CPF No. 3-2000-5009C

Dear Mr. McCann:

On October 18-29, 1999, a representative of the Central Region, Office of Pipeline Safety (OPS), pursuant to Chapter 601 of 49 United States Code, conducted an onsite pipeline safety inspection of Koch Pipeline Company's facilities in Pine Bend, MN.

The inspection and review revealed an area that is a cause for concern. Maps and records had not been updated to reflect the appropriate maximum operating pressures, mainline valves, and pump stations.

The above items were discussed with your representatives during the inspection. They indicated that these items would receive prompt attention.

The Office of Pipeline Safety appreciates your attention in this matter and good faith efforts to promote continued safety in your organization.

If we can answer any questions or be of any help, please contact me or my staff at (816) 329-3800. Thank you for your staff's

cooperation during this scheduled inspection.

Sincerely,

Ivan A. Huntoon
Director, Central Region
Office of Pipeline Safety
