EMSL In Brief

Environmental Molecular Sciences Laboratory

Wang Appointed to Editorial Advisory Board

Lai-Sheng Wang, a long-time user of the U.S. Department of Energy's Environmental Molecular Sciences Laboratory, was appointed to the 2008 Editorial Advisory Board of *The Journal of Physical Chemistry*.

A professor at Washington State University Tri-Cities and an Affiliate Senior Chief Scientist at Pacific Northwest National Laboratory, Wang was selected for the three-year term on board based on his distinguished and innovative contributions to the field of atomic clusters and for pioneering work on gaseous multiply-charged anions. In this role, Wang will influence the current policies and future direction of this publication. Produced weekly by the American Chemical Society, the journal is actually three highly respected journals focused on different aspects of experimental and theoretical research of interest to physical chemists and chemical physicists.

Lai-Sheng Wang

Being named to the Editorial Advisory Board is just one more example of Wang's contributions to the scientific community. During his 20 years in research, Wang has written or co-written more than 260 publications. He is active in the scientific community, working with the American Chemical Society, American Physical Society, Materials Research Society, and the American Association for the Advancement of Science, where he was recently named a Fellow.
