Canned Sardines Market Report - April 2007

2006 a good year for Moroccan canned sardine sales to key European markets

Morocco consolidated its leading position in European canned sardine markets during 2006 as several countries including France, the UK and Germany, maintained the upward trend in imports also evident during 2005. Last year's imports in the three markets were the strongest over the 2002-2006 period with France the leading European import market at almost 17 000 tonnes. Notwithstanding the strong performance of Morocco, Portugal also significantly increased canned sardine supplies to the French and UK markets last year.

Canned Sardine Imports in Key European Markets (tonnes)

	2002	2003	2004	2005	2006	2005/06 %
France	13 000	14 100	15 000	15 900	16 800	+6
UK*	13 000	11 800	13 000	14 000	14 600	+4
Germany	10 100	10 800	11 500	12 100	13 300	+10

Globefish / national trade statistics *includes canned pilchards

Strong increase in French imports from Portugal

French canned sardine imports increased by 6% to just under 17 000 tonnes following a 9% increase from Morocco and a 24% increase from Portugal which more than balanced a 25% fall in volumes from Spain. These increases resulted in Morocco's share of French imports edging up from 76 to 78% while the Portuguese share increased from 13 to 15%.

The dominance of Morocco in French imports is underpinned by competitive pricing with unit import values for Moroccan product last year at €2.44/kg well below those for both Portugal and Spain, respectively €4.13/kg and €3.81/kg. Unit values for Moroccan supplies increased by 6% in 2006 suggesting an increase in prices and/or a shift to higher value products in the composition of exports from Morocco to France. Morocco remains the key supplier of private label canned sardine products for the French retail chains.

French Canned Sardine Imports 2002-2006 (tonnes)

	2002	2003	2004	2005	2006	2005/06 %
Morocco	8 700	9 300	11 300	12 000	13 100	+9
Portugal	2 700	2 900	2 300	2 100	2 600	+24
Spain	1 200	1 500	1 100	1 200	900	-25
Others	400	400	300	600	200	-67
Total	13 000	14 100	15 000	15 900	16 800	+6

Drop in Namibian canned pilchard sales to the UK

Morocco's share of UK canned sardines/pilchards imports also rose last year, jumping from 34% in 2005 to 55%. The increased share was based on a 70% increase in volumes to 8 000 tonnes and followed a two thirds drop in UK imports of canned pilchards from Namibia. Namibia's share of UK sardine/pilchard imports had jumped from almost 20% in 2004 to just under a third in 2005 but dropped back to 10% last year as a result of the volume decline. Portugal also benefited from the reduced sales from Namibia, increasing its share of total UK imports from 12 to 25%.

UK Canned Sardine / Pilchard Imports 2002 -2006 (tonnes)

	2002	2003	2004	2005	2006	2005/06 %
Morocco	3 700	4 700	6 200	4 700	8 000	+70
Portugal	4 900	2 600	2 200	1 700	3 600	+112
Namibia	300	900	2 500	4 500	1 500	-67
Others	4 100	3 600	2 100	3 100	1 500	-52
Total	13 000	11 800	13 000	14 000	14 600	+4

Morocco consolidates dominance in German market

In Germany, canned sardine imports followed somewhat similar trends to those of France and the UK with overall volumes increasing by 10% during 2006 thanks to a 17% rise in imports from Morocco. This latter increase confirmed Morocco's dominance of German imports lifting its share of total imports from 87 to 92%.

German Canned Sardine Imports 2002-2006 (tonnes)

	2002	2003	2004	2005	2006	2005/06 %
Morocco	9 700	9 900	10 300	10 500	12 300	+17
Portugal	-	300	300	300	300	-
Others	400	600	900	1 300	700	-46
Total	10 100	10 800	11 500	12 100	13 300	+10

Upward trend in French imports continues into 2007

Initial indications for 2007 point to a continuation of the positive import trend noted in France last year. Total French import volumes increased 20%, to 3 000 tonnes, during January-February compared with the same period in 2006. As in 2006, increased imports were based mainly on stronger sales from Morocco, up 28%, to 2 300 tonnes, this year.

Herring Market Report - February 2007

Report prepared by

Difficult trading times for herring

2006 was a slow year for the herring trade, with imports and exports falling throughout Europe. Unit values showed a couple of high peaks, but in general the trend was downwards.

The latest intelligence has it that a considerable quantity of summer herring remains in cold stores, and much of it in fillet form. While some of this will undoubtedly be turned into fishmeal, it is feared that the rest will be used as a lever to drive down the trading value of North Sea herring.

Herring Salted or in Brine	Total	3530	1840	-48%	7263	4765	-34%	2,06	2,59	26%
	Netherlands	2518	1252	-50%	5652	3550	-37%	2,24	2,84	26%
	Denmark	743	420	-43%	1.206	750	-38%	1,62	1,79	10%
Grand Total		65 427	50 482	-23%	66 702	58 202	-13%	1,02	1,15	13%

In the period January – November 2005/2006 total herring imports into Germany fell by -23% to 50482 tonnes. Imports of frozen herring saw the sharpest fall, as Germany imported just 4656 tonnes, or 43% of 2005 imports for this product. The fall in frozen herring imports accounted for 42% of the reduction in overall herring imports in 2006.

Unit values rose across all products, with a +13% increase overall. The price of frozen herring imports

improved the most at +36% to 0.79€/kg, in line with the reduction of volume imported. The highest unit value achieved was for imports of frozen herring fillets from the Netherlands, which leapt by 54% to reach 5.79€/kg in 2006.

Norway continues to supply the greatest volume of herring products into Germany, accounting for 54% of total imports in 2006. Norway grew its exports into Germany by 4% to 27163 tonnes during the reference period, with unit values increasing slightly by +1% across all products.

This is in line with a reported increase in consumption of seafood in Germany, particularly of herring, which now accounts for 18.2% of the all seafood consumed in the country. Per capita seafood consumption was 14.8kg in 2005, up from 13.8kg the previous year and expected to top 15kg when the 2006 total is released.

The category of "other frozen herring products" (excluding whole and fillets) was the only category to register an increase in import volume during the period, with total imports rising +2% to 21574 tonnes. This consolidated its position as the most imported herring product category, rising +11% to 43% of all 2006 herring imports.

Imports of fresh or chilled flaps of herring decreased by -31% to 13764 tonnes in 2006, accounting for 40% of the overall reduction in herring product imports. The reduction in volume contributed to a +14% rise in unit value to 0.99 €/kg in 2006, and was largely influenced by an 0.11€/kg (+12%) increase in Norwegian imports of this product.

Despite a -14% reduction in imports of frozen herring fillets to 8648 tonnes, the product jumped one position to the 3rd most imported product, accounting for 17% of imports in 2006.

Salted herring or herring in brine was the least imported product for both years. At 1840 tonnes it accounted for just 4% of 2006 imports. However, German consumers have increased their appetite for roll-mops and Matjes herrings, with volume sales increasing by 4% to 33 400 tonnes over the first six months of 2006 with a value of € 141 million.

During the period January- November 2005/2006 the overall value of UK herring exports fell by -21% to €26,221,000. Overall unit values increased by +1% to 0.59€/kg but the volume of total herring exports suffered a -22% reduction to 44696 tonnes.

Germany and the Netherlands are the main recipients of UK herring exports although collectively their influence was slightly reduced as they accounted for 58% of the value and 63% of the volume in 2006, -6% and -5% respectively. The third largest recipient Russia, grew over the period to receive 17% of all volume and 18% of all value in 2006.

Frozen herring accounted for 79% of herring exports in 2006, but exports of this product slumped -24% over the period to 35213 tonnes. Significantly this reduction in volume accounted for 45% of the total reduction in herring exports across all products.

Unit values of frozen herring fell -4% to 0.50€/kg, negatively impacting on the total value of this export which dropped -27% to €17,552,000 in 2006.

In total Germany received 15337 tonnes of frozen herring product, -62% less than the Netherlands. However the higher unit value of product exported to Germany made it the most valuable frozen herring market during the period at €6,275,000.

In 2006, the Netherlands accounted for 40% of total UK herring exports but only 23% of total value, while the German market received just 23% of total exports but accounted for 35% of total value.

Frozen herring fillets remained the second most exported product, accounting for 16% of the market across the reference period. The unit value increased +10% to 0.97€/Kg although export volume dropped -17% to 7571 tonnes resulting in a -9% reduction in the value of these exports to €7,315,000.

In the market for chilled herring flaps, reductions in exports to Russia and the Netherlands were countered by +178% growth in cheaper exports to Germany and Latvia and overall unit values dropped -

24% to 0.70€/Kg.

Exports of other frozen herring products (mainly flaps) grew a staggering +324% to 1052 tonnes. This was due to Russia which materialised as a new market, receiving 98% of the UK product in 2006. Despite the loss of all exports to Denmark (worth €56,000 in 2005), the value of this export market soared +437% to €753,000.

Russia's turning to the UK for supplies was influenced by the country's new import procedural rules, which brought all exports of seafood from Norway – its largest supplier - to a halt. The problem was triggered by the discovery of forged veterinary certificates on Norwegian seafood products and resulted in the introduction of more secure export certificate documentation. It also meant that all processing and handling facilities in Norway were required to undergo inspection before being allowed to export to Russia. This led to chaos in the marketplace, which is still in the process of being resolved.

The Norwegian Seafood Export Council has countered with plans to undertake marketing campaigns for herring in China, but building a new market to equal the size of that in Russia will take some considerable time.

Norwegian Exports of Herring January - December 2005 - 2006							
	Country	MT			NOK/kg		
		2005	2006	%	2005	2006	%

Norwegian exports of herring products fell by -8% to 37175 tonnes in the period January – December 2005/2006 and with the average unit price across all products falling from 6.87NOK/kg to 5.96NOK/kg, it was a tough year for this export market.

Despite a reduction in the export volume of frozen whole herring in 2006, it remains the leading export product, accounting for 75% of total exports. The highest unit value was achieved on exports to the Netherlands which at 8.86 NOK/kg in 2006 was +63% higher than the next highest unit value for that

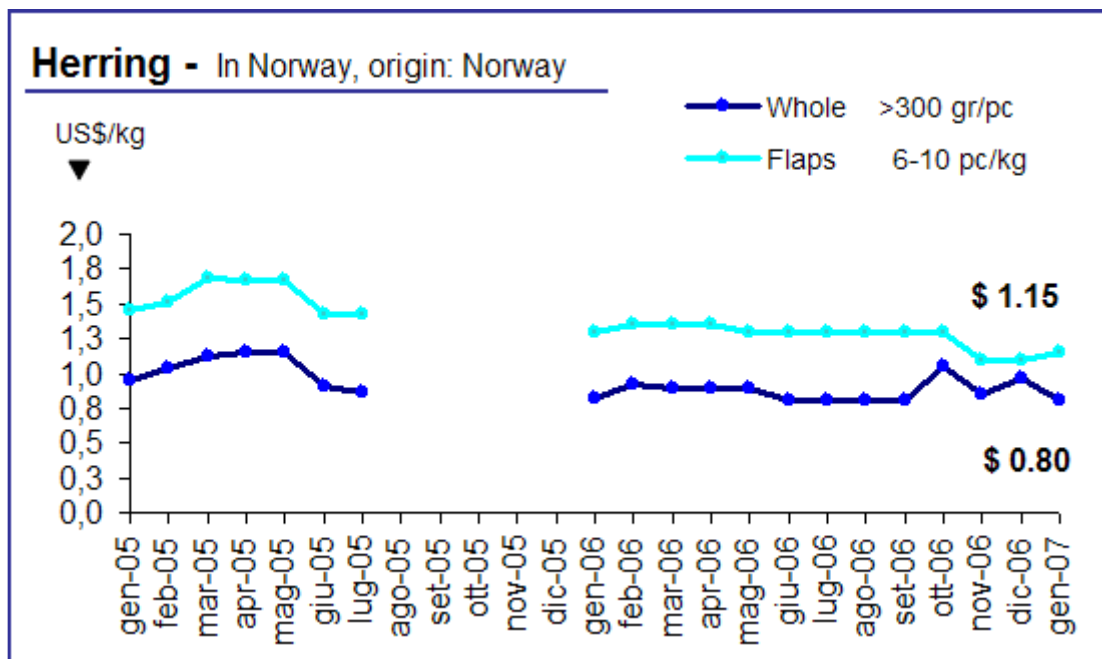

product.

Despite problems in the autumn, Russia remained the largest recipient of Norwegian herring exports, receiving 185693 tonnes in 2006, which was a reduction of -16% on 2005 levels. The Ukraine continued to be the second largest recipient in 2006 despite a -19% reduction and reports that many suppliers had ceased trading with the country due to difficult market conditions.

Exports of fresh or chilled herring flaps dropped -15% and exports to individual countries were relatively small, with Poland, the largest recipient at 358 tonnes in 2006. However, this product accounted for some strong unit values, with exports to Denmark achieving the highest of all products in 2005 and 2006, at 12.29NOK/kg.

Frozen herring fillet exports grew by +7% and accounted for 25% of total herring exports in 2006. This growth in volume hit unit value, with reductions between -10% and -18% resulting in a 2006 unit price of 8.04 NOK/kg.

Salted herring and herring in brine remained at less than 1% of total exports despite good growth, but was accompanied by a -14% reduction in unit value to 8.96NOK in 2006.

Average reported* Norwegian export prices over the past two years for frozen whole herring fell by 0.15 US\$/kg, while those for flaps fell by 0.3 US\$/kg. During 2006, higher unit values were reported during October and December for whole product, while flaps showed a decline from October onwards.

Mackerel Market Report - February 2007

Report prepared by 

A year of mixed fortunes

The market at the tail end of 2005 and into 2006 was a mixed one, which saw a year of high prices for raw material and uncertainties in the market, especially in Japan. However, the year ended with prices for finished product becoming more attractive at consumer level, especially in Eastern Europe.

UK Exports

The UK and Ireland experienced difficult times in 2005/2006 with investigations into blackfish landings and consequent quota penalties to the fleet. Scottish pelagic fishermen now have to repay more than 50,000 tonnes of herring and mackerel quota over the next 6 years, which represents all the herring and 75% of the mackerel caught over quota between 2001 and 2005. At current value, this repayment amounts to more than £32 million.

Total exports of frozen mackerel from the UK in the period January – November 2005-2006 fell by 34% from 88,000 tonnes to 58,000 tonnes. However, the value of those exports fell by only 17% as the average unit price rose by 25% from 1.25€/kg to 1.54€/kg.

This situation was particularly affected by a redirection of exports away from the low unit value markets of Nigeria, Poland, China and Latvia, into Russia, where unit values rose from 1.70€/kg to 1.84€/kg. This led to Russia taking nearly 50% of total exports.

The Netherlands, the second largest importer of UK frozen mackerel, showed little change in volume or unit value at around 11,600 tonnes and 0.86€/kg.

Unit values in France and Denmark rose strongly by 60% but exports also fell by around 60%, possibly as a result of some price resistance.

Fillets remained a small part of the total export at around 1%. The Czech Republic was the largest importer of fillets in 2005 but dropped the UK as a supplier in 2006. Italy and Poland decreased imports by 29% and 16% respectively, while unit values to these countries increased by around 34%.

Interestingly, market intelligence from Eastern Europe is that sales of chilled fresh fish, especially mackerel and herring, are up by 75% in the last 12 months in the Czech Republic, while frozen sales have declined.

Only the US showed an increase in volume, with a rise of 35% from 54 – 73 tonnes. This was accompanied by a 10% drop in unit value from 3.50€/kg to 3.14€/kg.

Norwegian Exports

Overall exports of frozen mackerel from Norway fell by 15% from 166,000 tonnes to 141,000 tonnes between January and December 2005-2006. This was accompanied by an easing of the unit value by 17%, resulting in a drop in total value of 29%.

Notable changes within the market were a 38% reduction in sales to China from 41,000 tonnes to 25,000 tonnes and a fall in unit value of 21% from 12.42 NOK/kg to 10.57 NOK/kg. More significantly, sales to Japan fell by 43% from 79,000 tonnes to 45,000 tonnes. This was also accompanied by a significant drop of 18% in unit value from 14.98 NOK/kg to 12.23 NOK/kg. These decreases in export were only partly compensated for by a rise in exports to Russia and the Ukraine of 108% and 39% respectively.

Unit values also declined by 15% in Russia, falling from 13.95 NOK/kg to 11.82 NOK/kg and by 26% in Ukraine, from 14.29 NOK/kg to 10.56 NOK/kg. Fillet sales rose by 26% from 911 to 1,150 tonnes, although this sector remained at less than 1% of total exports.

Fillet sales rose overall but there was a decline in sales to the 3 top countries Japan, Sweden and Poland, indicating a greater sales spread.

Unit values for fillets slipped slightly overall by 4%, although there were increases of 26% and 67% to Sweden and Poland, albeit on small volumes.

Norwegian export prices to Japan hit a new low in the autumn of 2006 with minimum prices of NOK 5.5/kg for 500-524 grams (down from NOK 10/kg in late spring), NOK 5/kg for 450-474 grams (down from NOK 8.5/kg) and NOK 4.25 for 400-425 grams (down from NOK 7.5/kg). The Japanese market began late in the season, with buyers waiting for fish with higher fat content.

Meanwhile, new Russian import regulations led to a tightening of the market in 2006 for Norway, with consignments of fish either turned into fishmeal or cancelled. These problems were coupled with rumours flying around the market that the early season catch was of low quality/fat content, making it unsuitable for smoking, leading to further stops on imports.

In October three of Norway's largest pelagic producers announced a merger to create the world's largest herring and mackerel supplier. Domstein Pelagic, Global Fish and Westcoast have signed a letter of intent to merge and will operate separately until summer 2007.

Italian Imports

Total Italian imports of mackerel rose by 41% in volume in the period January –October 2005-2006, from 8,636 tonnes to 12,190 tonnes. Of particular note was a 50% rise in fresh imports, with supply switching from France (-19%) to Spain (+89%). This move reflected a difference in unit value between supplies from the two countries, with French values +5% and Spanish values down -10%.

Frozen imports rose by 24% from 2,762 tonnes in 2005 to 3,427 in 2006, with Spain again increasing its supply significantly (+71%). Supplies from the Netherlands and France decreased by -27% and -39%

respectively. It is interesting to note that the unit value of frozen mackerel imported from France rose by 54%, Spain by 33% and the Netherlands by just 16%. There was a 22% increase in overall unit value in this category.

Imports of fillets showed an 18% rise in overall volume, with supplies increasing from the Netherlands (+17%) but decreasing from Spain (-52%), where the unit value rose by 58%. However, trade in fillets with Spain has not historically been a significant business.

The overall value of mackerel imports rose by 35% from €12 million in 2005 to 16 million in 2006, with overall unit value decreasing by 5% from 1.38 €/kg to 1.32 €/kg.

French Imports

In 2006, France imported a total of 23,221 tonnes of mackerel, an increase of just 5% on the 2005 total of 22,204 tonnes.

Fresh mackerel made up around one third of total imports, but volumes fell by 11% from 8,819 tonnes to 7,815 tonnes overall. Imports decreased from the UK by -32% and from Spain -29% while unit prices of fresh mackerel from these countries increased by +69% and +34% respectively to 1.54€/kg and 0.9€/kg. Unit values of fresh product from Ireland increased by 20% to 1.25€/kg and this is accompanied by an increase of 13% in import volume.

Imports of frozen mackerel remained the largest category of total import volumes, with an 18% rise from 12,626 tonnes in 2005 to 14,946 tonnes in 2006. Within this volume total was a fall of -39% in imports from the UK, the principle supplier, where unit values increased by +68%, and a -15% fall in imports from Ireland, where unit values rose a massive 107% from 0.78€/kg to 1.62€/kg.

These decreases were more than made up for by a dramatic increase of 1,557% in imports from the USA, where volumes rose from 255 in 2005 to 4,251 in 2006, together with an increase of 123% in imports from Spain.

Imports of fillets remained at around 2-3% of the total import volume with a 39% fall in tonnage from 759 to 460 tonnes and a 3% unit value rise from 2.51€/kg to 2.59€/kg.

German Imports

Total imports of mackerel into Germany in the period January – November 2005-2006 rose just 4% by volume, from 15,587 tonnes to 16,208 tonnes, and 6% in unit value, from 1.54€/kg to 1.63€/kg. This resulted in an overall rise in value of 10%, with imports worth €26.5 million.

Within this relatively stable picture there was a strong change in emphasis, with a notable growth in the volume of fresh supplies of 48% and a sharp fall of 44% in frozen imports. There was an 18% rise in imports of fillets, with this sector accounting for around 10% of total imports.

The supplier situation also changed significantly, with Ireland increasing fresh sales from 913 tonnes to 2,710 tonnes – a rise of 197%, and frozen sales from 319 tonnes to 680 tonnes, a rise of 113%.

UK remained the largest supplier but there was a drop in its frozen supply of 68%, which was only partly compensated for by an increase in fresh sales of 21%. An increase of 66% in supply of fresh mackerel from Sweden made it the third most important supplier to Germany.

Unit values for fresh mackerel fell slightly by -6% from 1.67€/kg to 1.58€/kg but rose strongly for frozen fish by 17% from 1.23€/kg to 1.43€/kg and remained unchanged overall for fillets at 3.20€/kg. Irish fish achieved the highest unit values in all categories.

SMALL PELAGICS

Market resistance to high mackerel and herring prices during 2006

The upward trend which saw mackerel and herring prices reach record levels in 2005, ended during 2006 amid signs of resistance in key markets and an easing of the supply situation. In European sardine markets, the positive trend in canned imports continued with Morocco consolidating the gains of recent years. Initial indications for 2007 point to continued uncertainty in herring and mackerel markets.

Strong Japanese mackerel landings during 2006

Following steady increases over the 2004-2005 period, prices for frozen round Atlantic mackerel (*Scomber scombrus*) declined during 2006. Price levels still remain relatively high, however, in a longer term context. Indications in the European Price Report (EPR) show fob prices for 400-600gr Norwegian mackerel at NOK7.50/kg at the beginning of 2004, rising to NOK12.50/kg a year later and to NOK15.50/kg in January 2006. By the end of 2006, the same grade was reported at NOK11-12/kg and a further weakening to NOK10.50/kg was indicated during the early months of this year.

This price decline followed weaker interest in the key Japanese market where strong domestic mackerel landings reduced import demand increasing buyer resistance to the still relatively high prices for European mackerel.

According to trade reports (Seafood.com/BANR), mackerel stock levels increased significantly in Japan during the latter half of 2006 as a result of the above average local catch levels. Official figures were reporting inventory

levels above 100 000 tonnes for the first time since 1998. The BANR report notes a tripling of Japanese mackerel exports for 2006 as a result of the increased landings.

Norwegian round mackerel exports during 2006 reflect the changed market conditions with frozen sales to Japan down almost 43% on 2005 to 45 000 tonnes and values down 53% to NOK550 million. Despite these declines, Japan remains the main market for Norwegian mackerel while China, with its processing activities for re-export, stays in second position notwithstanding a 38% volume drop. In contrast, lower Japanese demand and weaker prices boosted Russian imports during 2006 and Norwegian mackerel exports to the Russian Federation more than doubled to 20 000 tonnes.

Similarly, Norwegian sales to EU markets also increased last year, up from less than 8 000 tonnes in 2005 to over 14 000 tonnes. Overall, Norwegian round mackerel exports fell 15% in volume terms, to 140 000 tonnes, and 30% in value terms, to NOK1.6 billion, compared with 2005.

Source: Norwegian Seafood Export Council

The decline in Norwegian exports contrasts with significantly higher mackerel sales from the USA during 2006. Volumes jumped almost 50% on the 2005 level to 45 000 tonnes while the value of exports increased by over 60% to \$46 million. The increases were based on higher exports to both France and Portugal, possibly for re-exports to African or East European markets. There was also a sharp rise in US sales to Egypt.

Decline in Norwegian herring exports to the Russian Federation

European herring markets were characterized by some uncertainty and price instability during 2006. Following above average levels during the 2004-2005 season, frozen herring prices weakened during the second half of 2005 and this trend continued, depending on size grade, into 2006. Stronger supplies, notably in Norway, was a factor under-

lying the price weakness in 2005 and this effect carried into 2006 in the form of high stock levels in several East European markets, notwithstanding a fall in herring landings by both Norwegian and Danish boats. The decline in prices during 2006 appeared to affect the medium more so than the larger grades. Indications in the European Price Report show delivered prices St Petersburg for 300gr+ herring at \$0.82/kg in January 2006 falling to \$0.75/kg in December.

Frozen round herring sales from Norway to both the Russian Federation and the Ukraine, the main East European markets, fell in volume terms last year by 23 and 19% respectively. Despite the decline, the Russian Federation continued to account for a significant share of total Norwegian round herring exports at 47% (53% in 2005). The Ukraine's share also remained high at 27% compared to 30% in 2005. Overall Norwegian round herring exports fell 12% to 323 000 tonnes while the value of exports dropped 25% to NOK1.7 billion.

Positive trend in European canned sardine imports continues

2006 imports of canned sardines in key European markets continued the upward trend noted in 2005 with higher volumes in France, the UK and Germany. Boosted by increased supplies from Morocco, all three markets reported their strongest import levels last year for the 2001-2006 period.

French canned sardine imports increased by 6% to just under 17 000 tonnes following a 9% increase from Morocco and a 22% increase from Portugal which more than balanced a 19% fall in volumes from Spain. Morocco's share of French imports also increased, edging up from 76% in 2005 to 78%.

The dominance of French imports by Morocco is underpinned by competitive pricing with unit import values for Moroccan product last year at €2.44/kg well below those for both Portugal and Spain, respectively €4.13/kg and €3.81/kg. Unit values for Moroccan supplies increased by 6% in 2006 suggesting an increase in prices and/or a shift to higher value products in the composition of exports from Morocco to France.

Morocco's share of UK canned sardine/pilchard imports also rose last year, jumping from 44% in 2005 to 55%. The increased share was based on a 31% increase in volumes to 8 000 tonnes and followed a two thirds drop in UK imports of canned pilchards from Namibia. Namibia's share of UK sardine/pilchard imports had jumped from 20% in 2004 to a third in 2005 but dropped back to 10% last year as a result of the volume decline. Portugal also benefited from the reduced sales from Namibia, increasing its share of total UK imports from 12 to 25%.

In Germany, canned sardine imports followed somewhat similar trends to those of France and the UK with overall volumes increasing by 10% thanks to a 17% rise in imports from Morocco. This latter increase confirmed Morocco's dominance of German imports lifting its share of total imports from 91 to 92%.

Mackerel and herring prices remain weak in 2007

Initial indications for 2007 point to continued price weakness in both frozen herring and mackerel markets. With lower Japanese and Russian demand, unit values for Norwegian round mackerel exports for the January-February period are down almost 20% on the corresponding period in 2006.

Similarly, reports from Norway forecast a further weakening in prices for medium grade round herring while high stock levels of herring flaps suggest weaker prices in this category during the second quarter. Prospects for any return to the record high prices of 2004 and early 2005 now appear unlikely for 2007.
