COMMODITY update

The COMMODITY UPDATE reports, issued for each commodity once a year, contain information on prices, imports, exports and production by commodity. The information is taken from the network of GLOBEFISH correspondents and the GLOBEFISH European Price Report, INFOFISH Trade News, FAO FISHDAB, EUROSTAT and others.

The issues are scheduled approximately as follows:

FISHMEAL - FISH OIL - <i>Spring</i>	CRAB - <i>Autumn</i>
BIVALVES - <i>Spring</i>	LOBSTER - <i>Autumn</i>
SALMON - <i>Spring</i>	CEPHALOPODS - <i>Winter</i>
FRESHWATER FISH - <i>Spring</i>	GROUND FISH - <i>Winter</i>
SHRIMP - <i>Summer</i>	SMALL PELAGICS - <i>Winter</i>
TUNA - <i>Summer</i>	

<p>For single issues please contact GLOBEFISH Viale delle Terme di Caracalla 00153 Rome ITALY Tel: ++39 0657055074 Fax: ++39 0657055188 E - mail: globefish - pub@fao.org Web site: www.globefish.org</p>	<p>For an annual subscription to the complete set please contact EUROFISH UN Centre Midtermolen 3 D - 2100 Copenhagen Denmark Tel: ++45 3546 7180 Fax: ++45 3546 7181 E - mail: info@eurofish.dk Web site: www.eurofish.dk</p>

Oyster - August 2007

Boosted by weaker production in France, Europe's leading oyster market, prices were generally stronger during the 2006-2007 season compared to the previous one. Initial indications for the forthcoming oyster season point to a continuation of the firm price trend.

Despite some adverse press publicity and a slow start, the 2006-2007 oyster season in France appears, in general, to have been a positive one for the domestic industry. Demand during the peak Christmas – New Year period was buoyant and prices, boosted somewhat by weaker production, were above levels for the previous season.

The shortfall in production, estimated by the national trade organization, the CNC, at around 9 000 tonnes, was due to poor growth in parts of the west coast as well as mortalities on the Mediterranean coast. Lower production last year was not, however, reflected in reduced export volumes. French oyster exports for 2006 at 8 000 tonnes, were 10% up on the previous year. Perhaps more encouraging for the industry was the stronger value increase, +17% to €29 million, suggesting higher average prices in export markets. Export unit values increased by 6.5% to €3.62/kg.

French Oyster Exports 2005 - 2006

	2005 tonnes	2006 tonnes	%	2005 €'000	2006 €'000	%
Italy	4 700	5 230	+11	13 350	16 030	+20
Belgium	740	810	+9	3 130	3 500	+12
Germany	430	550	+28	1 630	2 270	+39
Spain	300	310	+3	1 480	1 460	-1
Other	1 120	1 120	-	5 220	5 750	+10
Total	7 290	8 020	+10	24 810	29 010	+17

These trends have continued into 2007 with somewhat higher volumes for the first four months of the year but values, and by implication unit values, up at a higher rate. Compared to the January-April period 2006, volumes are up 4% this year to 2 200 tonnes while the value of exports is up over 30% to €10 million. Average unit values for overall exports are up 27% to €4.49/kg.

Italy remains by far, France's leading export market, although its share of French volume exports is down this year to 55% compared to almost two thirds for the twelve months of both 2005 and 2006. For the January-April period 2007, French trade statistics are showing a decline in exports to Italy of 7%, to over 1 200 tonnes, compared with the same period in 2006. Export values, on the other hand, are up 15% to €4.6 million. Other key markets are

also showing increases this year in value terms although volumes are down for several of these markets.

French Oyster Exports January - April

	2006 tonnes	2007 tonnes	%	2006 €'000	2007 €'000	%
Italy	1 340	1 240	-7	3 970	4 570	+15
Spain	140	280	+100	710	920	+30
Belgium	190	170	-11	730	890	+22
Germany	190	160	-16	770	870	+13
Other	300	390	+30	1 470	2 780	+89
Total	2 160	2 240	+4	7 650	10 030	+31

Stronger Italian imports but German imports lower

It is worth noting that Italian trade statistics are showing a 14% increase in French volume sales to Italy for the January-April period in contrast to the decline indicated by French figures. Both sources agree, however, on the increase in values, and unit values, this year for French sales to Italy. Overall, Italian oyster imports are up 35%, to almost 2 000 tonnes, compared to the January-April period in 2006. French oysters account for almost three quarters of this amount.

The German oyster market is significantly smaller than that of France, and even of Italy. Oyster import trends in Germany during the early months of the year are down on the corresponding period for 2006 although this may be an unreliable indicator for the year as a whole given the strong seasonality in German consumption during the latter half of the year. Overall, German imports are down 27%, to less than 300 tonnes, for the January-May period compared to the first five months of last year. As in the Italian market, France accounts for the bulk of imports, around two thirds of the total volume.

Strong price trend to continue into new season

With the 2007-2008 season due to get underway shortly in France, early indications point to a continuation of the relatively strong price trend of last season. Weaker production is again a possibility particularly if reports of oyster mortalities in several regions are confirmed. Higher prices may also be supported by better quality with above average meat levels also being reported ahead of the new season. French producers will be hoping for a cool autumn, normally a positive condition for good sales at the beginning of the season.

Mussels - August 2007

Mussel mnr July 07

Mixed trends for European mussel imports

European import trends for processed mussels are mixed this year with volumes higher in both France and Spain but lower in Italy compared with 2006. Price trends appear broadly negative as suggested by lower import unit values for the three markets. Although imports from Chile in both Spain and Italy are lower, the country remains the top supplier to all three markets.

Imports of Frozen and Prepared Mussels January-April

	2006 tonnes	2007 tonnes	%	2006 €'000	2007 €'000	%
France	4 810	5 440	+13	12 600	14 170	+12
Spain	3 760	3 870	+3	11 130	10 110	-9
Italy	4 290	3 160	-26	11 490	7 840	-32

source: Globefish/national trade statistics

Jump in sales of Chilean mussels to France

French imports of processed mussels during 2006 were slightly down (-2%) on 2005 following several years of successive increases. The positive trend is back this year with volumes up 13% for the first four months due to a sharp jump in sales from Chile at +67%. Chile now accounts for almost half of total French imports compared to just under a third for the January-April period in 2006.

Chile continues to displace more traditional suppliers such as Denmark and the Netherlands. French imports from Denmark are down almost a third to just under 500 tonnes, while Dutch supplies are down 19% to roughly the same level. After a strong increase last year, imports from Spain are also down, -40% to 210 tonnes. The combined share of these three suppliers has fallen from just over a third to less than a quarter. Imports from Ireland, the second supplier after Chile, are largely stable at 1 100 tonnes.

French Imports of Frozen and Prepared Mussel Products January-April

	2006 tonnes	2007 tonnes	%	2006 €'000	2007 €'000	%
Chile	1 560	2 600	+67	3 160	5 320	+68
Ireland	1 120	1 150	+3	2 720	2 800	+3
Denmark	740	500	-32	2 150	1 480	-31
Netherlands	570	460	-19	1 860	1 940	+4
Spain	350	210	-40	1 090	970	-11
Other	470	520	+11	1 620	1 660	+2
Total	4 810	5 440	+13	12 600	14 170	+12

Although average unit values for French imports are down slightly on 2006 levels, -1% to €2.61/kg, unit values for both the Netherlands and Spain are up significantly. These increases may help explain the loss in import share for both countries as well as the strong increase in imports from Chile which enjoyed largely stable unit values at around €2.04/kg.

Modest increase in Spanish imports

Spanish involvement in Chile's farmed mussel industry in recent years has opened up an additional source of supply for the Galician processing industry. Although Spanish imports from Chile declined during the January-April period this year, Chile's share of imports remains high at around two thirds.

Despite the drop in sales from Chile, total Spanish processed mussel imports are up with volumes rising 3% to 3 900 tonnes. The increase is due to a strong jump in sales from New Zealand, up from 700 tonnes during January-April 2006 to 1 200 tonnes this year. In value terms, Spanish imports are down, -9%, implying a decline in average import prices. Unit values for Chilean supplies are down 17% to €2.37/kg.

Spanish Imports of Frozen and Prepared Mussels January-April

	2006 tonnes	2007 tonnes	%	2006 €'000	2007 €'000	%
Chile	2 840	2 540	-11	8 110	6 030	-26
New Zealand	700	1 200	+71	2 130	3 510	+65
Others	220	130	-41	890	570	-36
Total	3 760	3 870	+3	11 130	10 110	-9

Drop in Italian imports from Turkey

Following record imports of processed mussels during 2006, Italy looks unlikely to repeat this result in 2007. Volumes for January-April are down a quarter on last year, to 3 200 tonnes, while values are down over 30%, to €7.8 million. The declines may be seen as a market adjustment to the strong increases of last year - this year's figures are in line with imports for the first four months of 2005.

The import decline is due to a drop in sales this year from two of the country's leading suppliers, Chile and Turkey. Volumes from Turkey more than halved to less than 600 tonnes while imports from Chile dropped 16% to 1 200 tonnes. Despite the decline, Chile remains the top supplier, its share of imports in fact increasing from 34% to 39%. The sharp fall in Turkish sales may be seen in the context of the strong increase last year when volumes for the twelve months jumped by 60%. This year's decrease brings volumes in line with the 2005 level of between 500 and 600 tonnes.

In contrast, Spain managed to maintain its sales volume to Italy at just under 700 tonnes while in value terms, imports are up 6% to €1.9 million. Spain's share of volume imports are up this year to 21% compared to 15% for 2006.

Italian Imports of Frozen and Prepared Mussels (tonnes) January-April

	2005	2006	2007	%
Chile	1 340	1 480	1 240	-16
Spain	580	660	670	+2
Turkey	540	1 310	580	-56
Others	760	840	670	-20
Total	3 220	4 290	3 160	-26

Medium term expansion in European markets

Notwithstanding what looks like a re-adjustment in Italy this year, the longer term trend in processed mussel imports in key European markets appears positive. Plans for further expansion in Chilean rope mussel production continue to be reported in the trade press which, if realized, should translate into further penetration of European mussel markets. Import unit values, a rough proxy for import prices, are largely lower this year in several markets. This trend may be expected to continue if Chilean supplies to Europe continue to grow.

** included under "others"

(*): All scallops, live or fresh, were put together with "Other Species, frozen", until 1988;
In "Other Species", scallops but also sea snails are included, and the latter may be in significant quantities, especially from Ireland.

Commodity Update

€ 20,00

Commodity Updates Programme

Small Pelagics	Tuna
Fishmeal - Fishoil	Crab
Bivalves	Lobster
Salmon	Cephalopods
Shrimp	Groundfish

Complete set of 10 Commodity Updates

Electronic version (by e-mail)	€ 100,00
Hard copy and Electronic version	€ 150,00

I would like to order _____ copy(ies) of the _____ Commodity Update for a total of € _____

I would like to order a complete set of 10 Commodity Updates

- Hard copy and electronic version
- Only electronic version

I will pay

By bank transfer (I will receive bank details by return)

By credit card: Visa MasterCard

Card no.: _____ Expiry Date: _____

Signature: _____ For €: _____

Please provide the following information:
