Services, n.e.c.	89	—	.7	—	.2	—	.2	—	.5

¹ Totals include data for industries not shown separately.

² Standard Industrial Classification Manual, 1987 Edition.

³ Total lost workday cases involve days away from work, days of restricted work activity, or both.

⁴ Days-away-from-work cases include those which result in days away from work with or without restricted work activity.

⁵ Excludes farms with fewer than 11 employees.

⁶ A statistical significance test indicates that the difference between the 1999 count and the 1998 count is statistically significant at the 95 percent confidence level.

⁷ Data conforming to OSHA definitions for mining operators in coal, metal, and nonmetal mining and for employers in railroad transportation are provided

to BLS by the Mine Safety and Health Administration, U.S. Department of Labor, and the Federal Railroad Administration, U.S. Department of Transportation. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries.

NOTE: BLS does not calculate relative standard errors for SICs 10, 12, 14, and 40, therefore, differences in these estimates were not tested for statistical significance. Because of rounding, components may not add to totals. Dash indicates data not available. The n.e.c. abbreviation means that the category includes those components not elsewhere classified.
