Estimating the Potential Effect on Competing R01 Modular Grant Applications with a Fixed Budget and a DC Cap Raised to \$275K/Year

* The Median Ratio of "Awarded Direct Costs" to "Requested Direct Costs", historically, is about 90%. That is, half of the awards get less than 90% of what was requested while half get more than 90% of what was requested. The median was chosen to simplify calculations and to be most representative.
