## STORAGE KEY G1

---

Woody plants (crop types): DT, BE, CE, FN, DS, BS, CS, SF, RO, GC

### Hardiness Zones 1-6

Storage, such as:

1. Poly covered walk-in Quonset House with functional irrigation and
  - a. Supplemental heat or
  - b. Poly liners or
  - c. Thermo blankets.
2. Storage barns or buildings proven satisfactory in previous seasons.

### Hardiness Zones 7-8

Storage, such as:

1. Poly covered walk-in Quonset Houses or
2. Low Hoop Houses or
3. Pit frames covered with poly or
4. Outside beds covered with thermo blankets or poly.

### Hardiness Zones 9-10

Storage, such as:

1. Overhead irrigation with sprinklers capable of providing complete coverage of the crop throughout the duration of cold temperatures or
2. Plastic film covered structures without heat or overhead irrigation or
3. Plants covered with thermo blankets or poly during periods of cold temperature. Over-sized containerized plants (plants that are too large) should be laid on their side prior to covering.

NOTE: If wind conditions prevent effective use of overhead irrigation, either strategy #2 or #3 must be followed.

NOTE: The storage temperature must be established to prevent above freezing low temperature damage to the species being produced, including protection from dry, desiccating winds, either by covering the plants, use of overhead irrigation, or wind blocks.

### Hardiness Zone 11

Storage, such as:

1. Overhead irrigation with sprinklers capable of providing complete coverage of the crop throughout the duration of cold temperatures or
2. Plants covered with thermo blankets or poly during periods of cold temperature. Over-sized containerized plants (plants that are too large) should be laid on their side prior to covering.

---

## STORAGE KEY G2

---

Woody plants (crop types): DT, BE, CE, FN, DS, BS, CS, SF, RO, GC

Note: If other than white or clear poly is used to cover plants for cold protection, it must be removed prior to sun exposure the following day.

### Hardiness Zones 1-6

Storage, such as:

1. Poly covered walk-in Quonset Houses or
2. Low Hoop Houses or
3. Pit frames covered with poly or
4. Outside beds covered with thermo blankets or poly.

### Hardiness Zones 7-8

Storage, such as:

1. Overhead irrigation with sprinklers capable of providing complete coverage of the crop throughout the duration of cold temperatures or
2. Plastic film covered structures without heat or overhead irrigation or
3. Plants covered with thermo blankets or poly during periods of cold temperature. Over-sized containerized plants (plants that are too large) should be laid on their side prior to covering.

### Hardiness Zones 9-10

Storage, such as:

Plants covered with thermo blankets or poly during periods of cold temperature. Over-sized containerized plants (plants that are too large) should be laid on their side prior to covering.

### Hardiness Zone 11

No cold protection required.

---

## STORAGE KEY G3

---

Foliage (crop type): FO

### Hardiness Zones 1-9A

Plants to be stored in a greenhouse, covered with glass or plastic film, equipped with irrigation and a heating system.

### Hardiness Zones 9B-10A

Plants to be stored in a greenhouse or a shadehouse covered with plastic film during the cold season and equipped with irrigation and a heating system, or a below bench and/or aisle irrigation system capable of maintaining the air temperature around the plants above critical minimums for the crops grown (minimum water temperature for heating purposes: 70° F).

### Hardiness Zones 10B-11

Plants to be stored in a shadehouse covered with plastic film during the cold season and equipped with irrigation system.

---

## STORAGE KEY G4

---

Herbaceous (crop types): SF, HP, GC, AN

### Hardiness Zones 1-6

Storage, such as:

1. Glass, fiberglass, polycarbonate or poly covered greenhouse with supplemental heat and irrigation or
2. Poly covered structures plus supplemental heat with overhead irrigation from sprinklers or mist or
3. Poly covered structures with irrigation.

### Hardiness Zones 7-8

Storage, such as:

1. Poly covered structures plus supplemental heat with overhead irrigation from sprinklers or mist or
2. Poly covered structures with irrigation.

### Hardiness Zones 9-10A

Storage, such as:

1. Poly covered structures with supplemental heat and irrigation or
2. Poly covered structures with irrigation or
3. Outside beds covered with thermal blankets during periods of cold weather.

### Hardiness Zones 10B-11

Overhead irrigation from sprinklers.

---

## STORAGE KEY R1

---

### Hardiness Zones 1-8

Storage, such as:

1. Glass or poly greenhouses with supplemental heat and irrigation or
2. Pot-in-Pot with adequate drainage to prevent water-logging and excess salt accumulation.

---

## STORAGE KEY R2

---

### Hardiness Zones 1-8

Storage structures, such as glass or poly greenhouses with supplemental heat and irrigation.

---

## STORAGE KEY S1

---

### Alaska Hardiness Zones 2-3

Containers standing or laid on their side; containers mulched with 6-10 inches of straw, hay, leaves, evergreen boughs, or wood chips from the top of the container, mulch material covered with netting or floating row cover to hold mulch in place, if necessary, or

Containers/B&B set in trench and backfilled with soil, straw, hay or leaves.

NOTE: Rodent proofing required.

### Hardiness Zones 1-6

Mandatory cold protection level 1 (Winter Long Protection)

Storage, such as:

1. Co-poly (white preferred) covered walk-in Quonset House and poly liners or
2. Thermal blankets covered with poly or
3. Supplemental heat.

### Hardiness Zones 7-8

Mandatory cold protection level 2 (Winter Long Protection)

Storage, such as:

1. Co-poly (white preferred) covered walk-in Quonset House or
2. Co-poly (white preferred) covered Hoop House or
3. Structureless storage, such as: Outside beds covered with thermal blankets laminated or overlaid with white co-poly (white required).

---

## STORAGE KEY S2

---

Mandatory cold protection level 1 (Winter Long Protection)

Storage, such as:

1. Co-poly (white preferred) covered walk-in Quonset House and poly liners or
2. Thermal blankets covered with poly or
3. Supplemental heat.

---

### **STORAGE KEY S3**

---

Mandatory cold protection level 2 (Winter Long Protection)

Storage, such as:

1. Co-poly (white preferred) covered walk-in Quonset House or
2. Co-poly (white preferred) covered Hoop House or
3. Structureless storage, such as: Outside beds covered with thermal blankets laminated or overlaid with white co-poly (white required).

---

### **STORAGE KEY S4**

---

Hardiness Zones 1-6

Mandatory cold protection level 1 (Winter Long Protection)

Storage structures, such as controlled environment greenhouses.

Hardiness Zones 7-8

Mandatory cold protection level 2 (Winter Long Protection)

Storage, such as:

1. Co-poly (white preferred) covered walk-in Quonset House or
2. Co-poly (white preferred) covered Hoop House or
3. Structureless storage, such as: Outside beds covered with thermal blankets laminated or overlaid with white co-poly (white required).

---

### **STORAGE KEY S5**

---

Mandatory cold protection level 1 (Winter Long Protection)

Storage structures, such as controlled environment greenhouses.

---

**STORAGE KEY NR**

---

No cold protection required.

---

**STORAGE KEY XX**

---

The “XX” code does not communicate any information regarding storage requirements. Rather, it is used in situations where it is necessary to communicate that field grown material is insurable and container material is not insurable.

---

## INSURANCE PRICE CALCULATION WORKSHEET

---

SAMPLE FOR REPRODUCTION

**Plant Name:** \_\_\_\_\_

**Crop Type:** \_\_\_\_\_  
(from Eligible Plant List)

**Size:** \_\_\_\_\_

**Measurement Method:** Container\_\_\_\_ Caliper\_\_\_\_ High/Wide\_\_\_\_\_

**Factor:** \_\_\_\_\_  
(from Eligible Plant List)

**Base Price:** \_\_\_\_\_  
(from Base Price Table for Crop Type)

**Calculation of Max. Price:**  
$$\frac{\text{_____}}{\text{Base Price}} \times \frac{\text{_____}}{\text{Factor}} = \frac{\text{_____}}{\text{Max. Price}}$$

**Insurance Price:** Lesser of Max. Price or Grower Lowest Wholesale Price

\_\_\_\_\_                      \_\_\_\_\_  
Max. Price                      Grower Lowest Wholesale Price

---

## CONTAINER VOLUME CALCULATION WORKSHEET

---

Round container volume calculation:

Calculate radius  $R_1$  and  $R_2$  in inches using diameter  $D_1$  and  $D_2$  in inches:

$$R_1 \text{ (inches)} = D_1 \div 2$$

$$R_2 \text{ (inches)} = D_2 \div 2$$

Calculate volume in gallons using  $R_1$ ,  $R_2$  and  $H$  in inches:

$$\text{Volume (gallons)} = \frac{3.1416 (H \div 3) [(R_1 \times R_1) + (R_1 \times R_2) + (R_2 \times R_2)]}{231}$$

Note: Measurements for  $D_1$ ,  $D_2$  and  $H$  should be taken inside the container.

Square/rectangular container volume calculation:

Calculate top (Y) and bottom (Z) area in square inches using T<sub>1</sub>, T<sub>2</sub>, B<sub>1</sub>, and B<sub>2</sub> in inches:

$$Y \text{ (square inches)} = T_1 \times T_2$$

$$Z \text{ (square inches)} = B_1 \times B_2$$

Calculate volume in gallons using Y and Z in square inches and H in inches:

$$\text{Volume (gallons)} = \frac{(H \div 3) (Y + Z + \sqrt{Y \times Z})}{231}$$

Note: Measurements for T<sub>1</sub>, T<sub>2</sub>, B<sub>1</sub>, B<sub>2</sub> and H should be taken inside the container.

**FCIC CONTAINER DEFINITIONS**

| FCIC SIZE NAME | GALLON MEASUREMENT |         | CUBIC INCH EQUIVALENT |         | INCLUDES STANDARD ANSI CLASS |
|----------------|--------------------|---------|-----------------------|---------|------------------------------|
|                | MINIMUM            | MAXIMUM | MINIMUM               | MAXIMUM |                              |
| POT            | 0.08               | 0.19    | 18                    | 45      | SP3                          |
