-0141
Title:	2006 National Survey of College Graduates (NSCG)

Purpose of Collection:	Educational institutions use NSCG data in establishing and modifying scientific and technical curricula, while various industries use the information to develop recruitment and remuneration policies.
How Reduction Achieved:	The first survey in the decade is much more expensive and burdensome than the following ones because of the large size of the sample needed to screen respondents to determine whether they meet the Scientists and Engineers Statistical Data System SESTAT definition of a scientist or engineer. On subsequent surveys in the decade, only those identified as scientists and engineers are followed. Thus the sample size for the 2006 survey will drop to 68,000, which greatly reduces both the cost and burden.
Change in Burden:	-49,377 hours
Agency:	Nuclear Regulatory Commission
OMB Control Number:	3150-0120
Title:	NRC Forms 313, Application for Material License and NRC Form 313A, Medical Use Training and Experience and Preceptor Attestation

OMB Control Number:	1545-0074
Title:	U.S. Individual Income Tax Return
Purpose of the Collection:	For individuals to file their federal income tax return.
Why Increase Occurred:	IRS changed its way of figuring burden from the Arthur D. Little methodology to the Individual Taxpayer Burden Model (ITBM). In so doing, IRS combined the burden of over 200 related forms under OMB number 1545-0074, which accounts for much of the 1.44 billion hour increase. Chapter 3 provides a brief explanation of how IRS eliminated the separate burden figures for the related forms, and thus avoided double counting. Since the increase is the result of 1545-0074 absorbing the 200 plus forms, as well as the change in methodology, the actual adjustment increase is approximately 343 million hours, as we explain in Chapter 3. It should be noted that this adjustment increase is due to a new estimate of burden, not an actual change in the burden imposed on individual taxpayers..

Title:	Identifying Information for Possible Direct Payment of Authorized Fees
Purpose of the Collection:	Information collected on the SSA-1695 will facilitate the direct payment of authorized fees related to the representation of claimants for benefits before SSA and to issue a Form 1099 MISC, as required. The information will also be used to establish a link between each claim for benefits and the data that will be collected on the SSA-1699 and stored on an Appointed Representative Database.
Why Increase Occurred:	New Collection.
Change in Burden:	41,667 hours
Agency:	E-Gov (Grants.gov)
OMB Control Number:	4040-0004
Title:	SF-424 Application for Federal Assistance (Discretionary)
Purpose of the Collection:	Data is collected with established government-wide standard data elements definitions for grant related applications. The established core data sets are used on both paper and electronic applications. Use of the electronic process of Grants.gov was deployed in October 2003 as part of the implementation of the Federal Financial Assistance Management Improvement Act of 1999 (P.L. 106-107).

Why Increase Occurred:

The data collection was transferred from 0348-0043 to 4040-0004. After the transition period Grants.gov phased out the use of the old forms and adapted the revised application forms and systems.

Agency: Department of Health and Human Services
OMB Control Number: 0938-0033
Title: Request for Review of Part B Medicare Claim and Supporting Regulations in 42 CFR Sec.405.807
Purpose of the Collection: The CMS-1964 is a form which is used nationally to request review of an initial determination made on a Part B health insurance claim.
How Reduction Achieved: Collection discontinued. The agency revised its reconsideration request process in the regulation CMS-4064-IFC. The collection is now exempt under 5 CFR 1320.4.
Change in Burden: -1,629,000 hours

Agency: Department of Health and Human Services
OMB Control Number: 0938-0798
Title: Provider-Based Status Regulations in 42 CFR 413.24 and 413.65
Purpose of the Collection: To determine whether a facility or organization acquired by a main provider should be treated as provider-based for Medicare certification, coverage, and payment purposes or whether a main provider has had a material change in its relationship to a provider-based facility or organization that affects the provider-based status of the facility or organization.
How Reduction Achieved: Eliminated information collection associated with 42 CFR 419.42 (b) and (c).
Change in Burden: -15,000 hours

Agency: Department of Labor
OMB Control Number: 1218-0190
Title: Electrical Protective Equipment (1910.137), and Electric Power Generation, Transmission, and Distribution
Purpose of the Collection: The Electrical Protective Equipment Standard at 29 CFR 1910.137 and the Electric Power Generation, Transmission, and Distribution Standard at 29 CFR 1910.269 prevents employee exposure to electrical hazards.
How Reduction Achieved: Final Rule will remove of the training certification record.
Change in Burden: -11,520 hours

Agency: Department of Transportation/FMCSA
OMB Control Number: 2126-0001
Title: Hours of Service of Drivers Regulations
Purpose of the Collection: This information is required for the Record of Duty Status (RODS) of drivers of commercial motor vehicle (CMVs) drivers to help ensure that motor carriers and CMV drivers comply with the limitations on maximum driving and duty time prescribed in the Federal Motor Carrier Safety Regulations (FMCSRs).

How Reduction Achieved:	Certain motor carriers will be required to use Electronic On-Board Recorders (EOBRs) to document and manage their drivers' compliance with Federal hour-of-service at the final rule stage of FY 2006 Notice of Proposed Rulemaking (NPRM).
Change in Burden:	-655,000 hours

OMB Control Number:	2040-0250
Title:	Final NPDES and ELG Regulatory Revisions for CAFOs: CAFO Rule Revisions Based on Second Circuit Court Decision in Waterkeeper Alliance et al. v. EPA
Purpose of the Collection:	Addresses the reporting burden for Concentrated Animal Feeding Operations (CAFOs) as required by the NPDES and ELG regulations. The regulations regulate land application of manure, litter and wastewater generated at these facilities. Permit application activities for permittees involve completing and submitting either an NOI or an application for an individual permit. Manure samples must be collected annually and analyzed for nutrient content. Manure and soil sampling results must be retained and the manure content results must be made available to off-site users. Records of the volume of manure and process wastewater produced must also be maintained, and large CAFOs must create and maintain off-site transfer records.
How Reduction Achieved:	The CAFO rule revisions will result in fewer CAFO operations being required to seek coverage under an NPDES permit.
Change in Burden:	-777,000 hours
Agency:	Environmental Protection Agency
OMB Control Number:	2050-0021
Title:	Revision of Information Collection Request (ICR) for the Oil Pollution Prevention Regulation for Certain Facilities to Prepare and Maintain an Oil Spill Prevention, Control, and Countermeasure (SPCC) Plan
Purpose of the Collection:	To implement requirements related to Spill Prevention, Control, and Countermeasure (SPCC) Plans pursuant to the Oil Pollution Prevention Regulation at 40 CFR part 112. These requirements included regulatory relief in several ways: by providing streamlined options for facilities and oil-filled operational equipment that meet qualifying criteria; by exempting certain onboard bulk storage containers and ancillary onboard oil-filled operational equipment from the requirements; and, by exempting mobile refuelers from certain secondary containment requirements for bulk storage containers.
How Reduction Achieved:	The Agency issued a rule to amend SPCC Plan requirements to reduce the regulatory burden.
Change in Burden:	-504,260 hours and -\$36,024,000
Agency:	Environmental Protection Agency
OMB Control Number:	2060-0084
Title:	Ambient Air Quality Surveillance (Final Rule)

Purpose of the Collection:	Revises requirements for existing monitoring stations to provide more flexibility to their operators as well as requiring each State to operate one to three new (or expanded) monitoring stations that take an integrated, multi-pollutant approach to ambient air monitoring. The amendments modify the requirements for ambient air monitors by focusing requirements on populated areas with air quality problems and significantly reducing the requirements for criteria pollutant monitors that have measured ambient air concentrations well below the applicable NAAQS. Other amendments revise the requirements for monitoring network descriptions and periodic assessments, quality assurance, and data certification.
How Reduction Achieved:	New regulation
Change in burden:	-48,588 hours and -\$11,161,019
Agency:	Federal Acquisition Regulation
OMB Control Number:	9000-0075
Title:	Government Property
Purpose of the Collection:	This collection of information contains the reporting, recordkeeping and disclosure requirements for the management of Government property in the possession of Federal contractors. These regulatory requirements affect contracting officers, property administrators, and contractors responsible for the management of Government property.
How Reduction Achieved:	FAR will amend its regulations to simplify procedures, clarify language, and eliminate obsolete requirements. Significant proposed changes include: combining selected property clauses into a single clause; deleting outdated clauses and other language; and establishing a life-cycle approach to property management.
Change in Burden:	-348,959 hours

Title:	10 CFR Parts 19, 20, and 50, "Occupational Dose Records, Labeling Containers, and the Total Effective Dose Equivalent," and NRC Form 4, "Cumulative Occupational Exposure History "
Purpose of the Collection:	Protect workers' health by monitoring ongoing and past radiation exposure.
How Reduction Achieved:	The proposed rule requires that dose reports be provided only to individuals exceeding specified limits or who request the reports and eliminates the need to provide cumulative occupational dose history reports except for planned special exposures. The rule eliminates labeling requirements for containers kept in protected areas.
Change in Burden:	-10,882 hours (3150-0044) and -9,969 hours (3150-0005)
OMB Control Number	3150-0011
Title:	10 CFR 50, Domestic Licensing of Production and Utilization Facilities
Purpose of the Collection:	Provisions pertaining to early site permits, standard design certifications, and combined licenses are being amended to move these requirements to Part 52. This action places all procedural requirements in Part 52 and all technical requirements in Part 50. The proposed modifications to 10 CFR 50.34, 50.34a, and Appendices B & E transfer reporting and recordkeeping requirements for the technical content of applications for early site permits, design certifications, and combined licenses to 10 CFR Part 52.
How Reduction Achieved:	The transfer of some reporting and recordkeeping requirements to 10 CFR Part 52 will reduce the burden for 10 CFR Part 50.
Change in Burden:	-173,667 hours

FY 2007 Burden Reduction from Cutting Redundancy

Agency:	Department of Commerce
OMB Control Number:	0607-0444
Title:	Company Organization Survey (COS)
Purpose of the Collection:	The Census Bureau conducts the annual COS in order to maintain and update a centralized, multipurpose Business Register (BR). In particular, the COS supplies critical information on the organizational structure, operating characteristics, and employment and payroll of multi-location enterprises.
How Reduction Achieved:	The Census Bureau will conduct the 2007 COS in conjunction with the 2007 Economic Census and will coordinate these collections so as to minimize response burden. The decrease in response burden is the result of obtaining most multi-location establishment data as part of the Economic Census.

Title:	Health Insurance Common Claims Form and Supporting Regulations at 42 CFR Part 424, Subpart C
Purpose of the Collection:	As a standardized claim form for use in the Medicare/Medicaid programs to apply for reimbursement for covered services, use of this form reduces cost and administrative burdens associated with professional claims because only one format need be used and maintained.
How Reduction Achieved:	Form discontinued and the information will be collected under 0938-0999.
Change in Burden:	-46,383,364 hours
Agency:	Department of Health and Human Services

OMB Control Number: 0938-0279
Title: Medicare Uniform Institutional Provider Bill and Supporting Regulations in 42 CFR 424.5
Purpose of the Collection: This standardized form is used in the Medicare/Medicaid program to apply for reimbursement of covered services by all providers that accept Medicare/Medicaid assigned claims and that do not bill Medicare/Medicaid electronically.
How Reduction Achieved: Form discontinued and the information will be collected on 0938-0997.
Change in Burden: -1,997,581 hours

Agency: Department of Housing and Urban Development
OMB Control Number: 2506-0145
Title: Annual Progress Report (APR) for Competitive Homeless Assistance Programs
Purpose of the Collection: The Annual Progress Report (APR) tracks competitive homeless assistance program progress and is used to provide grant recipients and HUD with information necessary to assess program and grantee performance.
How Reduction Achieved: The number of burden hours for this information has decreased because the instructions and form have been more clearly defined reducing the time it takes to complete the APR.
Change in Burden: -33,500 hours

Agency: Department of Labor
OMB Control Number: 1215-0188
Title: Labor Organization and Auxiliary Reports
Purpose of the Collection: Statutory reporting and public disclosure by labor organizations, their officers and key employees, and certain employers.
How Reduction Achieved: Final Rule amended 29 CFR Part 403 curtailing the use of the Form T-1.
Change in Burden: - 988,656 hours

Agency: Federal Communications Commission
OMB Control Number: 3060-0874
Title: FCC Consumer Complaint Form 475
Purpose of the Collection: Form 475 collects detailed information from consumers on the practices of telecommunications companies to assist in resolving complaints and to collect data as a part of the investigative work performed by federal and state law enforcement.
How Reduction Achieved: The form will require less data to be collected as it will be amended slightly to reflect that it will no longer be used for certain types of complaints.
Change in Burden: -12,300 hours

Title:	Federal Direct Consolidation Loan Program Application Documents
Purpose of the Collection:	These forms are the means by which an applicant applies for and promises to repay a Federal Direct Consolidation Loan and a lender verifies that a loan is eligible to be consolidated.
How Reduction Achieved:	The statute changed the eligibility requirements for consolidation loans, which will decrease the number of consolidation borrowers.
Change in Burden:	-331,800 hours
Statute Title and Public Law:	Higher Education Reconciliation Act of 2005 (Pub. L. No. 109-171)
Agency:	Department of Housing and Urban Development
OMB Control Number:	2502-0500
Title:	Housing Finance Agency Risk-Sharing Program
Purpose of the Collection:	The purpose of the Risk-Sharing Program is to provide new forms of Federal credit enhancement for multifamily loans. Under this program, HUD provides full mortgage insurance on multifamily housing projects whose loans are underwritten, processed, and serviced by housing finance agencies (HFAs). The HFAs reimburse HUD a percentage of any loss under an insured loan depending upon the level of risk the HFA contracts to assume
Why Increase Occurred:	This previously canceled collection will be reinstated. In 2000, there were fewer than 10 new applications annually by HFAs to join in the program.
Change in Burden:	18,243 hours
Statute Title and Public Law:	Housing and Community Development Act of 1992 (Pub. L. No. 102-550)
Agency:	Department of Justice
OMB Control Number:	1140-0041
Title:	Implementation of Public Law 103-322, The Violent Crime Control and Law Enforcement Act of 1994
Purpose of the Collection:	To document compliance with the Act, which restricts the manufacture, transfer, and possession of certain semiautomatic assault weapons and large capacity ammunition feeding devices.
How Reduction Achieved:	The provisions covering semiautomatic assault weapons and large capacity ammunition feeding devices are no longer in effect. However, any records required to be obtained prior to September 13, 2004 pertaining to the sale or transfer of semiautomatic assault weapons must still be retained for a period of 5 years.
Change in Burden:	-310,040 hours

Statute Title and Public Law:	The Violent Crime Control and Law Enforcement Act of 1994 (Pub. L. No. 103-322)
Agency:	Department of the Treasury
OMB Control Number:	1550-0075
Title:	Loans to Executive Officers, Directors, and Principal Shareholders of Savings Associations
Purpose of the Collection:	This information collection enables the Department to ensure that savings associations comply with regulatory provisions that require savings associations to maintain detailed records of their extensions of credit to executive officers, directors, and principal shareholders. The regulations also require that savings associations report certain loans and indebtedness to the Department.
Why Decrease Will Occur:	New statute eliminated certain insider lending reporting requirements imposed on insured depository institutions and their insiders that the Federal banking agencies have not found useful in monitoring or preventing abusive insider lending practices.
Change in Burden:	-12,705 hours
Statute Title and Public Law:	Financial Services Regulatory Relief Act of 2006 (Pub. L. No. 109-351).
Agency:	Federal Deposit Insurance Corporation
OMB Control Number:	3064-0023; 3064-0052
Title:	Reports on Indebtedness of Executive Officers and Principal Shareholders to Correspondent Banks and to Own Bank; Call Report
Purpose of the Collection:	To detect preferential lending by insured financial institutions.
How Reduction Achieved:	Rescission of statutory requirement.
Change in Burden:	-68,986 hours
Statute Title and Public Law:	Financial Services Regulatory Relief Act of 2006 (Pub. L. No. 109-351)
Agency:	Federal Energy Regulatory Commission
OMB Control Number:	1902-0060 and 1902-0128
Title:	Gas Pipeline Certificates: Construction, Acquisition and Abandonment (0060) and Gas Pipeline Certificates: Environmental Impact Statement (0128)
Purpose of the Collection:	FERC is expanding its blanket permitting authority for natural gas.
How Reduction Achieved:	FERC is expanding its blanket certificate to include additional types of natural gas facilities. Because this change will permit projects that are now processed under the case-specific NGA section 7 procedures to go forward under the streamlined blanket certificate program, the burden under the blanket certificate program will increase but the overall burden on industry will decrease.
Change in Burden:	7,727 hours (1902-0060) and -11,997 hours (1902-0128)
Statute Title and Public Law:	Energy Policy Act of 2005 (Pub. L. No. 109-58)
Agency:	National Science Foundation
OMB Control Number:	3145-0060
Title:	National Science Foundation Proposal Review Process
Purpose of the Collection:	The information collected is used to support grant programs of the Foundation. The information collected on the proposal evaluation forms is used by the Foundation to determine the following criteria when awarding or declining proposals submitted to the Agency: (1) What is the intellectual merit of the proposed activity? (2) What are the broader impacts of the proposed activity?
Why Decrease Occurred:	NSF is combining the Proposal Review Process with the Grant Proposal Guide information collection (3145-0058; see below for "increases") to streamline the proposal and award management policies and procedures; this collection will be discontinued.
Change in Burden:	-600,000 hours

FY 2007 Burden Reduction from Miscellaneous Actions

Agency:	Department of Commerce
OMB Control Number:	0607-0924
Title:	2007 Economic Census General Classification Report
Purpose of the Collection:	The results will be used to update the classification codes in the Business Register.
How Reduction Achieved:	Census will mail this information collection to fewer respondents than originally projected.
Change in Burden:	-23,333 hours
Agency:	Department of Health and Human Services
OMB Control Number:	0910-0537
Title:	Bar Code Label Requirement for Human Drug and Biological Products
Purpose of the Collection:	The bar code and machine-readable information is used by hospitals to ensure that the right product (including the right dose and right route of administration for the product) is reaching the right patient at the right time.
How Reduction Achieved:	Most of the information collection burden was a one-time burden that does not occur after the rule's compliance date of April 26, 2006.
Change in Burden:	-1,777,503 hours
Agency:	Department of Health and Human Services
OMB Control Number:	0915-0289
Title:	Health Care Infrastructure Application Forms for Funding Opportunities
Purpose of the collection:	This application form is part of a set of application forms that are used to provide information needed to make funding decisions for health center grant applicants applying for certain infrastructure funding opportunities.
How Reduction Achieved:	This form was used for applicants to the Healthy Communities Access Program (HCAP), which has been eliminated as one of the funding opportunities from the Bureau of Primary Health Care.
Change in Burden:	-10,890 hours
Agency:	Department of Health and Human Services
OMB Control Number:	0920-0428
Title:	PHS Supplement to Application for Federal Assistance (SF 424)
Purpose of the Collection:	The information collected in the supplemental HHS forms will be moved to the Office of the Secretary for use HHS-wide. Each agency's financial assistance program evaluates the information provided by the applicants to select the ones most likely to meet program objectives and to determine that satisfactory progress is being made on funded projects.
How Reduction Achieved:	Data collection will be transferred to a separate OMB number and will be used HHS wide.
Change in Burden:	-49,691 hours
Agency:	Department of Health and Human Services
OMB Control Number:	0925-0405
Title:	Generic Clearance to Collect Medical Outcome and Risk Factor Data from a Cohort of U.S. Radiologic Technologists
Purpose of the Collection:	The primary aim of this project is to substantially increase knowledge about the long-term health effect associated with protracted low-to-moderate-dose radiation exposures.
How Reduction Achieved:	The decrease is due to the fact that the Agency plans to conduct only one survey under this approval rather than the three requested originally under the generic clearance.
Change in Burden:	-23,870 hours

Agency:	Department of Health and Human Services
OMB Control Number:	0925-0484
Title:	National Epidemiologic Survey on Alcohol and Related Conditions
Purpose of the Collection:	To acquire reliable estimates of alcohol use disorders and related disabilities.
How Reduction Achieved	Two waves of the NESARC were executed successfully as planned and budgeted for and the data collection activity is over.
Change in Burden:	-43,093 hours
Agency:	Department of Health and Human Services
OMB Control Number:	0935-0118
Title:	Medical Expenditure Panel Survey Household Component and Medical Provider Component (MEPS-HC and MEPS-MPC - 2004 and 2005)
Purpose of the Collection:	For nearly thirty years, the results of MEPS and its predecessor surveys (the 1977 National Medical Care Expenditure Survey, the 1980 National Medical Care Utilization and Expenditure Survey and the 1987 National Medical Expenditure Survey) have been used by OMB, DHHS, Congress and a wide number of health services researchers to analyze health care use, expenses and health policy.
How Reduction Achieved:	The burden hours previously submitted were not annualized properly. The total burden hours for the full three years of the clearance were entered by mistake. The amount entered was 249,848, but should have been entered as $249848/3 = 83,283$. This change request corrected the original error.
Change in Burden:	-164,664 hours
Agency:	Department of Health and Human Services
OMB Control Number:	0935-0127
Title:	Privacy and Security Solutions for Interoperable Health Information Exchange
Purpose of the Collection:	The use of health information technology (IT) and the adoption of electronic health records (EHRs) will enable health information to follow patients throughout their care in a seamless and secure manner. This privacy and security project is a key part of the Department of Health and Human Services' health IT plan. Information collected by this effort is critical for the advancement of health IT and will be used to achieve the goal of developing seamless and secure electronic health records nationwide.
How Reduction Achieved:	Data collection under the emergency clearance is complete and will be discontinued on the scheduled date of February 28, 2007.
Change in Burden:	-164,392 hours
Agency:	Department of Health and Human Services
OMB Control Number:	0938-0045
Title:	Request for Reconsideration of Part A Medicare Claim and Supporting Regulations
Purpose of the Collection:	To request a reconsideration of an initial determination made on a Part A health insurance claim.
How Reduction Achieved:	CMS discontinued use of this collection.
Change in Burden:	-15,000 hours
Agency:	Department of Health and Human Services
OMB Control Number:	0938-0791
Title:	A Project to Develop an Outcome-Based Continuous Quality Improvement System and Core Outcome and Comprehensive Assessment Data Set for PACE
Purpose of the Collection:	The purpose of this collection was to develop an out-come based quality improvement approach for the PACE program.
How Reduction Achieved:	CMS considers this collection obsolete therefore it will be discontinued.
Change in Burden:	-16,960 hours
Agency:	Department of Health and Human Services

OMB Control Number:	0938-1001
Title:	Voluntary Sample AMP Collection
Purpose of the Collection:	The data collection allows CMS and OIG to analyze the current definition of AMP and to determine whether or not the definition should be revised.
How Reduction Achieved:	The data collection is complete and the collection will be discontinued in February 2007.
Change in Burden:	-11,000 hours
Agency:	Department of Health and Human Services
OMB Control Number:	0970-0223
Title:	State Self-Assessment Review and Report - NPRM
Purpose of the Collection:	Periodic report of State performance.
How Reduction Achieved:	The number of data elements on the data collection forms was decreased.
Change in Burden:	-208,549 hours
Agency:	Department of Justice
OMB Control Number:	1110-0022
Title:	Cost Recovery Regulations, Communications Assistance for Law Enforcement Act of 1994
Purpose of Collection:	To allows telecommunications carriers to recover the costs associated with complying with the Act.
How Reduction Achieved:	Agreements were made with telecommunications manufacturers that allowed for distribution among multiple carriers, which made it unnecessary to make individual cost recovery agreements.
Change in Burden:	-45,920 hours
Agency:	Department of Justice
OMB Control Number:	1140-0054
Title:	Commerce in Firearms and Ammunition - Annual Inventory of Firearms
Purpose of the Collection:	Annual inventory of federal firearms
How Reduction Achieved:	ATF decided not to proceed with final rule given comments received during the notice of proposed rulemaking.
Change in Burden:	-15,483 hours
Agency:	Department of Labor
OMB Control Number:	1220-0032
Title:	Annual Refiling Survey (ARS)
Purpose of the Collection:	Verifies the accuracy of industry codes for business establishments covered by State Unemployment Insurance (U.I.) programs.
How Reduction Achieved:	The decrease is due to the removal of employers with two or less employees.
Change in Burden:	-22,792 hours
Agency:	Department of Transportation
OMB Control Number:	2130-0008
Title:	Inspection Brake System Safety Standards for Freight and Other Non-Passenger Trains and Equipment (Power Brakes and Drawbars)
Purpose of Collection:	To ensure that locomotives are inspected, tested, and properly maintained in accordance with Federal safety regulations, as well as to ensure that locomotive engineers and train crews verify that the terminal air brake test has been performed in a satisfactory manner.
How Reduction Achieved:	There were nine one-time requirements under 49 CFR 232 that have been fulfilled.
Change in Burden:	-57,412 hours
Agency:	Department of the Treasury

OMB Control Number: 1559-0021
Title: Financial Assistance (FA) Component Application-CDFI Program
Purpose of the Collection: To determine certified Community Development Financial Institutions eligibility for assistance in the forms of grants, loans, equity investments and deposits through a competitive review process.
How Reduction Achieved: The burden was reduced by combining the Financial Assistance and the Technical Assistance applications, reducing the number of questions and tables within the application.
Change in Burden: -16,400 hours

Agency: National Science Foundation
OMB Control Number: 3145-0141
Title: 2006 National Survey of College Graduates (NSCG)
Purpose of Collection: These data enable government agencies to assess the scientific and engineering resources available in the United States relative to the needs of business, industry, and academia, and to provide a basis for the formulation of the Nation's science and engineering policies.
How Reduction Achieved: The first survey in the decade is much more expensive and burdensome than the following ones because of the large size of the sample needed to screen respondents to determine whether they meet the Scientists and Engineers Statistical Data System SESTAT definition of a scientist or engineer. On subsequent surveys in the decade, only those identified as scientists and engineers are followed. Thus the sample size for the 2006 survey will drop to 68,000, which greatly reduces both the cost and burden.
Change in Burden: -49,377 hours

Agency: Social Security Administration
OMB Control Number: 0960-0145
Title: Statement for Determining Continuing Eligibility for Supplemental Security Income (for Low-Error Probability and Middle-Error Probability cases)
Purpose of the Collection: This collection is used to determine whether SSI recipients have met and continue to meet all statutory and regulatory requirements for SSI eligibility, and whether they have been and are still receiving the correct payment amount.
Why Reduction Occurred: SSA will be conducting significantly fewer redeterminations this year due to budgetary constraints.
Change in Burden: -208,000 hours

Agency: Social Security Administration
OMB Control Number: 0960-0416
Title: Statement for Determining Continuing Eligibility for Supplemental Security Income (for High-Error Probability cases)
Purpose of the Collection: This collection is used to determine whether SSI recipients have met and continue to meet all statutory and regulatory requirements for SSI eligibility, and whether they have been and are still receiving the correct payment amount.
Why Reduction Occurred: SSA will conduct significantly fewer redeterminations this year because of budget constraints.
Change in Burden: -228,606 hours

FY 2007 Burden Increases from Statutory Requirements

Agency: Department of Agriculture
OMB Control Number: 0563-0053
Title: Multiple Peril Crop Insurance
Purpose of the Collection: To improve and expand existing crop programs, develop new crop products and study new insurance concepts for possible implementation.

Why Increase Occurred:	New pilot crop insurance programs were added; and there were not enough hours accounted for in this package to allow the producers and agents to read the insurance documents.
Change in Burden:	406,192 hours
Statute Title and Public Law:	Federal Crop Insurance Act (Pub. L. No. 106-224)
Agency:	Department of Agriculture
OMB Control Number:	0584-0026
Title:	7 CFR Part 245, Determining Eligibility for Free and Reduced Priced Meals
Purpose of the Collection:	Determination and verification of eligibility for free and reduced price meal.
Why Increase Occurred:	Child Nutrition and WIC Reauthorization Act of 2004 requires direct certification with the Food Stamp Program and implements provisions relating to verification of applicants approved for free or reduced price meals.
Change in Burden:	700,889 hours
Statute Title and Public Law:	Child Nutrition and WIC Reauthorization Act of 2004 (Pub. L. No. 108-265)
Agency:	Department of Agriculture
OMB Control Number:	0584-0043
Title:	WIC Program Regulation – Reporting and Recordkeeping Burden
Purpose of the Collection:	To determine program eligibility and to ensure compliance with program requirements for the purpose of providing food, nutrition counseling and access to health service to low-income women, infants, and children.
Why Increase Occurred:	Statute mandates certain discretionary WIC vendor provisions.

Title:	Dietary Supplements CGMP final rule
Purpose of the Collection:	Section 402(g) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 342 (g)) gives the Food and Drug Administration (FDA) explicit authority to issue a rule establishing Current Good Manufacturing Practice for dietary supplements. For this final rule, recordkeeping is necessary to provide the type of documentation that will demonstrate that dietary supplements are manufactured, packaged, labeled and held in a manner that will ensure the quality of the dietary supplement as specified in the master manufacturing record.
Why Increase Occurred:	New rulemaking requires additional data collection.
Change in Burden:	933,000
Statute Title and Public Law:	Dietary Supplement and Health Education Act (DSHEA) of 1994 (Pub. L. No. 103-417)

Title:	Supplements and Other Changes to Approved New Animal Drug Applications; Final Rule and Guidance
Purpose of the Collection:	This collection is in response to the requirements of the Food and Drug Administration Modernization Act of 1997 (Pub. L. No. 105-115). This section revises current FDA procedures for approving manufacturing changes for new animal drugs. Small entities are not likely to be significantly affected by this regulation.
Why Increase Occurred:	The publication of this final rule is an important step in the process of adopting a risk-based approach to the regulation of new drugs. This approach provides for a continued high level of scrutiny by FDA of changes that are most likely to affect the performance of a new animal drug and decrease scrutiny of changes that are not likely to affect a new animal drug's performance.

Title:	Railroad Operating Rules
Purpose of Collection:	To enhance rail safety and drive down the number and severity of accidents/incidents and corresponding injuries, fatalities, and property damage caused by human factors, such as employees improperly setting hand-operated main track switches in the daily operation of the nation's railroads.
Why Increase Occurred:	Expanded regulatory requirements (NPRM) (<i>see</i> 49 CFR 217) to improve railroad employees' familiarity (training) and compliance with their railroad's operating rules.
Change in Burden:	3,044,921 hours
Agency:	Department of Transportation
OMB Control Number:	2130-0562
Title:	Occupational Noise Exposure for Railroad Operating Employees
Purpose of Collection:	To ensure that covered railroads establish and implement – by specified dates – noise monitoring, hearing conservation, and audiometric testing programs to protect their employees against the damaging and potentially dangerous effects of excessive noise in the everyday rail work environment.
Why Increase Occurred:	Expanded regulatory requirements (Final Rule) (<i>see</i> 49 CFR 227 and 229) to protect the safety and health of railroad employees.
Change in Burden:	44,178 hours
Agency:	Department of Transportation
OMB Control Number:	2137-New
Title:	Distribution Integrity Management Program (DIMP)
Purpose of the Collection:	PHMSA proposes to revise Pipeline Safety Regulations to require operators of gas distribution pipelines to develop and implement pipeline system integrity improvements. The proposed regulations would require distribution pipeline operators to implement a Distribution Integrity Management Program with elements similar to those required for gas transmission pipelines.
Why Increase Occurred:	Pipeline operators would be required to evaluate risks to and performance of the gas distribution system, and add the assessment to existing annual reports to PHMSA.
Change in Burden:	680,046 hours

Title:	Currency Transaction Report by Casinos – (CTR-C)
Purpose of the Collection:	Reporting of suspicious transaction involving more than \$10,000 in cash in any Nevada casino that qualifies as a 6A licensee.
Why Increase Occurred:	Increased the frequency of reporting by Nevada 6A casinos.
Change in Burden:	21,201 hours
Agency:	Department of the Treasury
OMB Control Number:	1506-0004
Title:	Currency Transaction Report (CTR)
Purpose of the Collection:	Reports filed by financial institutions on transactions involving more than \$10,000.
Why Increase Occurred:	Increased the frequency of reporting by financial institutions.
Change in Burden:	1,289,995 hours
Agency:	Department of the Treasury
OMB Control Number:	1545-NEW
Title:	Form 8913, Credit for Federal Telephone Excise Tax Paid
Purpose of the Collection:	IRS issued Notice 2006-50 stating “taxpayers may be entitled to request a credit or refund of the federal excise tax on nontaxable telephone service.” The refund period is for nontaxable service billed after February 28, 2003 and before August 1, 2006. The credit or refund must be claimed on a 2006 income tax return.
Why Increase Occurred:	IRS authored new Form 8913 to allow taxpayers to compute the actual amount of refund for each month of the 14 refund periods. Taxpayers must also calculate the interest due on the refund. Factors have been provided for each refund period. The tax and interest is combined on Form 8913 and one amount is transferred to the appropriate income tax return.
Change in Burden:	67,600,000 hours
Agency:	Department of the Treasury
OMB Control Number:	1545-0074
Title:	U.S. Individual Income Tax Return
Purpose of the Collection:	For individuals to file their federal income tax return.
Why Increase Occurred:	This increase is the result of a procedural agency changes.
Change in Burden:	1,100,000 hours
Agency:	Department of the Treasury
OMB Control Number:	1545-0099
Title:	Form 1065, U.S. Return of Partnership Income
Purpose of the Collection:	This form is an information reporting document used by partnerships to report the income of every domestic partnership (syndicates, groups, pools, joint ventures, etc.) and every foreign partnership doing business in the U.S. or receiving income from U.S. sources.
Why Increase Occurred:	IRS created the new Schedule M-3 which is filed with Form 1065 and ask certain questions about the partnership’s financial statements and reconciles financial statement net income (loss) for the consolidated financial statement group to income (loss) per the income statement for the partnership.
Change in Burden:	7,154,000 hours
Agency:	Department of the Treasury
OMB Control Number:	1550-NEW
Title:	Risk-Based Capital Standards: Advanced Capital Adequacy Framework
Purpose of the Collection:	A new Treasury proposed rule would require some banks and allow other qualifying banks to use an internal ratings-based approach to calculate regulatory credit risk capital requirements and advanced measurement approaches to calculate regulatory operational risk capital requirements.
Why Increase Will Occur:	New collection based on a proposed rule.
Change in Burden:	60,000 hours

Agency: Department of the Treasury
OMB Control Number: 1559-0016
Title: New Markets Tax Credit (NMTC) Program-Allocation Application
Purpose of the Collection: Program application for the NMTC program, which provides an incentive to investors in the form of tax credits to stimulate private investment capital to help economic and community development in low-income communities.
Why Increase Occurred: The application was enhanced to include questions regarding applicant activity in the Gulf Opportunity Zone.
Change in Burden: 10,150 hours

Agency: Department of the Treasury
OMB Control Number: 1559-0027
Title: Annual Survey: Institutional Level Report; Transaction Level Report; IRS Compliance Questions
Purpose of the Collection: To solicit reporting requirements from participants in the Fund's CDFI Program, Native American CDFI (NACA) Program, and NMTC Programs and related assistance and allocation agreements, respectively.
Why Increase Occurred: The survey was enhanced to better obtain information from participants.
Change in Burden: 28,368 hours

Agency: Department of the Treasury
OMB Control Number: 1557-New
Title: Risk-Based Capital Standards: Advanced Capital Adequacy Framework
Purpose of the Collection: The Federal banking agencies will propose new policies to require some national banks to use an internal ratings-based approach to calculate regulatory credit risk capital requirements and advanced measurement approaches to calculate regulatory operational risk capital requirements. This collection will cover the associated recordkeeping and reporting requirements.
Why Increase Occurred: The Federal banking agencies will issue a proposed rule to implement "New Accord" from the Basel Committee on Banking Supervision (BCBS) for banks in the United States.
Change in Burden: 15,570 hours

Agency: Environmental Protection Agency
OMB Control Number: 2040-0204
Title: Short Term Regulatory Changes to the Lead and Copper Rule
Purpose of the Collection: Systems demonstrate compliance through reporting the analytical results of collected samples and other information to the State. States are required to report a subset of the data to EPA which utilizes this information to protect public health by ensuring compliance with the LCR, measuring progress toward meeting the LCR's goals, and evaluating the appropriateness of State implementation activities.
Why Increases Occurred: New regulatory monitoring, reporting, and public notification requirements
Change in burden: 113,852 hours and \$2,935,000

Agency: Environmental Protection Agency
OMB Control Number: 2040-0271
Title: Microbial Rules; Ground Water Rule
Purpose of the Collection: The final Ground Water Rule establishes a risk-based approach to target ground water systems that are vulnerable to fecal contamination instead of requiring disinfection for all ground water systems. The information collected as result of the final GWR will allow the States and EPA to make decisions and evaluate compliance with the rule.
Why Increases Occurred: New regulatory monitoring, reporting, and public notification requirements
Change in burden: 385,264 hours

Agency: Environmental Protection Agency
OMB Control Number: 2040-NEW
Title: Unregulated Contaminant Monitoring Regulation (UCMR) for Public Water Systems Revisions
Purpose of the Collection: The Safe Drinking Water Act (SDWA), as amended in 1996, requires the EPA to establish criteria for a program to monitor unregulated contaminants and to publish a list of contaminants to be monitored every five years. This final regulation meets the SDWA requirement by publishing the next set of unregulated contaminants to be monitored for the second Unregulated Contaminant Monitoring Regulation (UCMR) cycle (i.e., UCMR 2) of 2007 - 2011. Implementation of this final rule will provide EPA and other interested parties with scientifically valid data on the occurrence of these contaminants in drinking water. These data are the primary source of occurrence and exposure data for the Agency to determine whether to regulate these contaminants.
Why Increases Occurred: New regulatory monitoring and reporting requirements
Change in burden: 40,386 hours and \$5,727,000

Agency: Environmental Protection Agency
OMB Control Number: 2060-0594
Title: Final 0.08ppm, 8-hour Ozone National Ambient Air Quality Standard (NAAQS) Implementation Rule
Purpose of the Collection: To record the incremental burden to State and local agencies regarding state implementation plans and supporting analyses for the new 8-hour ozone NAAQS.
Why Increases Occurred: New regulation
Change in burden: 285,333 hours

Agency: Environmental Protection Agency
OMB Control Number: 2060-NEW
Title: ICR for National Perchloroethylene Air Emission Standards for Dry Cleaning Facilities Subpart M - Recordkeeping and Reporting Requirements
Purpose of the Collection: To assure compliance with 40 CFR part 63, subpart M.
Why Increases Occurred: To comply with the final revisions to the dry cleaning NESHAP, owners or operators of dry cleaning facilities will be required to keep additional records and conduct additional monitoring that will also require maintenance of records. Owners and operators will incur the capital/startup cost of purchasing the monitors, plus ongoing annual operation and maintenance costs of those instruments.
Change in burden: 241,212 hours and \$5,344,740

Agency: Environmental Protection Agency
OMB Control Number: 2060-NEW
Title: ENERGY STAR Program in the Residential Sector
Purpose of the Collection: To track and analyze the market for Energy Star qualified new homes as well as the market for energy efficiency improvements to existing homes. These activities allow EPA to design its Energy Star outreach programs and public education materials to fit the needs of its Partners, as well as to provide public recognition and market differentiation to participating organizations. Respondents include homebuilders, home energy verification organizations, lenders, and utilities.
Why Increases Occurred: To collect information on existing program
Change in burden: 175,449 hours

Agency: Environmental Protection Agency
OMB Control Number: 2070-0133
Title: Standards for Pesticide Containers and Containment (Final Rule)

Purpose of the Collection:	Section 19 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) requires EPA to promulgate regulations for the safe storage and disposal of pesticides to protect human health and the environment. EPA recently issued final regulations (RIN 2070-AB95) that impose certain reporting on some States and recordkeeping requirements for businesses.
Why Increase Occurred:	New regulation.

Title:	Food Additives; Food Contact Substances Notification System
OMB Control Number:	FDA/0910-0495
Date of Approval:	7/11/2006
How Discovered:	In December 1992, before guidance documents were evaluated for information collection provisions, CFSAN issued a guidance entitled, "Points to Consider for the Use of Recycled Plastics in Food Packaging: Chemistry Considerations." Upon revising the guidance in 2006, CFSAN staff noticed that the draft revised guidance document entitled, "Guidance for Industry: Use of Recycled Plastics in Food Packaging: Chemistry Considerations," had information collection provisions. These provisions are related to the OMB approval under OMB No. 0910-0495, "Food Contact Substances Notification System." However, CFSAN discovered that the supporting statement for the information collection did not specifically identify the burden hours associated with the guidance.
How Resolved:	HHS submitted to OMB a Form 83-C to add 250 hours to OMB No. 0910-0495. OMB approved the request.

Title:	Cosmetic Labeling Regulations
OMB Control Number:	None
Date of Approval:	N/A
How Discovered:	FDA's cosmetic labeling regulations in 21 CFR Part 701 require that cosmetic manufacturers, packers, and distributors label their products with a list of ingredients in descending order of predominance, a statement of the identity of the product, the establishment's name and place of business, and the net quantity of contents. FDA's cosmetic labeling regulations were published in the Federal Register on March 15, 1974 (39 FR 10054 at 10056) and subsequently amended, most recently on March 17, 1999 (64 FR 13254 at 13297). Sometime subsequent to the amendments of 1999, CFSAN staff noticed that the labeling regulations had information collection provisions for which there was no OMB approval.
How Resolved:	FDA submitted collection to OMB for review and is pending approval.

Title:	The National Electronic Disease Surveillance System (NEDSS)
OMB Control Number:	CDC/0920-0728
Date of Approval:	8/16/2006

How Discovered:	During conference call with OMB, Desk Officer asked specific questions about ongoing data collections that had been covered under several OMB approved projects but were not specifically covered under one approved data collection, as NEDSS is designed to be. CDC was advised during the call and in the Notice of Action on 8/16/2006 that clearance “must be received prior to the collection of information covered under the Paperwork Reduction Act.”
How Resolved:	On 8/11/2006, CDC provided OMB an explanation about how existing OMB approved surveillance systems related to NEDSS will be phased out, and any changes in the approved “Operational Definitions and Standards” will be submitted to OMB, and OMB approval will be obtained, before data collections will be started. CDC has fully complied with the OMB Terms of Clearance since receiving their clearance in August 2006. No new information or data collections have been implemented by the National Electronic Disease Surveillance System (NEDSS) project, other than the information currently approved by OMB. Furthermore, CDC stipulates that OMB Paperwork Reduction Act (PRA) clearance will be obtained as required by law, prior to any new data or information collections occur.

Title:	Multi-Site Evaluation of Foster Youth Programs
OMB Control Number:	ACF/0970-0253
Date of Approval:	12/18/2006
How Discovered:	Violation was initially discovered during the negotiation period of the first clearance in August 2003. ACF had conducted a pilot test of this evaluation but had not submitted the collection to OMB for review and approval.
How Resolved:	OMB initially cleared the submission in August 2003 and included in terms of clearance that this violation would be reported in the FY 2004 ICB report. However, in the course of reviewing ACF’s request for renewal, OMB discovered that this violation was never reported in the 2004 ICB report. Therefore, it is being reported in this year’s ICB report.

About OIRA

The Paperwork Reduction Act of 1980 (Pub. L. No. 96-511) and its successor, the Paperwork Reduction Act of 1995 (Pub. L. No. 104-13), established the Office of Information and Regulatory Affairs (OIRA) in the Office of Management and Budget to oversee agency information resources management, information collection, and use of information technology. Under this authority, OIRA develops policies and guidelines to promote the management, dissemination, privacy, and security of government information and coordinates Federal statistical policies and resources. OIRA is also responsible for the review of agency rulemaking activity under Executive Order 12866. The Administrator of OIRA is appointed by the President and confirmed by the Senate.

Principal contributors to this report were Rachel Potter, Karen Matsuoka, Paula Braun, Seema Singh, and Alex Hunt. If you have questions about any of the information collections discussed in this report, please visit our website at www.reginfo.gov.
