

# A Survey of Firms Providing Arsenic Treatment for Private Well Owners in New Hampshire

Nancy Serrell, MALS    Oct. 4, 2007    Dartmouth Toxic Metals Research Program

# Dartmouth Toxic Metals Research Program

# Survey goals

- to compile a list of firms that provide arsenic treatment for private well owners in NH
- to identify available technologies
- to characterize the audience for an informational web site
- to insight into the consumer experience

# Survey respondents

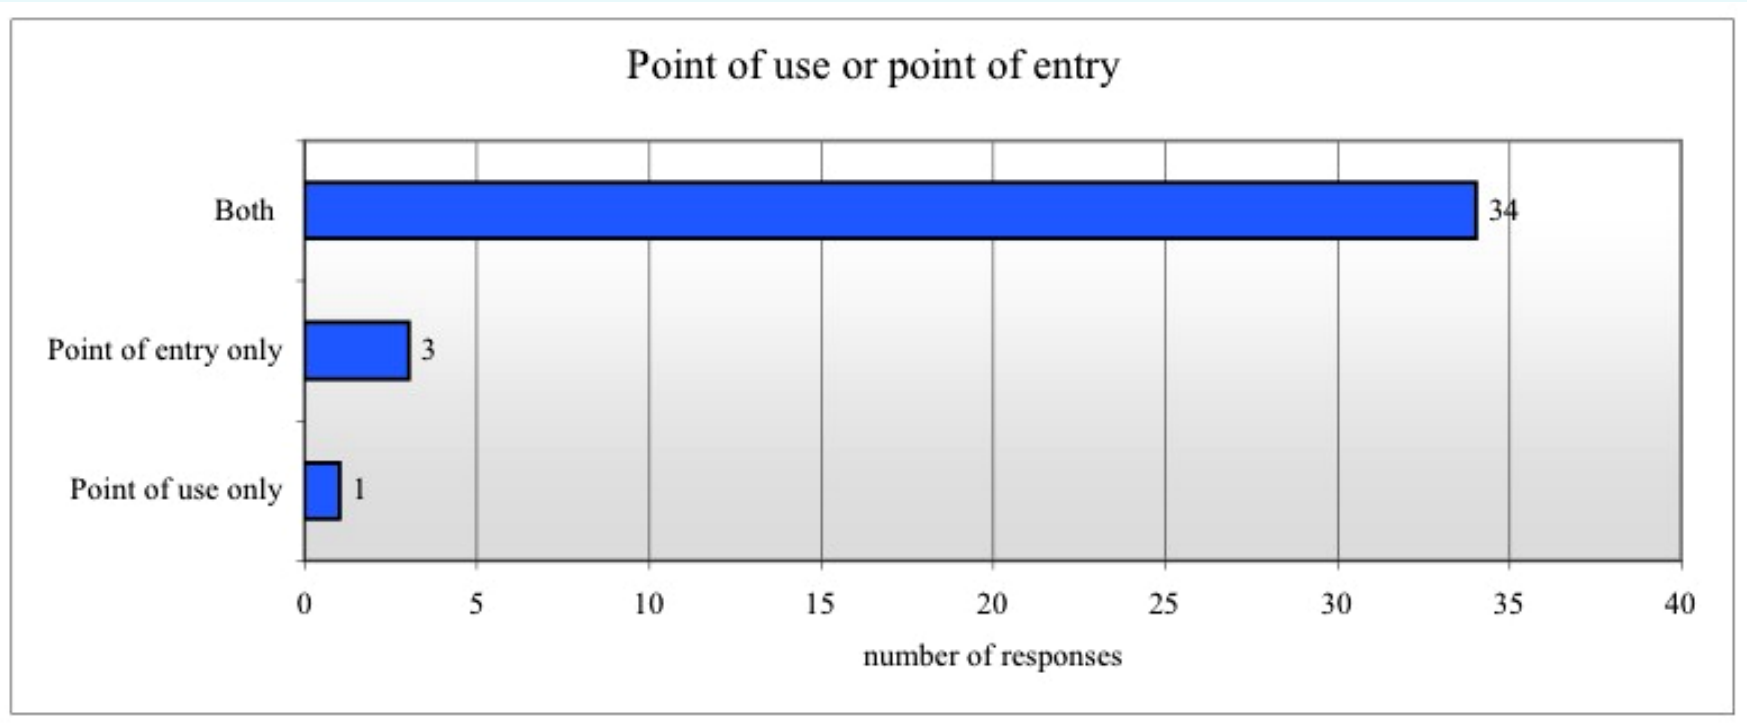

Initial list of water treatment firms provided by NH DES	108
Deleted due to obsolete contact information	8
Did not offer arsenic treatment equipment to private well owners	19
Declined to participate in the survey	10
Postcards sent to firms that could not be reached by telephone	46
Returned postcard and agreed to interview date and time	12
Final survey sample	40

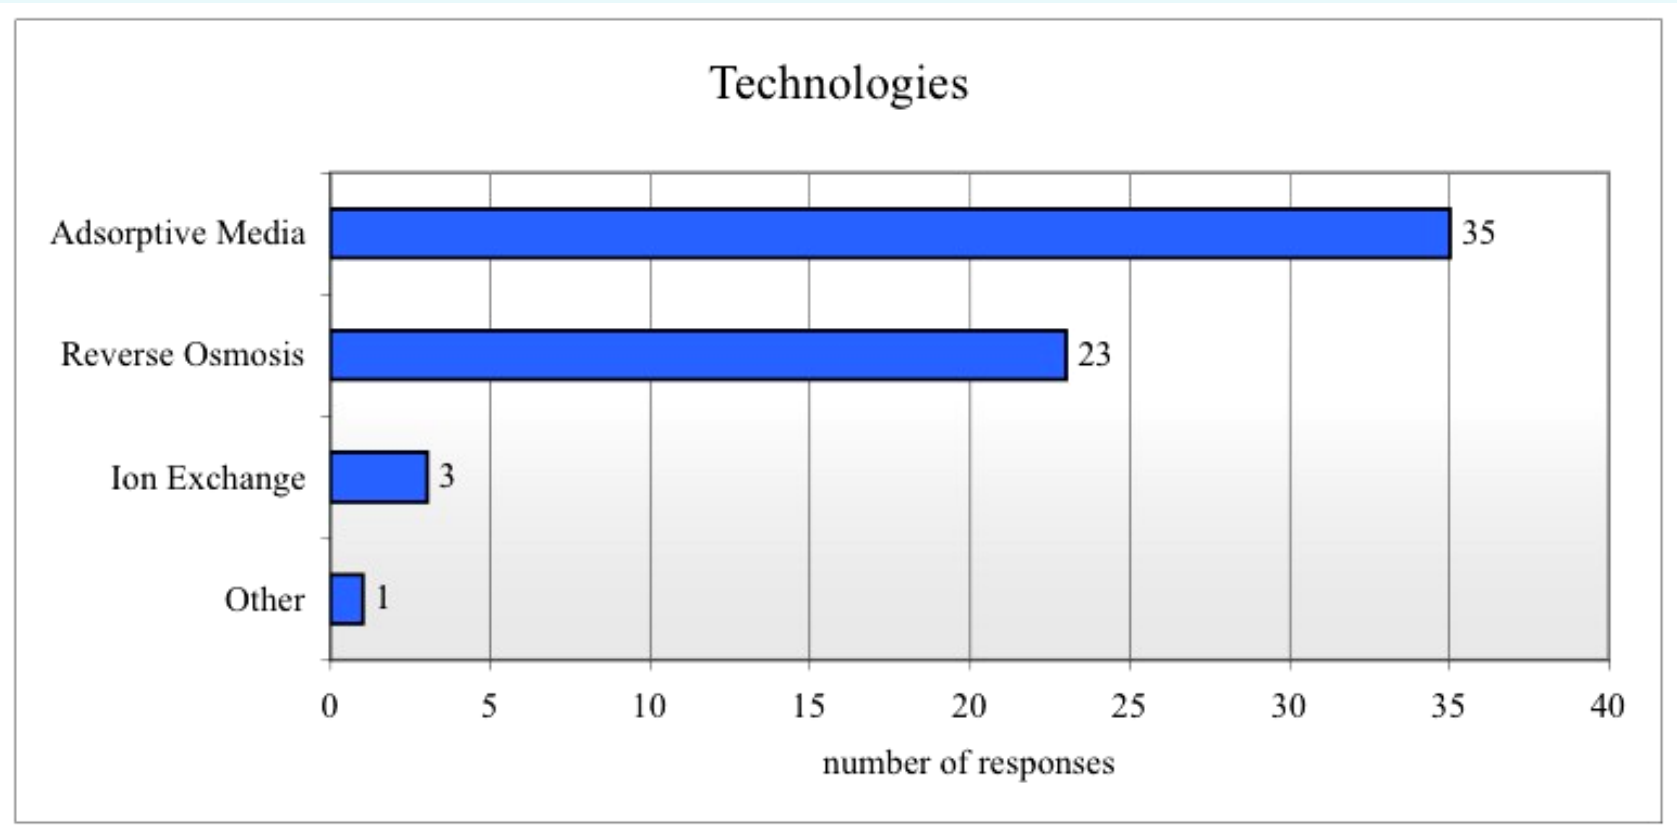

# Survey Findings

- firms have divergent backgrounds and skills
- real estate transactions often trigger the decision to treat
- costs vary enormously
- firms have close relationships with suppliers
- discussing treatment is daunting

# Survey Findings: Treatment Options

# Survey Findings: Treatment Options

# Survey Findings: Disposal of Wastes

How much waste is produced by the systems you install?

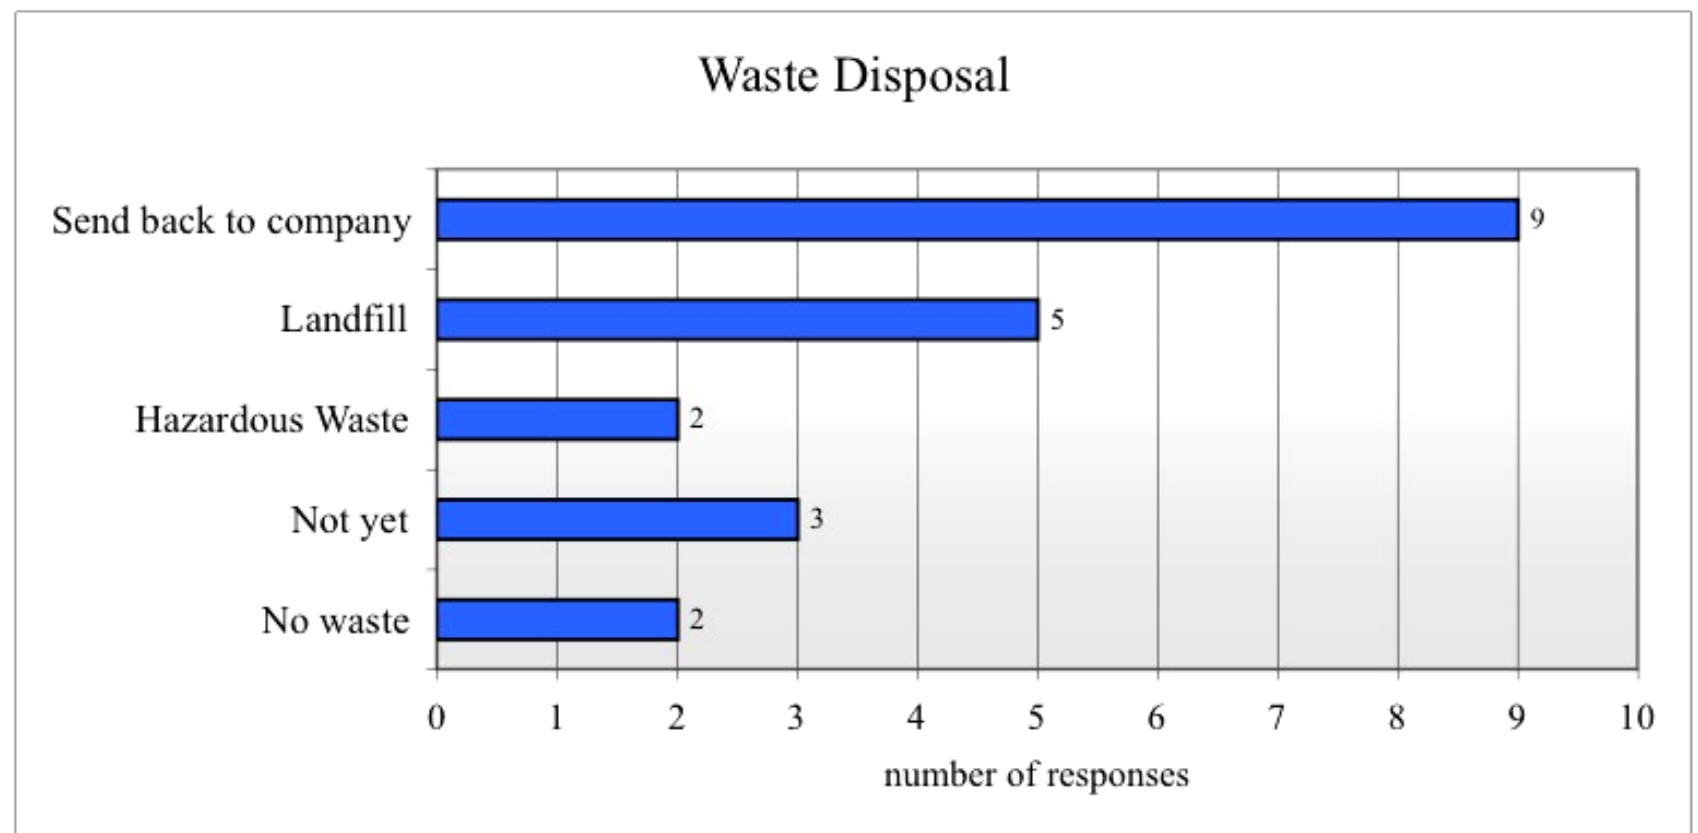

Is this solid waste or wastewater?

Do you know the arsenic concentration of the waste?

How is waste disposed of — municipal landfill or wastewater to septic system?

# Survey Findings: Disposal of Wastes
