King County offers a unique training experience.

*"At King County, we try to match the interests and  
career goals of the intern with the type of engineering  
work we do in order to give them the best learning  
experience. We believe this experience is a building  
block to helping the intern achieve their career  
objectives and, in turn, hope that they will consider  
King County as an employer of choice."*

Matt Nolan  
Traffic Engineering Manager

# King County Department of Transportation Road Services Engineering Internship Program

## Engineering internship opportunities with King County

Are you looking for the opportunity to be part of an organization that is a leader, partner and provider of local and regional transportation services?

The King County Road Services Division is responsible for the design, building, operating and maintenance of approximately 2,000 miles of roadway and 200 bridges in unincorporated King County and many more in other jurisdictions on a contractual basis. Make a difference in the community by joining one of our engineering work groups.

*“Working as an Engineering Intern in the King County Department of Transportation allowed me to expand my engineering skills through everyday duties and trainings. The internship also allowed me to gain real life experience working in the engineering field. These experiences gave me advantages and qualifications that helped me to obtain my current full-time position in the DOT. I am thankful that I was given the opportunity to work for King County and to serve the citizens.”*

### Status

- Full-time enrollment in an accredited college/university
- Completion of freshman year in an accredited college/university

### G.P.A.

3.0

### Majors

Civil Engineering, Environmental Sciences, GIS, Geography, Geology

*“My internship at King County really helped me gain the skills and experience necessary to succeed in the real world. I was fortunate enough to work on and complete some small scale projects from start to finish, which gave me the confidence and drive to succeed in the future. Now I am happy to be a full-time employee for the King County Department of Transportation.”*

Nadeem Mohammad  
Engineer I

*“I really enjoyed the field of Transportation and the direct impact that can be made to improve the safety and lives of the citizens within King County. The internship also gave me a mechanism to gain job experience as well as make contacts for future full-time jobs within DOT.”*

Mike Crippen  
IT Project Manager I

*“The internship program in the Department of Transportation’s Road Services Division provides unique professional level experiences for Engineering students...”*
