

## Bring Bullying To An End

*Protect yourself. Protect others.*

Bullying is when one person or a group of people repeatedly hurts someone else. Bullying can be hitting, gossiping, threatening to harm, keeping others out of cliques, making fun, and ignoring others. There are also other ways people can bully. Bullying is often done on purpose and it can happen anywhere, such as at school, in the park, on a sports team, or even at home. In fact, bullying is common—5 million teens have been involved with bullying. For everyone involved, bullying can have serious effects that can last for a long time.
