## **2003 DIRECTORY OF STATE LISTINGS OF CRUSHED STONE AND SAND AND GRAVEL PRODUCERS**

A significant amount of information regarding the crushed stone and sand and gravel industries in each State is available from State agencies and State trade associations. These organizations continuously monitor the State mineral industries and are therefore an important source of detailed information at the local level. The fifth edition of this directory, published for the first time in electronic form only this year, provides a listing of State government agencies and trade associations that can assist the users interested in obtaining detailed listings of crushed stone and sand and gravel producers, in addition to the information published by the U.S. Geological Survey.
