

Transit Now service improvements

This map, based on Metro Transit's analysis of current ridership and future population and employment trends, illustrates how service improvements from **Transit Now** could be spread throughout the region. Exactly which improvements would be made along which corridors would be decided only after a thorough process combining research, analysis, and extensive public outreach. The outreach would include mailings, questionnaires, public meetings, and other opportunities for comment.

RapidRide BRT:

- Aurora Ave N
- Ballard/15th Ave W
- West Seattle
- Bellevue/Redmond
- Pacific Hwy S

High-ridership routes:

- Network of all-day central Eastside routes with 15-minute frequency
- South King County all-day 15-30-minute frequency route network
- Improved cross-town services within Seattle

Developing areas:

New peak service or addition of midday service to newly developing residential areas

Service partnerships:

Additional services to urban employment centers with high potential for matching resources
