

NRC Focus Group Meeting 4/26/00

1. **NUREG 1021 Supplement** *Several items in supplement are a "surprise", such as admin portion of written exam must contain 10 SRO-only questions, use of INPO Exam Bank restrictions, etc. 80-10-10 Question Selection Implementation - how does this interface with use of INPO Exam Bank questions?*
2. **NRC Generic Letter (or similar) to announce NRC acceptance of ACAD 00-003 and to direct revising-out licensing basis references to ANSI N18.1-1971, ANSI 3.1-1981, etc. Also delete experience requirements in NUREG 1021 ES-202.**
3. **Long Term ILO Written Exam (Options 3 and 4)** *See separate comments.*
4. **NUREG 1262 revision/mark-up** *Discussion between group indicates this effort needs to continue. Several items in 1262 are now outdated, inaccurate, etc.*
5. **GFES Exam Administration (either flexibility on administering as needed, or on-demand exam administration)**
6. **Reactivity Manipulations - Status of rule change to allow performance on simulator (LaSalle to pilot via exemption within next few weeks)**
7. **Future 1021 Changes** *What are the ground rules for future revisions to NUREG 1021?*
8. **Requal Issues:**
 - Annual exam is required within a "calendar year" while the biennial exam requirement is stated to be required within 24 calendar months. This poses resource constraints for new licenses and their integration into the requal program.
 - Required manipulation tracking (Denton Letter List) is still vague
 - Remove static exams from NUREG

75 feedback sheets with meaningful information collected

25 - Excellent

12 - Excellent/Good

26 - Good

12 - Fair (in one or more categories)

Topics Selected
