

BIOSOLIDS, THE ULTIMATE IN RECYCLING!

HOW WE TREAT WASTEWATER

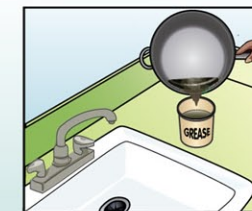

File Name: 0708_BiosolidsPOSTER.ai LPR: D:\NSP\MSRD Visual Communication and GIS Unit Archive

WHAT YOU CAN DO

Only toilet paper and human waste in the toilet.

- Everything else goes in the trash.
- Trash in the plumbing can clog household pipes and sewer lines.

Keep drains clean.

- Only food in the garbage disposal
- Fats, fruit stickers and grease go in the trash can.

Buy smart, use less.

Choose products that:

- do not have "danger" "hazardous" or "toxic" on the label
- are biodegradable
- are safer, more natural alternatives
