Subject: Privatization is important

Dear Mr. President,

It is vitally important to the continuing principles of our free nation to support the idea that all activities are "presumed to be commercial".

There are several reasons why I support privatization, and here are a few:

- There is no fundamental reason that most activities of the US government should be carried out by federal workers protected from the conditions of supply and demand. Work is work.
- Anti-trust laws restrict private sector monopolies based on the idea that competition is good, so it is hypocritical to have federal agencies do work while protected from competition.
- Federal agencies are not generally subject to the oversight given to private institutions by the media and private and government watchdogs, and as such are more liable to commit abuses without repercussion.

Sincerely,  
Pranav Badhwar
