

Small Business Profile: NORTH DAKOTA

Small businesses are the heart of North Dakota's economy. Research by the Office of Advocacy shows that small businesses create most of the nation's net new jobs, and they bring dynamic ideas, innovative services, and new products to the marketplace. They account for almost all of the nation's employer firms and generate half of non-farm private output. New business creation is key to a state's ability to increase its gross state product, state personal income, and total state employment.¹ This small business profile uses the most recent data available to demonstrate the valuable contributions that small businesses make to North Dakota's economic health.

Number of Businesses. North Dakota had an estimated total of 63,100 small businesses.² Employer firms totaled 20,000 in 2006, up 1.9 percent from the previous year. Of this total, an estimated 96.6 percent, or 19,300 were small. Self-employment (incorporated and unincorporated) totaled 51,500 in 2006, a decrease from 56,200 in 2005. Non-employer firms totaled 44,100 in 2005, an increase of 3.1 percent since 2004. (Sources: U.S. Dept. of Labor, Employment and Training Administration; U.S. Dept. of Commerce, Census Bureau; U.S. Dept. of Labor, Bureau of Labor Statistics.)

Women-owned Firms. In 2002, businesses owned by women numbered 13,200, represented 23.2 percent of the state's 56,800 businesses, and generated \$1.3 billion in revenues. Employer firms owned by women totaled 2,000, a decrease of 7.2 percent since 1997. Women numbered 15,800 or 30.6 percent of the state's self-employed persons in 2006, a decrease of 6.3 percent from the previous year. (Sources: U.S. Dept. of Labor, Bureau of Labor Statistics; U.S. Dept. of Commerce, Census Bureau.)

Minority-owned Firms.³ In 2002, Asian-owned firms totaled 300, and 200 of them were employer firms; Black-owned firms numbered 100, and employer firm data are unavailable; Hispanic-owned firms totaled 200, and 40 were employer firms. American Indian and Alaska Native-owned firms numbered 900, and 100 of them were employer firms; while

¹ Small businesses are defined as having fewer than 500 employees. Their economic contribution is documented in research published by the Office of Advocacy: www.sba.gov/advo/research.

² This estimate is based on the percent that small businesses are of the state's total businesses (see Table 1, 2004 firm size data). This percentage is multiplied by the total number of employer businesses in 2006 (Dept. of Labor). The 2005 number of non-employer firms is added to this total (Census Bureau).

³ The groups should not be added together or double counting will result, since owners may belong to more than one minority group.

Native Hawaiian and other Pacific Islander-owned businesses numbered 2, and data on employer firms are unavailable. (Source: U.S. Dept. of Commerce, Census Bureau.)

Business Turnover. An estimated 1,821 new employer firms were created in 2006, which is 3.8 percent less than the number created in 2005. Business bankruptcies totaled 32 in 2006, down from 95 the previous year, while business terminations decreased from 2,500 in 2005 to 2,200 in 2006. (Sources: U.S. Dept. of Labor, Employment and Training Administration; Administrative Office of the U.S. Courts; U.S. Dept. of Commerce, Census Bureau.)

Employment. Small firms employed 63.1 percent of the state's non-farm private labor force in 2004, which was above the national average of 50.9 percent.⁴ These 17,000 firms accounted for 96.6 percent of the state's employer businesses, and they employed 167,700 people (Table 1). Small businesses added a total of 5,000 net new jobs between 2003 and 2004 (Table 2). (Source: U.S. Dept. of Commerce, Census Bureau, Statistics of U.S. Businesses.)

Small Business Income. Non-farm proprietors' income, which is a share of small business income, increased by 6.2 percent, from \$1.6 billion in 2005 to \$1.7 billion in 2006.⁵ (Source: U.S. Dept. of Commerce.)

Finance. Commercial banks and savings institutions continued to be important sources of small business financing. The number of lending institution branches in the state increased in 2006 (Table 3). For a list of financial institutions in the state that make the most loans to small businesses, visit www.sba.gov/advo/research/lending.html.
