INTRODUCTION

The Eligible Plant List and Plant Price Schedule are parts of the nursery crop insurance program provided by the Federal Crop Insurance Corporation (FCIC), an agency of the United States Department of Agriculture (USDA).

The Eligible Plant List and Plant Price Schedule are used to:

1. Determine the eligibility of nursery plants for insurance.
2. Assist in estimating nursery plant inventory value.
3. Determine the cold protection requirements in accordance with section 10, Causes of Loss, of the Nursery Crop Insurance Provisions.
4. Assist in establishing Field market value A, Field market value B, and/or Field market value C for claim settlement in accordance with section 12, Settlement of Claim, of the Nursery Crop Insurance Provisions.

The following provides important information regarding the use of the Eligible Plant List.

CROP INSURANCE NOMENCLATURE FORMAT

Consistent use of plant names is key to the administration of the nursery crop insurance program. The Eligible Plant List and Plant Price Schedule uses researched plant names taken from the *DataScape Guide to Commercial Nomenclature* and contains four forms of plant names defined as follows:

Botanical Name	The Latin, scientific, or legal form of a plant name. Parts of the name may be genus, specific epithet (species), subspecies, variety, and cultivar.
Commercial Botanical Name	The botanical form of a plant name (often including trademarked and/or registered cultivar names) used in commerce.
Common Name	The name by which a plant is known in everyday commerce.
Invalid Botanical Name	A Latin form of a plant name which is incorrectly used to identify a plant.

Plants are sometimes sold commercially by a different name from the botanical name. In some cases, that name is one that taxonomists consider outdated or incorrect. In other cases, the name is one that is more often used in commercial trade. If such conditions are present, these invalid botanical names and commercial botanical names are listed with a "see" notation which points to the correct botanical name (e.g. *Acer x freemanii* 'Autumn Blaze' is followed by the statement, "See - *Acer x freemanii* 'Jeffersred" which is the correct botanical name).

If the desired cultivar of a plant is not listed, the prices and other parameters for the "genus", "genus, species" or "genus, species, variety" will be used for inventory valuation. The incomplete name may not be used if the desired cultivar is listed. Examples are listed below, where XX is a cultivar name:

Name not found

Rhododendron 'XX'
Acer rubrum 'XX'
Acer palmatum var. *dissectum* 'XX'

Name to use

Rhododendron
Acer rubrum
Acer palmatum var. *dissectum*

CROP TYPE AND OPTIONAL UNITS

All plant material is classified in one of the crop types shown below. For administering the nursery crop insurance program, plants will carry a designation contained in this list.

<u>Code</u>	<u>Description</u>
DT	Deciduous Trees (Shade and Flower)
BE	Broadleaf Evergreen Trees
CE	Coniferous Evergreen Trees
FN	Fruit and Nut Trees
DS	Deciduous Shrubs
BS	Broadleaf Evergreen Shrubs
CS	Coniferous Evergreen Shrubs
SF	Small Fruits
HP	Herbaceous Perennials
RO	Roses
GC	Ground Cover and Vines
AN	Annuals
FO	Foliage

STORAGE KEYS

Some container plants require cold protection to retain insurance coverage against cold damage. The cold protection requirements are listed on the Eligible Plant List for each insurable container plant through the use of the storage key (SK) code. Storage key code specifications are detailed in Appendix B.

HARDINESS ZONE DESIGNATIONS

All counties are assigned a single hardiness zone (HZ) designation for insurance purposes. These assignments are listed in Appendix A and affect the insurability for both container and field grown plant material.

CONTAINER INSURABLE HARDINESS ZONES

Container plant insurability is limited to the hardiness zone (HZ) or range of hardiness zones specified. These zones are listed under "Req" (requiring cold protection) and "Not Req" (not requiring cold protection).

Hardiness zone (HZ) insurability container example:

Insurable HZ	
Req.	Not Req.
2 - 6	7 - 8

The plant is not insurable in hardiness zones 1 and 9-11.

FIELD GROWN MINIMUM HARDINESS ZONES

The Eligible Plant List designates the minimum hardiness zone for each insurable field grown plant. Field grown plant material is not insurable below the minimum hardiness zone specified for each plant.

Hardiness zone (HZ) insurability field grown example:

Minimum
Field
<u> HZ</u>
5

The plant is not insurable in hardiness zones 1 through 4. It is insurable in zones 5 through 11.

PLANT SIZE

All eligible plants are considered either field grown or container material with sizes listed for each category (practice).

Field grown plants are listed by plant size for height, width or caliper. Caliper is determined by measuring tree diameter 6 inches above the soil line up to a caliper of 4 inches. Plant sizes below the smallest listed in the Base Price Table are uninsurable.

Plants in containers are listed by the container size with volume units of measure (e.g. quart, gallon). No plant sizes (height, width, or caliper) are listed for plant material in containers. Each cell of insurable multiple-cell nursery containers (cellpacks, jumbo packs, six packs, pony packs, etc.) will be valued as a separate plant. Container sizes below the smallest size listed in the Base Price Table are uninsurable.

Container size is measured by actual volume in gallons as specified in the Special Provisions. Use the worksheet shown in Appendix D to calculate container gallon size if the plant inventory container size is unknown. The worksheet includes formulas for both round and square (rectangular) containers.

SOFTWARE AVAILABILITY

The Eligible Plant List and Plant Price Schedule are available on compact disk (CD) for use on personal computers. The software is a Windows application available at no cost which allows:

1. Searching for a plant by botanical name, commercial botanical name, common name, or key word. The multiple search function is designed to assist those who may not be familiar with scientific plant nomenclature.
2. Compiling a plant inventory list for estimating nursery plant inventory value. The program allows the plant inventory list to be printed as shown in the following example.

It should be noted that the CD containing the application program is intended only to provide convenient access to eligible plant information and help estimate the nursery plant inventory value. The CD is not required for processing insurance coverage.

SYSTEM REQUIREMENTS

386SX CPU or better
16 MB RAM or more
Windows 3.X, Windows 95 or Windows 98
25 MB available disk space or more

--------------	--------------------

INSURANCE PRICE CALCULATION

Eligible plant insurance prices are based on:

Crop Type
Practice (container/field grown)
Measurement Method

The two growing practices involve three different plant size measurement methods:

<u>Container</u> Volume (gal.)	<u>Field Grown</u> Caliper (in.) High/Wide (ft.)
-----------------------------------	--

Shown in this section are the Base Price Tables showing a base price for each eligible size (container and field) for each of the thirteen crop types.

The main body of this document titled "Eligible Plant List and Plant Price Schedule" (EPLPPS) shows a factor for each eligible plant name and valid measurement method.

The insurance price for each plant size is the grower's lowest wholesale catalog price (from catalogs submitted in accordance with the Special Provisions) not to exceed the maximum price calculated by multiplying the plant factor on the EPLPPS for the plant by the base price on the Base Price Table for that crop type and measurement method.

EXAMPLES OF INSURANCE PRICE CALCULATION:

A grower wants to insure his Autumn Blaze maples. The Eligible Plant List refers to the correct botanical name of Acer x freemanii 'Jeffersred'. Examples of price calculations for each measurement method follow.

PRICE CALCULATION EXAMPLE - CONTAINER

Plant Name: Acer x freemanii 'Jeffersred'

Crop Type: DT
(from Eligible Plant List)

Size: 5 gal.

Measurement Method: Container X Caliper High/Wide

Factor: 0.80
(from Eligible Plant List)

Base Price: \$ 14.16
(from Base Price Table for Crop Type)

Calculation of Max. Price:

$$\frac{\$ 14.16}{\text{Base Price}} \times \frac{0.80}{\text{Factor}} = \frac{\$ 11.33}{\text{Max. Price}}$$

Insurance Price: Lesser of Max. Price or Grower Lowest Wholesale Price

$$\frac{\$ 11.33}{\text{Max. Price}} \quad \frac{\$ 23.50}{\text{Grower Lowest Wholesale Price}}$$

Insurance price is \$ 11.33 in this example.

PRICE CALCULATION EXAMPLE - CALIPER

Plant Name: Acer x freemanii 'Jeffersred'

Crop Type: DT

(from Eligible Plant List)

Size: 3"

Measurement Method: Container___ Caliper X High/Wide___

Factor: 1.06

(from Eligible Plant List)

Base Price: \$ 85.35

(from Base Price Table for Crop Type)

Calculation of Max. Price:

$$\begin{array}{r} \$ 85.35 \\ \text{Base Price} \end{array} \times \begin{array}{r} 1.06 \\ \text{Factor} \end{array} = \begin{array}{r} \$ 90.47 \\ \text{Max. Price} \end{array}$$

Insurance Price: Lesser of Max. Price or Grower Lowest Wholesale Price

$$\begin{array}{r} \$ 90.47 \\ \text{Max. Price} \end{array} \quad \begin{array}{r} \$ 105.00 \\ \text{Grower Lowest Wholesale Price} \end{array}$$

Insurance price is \$ 90.47 in this example.

PRICE CALCULATION EXAMPLE - HIGH/WIDE

Plant Name: Acer x freemanii 'Jeffersred'

Crop Type: DT

(from Eligible Plant List)

Size: 5 ft.

Measurement Method: Container___ Caliper___ High/Wide X

Factor: 0.68

(from Eligible Plant List)

Base Price: \$ 28.99

(from Base Price Table for Crop Type)

Calculation of Max. Price:

$$\begin{array}{r} \$ 28.99 \\ \text{Base Price} \end{array} \times \begin{array}{r} 0.68 \\ \text{Factor} \end{array} = \begin{array}{r} \$ 19.71 \\ \text{Max. Price} \end{array}$$

Insurance Price: Lesser of Max. Price or Grower Lowest Wholesale Price

$$\begin{array}{r} \$ 19.71 \\ \text{Max. Price} \end{array} \quad \begin{array}{r} \$ 18.50 \\ \text{Grower Lowest Wholesale Price} \end{array}$$

Insurance price is \$ 18.50 in this example.

APPENDIX

County Hardiness Zones

State	County	Zone
Hawaii	Hawaii	11
	Honolulu	11
	Kauai	11
	Maui	11

STORAGE KEY G1

Woody plants (crop types): DT, BE, CE, FN, DS, BS, CS, SF, RO, GC

Hardiness Zones 1-6

Storage Structures such as:

1. Poly covered walk-in Quonset House with functional irrigation AND
 - a. Supplemental heat OR
 - b. Poly liners OR
 - c. Thermo blankets.
2. Storage barns or buildings proven satisfactory in previous seasons.

Hardiness Zones 7-8

Storage Structures such as:

1. Poly covered walk-in Quonset Houses OR
2. Low Hoop houses OR
3. Pit frames covered with poly OR
4. Outside beds covered with thermo-blankets or poly.

Hardiness Zones 9-10

Storage such as:

1. Overhead irrigation with sprinklers capable of providing complete coverage of the crop throughout the duration of cold temperatures OR
2. Plastic film covered structures without heat or overhead irrigation OR
3. Plants covered with thermo-blankets or poly during periods of cold temperature. Over-sized containerized plants (plants that are too large) should be laid on their side prior to covering.

NOTE: If wind conditions prevent effective use of overhead irrigation, either strategy #2 or #3 MUST be followed.

NOTE: The storage temperature must be established to prevent ABOVE FREEZING low temperature damage to the species being produced, including protection from dry, desiccating winds, either by covering the plants, use of overhead irrigation, or wind blocks.

Hardiness Zone 11

Storage such as:

1. Overhead irrigation with sprinklers capable of providing complete coverage of the crop throughout the duration of cold temperatures OR
2. Plants covered with thermo-blankets or poly during periods of cold temperature. Over-sized containerized plants (plants that are too large) should be laid on their side prior to covering.

STORAGE KEY G2

Woody plants (crop types): DT, BE, CE, FN, DS, BS, CS, SF, RO, GC

NOTE: IF OTHER THAN WHITE OR CLEAR POLY IS USED TO COVER PLANTS FOR COLD PROTECTION, IT MUST BE REMOVED PRIOR TO SUN EXPOSURE THE FOLLOWING DAY.

Hardiness Zones 1-6

Storage Structures such as:

1. Poly covered walk-in Quonset Houses OR
2. Low Hoop Houses OR
3. Pit frames covered with poly OR
4. Outside beds covered with thermo-blankets or poly.

Hardiness Zones 7-8

Storage Structures such as:

1. Overhead irrigation with sprinklers capable of providing complete coverage of the crop throughout the duration of cold temperatures OR
2. Plastic film covered structures without heat or overhead irrigation OR
3. Plants covered with thermo-blankets or poly during periods of cold temperature. Over-sized containerized plants (plants that are too large) should be laid on their side prior to covering.

Hardiness Zones 9-10

Storage such as:

Plants covered with thermo-blankets or poly during periods of cold temperature. Over-sized containerized plants (plants that are too large) should be laid on their side prior to covering.

Hardiness Zone 11

No cold protection required.

STORAGE KEY G3

Foliage (crop type): FO

For all zones - The storage temperature should be established to prevent low temperature damage to the species being produced.

Hardiness Zones 1-9A

Plants to be stored in a greenhouse, covered with glass or plastic film, equipped with irrigation and a heating system.

Hardiness Zones 9B-10A

Plants to be stored in a greenhouse or a shadehouse covered with plastic film during the cold season and equipped with irrigation and a heating system, or a below bench and/or aisle irrigation system capable of maintaining the air temperature around the plants above critical minimums for the crops grown (minimum water temperature for heating purposes: 70°F).

Hardiness Zones 10B-11

Plants to be stored in a shadehouse covered with plastic film during the cold season and equipped with irrigation system.

STORAGE KEY G4

Herbaceous (crop types): SF, HP, GC, AN

Hardiness Zones 1-6

Storage such as:

1. Glass, fiberglass, polycarbonate or poly covered greenhouse with supplemental heat and irrigation OR
2. Poly covered structures plus supplemental heat with overhead irrigation from sprinklers or mist OR
3. Poly covered structures with irrigation.

Hardiness Zones 7-8

Storage such as:

1. Poly covered structures plus supplemental heat with overhead irrigation from sprinklers or mist OR
2. Poly covered structures with irrigation.

NOTE: The storage temperature should be established to prevent low temperature damage to the species being produced.

Hardiness Zones 9-10A

Storage such as:

1. Poly covered structures with supplemental heat and irrigation OR
2. Poly covered structures with irrigation OR
3. Outside beds covered with thermal blankets during periods of cold weather.

NOTE: The storage temperature should be established to prevent low temperature damage to the species being produced.

Hardiness Zone 10B-11

Overhead irrigation from sprinklers.

STORAGE KEY R1

Hardiness Zones 1-8

Storage structures such as:

1. Glass OR poly greenhouses with supplemental heat AND irrigation.
2. Pot-in Pot with adequate drainage to prevent water-logging and excess salt accumulation.

STORAGE KEY R2

Hardiness Zones 1-8

Storage structure such as:

1. Glass OR poly greenhouses with supplemental heat AND irrigation.

STORAGE KEY S1

Alaska Hardiness Zones 2-3

Containers standing or laid on their side; containers mulched with 6-10 inches of straw, hay, leaves, evergreen boughs, or wood chips from the top of the container, mulch material covered with netting or floating row cover to hold mulch in place, if necessary, OR

Containers/B&B set in trench and backfilled with soil, straw, hay or leaves.

Rodent proofing required.

Hardiness Zones 1-6

Mandatory cold protection level 1 (Winter Long Protection)

Storage such as:

1. Co-poly (white preferred) covered walk-in Quonset House and poly liners OR
2. Thermal blankets covered with poly OR
3. Supplemental heat

Hardiness Zones 7-8

Mandatory cold protection level 2 (Winter Long Protection)

Storage structures such as:

1. Co-poly (white preferred) covered walk-in Quonset House OR
2. Co-poly (white preferred) covered Hoop House OR
3. Structureless storage, such as: Outside beds covered with thermal blankets laminated or overlaid with white co-poly (white required)

STORAGE KEY S2

Mandatory cold protection level 1 (Winter Long Protection)

Storage structures such as:

1. Co-poly (white preferred) covered walk-in Quonset House and poly liners OR
2. Thermal blankets covered with poly OR
3. Supplemental heat.

STORAGE KEY S3

Mandatory cold protection level 2 (Winter Long Protection)

Storage structures such as:

1. Co-poly (white preferred) covered walk-in Quonset House OR
2. Co-poly (white preferred) covered Hoop House OR
3. Structureless storage, such as: Outside beds covered with thermal blankets laminated or overlaid with white co-poly (white required).

STORAGE KEY S4

Hardiness Zones 1-6

Mandatory cold protection level 1 (Winter Long Protection)

Storage structures such as:

1. Controlled environment greenhouses.

Hardiness Zones 7-8

Mandatory cold protection level 2 (Winter Long Protection)

Storage structures such as:

1. Co-poly (white preferred) covered walk-in Quonset House OR
2. Co-poly (white preferred) covered Hoop House OR
3. Structureless storage, such as: Outside beds covered with thermal blankets laminated or overlaid with white co-poly (white required).

STORAGE KEY S5

Mandatory cold protection level 1 (Winter Long Protection)

Storage structures such as:

1. Controlled environment greenhouses.

STORAGE KEY NR

No cold protection required.

STORAGE KEY XX

The "XX" code does not communicate any information regarding storage requirements. Rather, it is used in situations where it is necessary to communicate that field grown material is insurable and container material is not insurable.

INSURANCE PRICE CALCULATION WORKSHEET

SAMPLE FOR REPRODUCTION

Plant Name: _____

Crop Type: _____
(from Eligible Plant List)

Size: _____

Measurement Method: Container___ Caliper___ High/Wide___

Factor: _____
(from Eligible Plant List)

Base Price: _____
(from Base Price Table for Crop Type)

Calculation of Max. Price:

$$\frac{\text{Base Price}}{\text{Factor}} \times \text{Factor} = \text{Max. Price}$$

Insurance Price: Lesser of Max. Price or Grower Lowest Wholesale Price

$$\frac{\text{Max. Price}}{\text{Grower Lowest Wholesale Price}}$$

CONTAINER VOLUME CALCULATION WORKSHEET

Round container volume calculation:

Calculate radius R_1 and R_2 in inches using diameter D_1 and D_2 in inches:

$$R_1 \text{ (inches)} = D_1 \div 2$$

$$R_2 \text{ (inches)} = D_2 \div 2$$

Calculate volume in gallons using R_1 , R_2 and H in inches:

$$\text{Volume (gallons)} = \frac{3.1416 (H \div 3) [(R_1 \times R_1) + (R_1 \times R_2) + (R_2 \times R_2)]}{231}$$

Note: Measurements for D_1 , D_2 and H should be taken inside the container.

Square/rectangular container volume calculation:

Calculate top (Y) and bottom (Z) area in square inches using T₁, T₂, B₁, and B₂ in inches:

$$Y \text{ (square inches)} = T_1 \times T_2$$

$$Z \text{ (square inches)} = B_1 \times B_2$$

Calculate volume in gallons using Y and Z in square inches and H in inches:

$$\text{Volume (gallons)} = (H \div 3) (Y + Z + \sqrt{Y \times Z})$$
